INCIDENT: Archie Creek/Thielsen

OPERATIONAL PERIOD: 0700-1900

TOPICS:

HEAVY EQUIPMENT

- When near the excavator or other equipment that's working, maintain a safe distance and wear ear protection.
- Heavy equipment operators have limited visibility, especially to the rear of their equipment. Do not approach equipment unless you have established eye-contact with the operator and have been given the "go ahead" to approach.
- Do not work on the downhill side of heavy equipment. Watch for rolling debris.

DRIVING/TRANSPORTATION

Practice defensive driving skills and maintain time and distance from other vehicles and visual obstructions such as curves and blind spots. Be aware of debris fall and logs along the right-of-way. Keep your speeds low and take your time.

"Don't let your success of today lay you into complacency for tomorrow. For that is the worst form of failure." ~ Og Mandino

"Don't forget your COVID protocols and mitigations"

SAFETY OFFICER: Troy Corn, Jack Cates

Deliberate Risk Assessment-Hazard Summary

15 October 2020

Hazard	Mitigation	Post Risk
COVID Viral Transmission	Maintain awareness of health, perform self-checks, maintain social distancing, wear face covering when within social distancing space (minimum 6'), report and isolate if not feeling well, implement Module of One and Hub/Spoke criteria to greatest extent possible, establish relationship with local public health, establish a schedule to clean all frequently touched surfaces, maintain cleanliness of own workspace, box meals by crew (no more than 20), single person distribution for meals and hydration (24 hour supply of hydration each day supplied with breakfast)	Low
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site. Identify EMT's from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize short haul in remote areas. Evaluate on-going need for repositioning medical personnel.	High
Steep Terrain/Gravity	Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes. Establish LCES.	Moderate
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	Moderate
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Locate dumpsters/trash, food and feeding areas away from sleeping and assembly areas. Establish work windows during periods of heavy rainfall and/or cold weather conditions. Evaluate transportation routes for washout and debris fall potential and establish MAP for disengagement.	Moderate
Snags/Falling	Conduct on-going risk analysis of all work areas. Use mechanized falling to the greatest extent possible. Avoid use of agency personnel for hand falling. Follow Hazard Tree Safety Guidelines (IRPG page 22). Ensure use of protective equipment. Use qualified personnel for danger tree identification.	High
Transportation	Signing of all incident roads that provide access to divisions. Daily updated travel plan maps. In local communities obey the posted speed limits. Use reader boards to control entry as needed. Identify and evaluate contingency and alternate escape and travel routes, implement controls as needed. Practice defensive driving. Maintain an awareness of wildlife, rock fall and heavy truck traffic. Reduce speed and increase following distance as needed.	High
Public Interaction	Implement road and area closures in and adjacent to the perimeter.	Moderate
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment. Familiarize crews with specialty equipment and processes.	High

Catch of the Day

This photo is believed to be from the lower North Umpqua, circa 1930-1940s.

‘A bad day fishing beats a good day at work,’ as the old saying goes....but not to worry, there aren’t very many bad fishing days on the North Umpqua river...

The North Umpqua river bisects the Archie Creek fire area, and is considered a world-class fishery, known for its Steelhead runs. In addition to summer and winter steelhead, the North Umpqua is home to several species, including Oregon Coast coho salmon, spring Chinook salmon, cutthroat trout, and Pacific lamprey.

The impact of a fire of this magnitude will likely affect the North Umpqua and it’s tributaries for years to come, but we can help minimize additional resource damage by implementing the following;

- **As pumps get set up for mop-up, please keep fuel as far from the streams as possible, and make sure each pump has a containment kit.**
- **Avoid drafting from smaller streams – if you need help finding water sources, please contact a Resource Advisor, as most of them are local, have incredible knowledge of this area, and can assist with minimal response time.**
- **If working on hazard tree removal adjacent to larger streams such as Canton Creek and Rock Creek, please contact READ Jeff McEnroe at 541-537-0501.**

Weed Wash!!

