#### **INCIDENT OBJECTIVES (ICS 202)**

1. Incident Name:	2. Operational Period			
	Date/Time From		Da	ate/Time To:
ARCHIE CREEK / THIELSEN	10/10/2020 0700			10/2020 1900 SAT
	10/10/2020 0700	5 SAT		0/2020 1900 SAT
3. Objective(s):				
Provide for the safety of all responders and pub	lic at all times.			
Destant some with a setting bir for starstand time				
Protect communities, critical infrastructure, timb	er values, recreatio	n siles and natural	resource v	alues.
Implement Covid-19 prevention and mitigation p	procedures as outlin	ed by the CDC and	d the Geog	raphic Wildfire Response Plan.
Implement strategies and tactics that commit re with the least exposure necessary.	sponders only to op	perations and tasks	that will ha	ive a high probability of success
Coordinate suppression repair tasks with Resorcultural and aquatic resources.	urce Advisors and ir	nplement in a manı	ner that will	minimize impacts to protected
4. Operational Period Command Emphasis:				
Continue to implement the suppression repair p	lan and coordinate	work assignments	with assign	ed Resource Advisors.
			Ū	
General Situational Awareness:				
Be prepared for the changing weather conditior	ns, including rain an	d cooler temperatu	res.

#### FIRE WEATHER FORECAST

FORECAST NO: 31 SHIFT DATE: Saturday, Oct 10<sup>th</sup>, 2020 PREDICTION FOR: 0600-2000 UNIT: OR- Umpqua NF **INCIDENT NAME:** Archie Creek/Thielsen

Incident Meteorologist – Dan Byrd

SIGNED: Dan Byrd

TIME AND DATE FORECAST ISSUED: 2000 hrs. 10/9/20

**WEATHER DISCUSSION:** Rain will move into the area early this morning and this will continue into tonight. The rain will begin to diminish this evening, but occasional light rain will be possible through the night. Light snow may mix with the rain tonight at higher elevations, with snow levels falling to around 5800 feet. Showers will continue to be possible on Sunday, but snow levels will rise to around 7000 feet Sunday afternoon. Rain accumulations will range from 1 to 1.5 inches through Sunday. Light rain showers will continue to be possible on Monday and Tuesday with high temperatures warming into the low 70s by Tuesday afternoon.

**<u>SKY/WEATHER TODAY</u>**: Cloudy with rain. The rain will taper off during the evening hours. Accumulations of 1 to 1.5 inches.

#### MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

 2000 FT: (Archie Creek)
 51 to 56 degrees (Down 17-20) / 70 to 75 (Up 50)

 5000 FT: (Thielsen)
 45 to 50 degrees (Down 17-20) / 70 to 75 (Up 50)

 EYE LEVEL WINDS:
 Southwest 8-12 G20, Higher in W to E aligned canyons and drainages.

 Ridges:
 Southwest 10-15 G20-25 mph.

**Transport Wind:** SW 15 mph. **LAL:** 1. **Inversion:** Weak at 1,000ft AGL early.

Chc of Wetting Rain (> or = to 0.25"): 100% Afternoon Mixing Height: 4,000ft AGL.

<u>SKY/WEATHER TONIGHT</u>: Cloudy with occasional light rain. The rain should end early on Sunday. Snow may mix with rain at higher elevations, with Snow levels falling to 5800 feet overnight. No accumulations of snow is expected.

#### MIN TEMPERATURES / MAX RELATIVE HUMIDITY

 2000 FT: (Archie Creek)
 41 to 46 degrees (Down 5-7) / 90 to 100% (Up 20%)

 5000 FT: (Thielsen)
 30 to 36 degrees (Down 1-3) / 90 to 100% (Up 20%)

 EYE LEVEL WINDS:
 Southwest to West 8-12.

 <u>Ridges:</u>
 Southwest to West 10-15 G 25.

LAL: 1. Inversion: Weak at 1000ft AGL. **Chc of Wetting Rain (> OR = to 0.25"):** 10%

**<u>2-5 Day Outlook, Sun-Wed (2000 Feet)</u>**: \* Upper level disturbances will bring a chance for showers through Tuesday\*

Sunday: Cloudy with a chance of light rain. High Temp: 52-58 Min RH: 60. Wind: SW-W 10 G20. Monday: Mostly cloudy with light rain likely. High Temp: 61-66 Min RH: 50. Wind: SW-W 5 G12. Tuesday: Cloudy with a chance of rain showers. High Temp: 66-71 Min RH: 50. Wind: WSW 10 G20. Wednesday: Partly Cloudy. High Temp: 67-72 Min RH: 30. Wind: WSW 10 G15.

