FIRE WEATHER FORECAST

FORECAST NO: 31

SHIFT DATE: Friday, Oct 9th, 2020 PREDICTION FOR: 0600-2000

UNIT: OR- Umpqua NF

Incident Meteorologist – Dan Byrd

INCIDENT NAME: Archie Creek/Thielsen

SIGNED: Dan Byrd

TIME AND DATE

FORECAST ISSUED: 2000 hrs. 10/8/20

<u>WEATHER DISCUSSION:</u> Clouds will be on the increase today, out ahead of a strong Pacific storm system that will move into the region over the weekend. Rain will move into the area early Saturday morning and this will continue into Saturday night. Light snow may mix in Saturday night at higher elevations, with snow levels falling to around 5800 feet. Occasional light rain will continue into Sunday, but snow levels will rise to around 7000 feet Sunday afternoon. Rain accumulations will range from 1 to 1.5 inches through Sunday. Light rain showers will continue to be possible on Monday and Tuesday with high temperatures warming into the low 70s by Tuesday afternoon.

SKY/WEATHER TODAY): Partly becoming mostly cloudy. Areas of fog early, lifting by 10-11 am.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

2000 FT: (Archie Creek) 70 to 75 degrees (Up 2) / 28 to 34 (Down 2-3) **5000 FT: (Thielsen)** 65 to 70 degrees (Steady) / 22 to 28 (Steady)

EYE LEVEL WINDS:

Slope/Valley: Down slope/drainage 5 mph, becoming upslope from the south 5-10 mph late morning,

then generally from the west and up drainage 8-12 G20 mph in the afternoon.

Ridges: Southwest 8 to 12 G18 mph.

Transport Wind: SW 10 mph.

LAL: 1. Chc of Wetting Rain (> or = to 0.25"): 0% Afternoon Mixing Height: 4,000ft AGL.

SKY/WEATHER TONIGHT: Cloudy with rain moving in by early Saturday morning.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

2000 FT: (Archie Creek) 47 to 53 degrees (Down 3-5) / 80 to 90% (Up 20%) **5000 FT: (Thielsen)** 33 to 40 degrees (Down 1-3) / 50 to 60% (Steady)

EYE LEVEL WINDS:

Slope/Valley: Southwest 8-12 G20. Ridges: Southwest 10-15 G 25.

LAL: 1. Che of Wetting Rain (> OR = to 0.25"): 20%

Inversion: Weak at 1000ft AGL.

2-5 Day Outlook, Sat-Tue (2000 Feet): * Pacific storm system bringing rain this weekend, warmup next week*

Saturday: Cloudy with rain, slight chance of a thunderstorm. High Temp: 49-56 Min RH: 75. Wind: SW 10 G20-25.

Sunday: Cloudy with occasional light rain. **High Temp**: 52-58 **Min RH**: 60. **Wind**: W 10 G20. **Monday**: Cloudy with a chance of light rain. **High Temp**: 61-66 **Min RH**: 50. **Wind**: W 10 G15.

Tuesday: Cloudy with a chance of rain showers. High Temp: 67-72 Min RH: 50. Wind: WSW 10 G15-20.

Observations from midnight through 1800 PDT Thursday, 10/8/20:

North Bank (1913ft): Temps 49F/71F, RH: 98%/50%, Pk Wind: NW 9 G14 mph.

Little River ÌRAWŚ (2100ft): Temps 51F/73F, RH: 77%/44%, Pk Wind: WSW 8 G13 mph.

Grandad (2900ft): Temps: 48F/75F, RH: 79%/29%, Pk Wind: SW 7 G12 mph.

Lookout Mtn PRAWS (4739ft): Temps: 53F/66F, 67%/33%, Pk Wind: WNW 2 G6 mph.