The weed wash stations are still up and running! The objective, is to complete suppression repair and minimize damage to the natural resources. Thank you for your continued vigilance in helping us achieve that objective!

BOTH FIRES HAVE A WEED WASH.

- **Archie Creek Weed Wash location. (not at the ICP)**

Directions: Take 138 West into Glide, make a right (North) just West of the Glide Community Center (about 0.8 miles from Archie ICP). You'll see signs at the entrance. This is also the new Staging Area.

- **Thielsen Weed Wash location is at DP-3.**

PLEASE wash your vehicles during the following situations:

- **Prior to demob...DO NOT take our weeds home with you!**
- **Whenever logistically possible, wash equipment/vehicles prior to moving from the BLM/Private checkerboard to Forest Service- administered lands.**

****If you are just arriving to the Archie Creek or Thielsen Fire, take all vehicles through the weed wash before entering the fire areas.****

To review, please wash your vehicle / equipment upon:

1. Initial mobilization into camp;
2. Final demobilization;
3. Moving from BLM to FS;
4. As often as possible!

*Federal agencies and private industry spend thousands of dollars a year in the fight against noxious weeds as they spread from the valleys (or other infested areas) into un-infested Public Lands and plantations. Prevention is by far the most effective proactive weapon we have; it saves taxpayer dollars, and all it takes is a little extra time.

DEMOB INSTRUCTIONS

Follow all COVID-19 mitigations and steps below while demobing.

Demob steps for all resources (must be done in order):

1. Any resources that were off pavement must go through **weed wash**. See the **weed wash** page in this IAP for locations and further instructions.
2. Check out with **Ground Support** at either camp.
3. Turn in any radios to the **Communications Unit** and checked out supplies to the **Supply Unit** at either camp.
4. Call **Demob Unit @ 541-887-0815**
5. Call **Finance @ 509-949-3210 or 360-601-8820**
6. Scan this QR code and review the information on COVID.

If you follow this process you will be made available in the ordering system faster for your next assignment.

Any questions about the process please contact the Demob Unit at 541-887-0815.

Thank you and safe travels!

Human Resource Message – Archie Creek & Thielsen Fires October 15, 2020

International Shake Out Day & The Great Oregon Shake Out!

PNW Team 12 is one of the 27.7 million worldwide registered participants!

Scheduled for 10:15 A.M Thursday October 15, 2020

Shake Out Day is a day to practice earthquake safety. It is an annual event held on the third day of October. This is an international event where people from every country and every walk of life practice a “safety drill” to prepare themselves in case of an earthquake. Everyone everywhere should know how to protect themselves before, during and after earthquakes.

So, what happens if we are on a fire assignment and we have an earthquake? What would you do in the moment? This is something to consider for your, and your team-mate’s safety.

Follow the link below for additional information:

<https://www.shakeout.org/oregon/>

If an earthquake happens, protect yourself right away:

- If you are in a car, pull over and stop. Set your parking brake.
- If you are in bed, turn face down and cover your head and neck with a pillow.
- If you are outdoors, stay outdoors away from buildings, power poles and other aerial hazards.
- If you are inside, stay and do not run outside and avoid doorways.

After an earthquake, there can be serious hazards such as damage to the building, leaking gas and water lines, or downed power lines.

- Expect aftershocks to follow the main shock of an earthquake. Be ready to Drop, Cover, and Hold On if you feel an aftershock.
- If you are in a damaged building, go outside and quickly move away from the building. Do not enter damaged buildings.
- If you are trapped, protect your mouth, nose, and eyes from dust. Send a text, bang on a pipe or wall or use a whistle instead of shouting to help rescuers locate you.
- If you are in an area that may experience tsunamis, go inland or to higher ground immediately after the shaking stops.
- Check yourself to see if you are hurt and help others if you have training. Learn how to be the help until help arrives.