**Observations from midnight through 1700 PDT Friday, 10/9/20:** 

North Bank (1913ft): Temps 51F/72F, RH: 94%/48%, Pk Wind: NW 14 G20 mph. Little River IRAWS (2100ft): Temps 50F/77F, RH: 84%/35%, Pk Wind: SW 9 G16 mph. Grandad (2900ft): Temps: 47F/75F, RH: 94%/29%, Pk Wind: SW 6 G11 mph. Lookout Mtn PRAWS (4739ft): Temps: 53F/68F, 57%/33%, Pk Wind: W 1 G4 mph. Cinnamon (4834ft): Temps: 35F/71F, 88%/23%, Pk Wind: WNW 5 G15 mph.

### FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 30	TYPE OF FIRE: Wildland
FIRE NAME: Archie Creek / Thielsen	OPERATIONAL PERIOD: Oct. 10, 2020 0700-1900
DATE ISSUED: October 9, 2020	TIME ISSUED: 2000 Hours
UNIT: Umpqua NF	SIGNED:Don Strand
	Typed/printed:
INPUT	S
WEATHER SUMMARY: See attached for	
Archie Creek: Temps 56, Min RH's 75%, Winds-SW 10 mph with	
Thielsen: Temps 50, Min RH's 75%, Winds- SW 10 mph with gus	
OUTPU	TS
FIRE BEHAVIOR	
GENERAL: Expect minimal fire behavior due to precipitation	
unavailable to burn. Larger logs and woody debris may cor	ntinue to be consumed in those areas where visible
smokes have been present the last couple of days.	
Archie Creek: Forecasted 1-hour fuel moistures minimums	
1000- hour fuel moistures near 16%. ERC-G values will be	near 21 today, down 25 from yesterday.
Thielsen: Forecasted 1-hour fuels moistures 16%, 10-hour	• •
moistures will be near 18%. ERC-G values will be near 18 t	oday, down 24.
AIR OPERATIONS: Cloudy with rain and breezy. Likely low c	loud ceilings
SAFET	۷.
Gusty winds, 20 to 25 mph have potential to cause fire	
Gusty minus, 20 to 25 mpri nave potential to cause me	weakened uses and shays fail.
	er conditions.

	er conditions.
	er conditions.

### Safety Message

10 October 2020

**INCIDENT:** Archie Creek/Thielsen

**OPERATIONAL PERIOD: 0700-1900** 

**TOPICS:** 

### DRIVING/TRANSPORTATION

#### <u>Continually evaluate road and work areas for weather impacts. Set MAP's to</u> <u>disengage before conditions become unsafe.</u>

Practice defensive driving skills and maintain time and distance from other vehicles and visual obstructions such as curves and blind spots. Be aware of debris fall and logs along the right-of-way. Keep your speeds low and take your time.

### **COOLER/WETTER WEATHER**

<u>Cool and wet weather is here. Significant rainfall is forecasted through today and</u> <u>Sunday. Hopefully you have waterproofed your camp, taken steps to stay warm</u> <u>and dry and set MAP's to adjust your operation as weather impacts arise.</u>

### COMMON BARRIERS TO EFFECTIVE COMMUNICATION PART 3

**Inconsistent body language.** Nonverbal communication should reinforce what is being said, not contradict it. If you say one thing, but your body language says something else, your listener will likely feel you are being dishonest. For example, you cannot say "yes" while shaking your head no.