Cinnamon (4834ft): Temps: 35F/71F, 87%/22%, Pk Wind: WSW 5 G11 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 29	TYPE OF FIRE: Wildland
FIRE NAME: Archie Creek / Thielsen	OPERATIONAL PERIOD: Oct. 9, 2020
DATE ISSUED: October 8, 2020	TIME ISSUED: 2000 Hours
UNIT: Umpqua NF	SIGNED:Don Strand
	Typed/printed:

INPUTS

WEATHER SUMMARY:

See attached forecast

Archie Creek: Temps 70-75, Min RH's 28-34%, Winds-afternoon upslope/updrainage winds 8-12 with gusts to 20 mph. Thielsen: Temps 65-70, Min RH's 22-28%, Winds- afternoon upslope/updrainage winds 8-12 with gusts to 20 mph

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuels moistures in the 1-hour and 10-hour fuels today will be similar to yesterday. Those fuels will still be receptive to ignition. The trend is for increasing fuel moisture beginning Saturday.

Archie Creek: During the afternoon, forecasted 1-hour fuel moistures minimums will be near 6% unshaded and 10- hour fuels will be near 10%. 1000- hour fuel moistures will continue to be near 14%. ERC-G values will be near 46 today, down 4 from yesterday.

Thielsen: In the afternoon, forecasted 1-hour fuels moistures will be near 6% unshaded, 10-hour fuels moistures will approach 9%, 1000-hour fuel moistures will remain near 16%. ERC-G values will continue be near 43 today.

Overall, fire behavior will be minimal today although in places there will be limited smoldering and creeping. Some open flame may be present in larger down logs, old stumps, snags and in recent needle cast. Areas of dirty burn likely to experience minimal creeping fire behavior with some open flame at times. In the event the fire has positioned itself below-down slope of heat-treated ladder fuels, slight chance for flare ups exist.

In areas where wind/slope alignment exists or on exposed ridges, afternoon southwest gusty winds could contribute to a slight increase of fire behavior where surface are available as compared to yesterday.

If fire starts outside containment lines, expect moderate rates of spread with potential for isolated torching.

Rate of spread and flame lengths are model outputs based on maximum values for the fuel models shown, with current fuel moistures in exposed locations on steep slope.

Fuel Model	Rate of Spread	Flame Length
Grass/Shrub (GS2)	7 chains/hour 8 feet/min	3 feet
Mature Timber (TU2 & TL5)	3 chains/hour 3 feet/min	< 2 feet

In one hour, spot fire size would approach 1 acre in timber and 3 acres in grass/shrub. Probability of Ignition = 54%

AIR OPERATIONS: Light smokey haze today

SAFETY

In areas with wind/slope alignment or on exposed ridges, afternoon southwest gusty winds may contribute to fire weakened trees and snags falling.

When falling hazard trees with live or dead needles, potential for flare ups exist if they land on a hot spot.

Safety Message

9 October 2020

INCIDENT: Archie Creek/Thielsen OPERATIONAL PERIOD: 0700-1900

TOPICS:

DRIVING/TRANSPORTATION

<u>Continually evaluate road and work areas for weather impacts. Set MAP's to disengage before conditions become unsafe.</u>

Practice defensive driving skills and maintain time and distance from other vehicles and visual obstructions such as curves and blind spots. Be aware of debris fall and logs along the right-of-way. Keep your speeds low and take your time.

COOLER/WETTER WEATHER

Cool and wet weather is on the way. Significant rainfall is forecasted for the weekend. Take steps to stay warm and dry and prepare your camp for extended wet weather.

COMMON BARRIERS TO EFFECTIVE COMMUNICATION PART 2

Lack of focus. You cannot communicate effectively when you're multitasking. If you are checking your phone, planning what you're going to say next, or daydreaming you're almost certain to miss nonverbal cues in the conversation. To communicate effectively, you need to avoid distractions and stay focused.

