FIRE WEATHER FORECAST

FORECAST NO: 29 SHIFT DATE: Wednesday, Oct 7th, 2020 PREDICTION FOR: 0600-2000 UNIT: OR- Umpqua NF **INCIDENT NAME:** Archie Creek/Thielsen

Incident Meteorologist – Dan Byrd

SIGNED: Dan Byrd

TIME AND DATE FORECAST ISSUED: 2000 hrs. 10/6/20

WEATHER DISCUSSION: High pressure will continue to prevail over the area today with slightly cooler temperatures. Rh's will continue to be low, ranging from the upper teens in the upper elevations to around 30 percent over the western portions of the Archie Creek fire. The ridge will begin to weaken on Thursday, with isolated showers possible by Friday evening, out ahead of a strong Pacific storm system that will move into the region over the weekend. This storm system will produce widespread rainfall into Sunday. High pressure and warmer/drier conditions will return next week.

SKY/WEATHER TODAY): Sunny and slightly cooler. Some Haze/Smoke from other fires.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

2000 FT: (Archie Creek)
5000 FT: (Thielsen)75 to 82 degrees (Down 2-3) / 23 to 33 (Up 2-4%)
69 to 77 degrees (Down 2-3) / 18 to 28 (Up 2-4%)EYE LEVEL WINDS:
Slope/Valley:Down slope/drainage 5 mph, becoming upslope from the south 5-10 mph late morning,
then generally from the west and up drainage 5-10 G15 mph in the afternoon.Ridges:Southwest 4 to 8 G12 mph.

Transport Wind: W 6 mph. **LAL:** 1. **Inversion:** Weak at 1,000ft AGL early.

Chc of Wetting Rain (> or = to 0.25"): 0% Afternoon Mixing Height: 4,000ft AGL.

SKY/WEATHER TONIGHT: Clear skies. Patchy areas of fog possible in Canyons/Valleys.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

2000 FT: (Archie Cre	eek) 52 to 58 degrees (Steady) / 70 to 80% (Up 20%)
5000 FT: (Thielsen)	38 to 45 degrees (Steady) / 60 to 70% (Up 20%)
EYE LEVEL WINDS:	
<u>Ridges:</u>	Southwest 4 to 8 mph.
Slope/Valley:	Up slope and up drainage 4-7 mph early evening, becoming downslope and down drainage 4-8 mph overnight. Southwest 4 to 8 mph.

LAL: 1. Inversion: Strong at 1000ft AGL. Chc of Wetting Rain (> OR = to 0.25"): 0%

2-5 Day Outlook, Thu-Sun (2000 Feet): * Pattern change late in the week, with increasing chances for rain*

Thursday: Partly Cloudy. High Temp: 62-72. Min RH: 35. Wind: Slope Driven. Friday: Mostly Cloudy with a slight chance of showers. High Temp: 61-71 Min RH: 35. Wind: SW 10 G15. Saturday: Cloudy with rain. High Temp: 45-55 Min RH: 75. Wind: SW 10 G20-25. Sunday: Cloudy with light rain. High Temp: 44-54 Min RH: 60. Wind: W 10 G15.

Observations from midnight through 1800 PDT Tuesday, 10/6/20: North Bank (1913ft): Temps 55F/77F, RH: 90%/41%, Pk Wind: NW 10 G13 mph. Little River IRAWS (2100ft): Temps 56F/82F, RH: 76%/32%, Pk Wind: WSW 9 G13 mph. Grandad (2900ft): Temps: 55F/86F, RH: 65%/21%, Pk Wind: SSW 6 G11 mph. Lookout Mtn PRAWS (4739ft): Temps: 62F/77F, 45%/20%, Pk Wind: SSW 2 G3 mph. Cinnamon (4834ft): Temps: 43F/83F, 66%/17%, Pk Wind: WSW 3 G9 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 27	TYPE OF FIRE: Wildland							
FIRE NAME: Archie Creek / Thielsen	OPERATIONAL PERIOD: Oct. 7, 2020							
DATE ISSUED: October 6, 2020	TIME ISSUED: 2000 Hours							
UNIT: Umpqua NF	SIGNED:Don Strand							
	Typed/printed:							
INPUTS								

WEATHER SUMMARY:

See attached forecast

Archie Creek: Temps 75-81, Min RH's 25%, Winds light and variable (Diurnal winds). Thielsen: Temps 73-83, Min RH's 18%, Winds light and variable (Diurnal winds).

