INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY	
ARCHIE CREEK / THIELSEN	Date/Time From: 10/13/2020 0700 TUE	Date/Time To: 10/13/2020 1900 TUE
3. Objective(s):		
Provide for the safety of all responders and public at all times.		
Protect communities, critical infrastructure, timber values, recreation sites and natural resource values.		
Implement Covid-19 prevention and mitigation procedures as outlined by the CDC and the Geographic Wildfire Response Plan.		
Implement strategies and tactics that commit responders only to operations and tasks that will have a high probability of success with the least exposure necessary.		
Coordinate suppression repair tasks with Resource Advisors and implement in a manner that will minimize impacts to protected cultural and aquatic resources.		
4. Operational Period Command Emphasis:		
Continue to implement the suppression repair plan and coordinate work assignments with assigned Resource Advisors.		
General Situational Awareness:		
Monitor the weather, scout work area for hazards and adjust your work assignment based on conditions.		
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
Approved Site Safety Plan(s) Located at:		
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):		
<input checked="" type="checkbox"/> ICS 202	<input type="checkbox"/> ICS 207	Other Attachments:

FIRE WEATHER FORECAST

FORECAST NO: 35
SHIFT DATE: Tuesday, Oct 13th, 2020
PREDICTION FOR: 0600-1900
UNIT: OR- Umpqua NF

INCIDENT NAME: Archie Creek/Thielsen

Incident Meteorologist – Bob Tobin

SIGNED: *Bob Tobin*

TIME AND DATE

FORECAST ISSUED: 2000 hrs. 10/12/20

WEATHER DISCUSSION: Westerly flow will remain over the region for one more day. A last weather disturbance will move through the region today and will have enough energy for widespread light to moderate rain cross the fire area that will likely last into the evening hours. A little cooler compared to Monday. Beginning Wednesday there will be a pattern change as high pressure builds into the area, then strengthens through Sunday. This will result in above normal temperatures, lower relative humidity and northeast winds

SKY/WEATHER TODAY: Rain beginning between 0800-1000 and lasting all day. 0.40-0.60 inches of rain will be possible.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

3000 FT: (Archie Creek) 52 to 57 degrees (Down 2-4) / 80 to 90 (Up 10-15%)

5000 FT: (Thielsen) 48 to 52 degrees (Down 1-2) / 80 to 90 (Up 5 %)

20 FOOT WINDS:

Slope/Valley: Southwest 10-14 mph.

Ridges: Southwest 12-15 with gusts 20 to 25 mph.

Transport Wind: S-SW 15-20 mph.

LAL: 1.

Chc of Wetting Rain (> or = to 0.25"): 100%

Inversion: weak at 300 ft AGL.

Afternoon Mixing Height: 1100 ft AGL.

SKY/WEATHER TONIGHT: Rain likely until midnight. Then a slight chance of rain through the night. Rain amounts around 0.10. Areas of fog and low clouds through the morning.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

3000 FT: (Archie Creek) 42 to 45 degrees (Down 3-5) / 80 to 90% (Little change)

5000 FT: (Thielsen) 30 to 35 degrees (Down 1-2) / 80 to 90% (Little change)

20 FOOT WINDS:

Slope/Valley: West 5-10.

Ridges: West 10-12 mph.

LAL: 1.

Chc of Wetting Rain (> OR = to 0.25"): 25%

Inversion: Weak at 1100 ft AGL.

2-5 Day Outlook, Wed-Sat (3000 Feet): High pressure will build over the region through the weekend. This will result in warmer temps and lower relative humidity.

Wednesday: Morning fog. Then partly cloudy. **High Temp:** 50-55 **Min RH:** 50-60. **Wind:** W-NW 7-10 mph.

Thursday: Sunny. **High Temp:** 55-65 **Min RH:** 35-45. **Wind:** NE 8-10 mph.

Friday: Sunny. **High Temp:** 62-72 **Min RH:** 35-40. **Wind:** N-NE 8-12 mph.

Saturday: Sunny. **High Temp:** 60-65 **Min RH:** 45-50. **Wind:** NW-N 8-10 mph.