"Don't forget your COVID protocols and mitigations"

Deliberate Risk Assessment-Hazard Summary 9 October 2020

Hazard	Mitigation	Post Risk
COVID Viral Transmission	Maintain awareness of health, perform self-checks, maintain social distancing, wear face covering when within social distancing space (minimum 6'), report and isolate if not feeling well, implement Module of One and Hub/Spoke criteria to greatest extent possible, establish relationship with local public health, establish a schedule to clean all frequently touched surfaces, maintain cleanliness of own workspace, box meals by crew (no more than 20), single person distribution for meals and	Low
Extraction Time	hydration (24 hour supply of hydration each day supplied with breakfast) Identify medivac sites and helispots. Initiate ground transport to accident site. Identify EMT's from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize short haul in remote areas. Evaluate on-going need for repositioning medical personnel.	High
Steep Terrain/Gravity	Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes. Establish LCES.	Moderate
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	Moderate
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Locate dumpsters/trash, food and feeding areas away from sleeping and assembly areas. Establish work windows during periods of heavy rainfall and/or cold weather conditions. Evaluate transportation routes for washout and debris fall potential and establish MAP for disengagement.	Moderate
Snags/Falling	Conduct on-going risk analysis of all work areas. Use mechanized falling to the greatest extent possible. Avoid use of agency personnel for hand falling. Follow Hazard Tree Safety Guidelines (IRPG page 22). Ensure use of protective equipment. Use qualified personnel for danger tree identification.	High
Transportation	Signing of all incident roads that provide access to divisions. Daily updated travel plan maps. In local communities obey the posted speed limits. Use reader boards to control entry as needed. Identify and evaluate contingency and alternate escape and travel routes, implement controls as needed. Practice defensive driving. Maintain an awareness of wildlife, rock fall and heavy truck traffic. Reduce speed and increase following distance as needed.	High
Aircraft	Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary radio channel. Reference IRPG (Safe aircraft operations pg. 56-58). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	High
Public Interaction	Implement road and area closures in and adjacent to the perimeter.	Moderate
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment. Familiarize crews with specialty equipment and processes.	High

6. Control Operations/Work Assignmen									

<u>Task:</u> Utilize qualified READ to identify burned and scorched danger trees. Cut, process, remove and sort danger trees that could threaten the 4711 Road (see Archie Creek and Thielsen Danger tree falling specifications). Utilize mechanized equipment to limit exposure to falling and bucking hazards. Use hand falling and bucking only as needed. Transport merchantable material to designated storage areas. Transport non-merchantable material to designated areas for chipping and storage.

Purpose: Remove danger trees that could potentially threaten the 4711 Road travel corridor. Prepare and store merchantable logs for disposal. Remove and chip resulting slash to reduce future fire hazard potential.

End State: Danger trees are identified by qualified READs and removed based on Archie Creek Fire Repair Plan. Merchantable material is available for disposal and slash hazard is reduced.

7. Special Instructions:

O-313 FMOD C&K Wildland Fire on R&R 10/8-10/10, will return to the Division on 10/11.

Chinook Salmon – providing sustinance through the ages

Chinook salmon (also known as king salmon) and the Oregon Coast Coho Salmon, are the two salmonid species present in the Umpqua River. Chinook salmon are a key component of this region's past, present, and will likely hold a prominent spot in the future. At a glance, here are a few facts about this important fish;