### "Don't forget your COVID protocols and mitigations"

### Deliberate Risk Assessment-Hazard Summary

10 October 2020

Hazard	Mitigation	Post Risk
COVID Viral Transmission	Maintain awareness of health, perform self-checks, maintain social distancing, wear face covering when within social distancing space (minimum 6'), report and isolate if not feeling well, implement Module of One and Hub/Spoke criteria to greatest extent possible, establish relationship with local public health, establish a schedule to clean all frequently touched surfaces, maintain cleanliness of own workspace, box meals by crew (no more than 20), single person distribution for meals and hydration (24 hour supply of hydration each day supplied with breakfast)	Low
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site. Identify EMT's from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize short haul in remote areas. Evaluate on-going need for repositioning medical personnel.	High
Steep Terrain/Gravity	Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes. Establish LCES.	Moderate
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	Moderate
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Locate dumpsters/trash, food and feeding areas away from sleeping and assembly areas. Establish work windows during periods of heavy rainfall and/or cold weather conditions. Evaluate transportation routes for washout and debris fall potential and establish MAP for disengagement.	Moderate
Snags/Falling	Conduct on-going risk analysis of all work areas. Use mechanized falling to the greatest extent possible. Avoid use of agency personnel for hand falling. Follow Hazard Tree Safety Guidelines (IRPG page 22). Ensure use of protective equipment. Use qualified personnel for danger tree identification.	High
Transportation	Signing of all incident roads that provide access to divisions. Daily updated travel plan maps. In local communities obey the posted speed limits. Use reader boards to control entry as needed. Identify and evaluate contingency and alternate escape and travel routes, implement controls as needed. Practice defensive driving. Maintain an awareness of wildlife, rock fall and heavy truck traffic. Reduce speed and increase following distance as needed.	High
Aircraft	Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary radio channel. Reference IRPG (Safe aircraft operations pg. 56-58). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	High
Public Interaction	Implement road and area closures in and adjacent to the perimeter.	Moderate
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment. Familiarize crews with specialty equipment and processes.	High

Task: Patrol to ensure fire stays within established control features. Continue suppression repair per repair plan standards. Reduce Danger trees along 4712 road. Purpose: Protection of timber resources and improvements. Allow current and future work forces to safely travel along the road corridors. End State: To eliminate the threat to improvements and timber values. Reduce hazards along road system.

### **Top 10 Natural Resources Take-homes from Archie Creek**

These are the top 10 messaging points and/ or tidbits of 'gee-whiz' info that we have shared that will prove useful no matter what incident you work on. Thank you for your most excellent work here and safe travels as you time out and return to your home units! Note: these are not listed in order of importance.

 Constructing EFFECTIVE waterbars on firelines includes attention following the 5-D's; Distance, Divert, Diagonal, Discharge, and Dissipate. The purpose of waterbars is to slow water down as it travels downhill. When constructed correctly, waterbars help reduce excessive erosion and mitigate sediment transfer to streams and rivers.

Fireline Slope	Maximum Spacing
1-6%	300 ft.
7-9%	200 ft.
10-14%	150 ft.
15-20%	90 ft.
21-40%	50 ft.
41-60+%	25 ft.

# Figure 1. *The Five-D System for Effective Fireline Waterbars*. Furniss (undated) PNW

- 2) Raptors have 3 eyelids.
- 3) Control efforts and economic losses stemming from noxious weeds are extremely costly upwards of \$125 million, in Oregon alone. The best thing we can do is to prevent the spread; use the weed wash whenever possible, check your clothing for seeds, and ensure no plant parts/seeds make the journey home with you.
- 4) In areas where there are cultural sites, please do not move the items from where you discovered them. Simply collect point location, and pass the data to a READ/F on your division.
- 5) As pumps are set up for mop-up, please keep fuel as far from the streams as possible, and make sure each pump has a containment kit. Set pumps, fuel, jerry cans, etc. on level ground and ensure absorbent pads are changed when they become 50% saturated.
- 6) Avoid drafting from smaller streams if you need help finding water sources, please contact a Resource Advisor, as on most incidents, at least a few of them are local, have incredible knowledge of the area, and can assist with minimal response time.
- 7) Splash erosion occurs when raindrops (which can travel at up to 20 mph) strike soil without any plant cover or woody debris to intercept the drop's kinetic energy, soil particles can splash up to five feet horizontally and two feet in the air.
- 8) You'd be surprised how long trash persists; thanks for your efforts on this incident!

 Noxious weed seeds can remain viable for 1 – 80 years, depending on species.

10) The Chinook is the biggest of all of the Pacific salmons, growing as long as 53 inches and weighing as much as 126 pounds. This fish holds a significant stature culturally, economically, and recreationally.

Fun fact for the day; one-half inch of rain over the 130K acres of Archie creek equals approximately 1.7 BILLION gallons of water.