Observations from midnight through 1700 PDT Saturday, 10/10/20:

North Bank (1913ft): Temps 51F/61F, RH: 100%/67%, Pk Wind: S 16 G29 mph... pcpn 0.28

Little River IRAWS (2100ft): Temps 52F/65F, RH: 100%/58%, Pk Wind: NE 4g6... pcpn 0.42

Grandad (2900ft): Temps: 50F/62F, RH: 100%/55%, Pk Wind: SW 6 G12... pcpn 0.27

Lookout Mtn PRAWS (4739ft): Temps: 43F/49F, 100%/95%, Pk Wind: NNW 6 G20 mph... pcpn 0.84

Cinnamon (4834ft): Temps: 45F/56F, 9%/59%, Pk Wind: W 7 G19 mph... pcpn 0.24

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 33	TYPE OF FIRE: Wildland
FIRE NAME: Archie Creek / Thielsen	OPERATIONAL PERIOD: Oct. 13, 2020 0700-1900
DATE ISSUED: October 12, 2020	TIME ISSUED: 2000 Hours
UNIT: Umpqua NF	SIGNED: _____ Don Strand _____ Typed/printed:

INPUTS

WEATHER SUMMARY: See attached forecast
 Archie Creek: Temps 54-58, Min RH's 80-90%, Winds: slope/valley SW 10-14 mph, ridges SW 12-15, gusts 20-25 mph.
 Thielsen: Temps 48-52, Min RH's 80-90%, Winds: slope/valley SW 8-12 mph, ridges SW 12-15 with gusts 20-25 mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Expect minimal fire behavior to continue due to precipitation. Larger logs and woody debris may continue to smolder in those areas where visible smokes have been present the last couple of days.

Archie Creek: Forecasted 1-hour fuel moistures minimums will be near 21% and 10- hour fuels near 29%, 1000- hour fuel moistures near 19%. ERC-G values yesterday were 19 and forecasted to be 11 today, down 8.

Thielsen: Forecasted 1-hour fuels moistures 19%, 10-hour fuels moistures will approach 28%, 1000-hour fuel moistures will be near 21%. ERC-G values yesterday were 15 and forecasted to be near 11 today, down 4.

Safety Message

13 October 2020

INCIDENT: Archie Creek/Thielsen

OPERATIONAL PERIOD: 0700-1900

TOPICS:

KEYS TO RESILIENCY

Broadly defined, resilience is the capacity to recover quickly from difficulties and spring back to one's original form. Here are some key traits to create/maintain resiliency:

Positive vs Negative Thinking

Task Oriented

Flexible Thinking

Maintaining Physical Health and Avoiding Risks

MISSION CREEP

Mission Creep is the expansion of a mission or task beyond original objectives or assignment. In our business this is most often undesirable unless serious life considerations are at risk. Many times, Mission Creep will continue once started until catastrophic failure or undesirable outcomes are encountered. Plans are built based on set and measurable objectives. Stay in your lane and avoid the urge to creep and remember, mission creep occurs during all missions, not just during suppression activities.

DRIVING/TRANSPORTATION

Practice defensive driving skills and maintain time and distance from other vehicles and visual obstructions such as curves and blind spots. Be aware of debris fall and logs along the right-of-way. Keep your speeds low and take your time.

“Don't forget your COVID protocols and mitigations”