- The Chinook is the biggest of all of the Pacific salmons, growing as long as 53 inches and weighing as much as 126 pounds.
- Its Pacific Ocean habitat ranges all the way from Southern California to the Canadian Arctic.
- The king salmon is born in freshwater, migrates to the ocean during the second year of its life, and swims back to freshwater by the age of seven years to spawn and then die.
- In Oregon, the Chinook salmon provides sportfishing both in rivers and the ocean.
- The Chinook salmon is also a major part of commercial fishing operations in Oregon.
- For the coastal Native Americans who originally inhabited Oregon, salmon served as the basis of life. They placed the salmon in very high esteem, holding special rites around the coming of the salmon and the spearing and roasting of the fish.
- Chinook salmon make their spawning migrations during the spring, summer, and fall.
- In Oregon, the biggest runs happen in the Rogue, Umpqua, and Columbia rivers and the larger coastal streams.
- While swimming for up to 60 days from the ocean to their home streams, salmon do not feed and their stored body materials gradually dissipate.
- Upon reaching home again, the female salmon deposits up to 14,000 eggs in gravel nests, where newly hatched youngsters then live for several weeks.
- Young salmon consume plankton and later insects while in the streams, before moving on to creatures like herring, squid, pilchard, and crustaceans in the ocean habitat, reported State Symbols USA.
- Even today, salmon remain an important source of food for humans, who eat the meat fresh, frozen, canned, or smoked.

Spring Chinook are spawning in Rock Creek and the North Umpqua right now!

Archie Creek and Thielsen Danger Tree Felling Specifications

For the safety of firefighters ingress and egress to patrol and manage suppression response work on the Archie Creek Fire dead and dying trees along the identified priority roads need to be felled and removed (in some cases). The following is a draft prescription of the danger tree mitigation treatment:

- All dead trees along the prioritized roads that are at risk to hit the road need to be felled
 consistent with the Region 6 Danger Tree Identification document. Additionally, any trees with
 combinations of scorched and live crowns need to be evaluated by a person certified in danger
 tree identification for potential felling utilizing the criteria established in Smith and Cluck (2011).
- Do not cut live green trees with intact crowns.
- For tree removal, any danger tree that is felled and hits the road should be limbed and decked. Most limbs that break off within 40-75 ft of the edge of the road prism should be piled or chipped on uphill slopes adjacent to the roads.
- On steep slopes above the road, fell all danger trees within 1 ½ tree lengths. On steep slopes, where professional judgement identifies a likelihood that a tree will slide onto the road, consider removing the tree and all limbs within 40-75 ft of the road. If the tree cannot be safely pulled to the road, consider contour falling where appropriate and safe.
- For slash created by fallen trees, pile along roadsides in consultation with READs.
- Only yard trees to the road outside of riparian areas or areas where removal could cause slope erosion concerns.
- For Incense and Western Red Cedar with green needles, evaluate root scorch, if 50% or greater, consider felling for safety in consultation with READs.
- For slopes below the road, only fall dead trees that have the potential to hit the road. Only remove such trees if they hit the road and can be removed without causing resource damage.
- If for safety reasons, an area cannot be treated with danger tree felling operations, please map the area, and share it with the lead Resource Advisor for mapping purposes.

Slash Specifications

- Remove slash created by danger tree felling within 40' of edge of the road.
- Where possible, prefer to haul and chip slash rather than piling.
- Where not possible to haul, chipping into stands is preferred before piling. Don't chip to a depth greater than one foot. Where possible, shoot chips to the downhill side of the road.
- Where not possible, pile slash alongside roads in coordination with READs to avoid sensitive areas and culverts.
- When building slash piles, size is not a concern, but ensure they are at a sufficient distance from live trees to avoid killing the trees when the pile is burned.
- Cover all piles with plastic sufficiently to allow for the interior of pile to remain dry over winter.

Weed Wash!!

The weed wash stations are still up and running! The objective, is to complete suppression repair and minimize damage to the natural resources. Thank you for your continued vigilance in helping us achieve that objective!

There is a weed wash located at the Archie Creek ICP and at the Thielsen Spike camp.

 Stay tuned for an update on location for the Archie ICP weed wash – it may get moved before the weekend (10/10 and 10/11) is over.

PLEASE wash your vehicles during the following situations;

- Prior to demob....DO NOT take our weeds home with you!
- Whenever logistically possible, wash equipment/vehicles prior to moving from the BLM/Private checkerboard to Forest Serviceadministered lands.

If you are just arriving to the Archie Creek or Thielsen Fire, take all vehicles through the weed wash before entering the fire areas.

