Safety Message

11 October 2020

INCIDENT: Archie Creek/Thielsen

OPERATIONAL PERIOD: 0700-1900

TOPICS:

INSECT FRIENDS

The wet and cooler weather has pushed our eight leg friends to seek warm and dry conditions within our tents. Please check your doors and seams before opening/entering your tent.

DRIVING/TRANSPORTATION

Practice defensive driving skills and maintain time and distance from other vehicles and visual obstructions such as curves and blind spots. Be aware of debris fall and logs along the right-of-way. Keep your speeds low and take your time.

COOLER/WETTER WEATHER

Off and on wet weather will continue through mid week. Keep your camp prepared for rain and wind. Continually evaluate road and work areas for weather impacts. Set MAP's to disengage before conditions become unsafe.

COMMON BARRIERS TO EFFECTIVE COMMUNICATION PART 4

Negative body language. If you disagree with or dislike what is being said, you may use negative body language to rebuff the other person's message, such as crossing your arms, avoiding eye contact, or tapping your feet. You do not have to agree, or even like what's being said, but to communicate effectively and not make the other person defensive, it's important to avoid sending negative signals.

"Don't forget your COVID protocols and mitigations"

SAFETY OFFICER: Troy Corn, Jack Cates

11 October 2020

Hazard	Mitigation	Post Risk
COVID Viral Transmission	Maintain awareness of health, perform self-checks, maintain social distancing, wear face covering when within social distancing space (minimum 6'), report and isolate if not feeling well, implement Module of One and Hub/Spoke criteria to greatest extent possible, establish relationship with local public health, establish a schedule to clean all frequently touched surfaces, maintain cleanliness of own workspace, box meals by crew (no more than 20), single person distribution for meals and hydration (24 hour supply of hydration each day supplied with breakfast)	Low
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site. Identify EMT's from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize short haul in remote areas. Evaluate on-going need for repositioning medical personnel.	High
Steep Terrain/Gravity	Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes. Establish LCES.	Moderate
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	Moderate
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Locate dumpsters/trash, food and feeding areas away from sleeping and assembly areas. Establish work windows during periods of heavy rainfall and/or cold weather conditions. Evaluate transportation routes for washout and debris fall potential and establish MAP for disengagement.	Moderate
Snags/Falling	Conduct on-going risk analysis of all work areas. Use mechanized falling to the greatest extent possible. Avoid use of agency personnel for hand falling. Follow Hazard Tree Safety Guidelines (IRPG page 22). Ensure use of protective equipment. Use qualified personnel for danger tree identification.	High
Transportation	Signing of all incident roads that provide access to divisions. Daily updated travel plan maps. In local communities obey the posted speed limits. Use reader boards to control entry as needed. Identify and evaluate contingency and alternate escape and travel routes, implement controls as needed. Practice defensive driving. Maintain an awareness of wildlife, rock fall and heavy truck traffic. Reduce speed and increase following distance as needed.	High
Aircraft	Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary radio channel. Reference IRPG (Safe aircraft operations pg. 56-58). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	High
Public Interaction	Implement road and area closures in and adjacent to the perimeter.	Moderate
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment. Familiarize crews with specialty equipment and processes.	High

Archie Creek and Thielsen Danger Tree Felling Specifications

For the safety of firefighters ingress and egress to patrol and manage suppression response work on the Archie Creek Fire dead and dying trees along the identified priority roads need to be felled and removed (in some cases). The following is a draft prescription of the danger tree mitigation treatment:

- All dead trees along the prioritized roads that are at risk to hit the road need to be felled consistent with the [Region 6 Danger Tree Identification document](#). Additionally, any trees with combinations of scorched and live crowns need to be evaluated by a person certified in danger tree identification for potential felling utilizing the criteria established in [Smith and Cluck \(2011\)](#).
- Do not cut live green trees with intact crowns.
- For tree removal, any danger tree that is felled and hits the road should be limbed and decked. Most limbs that break off within 40-75 ft of the edge of the road prism should be piled or chipped on uphill slopes adjacent to the roads.
- On steep slopes above the road, fell all danger trees within 1 ½ tree lengths. On steep slopes, where professional judgement identifies a likelihood that a tree will slide onto the road, consider removing the tree and all limbs within 40-75 ft of the road. If the tree cannot be safely pulled to the road, consider contour falling where appropriate and safe.
- For slash created by fallen trees, pile along roadsides in consultation with READs.
- Only yard trees to the road outside of riparian areas or areas where removal could cause slope erosion concerns.
- For Incense and Western Red Cedar with green needles, evaluate root scorch, if 50% or greater, consider felling for safety in consultation with READs.
- For slopes below the road, only fall dead trees that have the potential to hit the road. Only remove such trees if they hit the road and can be removed without causing resource damage.
- If for safety reasons, an area cannot be treated with danger tree felling operations, please map the area, and share it with the lead Resource Advisor for mapping purposes.