OUTPUTS

FIRE BEHAVIOR GENERAL: Fuels have continued to dry due to poor-moderate nighttime humidity recovery on mid and upper slopes along with afternoon low RH's. 1-hour and 10-hour fuels will remain receptive to ignition. **Archie Creek**: During the afternoon, 1-hour fuel moistures minimums will be near 5% unshaded and 10- hour fuels will be near 6%. 1000- hour fuel moistures will continue to be near 14%. ERC-G values will continue to be near 51 today

Thielsen: In the afternoon, 1-hour fuels moistures will be near 5% unshaded, 10-hour fuels moistures will approach 7%, 1000-hour fuel moistures will remain near 16%. ERC-G values will continue to be near 43 today.

Overall, fire behavior will be minimal today although in places there will be limited smoldering and creeping. Some open flame may be present in larger down logs, old stumps, snags and in recent needle cast. As a result of slightly lower RH's, areas of dirty burn likely to experience creeping fire behavior with some open flame at times. In the event the fire has positioned itself below-down slope of heat-treated ladder fuels, slight chance for flare ups exist.

If fire starts outside containment lines, expect moderate rates of spread with potential for isolated torching.

Rate of spread and flame lengths are model outputs based on maximum values for the fuel models shown, with current fuel moistures in exposed locations on steep slope.

Fuel Model	Rate of Spread	Flame Length
Grass/Shrub (GS2)	8 chains/hour 9 feet/min	3 feet
Mature Timber (TU2 & TL5)	4 chains/hour 5feet/min	< 2 feet

In one hour, a spot fire would be approximately 1.4 acres in timber and 4 acres in grass/shrub. Probability of Ignition = 55%

AIR OPERATIONS: Light smokey haze today

SAFETY

Local Thresholds for Elevated Fire Behavior – Watch Outs - 20-foot winds> 13 mph, RH under 25%, Temperature over 85°, 1000-hour fuel moisture < 12%.

• Today on Archie Creek and Thielsen fires will meet RH thresholds in some locations.

Continue to watch for fire weakened trees and snags burning through and falling.

On steeper slopes, watch for rollouts.

With the days becoming shorter (losing 3 minutes/day), there's still potential in the right conditions for an increase of fire activity during the afternoon.

Safety Message

7 October 2020

INCIDENT: Archie Creek/Thielsen

OPERATIONAL PERIOD: 0700-1800

TOPICS:

MEDICAL RESOURCES

Take some time to familiarize yourself with medical resources on your division along with location and travel routes. Division Supervisors may move resources based on evolving or increased risk. Preplan actions needed should an issue arise within or near your work area.

PROPER MINDSET

A fixed mental attitude or disposition that predetermines a person's responses to and interpretations of situations.

What is the Mission at Archie Creek/Thielsen? While we had a quick ramp up to a month-long fire season, we are now well on the decline. Our mission here is repair and salvage, not firefighting. Change your focus to the tasks associated with such a mission and realize this is not a sprint, but rather a slow and methodical marathon. Proper mindset is key to an effective and safe operation.

"Don't forget your COVID protocols and mitigations"

Deliberate Risk Assessment-Hazard Summary 7 October 2020

Hazard	Mitigation	Post Risk
COVID Viral Transmission	Maintain awareness of health, perform self checks, maintain social distancing, wear face covering when within social distancing space (minimum 6'), report and isolate if not feeling well, implement Module of One and Hub/Spoke criteria to greatest extent possible, establish relationship with local public health, establish a schedule to clean all frequently touched surfaces, maintain cleanliness of own workspace, box meals by crew (no more than 20), single person distribution for meals and hub/space).	Low
Extraction Time	 hydration (24 hour supply of hydration each day supplied with breakfast) Identify medivac sites and helispots. Initiate ground transport to accident site. Identify EMT's from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize short haul in remote areas. Evaluate on-going need for repositioning medical personnel. 	High
Steep Terrain/Gravity	Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes. Establish LCES.	Moderate
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	Moderate
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Locate dumpsters/trash, food and feeding areas away from sleeping and assembly areas.	Moderate
Snags	Conduct on-going risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 22). Ensure use of protective equipment.	High
Transportation	Signing of all incident roads that provide access to divisions. Daily updated travel plan maps. In local communities obey the posted speed limits. Use reader boards to control entry as needed. Identify and evaluate contingency and alternate escape and travel routes, implement controls as needed. Practice defensive driving. Maintain an awareness of wildlife, rock fall and heavy truck traffic. Reduce speed and increase following distance as needed.	High
Aircraft	Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary radio channel. Reference IRPG (Safe aircraft operations pg. 56-58). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	High
Public Interaction	Implement road and area closures in and adjacent to the perimeter.	Moderate
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment. Familiarize crews with specialty equipment and processes.	High

Suppression Repair 101 Constructing Effective Waterbars

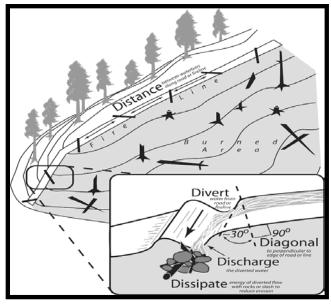

Who doesn't love Suppression Repair? Admittedly, it might not be as exciting as initial attack, but the reality is it is extremely important – our actions during the repair stage set the areas impacted by suppression efforts on a trajectory to heal more quickly than if left alone. Sure, nature is pretty good at healing from all sorts of disturbance, but our actions act like a catalyst....we can help speed up the recovery.