To review, please wash your vehicle / equipment upon:

- 1. Initial mobilization into camp;
- 2. Final demobilization;
- 3. Moving from BLM to FS;
- 4. As often as possible!

*Federal agencies and private industry spend thousands of dollars a year in the fight against noxious weeds as they spread from the valleys (or other infested areas) into un-infested Public Lands and plantations. Prevention is by far the most effective proactive weapon we have; it saves taxpayer dollars, and all it takes is a little extra time.

DEMOB INSTRUCTIONS

In the COVID-19 environment we are limiting direct contact where possible including within the demob process.

As such, much of the process will be completed via cellphone. Please wear a <u>face covering</u> during any in person interaction.

Demob steps for all resources (must be done in order):

- Any resources that were off pavement must go through weed wash. Location @ Thielsen Fire = Diamond Lake Camp. Location @ Archie Creek Fire = ICP.
- 2. Check out with **Ground Support** at either camp.
- 3. Turn in any radios to the **Communications Unit** and checked out supplies to the **Supply Unit** at either camp.
- 4. Call **Demob Unit** @ 541-887-0815
- 5. Call **Finance** @ 509-949-3210 or 360-601-8820
- 6. Scan this QR code and review the information on COVID.

If you follow this process you will be made available in the ordering system faster for your next assignment.

Any questions about the process please contact the Demob Unit at 541-887-0815.

Thank you and safe travels!

COVID Mitigated Check In Process....

With the many changes due to COVID, efforts are being made to keep our resources (you!) safe by social distancing. Although our process has changed, we are still here for you... The Team is attempting to make the check-in process as easy as possible, however the need to rely on technology can be a challenge at times. If at any time you run into issues or have questions, please call the assisted check-in desk at **425-324-1367** between **0600 - 2100**.

The Process:

Step 1: Ground Support Inspection

 Non-Agency Resources Only (includes contract crews, equipment and overhead) need to report to Ground Support at Archie Creek ICP for inspection prior to engaging in the incident.

Step 2: Fill out the Virtual Check-In Form (Use the option below that works best for you)

• Option 1: Use your smart phone or tablet to Scan the QR code. In most cases, your phone camera will successfully scan the code and take you to the virtual form.

- Option 2: Open your internet browser (from your phone, tablet or computer) and type the following in the address bar https://bit.ly/2SHj9bD
- Option 3: For on-site check in, please call 425-324-1367 an iPad can be provided for you to complete the Check-In process.
- Option 4: If you can't complete any of the above methods of accessing the form or for any check-in issues, please call 425-324-1367.

Step 3: Provide Supplemental Check-In Information (either email or text documents)

- Please provide the following documents:
 - Crews crew manifest with vehicle information, red cards
 - Equipment crew manifest (if information is not provided in check-in form), red/blue card(s)
 - Overhead –red card
- Methods to provide documents:
 - Email documents to <u>2020.archiecreek.resources@firenet.gov</u>
 - Text documents to 425-324-1367

Step 4: Determine Your Reporting Location

- **Fireline resources** pick up an IAP from Check-in, then call Matt in Operations at 509-630-8033.
- **Other resources** if you're unsure where to report, call Check-In for assistance at 425-324-1367.

Human Resource Message – Archie Creek/Thielson Fires October 9, 2020

MUTUAL RESPECT

Good Morning Everyone: Today's HR message is on mutual respect. I found that respect is mandatory when dealing with colleagues, employees, family, and friends. It keeps conversations civil and lets people genuinely work together towards common goals and objectives. Such as our goals and objectives for this fire assignment.

Respect is defined as having high or special regard. It also refers to a "state of being esteemed." Respect is tied to what a particular individual expects and how they make the other person feel.

So, given the variables, how can we create an environment that is one of respect? Well, it begins by listening, soliciting opinions, airing concerns, taking suggestions seriously when warranted and possible, and keeping an open mind and ear. Respect is a two-way street and cannot be one sided.