#### Archie Creek and Thielsen Danger Tree Felling Specifications

For the safety of firefighters ingress and egress to patrol and manage suppression response work on the Archie Creek Fire dead and dying trees along the identified priority roads need to be felled and removed (in some cases). The following is a draft prescription of the danger tree mitigation treatment:

- All dead trees along the prioritized roads that are at risk to hit the road need to be felled consistent with the <u>Region 6 Danger Tree Identification document</u>. Additionally, any trees with combinations of scorched and live crowns need to be evaluated by a person certified in danger tree identification for potential felling utilizing the criteria established in <u>Smith and Cluck (2011)</u>.
- Do not cut live green trees with intact crowns.
- For tree removal, any danger tree that is felled and hits the road should be limbed and decked. Most limbs that break off within 40-75 ft of the edge of the road prism should be piled or chipped on uphill slopes adjacent to the roads.
- On steep slopes above the road, fell all danger trees within 1 ½ tree lengths. On steep slopes, where professional judgement identifies a likelihood that a tree will slide onto the road, consider removing the tree and all limbs within 40-75 ft of the road. If the tree cannot be safely pulled to the road, consider contour falling where appropriate and safe.
- For slash created by fallen trees, pile along roadsides in consultation with READs.
- Only yard trees to the road outside of riparian areas or areas where removal could cause slope erosion concerns.
- For Incense and Western Red Cedar with green needles, evaluate root scorch, if 50% or greater, consider felling for safety in consultation with READs.
- For slopes below the road, only fall dead trees that have the potential to hit the road. Only remove such trees if they hit the road and can be removed without causing resource damage.
- If for safety reasons, an area cannot be treated with danger tree felling operations, please map the area, and share it with the lead Resource Advisor for mapping purposes.

#### **Slash Specifications**

- Remove slash created by danger tree felling within 40' of edge of the road.
- Where possible, prefer to haul and chip slash rather than piling.
- Where not possible to haul, chipping into stands is preferred before piling. Don't chip to a depth greater than one foot. Where possible, shoot chips to the downhill side of the road.
- Where not possible, pile slash alongside roads in coordination with READs to avoid sensitive areas and culverts.
- When building slash piles, size is not a concern, but ensure they are at a sufficient distance from live trees to avoid killing the trees when the pile is burned.
- Cover all piles with plastic sufficiently to allow for the interior of pile to remain dry over winter.

## Weed Wash!!

The weed wash stations are still up and running! The objective, is to complete suppression repair and minimize damage to the natural resources. Thank you for your continued vigilance in helping us achieve that objective!

There is a weed wash located at the Archie Creek ICP and at the Thielsen Spike camp.

• The Archie Weed Wash has MOVED.

Directions: Take 138 West into Glide, make a right (North) just West of the Glide Community Center (about 0.8 miles from Archie ICP). You'll see signs at the entrance. This is also the new Staging Area.

PLEASE wash your vehicles during the following situations:

- Prior to demob....DO NOT take our weeds home with you!
- Whenever logistically possible, wash equipment/vehicles prior to moving from the BLM/Private checkerboard to Forest Service- administered lands.

\*\*If you are just arriving to the Archie Creek or Thielsen Fire, take all vehicles through the weed wash before entering the fire areas.\*\*

To review,	please wash	vour vehicle /	' equip	ment upon:
,	p	, ,		

- 1. Initial mobilization into camp;
- 2. Final demobilization;
- 3. Moving from BLM to FS;
- 4. As often as possible!

\*Federal agencies and private industry spend thousands of dollars a year in the fight against noxious weeds as they spread from the valleys (or other infested areas) into un-infested Public Lands and plantations. Prevention is by far the most effective proactive weapon we have; it saves taxpayer dollars, and all it takes is a little extra time.

# **DEMOB INSTRUCTIONS**

In the COVID-19 environment we are limiting direct contact where possible including within the demob process.

As such, much of the process will be completed via cellphone. Please wear a <u>face covering</u> during any in person interaction.

### Demob steps for all resources (must be done in order):

- Any resources that were off pavement must go through weed wash. Location @ Thielsen Fire = Diamond Lake Camp. Location @ Archie Creek Fire = ICP.
- 2. Check out with **Ground Support** at either camp.
- 3. Turn in any radios to the **Communications Unit** and checked out supplies to the **Supply Unit** at either camp.
- 4. Call Demob Unit @ 541-887-0815
- 5. Call **Finance** @ 509-949-3210 or 360-601-8820
- 6. Scan this QR code and review the information on COVID.

If you follow this process you will be made available in the ordering system faster for your next assignment.

Any questions about the process please contact the Demob Unit at 541-887-0815.

Thank you and safe travels!