SAFETY OFFICER: Troy Corn, Jack Cates

Deliberate Risk Assessment-Hazard Summary

13 October 2020

Hazard	Mitigation	Post Risk
COVID Viral Transmission	Maintain awareness of health, perform self-checks, maintain social distancing, wear face covering when within social distancing space (minimum 6'), report and isolate if not feeling well, implement Module of One and Hub/Spoke criteria to greatest extent possible, establish relationship with local public health, establish a schedule to clean all frequently touched surfaces, maintain cleanliness of own workspace, box meals by crew (no more than 20), single person distribution for meals and hydration (24 hour supply of hydration each day supplied with breakfast)	Low
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site. Identify EMT's from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize short haul in remote areas. Evaluate on-going need for repositioning medical personnel.	High
Steep Terrain/Gravity	Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes. Establish LCES.	Moderate
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	Moderate
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Locate dumpsters/trash, food and feeding areas away from sleeping and assembly areas. Establish work windows during periods of heavy rainfall and/or cold weather conditions. Evaluate transportation routes for washout and debris fall potential and establish MAP for disengagement.	Moderate
Snags/Falling	Conduct on-going risk analysis of all work areas. Use mechanized falling to the greatest extent possible. Avoid use of agency personnel for hand falling. Follow Hazard Tree Safety Guidelines (IRPG page 22). Ensure use of protective equipment. Use qualified personnel for danger tree identification.	High
Transportation	Signing of all incident roads that provide access to divisions. Daily updated travel plan maps. In local communities obey the posted speed limits. Use reader boards to control entry as needed. Identify and evaluate contingency and alternate escape and travel routes, implement controls as needed. Practice defensive driving. Maintain an awareness of wildlife, rock fall and heavy truck traffic. Reduce speed and increase following distance as needed.	High
Public Interaction	Implement road and area closures in and adjacent to the perimeter.	Moderate
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment. Familiarize crews with specialty equipment and processes.	High

The Power of the Humble Raindrop

Erosion starts with a single raindrop.

Individual raindrops can travel at speeds up to 20 miles per hour. When raindrops strike soil directly, without any plant cover or woody debris to intercept the drop's kinetic energy, soil particles can splash up to five feet horizontally and two feet in the air. This is known as splash erosion.

The volume of soil material detached by raindrop splash is determined by raindrop diameter (larger drops are heavier and have more kinetic energy), median grain size of the soil, and slope. A sloped surface will result in more soil particles splashing downhill, and these particles will move at higher velocities.

Eventually the soil may become saturated and water will start to flow over the soil surface as sheet flow. Soil loosened by the action of splash erosion may then be moved off site by sheet erosion. As water moves downhill, it may concentrate and form rills and eventually gullies.

Much of what we do during Suppression Repair are actions to mitigate future erosion events on suppression lines. Pulling coarse woody debris onto suppression lines and mulching with straw and hay help intercept the kinetic energy of raindrops. Seeding native species provides soil cover in future years and stabilizes the soil through root development. Waterbars help intercept and diffuse sheet flow before it can lead to rilling.

Thank you for your help with this important work!

Fun fact: The total energy for 30 inches of annual precipitation occurring over 1 square mile is equivalent to the energy of 8,256 tons of TNT.

Archie Creek and Thielsen Danger Tree Felling Specifications

For the safety of firefighters ingress and egress to patrol and manage suppression response work on the Archie Creek Fire dead and dying trees along the identified priority roads need to be felled and removed (in some cases). The following is a draft prescription of the danger tree mitigation treatment:

- All dead trees along the prioritized roads that are at risk to hit the road need to be felled consistent with the [Region 6 Danger Tree Identification document](#). Additionally, any trees with combinations of scorched and live crowns need to be evaluated by a person certified in danger tree identification for potential felling utilizing the criteria established in [Smith and Cluck \(2011\)](#).
- Do not cut live green trees with intact crowns.
- For tree removal, any danger tree that is felled and hits the road should be limbed and decked. Most limbs that break off within 40-75 ft of the edge of the road prism should be piled or chipped on uphill slopes adjacent to the roads.
- On steep slopes above the road, fell all danger trees within 1 ½ tree lengths. On steep slopes, where professional judgement identifies a likelihood that a tree will slide onto the road, consider removing the tree and all limbs within 40-75 ft of the road. If the tree cannot be safely pulled to the road, consider contour falling where appropriate and safe.
- For slash created by fallen trees, pile along roadsides in consultation with READs.
- Only yard trees to the road outside of riparian areas or areas where removal could cause slope erosion concerns.
- For Incense and Western Red Cedar with green needles, evaluate root scorch, if 50% or greater, consider felling for safety in consultation with READs.
- For slopes below the road, only fall dead trees that have the potential to hit the road. Only remove such trees if they hit the road and can be removed without causing resource damage.
- If for safety reasons, an area cannot be treated with danger tree felling operations, please map the area, and share it with the lead Resource Advisor for mapping purposes.