When we are uncivil or disrespectful to one another relationships and morale deteriorate. Keep in mind, we are all human and we do have bad days. Sometimes our bad moods spill over into the workplace, and negative attitudes towards others, especially if it crosses into personal insults or derisive comments, have a demoralizing effect. So, we each have a responsibility when it comes to mutual respect. Respect is a two-way street with room in each lane for others to pass by safely. Bottom line...respect will counter the culture of incivility.

I respectfully wish you all a safe and productive day!

Susie Manezes, Human Resource Specialist PNW Team 12 – Contact: 602-571-9327 Located at the Incident Command Post (ICP) Glide, OR. smanezes@blm.gov

Maps are not included in the IAP document due to size and page count. For detailed Operations, Transportation and other maps, scan the QR code (or click the link below it) for your fire:

Archie Creek (click to open)

Thielsen (click to open)

Send Map Updates

Send map updates by email to the Situation Unit email address for your fire:

Archie Creek: 2020.archiecreek.situation@firenet.gov

Thielsen: 2020.thielsen.situation@firenet.gov

Alternately, text/call the Situation Unit at 360-584-3373. Make sure to include your name, position and explanation of the update you send.

How to correctly send data from Avenza:

- 1. Open the map in Avenza.
- 2. Click the pin with three lines near the lower-right corner.
- 3. *iPhone:* In the lower right, click the square with up arrow. From the pop-up menu, choose Export to Others.

Android: In the lower right, click the circle with three lines. Click the pop-up circle with up arrow.

- 4. Set these options:
 - a. Filename leave alone
 - Export Format choose SHP, GPX or KML

- c. Data all features
- d. Image size no image
- 5. Click the Export button in the upperright corner.
- 6. When the export is ready, choose your Mail application.
- 7. Send the email to the address for your fire.
- 8. Your email needs to include your name and position
- Your email needs to include an explanation of the data you are sending.

REQUIRED BY ALL PERSONNEL: COVID-19 DAILY CHECKLIST

Supervisors are required to go over this list each morning with assigned resources. Please make a notation in the remarks section on your daily Crew Time Report documenting your daily health assessment check.

Self-Awareness / Screening

- □ Notify supervisor if you or others experience:
 - Fever or chills
 - Cough
 - Shortness of breath or difficulty breathing
 - Fatigue
 - Muscle or body aches

- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea
- Have you had close contact within the last 14-days with someone who is currently sick with confirmed COVID-19? (Note: Close contact is defined as within 6 feet for more than 15 minutes per CDC Guidelines)
- □ Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel: Contact line EMT or COVID Module personnel for next steps.
 - Masks must be worn at all times in base camp, spike camp and ICP.
 - Modules (e.g. crews, engines) should send representatives to pick up meals for the entire group: 1 person for engine crews, 3-4 people for 20 person crews.
 - Join morning briefing via phone (number provided in IAP)
 - Observe 6-foot social distancing during briefings and while standing in line for meals, and any other time you are near people outside of your module.
 - Limit contact between firefighters and the public as much as possible, use crew representatives to pick up supplies, fuel, etc.

EMERGENCY PLAN

INCIDENT WITHIN AN INCIDENT

ON SCENE SUPERVISOR

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment and Transportation.

- Conduct size-up of the incident (nature of accident, number type of resources involved, latitude and longitude location); notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency; coordinate with incident communications and air attack for air medical transportation needs
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.
- ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

١.	CONTACT COMMUNICATIONS	/ DISPATCH (Verif	v correct free	uency	prior to sta	rting rer	ort)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

	C is TFLD Jones. EMT			o, a railing troo. Noqu	coung an ambulance to	Total Noda Fat (Eat./Long.) This will be the Troat			
•	ity of Emergency / Transport Priority RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.								
	njury or Illness & sm of Injury	•				Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