### **COVID Mitigated Check In Process....**

With the many changes due to COVID, efforts are being made to keep our resources (you!) safe by social distancing. Although our process has changed, we are still here for you... The Team is attempting to make the check-in process as easy as possible, however the need to rely on technology can be a challenge at times. If at any time you run into issues or have questions, please call the assisted check-in desk at **425-324-1367** between **0600 - 2100**.

### The Process:

### Step 1: Ground Support Inspection

• **Non-Agency Resources Only** (includes contract crews, equipment and overhead) need to report to Ground Support at Archie Creek ICP for inspection prior to engaging in the incident.

#### Step 2: Fill out the Virtual Check-In Form (Use the option below that works best for you)

- <u>Option 1</u>: Use your smart phone or tablet to Scan the QR code. In most cases, your phone camera will successfully scan the code and take you to the virtual form.
- <u>Option 2</u>: Open your internet browser (from your phone, tablet or computer) and type the following in the address bar https://bit.ly/2SHj9bD
- <u>Option 3</u>: For on-site check in, please call 425-324-1367 an iPad can be provided for you to complete the Check-In process.
- <u>Option 4</u>: If you can't complete any of the above methods of accessing the form or for any check-in issues, please call 425-324-1367.

### **Step 3: Provide Supplemental Check-In Information** (either email or text documents)

- Please provide the following documents:
  - **Crews** crew manifest with vehicle information, red cards
  - Equipment crew manifest (if information is not provided in check-in form), red/blue card(s)
  - **Overhead** red card
- Methods to provide documents:
  - Email documents to 2020.archiecreek.resources@firenet.gov
  - Text documents to 425-324-1367

### **Step 4: Determine Your Reporting Location**

- Fireline resources pick up an IAP from Check-in, then call Matt in Operations at 509-630-8033.
- **Other resources** if you're unsure where to report, call Check-In for assistance at 425-324-1367.

#### Human Resource Message – Archie Creek/Thielson Fires October 10, 2020

### Firefighter Photography, Videography, and Social Media Guidance

#### Good Morning Everyone:

Forest Service and BLM wildland firefighters who shoot photos and videos of work related activities and post them on their personal social media accounts must be mindful that images and messages reflect not only on their own professionalism, but also on the professionalism of their unit, the agency, and the interagency wildland fire community.

It is the responsibility of all agency wildland firefighters to ensure their conduct is appropriate both on the fireline and online.

<u>Check it before you wreck it</u>...before you post a photo or video, take a minute to think about the content. Does the photo or video involve firefighters without proper PPE? Does the photo or video portray something that could embarrass you or your crew?

<u>Think about the content</u>...is it inappropriate or would it have a negative effect on firefighters or the firefighting community? Once a video goes viral there is no way of getting back. Photos or videos taken in unsafe, unprofessional, or embarrassing circumstances reflect poorly on the entire fire and aviation community.

<u>Never lose your situational awareness</u>. A firefighter who is concentrating on a camera cannot be looking up, looking down and looking all around.

For your information (FYI) - following are the links to the FS and BLM policies:

https://www.ocio.usda.gov/document/departmental-regulation-1495-001

http://www.ocio.usda.gov/document/departmental-regulation-4070-735-001

Thielsen Spike Opens: 0600 Closed: 1200-1600 Closed: 2200

For COVID mitigation, please reduce the numbers of individuals coming to the kitchen window. Send representatives to collect meals for groups.

#### **FINANCE**

#### Communications for Finance should be sent to <u>2020.Thielsen.finance@firenet.gov</u> <u>2020.Archiecreek.finance@firenet.gov</u>

We would like to send a shout out to all the folks who have turned in the CTRs and Shift tickets – WE appreciate it!!!!

We would also like to thank all the folks who are volunteering on these fires – all you folks that have not turned in any CTRs or Shift tickets.

If you don't want to continue volunteering please use the QR codes below to submit your time.