Slash Specifications

- Remove slash created by danger tree felling within 40' of edge of the road.
- Where possible, prefer to haul and chip slash rather than piling.
- Where not possible to haul, chipping into stands is preferred before piling. Don't chip to a depth greater than one foot. Where possible, shoot chips to the downhill side of the road.
- Where not possible, pile slash alongside roads in coordination with READs to avoid sensitive areas and culverts.
- When building slash piles, size is not a concern, but ensure they are at a sufficient distance from live trees to avoid killing the trees when the pile is burned.
- Cover all piles with plastic sufficiently to allow for the interior of pile to remain dry over winter.

Weed Wash!!

The weed wash stations are still up and running! The objective, is to complete suppression repair and minimize damage to the natural resources. Thank you for your continued vigilance in helping us achieve that objective!

BOTH FIRES HAVE A WEED WASH.

- **Archie Creek Weed Wash location. (not at the ICP)**

Directions: Take 138 West into Glide, make a right (North) just West of the Glide Community Center (about 0.8 miles from Archie ICP). You'll see signs at the entrance. This is also the new Staging Area.

- **Thielsen Weed Wash location is at DP-3.**

PLEASE wash your vehicles during the following situations:

- Prior to demob...**DO NOT** take our weeds home with you!
- Whenever logistically possible, wash equipment/vehicles prior to moving from the BLM/Private checkerboard to Forest Service- administered lands.

****If you are just arriving to the Archie Creek or Thielsen Fire, take all vehicles through the weed wash before entering the fire areas.****

To review, please wash your vehicle / equipment upon:

1. Initial mobilization into camp;
2. Final demobilization;
3. Moving from BLM to FS;
4. As often as possible!

*Federal agencies and private industry spend thousands of dollars a year in the fight against noxious weeds as they spread from the valleys (or other infested areas) into un-infested Public Lands and plantations. Prevention is by far the most effective proactive weapon we have; it saves taxpayer dollars, and all it takes is a little extra time.

DEMOB INSTRUCTIONS

Follow all COVID-19 mitigations and steps below while demobing.

Demob steps for all resources (must be done in order):

1. Any resources that were off pavement must go through **weed wash**. See the **weed wash** page in this IAP for locations and further instructions.
2. Check out with **Ground Support** at either camp.
3. Turn in any radios to the **Communications Unit** and checked out supplies to the **Supply Unit** at either camp.
4. Call **Demob Unit @ 541-887-0815**
5. Call **Finance @ 509-949-3210 or 360-601-8820**
6. Scan this QR code and review the information on COVID.

If you follow this process you will be made available in the ordering system faster for your next assignment.

Any questions about the process please contact the Demob Unit at 541-887-0815.

Thank you and safe travels!

Good Morning Everyone: As a Reminder:

Alcohol, Non-Prescription, and Federal-Illegal Drugs are Not allowed on this or any Incident!

Being under the influence of drugs or alcohol is not a good choice because it is a safety concern and it also violates agency policy as it interferes with our mission, particularly when our resources are stretched, and optimal performance is needed from everyone.

We need everyone to make good choices every day, but it is essential when working in this high-risk business of wildland fire fighting. We know that many substances can impair driving, and slow coordination, judgment, and our reaction times.

It does not matter where you are working on this incident, being impaired in any way will not only affect your safety, it will also affect the safety of others.

Illegal drugs and or alcohol have no place here or anywhere. Please continue to work safely and please continue to make good choices.

Take Care and Be Aware! Be Safe and Have A Good Productive Day!

Susie Manezes, Human Resource Specialist PNW Team 12 – Contact: 602-571-9327

Archie Creek Fire & Thielsen Fire Training Message

WRITING EFFECTIVE PERFORMANCE EVALUATIONS

- ✓ Provide **CONSTRUCTIVE FEEDBACK** for trainee and make your words valuable for the person or people responsible for reviewing the evaluation.
- ✓ Describe what the trainee did on the assignment to justify their rating. **PAINT THE PICTURE** to the reviewing officials on the complexity of the assignment!
- ✓ Be **HONEST** enough to let the trainee know what their strengths and weaknesses are, how they performed and if they met, did not meet, or exceeded your expectations.
- ✓ **DOCUMENT** what skills or tasks the trainee should work on next if recommending continuing assignments.
- ✓ If recommending certification, **BE SPECIFIC** in the performance evaluation that you are recommending them for certification.