Slash Specifications

- Remove slash created by danger tree felling within 40' of edge of the road.
- Where possible, prefer to haul and chip slash rather than piling.
- Where not possible to haul, chipping into stands is preferred before piling. Don't chip to a depth greater than one foot. Where possible, shoot chips to the downhill side of the road.
- Where not possible, pile slash alongside roads in coordination with READs to avoid sensitive areas and culverts.
- When building slash piles, size is not a concern, but ensure they are at a sufficient distance from live trees to avoid killing the trees when the pile is burned.
- Cover all piles with plastic sufficiently to allow for the interior of pile to remain dry over winter.

Weed Wash!!

The weed wash stations are still up and running! The objective, is to complete suppression repair and minimize damage to the natural resources. Thank you for your continued vigilance in helping us achieve that objective!

There is a weed wash located near the Archie Creek ICP (in Glide) and at the Thielsen Spike camp.

- The Archie Creek Weed Wash has MOVED.

Directions: Take 138 West into Glide, make a right (North) just West of the Glide Community Center (about 0.8 miles from Archie ICP). You'll see signs at the entrance. This is also the new Staging Area.

PLEASE wash your vehicles during the following situations:

- Prior to demob....DO NOT take our weeds home with you!
- Whenever logistically possible, wash equipment/vehicles prior to moving from the BLM/Private checkerboard to Forest Service- administered lands.

****If you are just arriving to the Archie Creek or Thielsen Fire, take all vehicles through the weed wash before entering the fire areas.****

To review, please wash your vehicle / equipment upon:

1. Initial mobilization into camp;
2. Final demobilization;
3. Moving from BLM to FS;
4. As often as possible!

*Federal agencies and private industry spend thousands of dollars a year in the fight against noxious weeds as they spread from the valleys (or other infested areas) into un-infested Public Lands and plantations. Prevention is by far the most effective proactive weapon we have; it saves taxpayer dollars, and all it takes is a little extra time.

DEMOB INSTRUCTIONS

In the COVID-19 environment we are limiting direct contact where possible including within the demob process.

As such, much of the process will be completed via cellphone. Please wear a face covering during any in person interaction.

Demob steps for all resources (must be done in order):

1. Any resources that were off pavement must go through **weed wash**. Location @ Thielsen Fire = Diamond Lake Camp. Location @ Archie Creek Fire = ICP.
2. Check out with **Ground Support** at either camp.
3. Turn in any radios to the **Communications Unit** and checked out supplies to the **Supply Unit** at either camp.
4. Call **Demob Unit** @ 541-887-0815
5. Call **Finance** @ 509-949-3210 or 360-601-8820
6. Scan this QR code and review the information on COVID.

If you follow this process you will be made available in the ordering system faster for your next assignment.

Any questions about the process please contact the Demob Unit at 541-887-0815.

Thank you and safe travels!

COVID Mitigated Check In Process....

*With the many changes due to COVID, efforts are being made to keep our resources (you!) safe by social distancing. Although our process has changed, we are still here for you... The Team is attempting to make the check-in process as easy as possible, however the need to rely on technology can be a challenge at times. If at any time you run into issues or have questions, please call the assisted check-in desk at **425-324-1367** between **0600 - 2100**.*

The Process:

Step 1: Ground Support Inspection

- **Non-Agency Resources Only** (includes contract crews, equipment and overhead) need to report to Ground Support at Archie Creek ICP for inspection prior to engaging in the incident.

Step 2: Fill out the Virtual Check-In Form (Use the option below that works best for you)

- Option 1: Use your smart phone or tablet to Scan the QR code. In most cases, your phone camera will successfully scan the code and take you to the virtual form. 
- Option 2: Open your internet browser (from your phone, tablet or computer) and type the following in the address bar <https://bit.ly/2SHj9bD>
- Option 3: For on-site check in, please call 425-324-1367 – an iPad can be provided for you to complete the Check-In process.

COMMUNICATION

Communication is simply the act of transferring information from one place, person, or group to another. Every communication involves (at least) one sender, a message, and a recipient. Make sure your message is Accurate, Brief, and Concise.

We communicate every day in many ways regarding the “how, what, why and where”, which is so critical in wildland fire fighting. To communicate well is to understand and be understood. Misunderstandings often occur because we do not understand, *and we are often misunderstood.* Make sure your communication is received and understood.

Quote for the Day!

Words are powerful! When you chose just the right word, you increase understanding ten-fold. “The difference between the right word and the almost right word is the difference between lightning and a lightning bug.” ~ Mark Twain

Be safe, have a great day, communicate respectfully & effectively!

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