Archie Creek

FINANCE SECTION OFFICE ADDRESS:

BLM Cache 2300 NW Aviation Drive Roseburg, OR 97470

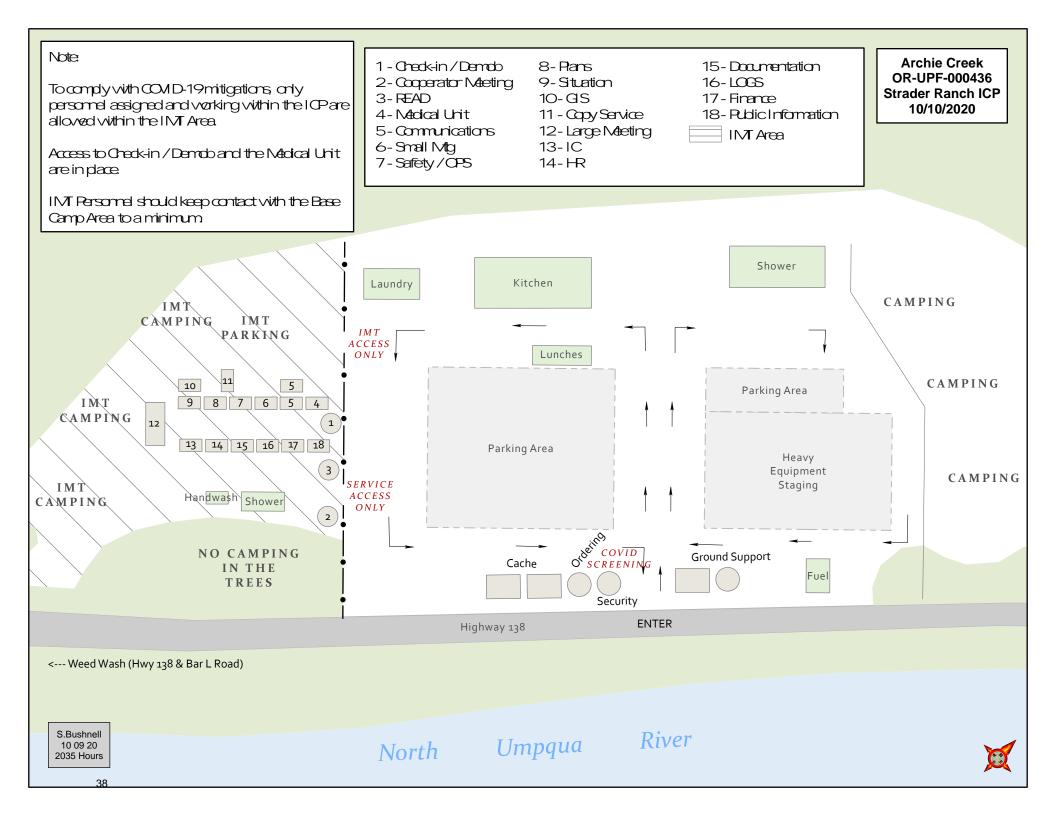

Thielsen

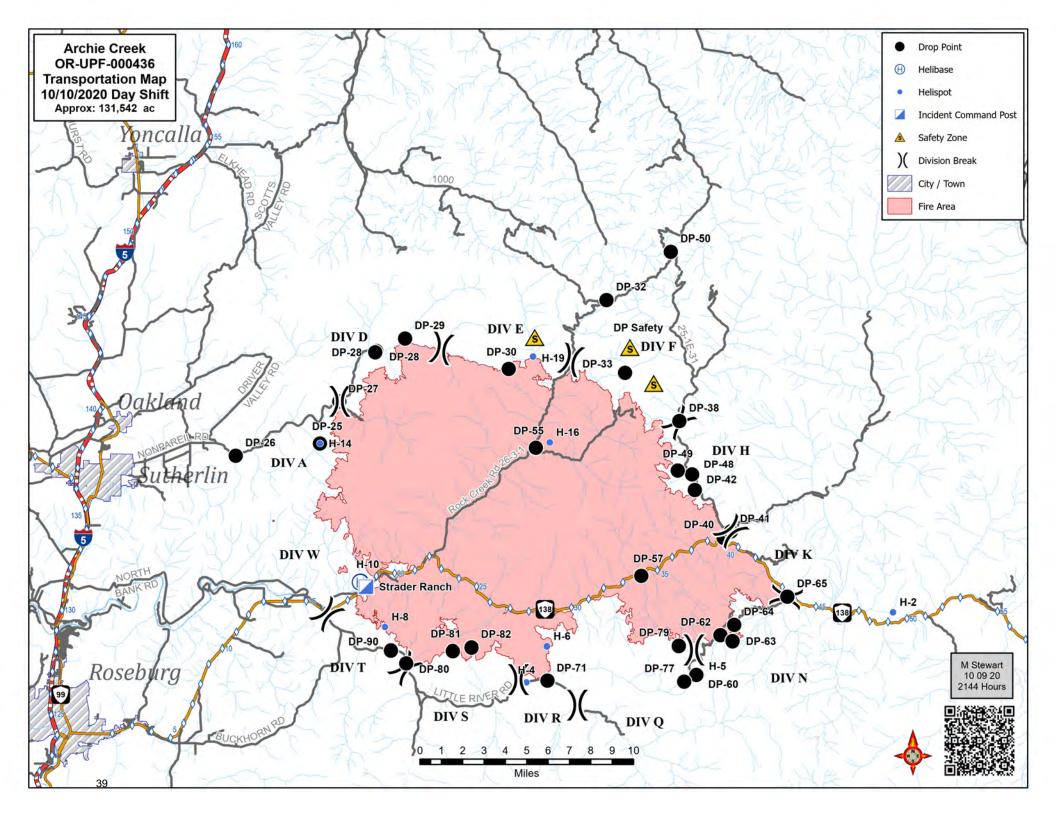

#### Reminder for <u>Forest Service</u> Resources:

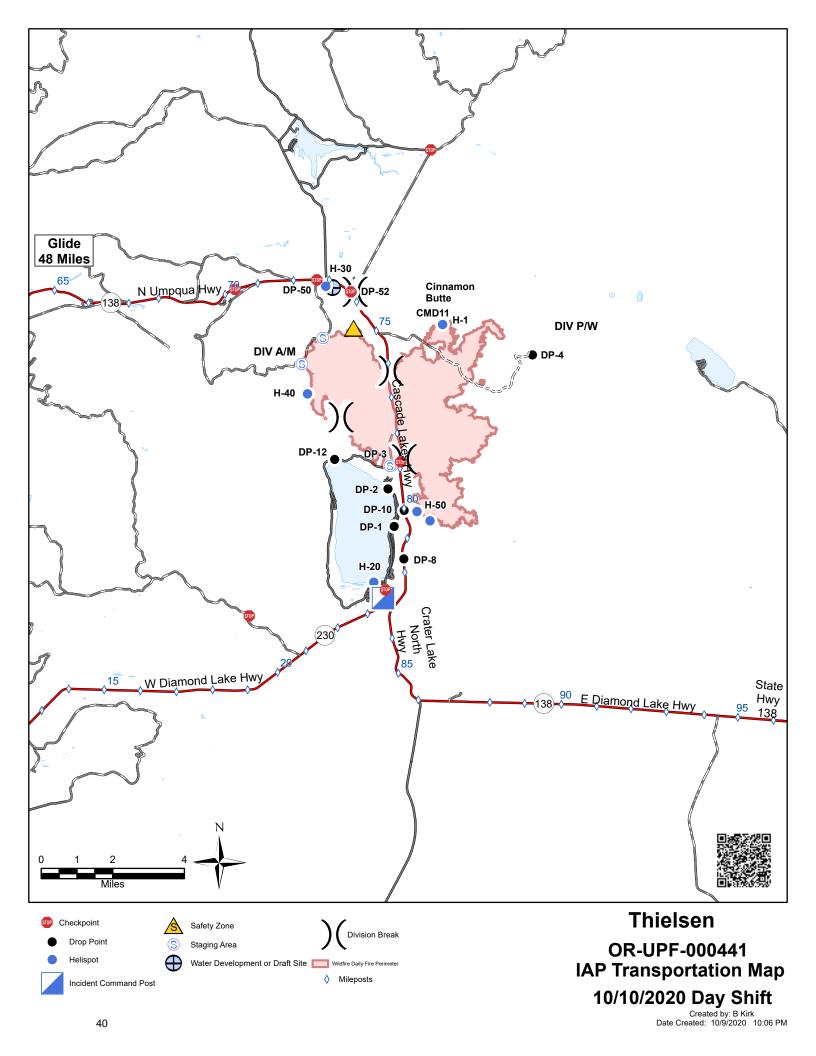

When you enter your time in Paycheck this week use the Fiscal year 20 shorthand code for the fire you are working on, and then do a corrected T&A next payperiod to the Fiscal year 21 shorthand code once it is in the system.