TNSP Hours:

6-9am by appointment only

3-8pm daily

Erika L. Davis ~ (850) 841-0038 ~ Erika.Davis@USDA.GOV

TRAINING CLOSE-OUT PROCEDURES

<https://tinyurl.com/y54ufg3v>

- Initiate Close-out via QR code
- Send completed Performance Evaluation(s), Evaluation Record(s), Final Evaluators Verification (if applicable)

Incident Maps

Maps are not included in the IAP document due to size and page count. For detailed Operations, Transportation and other maps, scan the QR code (or click the link below it) for your fire:

[Archie Creek](#) (click to open)

[Thielsen](#) (click to open)

Send Map Updates

Send map updates by email to the Situation Unit email address for your fire:

Archie Creek: 2020.archiecreek.situation@firenet.gov

Thielsen: 2020.thielsen.situation@firenet.gov

Alternately, text/call the Situation Unit at 360-584-3373. Make sure to include your name, position and explanation of the update you send.

How to correctly send data from Avenza:

1. Open the map in Avenza.
2. Click the pin with three lines near the lower-right corner.
3. *iPhone*: In the lower right, click the square with up arrow. From the pop-up menu, choose Export to Others.
Android: In the lower right, click the circle with three lines. Click the pop-up circle with up arrow.
4. Set these options:
 - a. Filename – leave alone
 - b. Export Format – choose SHP, GPX or KML
 - c. Data – all features
 - d. Image size – no image
5. Click the Export button in the upper-right corner.
6. When the export is ready, choose your Mail application.
7. Send the email to the address for your fire.
8. Your email needs to include your name and position
9. Your email needs to include an explanation of the data you are sending.

REQUIRED BY ALL PERSONNEL: COVID-19 DAILY CHECKLIST

Supervisors are required to go over this list each morning with assigned resources. Please make a notation in the remarks section on your daily Crew Time Report documenting your daily health assessment check.

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - Fever or chills
 - Cough
 - Shortness of breath or difficulty breathing
 - Fatigue
 - Muscle or body aches
 - Have you had close contact within the last 14-days with someone who is currently sick with confirmed COVID-19? (Note: Close contact is defined as within 6 feet for more than 15 minutes per CDC Guidelines)
 - Headache
 - New loss of taste or smell
 - Sore throat
 - Congestion or runny nose
 - Nausea or vomiting
 - Diarrhea
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel: Contact line EMT or COVID Module personnel for next steps.
 - Masks must be worn at all times in base camp, spike camp and ICP.
 - Modules (e.g. crews, engines) should send representatives to pick up meals for the entire group: 1 person for engine crews, 3-4 people for 20 person crews.
 - Join morning briefing via phone (number provided in IAP)
 - Observe 6-foot social distancing during briefings and while standing in line for meals, and any other time you are near people outside of your module.
 - Limit contact between firefighters and the public as much as possible, use crew representatives to pick up supplies, fuel, etc.

**WEAR YOUR MASK
WASH YOUR HANDS
WATCH YOUR DISTANCE**

IN-CAMP EMERGENCY MEDICAL PROCEDURE

Archie Creek

ICP/Base Camp

- 1. Stay with Patient**
- 2. YELL for HELP**
- 3. Send someone to Communications or Call:**

24 hours 206-450-6582

Communications will start the appropriate medical response

Thielsen

Spike Camp

- 1. Stay with Patient**
- 2. YELL for HELP**
- 3. Call Lee Venning to start appropriate medical response:**

24 hours 417-459-5759

EMERGENCY PLAN

INCIDENT WITHIN AN INCIDENT

ON SCENE SUPERVISOR

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment and Transportation.

- Conduct size-up of the incident (nature of accident, number type of resources involved, latitude and longitude location); notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency; coordinate with incident communications and air attack for air medical transportation needs
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.
- **ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED.**

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