One of the most crucial things we do during Suppression Repair is construct waterbars on firelines. The purpose of a water bar is to slow water down as it travels downhill. When constructed correctly, waterbars help reduce rilling, excessive erosion, and mitigate sediment transfer to streams and rivers.

There are two types of waterbars; effective and ineffective. An effective waterbar has 5 main characteristics (see Figure 1);

- Distance distance between waterbars is adequate for the slope not to close, and not to far apart.
- Divert the waterbar is effectively anchored into the uphill side so that water is funneled into the waterbar, and not over the top of the waterbar berm.
- Diagonal the waterbar angle does not exceed 45 degrees waterbars exceeding 45 degrees will not slow the water down.
- Discharge the waterbar is deep enough to ensure there are no barriers, and the water is effectively delivered to the green filter at the end of the waterbar.
- Dissipate the water is dissipated, or filtered, through the green filter at the end of the waterbar. This slows the runoff down and reduces erosion resulting from the energy flow of moving water.

DEMOB INSTRUCTIONS

In the COVID-19 environment we are limiting direct contact where possible including within the demob process.

As such, much of the process will be completed via cellphone. Please wear a <u>face covering</u> during any in person interaction.

Demob steps for all resources (must be done in order):

- Any resources that were off pavement must go through weed wash. Location @ Thielsen Fire = Diamond Lake Camp. Location @ Archie Creek Fire = ICP.
- 2. Check out with **Ground Support** at either camp.
- 3. Turn in any radios to the **Communications Unit** and checked out supplies to the **Supply Unit** at either camp.
- 4. Call Demob Unit @ 541-887-0815
- 5. Call **Finance** @ 509-949-3210 or 360-601-8820

If you follow this process you will be made available in the ordering system faster for your next assignment

Any questions about the process please contact the Demob Unit at 541-887-0815.

Thank you and safe travels!

Good morning everyone...

It is time to check in and find out how everyone is doing on this fire assignment. We realize many of you have been out on fires for a long time. You have spent some long days on this assignment and have completed a lot of hard work. This has already been a long fire season and it looks like there are many more weeks of hard work ahead for all, so we felt a check in was appropriate today. We also transferred command yesterday, so we want to make sure we have open lines of communication with everyone.

Given the size and complexity of these fires, we find ourselves spread out over many miles and in different camps. Not the best situation for many of us but one that we are dealing with now. We are also looking at cooler, wetter weather coming by the end of the week. Yes, rain and possibly snow in the higher elevations. We will get the rain down here at the ICP and you all may get rain and snow in your camp. Our Logistics folks have ordered extra sleeping bags and are looking at additional ways to make your living accommodations better during this inclement weather. We also ordered better weather, but that order was backlogged. Go figure.

In checking in with you, we also wanted to ask if you are checking in with your family. It is important to reach out to the folks back home and let them know that you are doing well and share with them your work experiences. Folks like to know how our day went and they too like to share their day's experiences. So, if you have not called home in a while, maybe take a moment today and check in with family and friends. Given the current situation with all the fires in the pacific northwest, family members are probably concerned with your safety. A reassuring call back home goes a long way in easing everyone's stress.

The work you have done and the work you are doing today is good work and appreciated by the Agencies, Community, and the Fire Teams involved with these fires. Keep up the good work. Take care of yourselves and each other. Stay warm and keep dry. Take the necessary breaks needed to battle fatigue. We consider everyone working with our team, part of our team. We are all in this together...Everyone is doing their part, and Everyone is Appreciated.

Thank you again for all the good work accomplished and have a safe day. If you have any questions or concerns, please let me know. I am at the ICP and I can be reached by phone, text, or email.