#### **Contact Information:**

Equipment Time: Christina Goebel – 509-670-5889 Personnel Time: Carol Long – 509-433-1115 Procurement: Mark Bohnet – 509-531-7418 Compensation & Claims: Barb Haxby – 360-601-8820 Finance Section Chief: Cheri Fuller – 509-949-3210 Deputy Finance Section Chief: Barb Haxby – 360-601-8820 ICPI: Rob Hechinger – 509-675-5821

### **Incident Maps**

Maps are not included in the IAP document due to size and page count. For detailed Operations, Transportation and other maps, scan the QR code (or click the link below it) for your fire:

Archie Creek (click to open)

Thielsen (click to open)

### Send Map Updates

Send map updates by email to the Situation Unit email address for your fire:

Archie Creek: 2020.archiecreek.situation@firenet.gov

Thielsen: 2020.thielsen.situation@firenet.gov

Alternately, text/call the Situation Unit at 360-584-3373. Make sure to include your name, position and explanation of the update you send.

#### How to correctly send data from Avenza:

- 1. Open the map in Avenza.
- 2. Click the pin with three lines near the lower-right corner.
- 3. *iPhone:* In the lower right, click the square with up arrow. From the pop-up menu, choose Export to Others.

*Android:* In the lower right, click the circle with three lines. Click the pop-up circle with up arrow.

- 4. Set these options:
  - a. Filename leave alone
  - Export Format choose SHP, GPX or KML

- c. Data all features
- d. Image size no image
- 5. Click the Export button in the upperright corner.
- 6. When the export is ready, choose your Mail application.
- Send the email to the address for your fire.
- 8. Your email needs to include your name and position
- Your email needs to include an explanation of the data you are sending.

#### **REQUIRED BY ALL PERSONNEL: COVID-19 DAILY CHECKLIST**

Supervisors are required to go over this list each morning with assigned resources. Please make a notation in the remarks section on your daily Crew Time Report documenting your daily health assessment check.

#### Self-Awareness / Screening

□ Notify supervisor if you or others experience:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches

- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea
- Have you had close contact within the last 14-days with someone who is currently sick with confirmed COVID-19? (Note: Close contact is defined as within 6 feet for more than 15 minutes per CDC Guidelines)

 Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel: Contact line EMT or COVID Module personnel for next steps.

- Masks must be worn at all times in base camp, spike camp and ICP.
- Modules (e.g. crews, engines) should send representatives to pick up meals for the entire group: 1 person for engine crews, 3-4 people for 20 person crews.
- Join morning briefing via phone (number provided in IAP)
- Observe 6-foot social distancing during briefings and while standing in line for meals, and any other time you are near people outside of your module.
- Limit contact between firefighters and the public as much as possible, use crew representatives to pick up supplies, fuel, etc.

#### **EMERGENCY PLAN**

#### **INCIDENT WITHIN AN INCIDENT**

#### **ON SCENE SUPERVISOR**

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment and Transportation.

- Conduct size-up of the incident (nature of accident, number type of resources involved, latitude and longitude location); notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency; coordinate with incident communications and air attack for air medical transportation needs
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.
- ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED.

# MEDICAL PLAN (ICS 206 WF) Controlled Unclassified Information//Basic

	Me	dical Incident Re	eport					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.								
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.								
Use the following items to communicate situation to communications/dispatch.								
<ol> <li>CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</li> <li>INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.</li> </ol>								
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."								
Severity of Emergency / Transport       RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE         Severity of Emergency / Transport       Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.         Priority       YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.         Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.         GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport         Ex: Sprains, strains, minor heat-related illness.								
Nature of Injury or Illness								
& Mechanism of Injury				Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)				
Transport Request	st Air Ambulance / Short Haul/Hoist Ground Ambulance / Other							
Patient Location	Location Descriptive Location & Lat. / Long. (							
Incident Name				Geographic Name + "Medical" (Ex: Trout Meadow Medical)				
On-Scene Incident Commander		lame of on-scene IC of Incident within an Incident (Ex: TFLD Jones)						
Patient Care				Name of Care Provider (Ex: EMT Smith)				
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)								
Patient Assessment: See IRPG page 106								
Treatment:								
4. TRANSPORT PLAN:								
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:								
Helispot / Extraction Site Size and Hazards:								
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:								
Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication								
6 COMMUNICATIONS, Idontify St	ata Air/Cround EMS Eroquana	ioc and Hospital (	antaata aa annliaahl					
6. COMMUNICATIONS: Identify St Function Channel Name/Nur		Tone/NAC *	Transmit (TX)	Tone/NAC *				
COMMAND								
AIR-TO-GRND								
TACTICAL								
7. CONTINGENCY: <u>Considerations:</u> If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.								
B. ADDITIONAL INFORMATION: Updates/Changes, etc.								
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