Susie Manezes, Human Resource Specialist PNW Team 12 – Contact: 602-571-9327 Located at the Incident Command Post (ICP) Glide, OR. <u>smanezes@blm.gov</u>

Union Contact Information

For NFFE Bargaining Unit Employees of the Forest Service As of September 18, 2020

Union Representative(s):	PRIMARY: Linda M. Spencer	SECONDARY: Erin Kidwell
Title:	Chief Steward for Umpqua BU	R6 FS Council VP
E-mail:	linda.m.spencer@usda.gov	erin.kidwell@usda.gov
Phone:	541-825-3163	971-333-4091

Notice of Right to Representation

As a bargaining unit employee represented by a labor organization, you have the right to request representation from your certified labor organization at any investigative examination/interview where you reasonably believe the examination might result in disciplinary action being taken against you. You may make this request at any time prior to or during the interview. If you request union representation, your agency may opt to: (1) suspend questioning and grant your request then resume the interview; (2) discontinue the interview; or (3) offer you the choice to proceed with the interview without a Union representative or to forego the interview.

Clarification about the Above Notice

If a management representative wants to question you (a bargaining unit employee) about an allegation that you were involved in some occurrence that could result in a proposal to discipline you, Union believes it is in your interest to have a Union representative present when you are questioned. *You have to invoke that right by asking for representation*. *Management is not obligated to inform you of this right, and they are not obligated to automatically arrange for a Union representative to be present.* In the event that you request representative listed above, and arrangements will be made for that representative or his designee to come out on site, or to meet with you by telephone.

NOTE: These email addresses are used for both Thielsen and Archie Creek Fires.

Created by: B Kirk Date Created: 10/5/2020 8:23:42 PM

Incident Maps

Maps are not included in the IAP document due to size and page count. For detailed Operations, Transportation and other maps, scan the QR code (or click the link below it) for your fire:

```
Archie Creek (click to open)
```

Thielsen (click to open)

Send Map Updates

Send map updates by email to the Situation Unit email address for your fire:

Archie Creek: 2020.archiecreek.situation@firenet.gov

Thielsen: 2020.thielsen.situation@firenet.gov

Alternately, text/call the Situation Unit at 360-584-3373. Make sure to include your name, position and explanation of the update you send.

How to correctly send data from Avenza:

- 1. Open the map in Avenza.
- 2. Click the pin with three lines near the lower-right corner.
- 3. *iPhone:* In the lower right, click the square with up arrow. From the pop-up menu, choose Export to Others.

Android: In the lower right, click the circle with three lines. Click the pop-up circle with up arrow.

- 4. Set these options:
 - a. Filename leave alone
 - Export Format choose SHP, GPX or KML

- c. Data all features
- d. Image size no image
- 5. Click the Export button in the upperright corner.
- 6. When the export is ready, choose your Mail application.
- 7. Send the email to the address for your fire.
- 8. Your email needs to include your name and position
- Your email needs to include an explanation of the data you are sending.

REQUIRED BY ALL PERSONNEL: COVID-19 DAILY CHECKLIST

Supervisors are required to go over this list each morning with assigned resources. Please make a notation in the remarks section on your daily Crew Time Report documenting your daily health assessment check.

Self-Awareness / Screening

□ Notify supervisor if you or others experience:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches

- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea
- Have you had close contact within the last 14-days with someone who is currently sick with confirmed COVID-19? (Note: Close contact is defined as within 6 feet for more than 15 minutes per CDC Guidelines)

 Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel: Contact line EMT or COVID Module personnel for next steps.

Covid-19 Prevention and Mitigation Measures

□ Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.

Avoid handshakes and communal use items.

□ Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.

Disinfect high touch surfaces often: Radios, phones, doors, pumps, fuel cans, etc.

Camps will work off a "restricted camp" principle. Once you are checked into the incident, your ability to restock personal items may be limited.

Social Distancing and Protective Equipment

□ Initiate, practice, and remind others of social distancing.

□ Conduct briefings and conversations outdoors and at least 6 feet apart.

□ Remain 6 feet apart while waiting in line for meals or showers

□ Utilize face coverings indoors at all times and outdoors when you are less than 6 feet apart from others.

□ Clean or replace dirty face coverings, equipment, and PPE.

Communications

□ Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

COVID-19 MITIGATIONS FOR ARCHIE CREEK FIRE

- Masks must be worn at all times in base camp, spike camp and ICP.
- Modules (e.g. crews, engines) should send representatives to pick up meals for the entire group: 1 person for engine crews, 3-4 people for 20 person crews.
- Join morning briefing via phone (number provided in IAP)
- Observe 6-foot social distancing during briefings and while standing in line for meals, and any other time you are near people outside of your module.
- Limit contact between firefighters and the public as much as possible, use crew representatives to pick up supplies, fuel, etc.

WEAR YOUR MASK WASH YOUR HANDS WATCH YOUR DISTANCE

EMERGENCY PLAN

INCIDENT WITHIN AN INCIDENT

ON SCENE SUPERVISOR

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment and Transportation.

- Conduct size-up of the incident (nature of accident, number type of resources involved, latitude and longitude location); notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency; coordinate with incident communications and air attack for air medical transportation needs
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.
- ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED.
