To: All Incident Personnel, Archie Creek 2020

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

# FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 22	<b>TYPE OF FIRE:</b> Wildland	
<b>FIRE NAME:</b> Archie Creek	<b>OPERATIONAL PERIOD:</b> Day Shift	
<b>DATE ISSUED:</b> 9/30/2020	<b>TIME ISSUED:</b> 1600	<b>SHIFT DATE:</b> Thursday, October 1, 2020
<b>UNIT:</b> Umpqua NF	<b>SIGNED:</b> Greg Titus, FBAN	

## WEATHER SUMMARY:

See weather forecast in IAP for detailed forecast.

### Local Thresholds for Elevated Fire Behavior– Watch Outs

20-foot winds > 13 mph, **RH under 25%**, **Temperature over 85°**, 1,000-hour fuel moisture less than 12%.

## FIRE BEHAVIOR:

### GENERAL:

One- and ten-hour fuels will remain receptive to ignition. One-hour fuels will range from 4% in exposed locations to 7% in sheltered locations. Ten-hour fuels will be < 8%. 1000-hour fuels remain above critical levels at around 16%.

Fire behavior will be **minimal** today. No active fire spread is expected. **Smoldering** in stumps, snags, and downed heavy fuels will continue.

**Running** fire may occur if fire finds its way into previously unburned pockets. Torching is possible. No fire perimeter growth is expected.

If fire starts outside containment lines expect moderate running fire with occasional torching.

ERC's are slightly above average. ERC-G is 43 at Granddad RAWs. Critical ERC level 54-58.

Rate of spread and flame lengths are model outputs based on **maximum values** for the fuel models shown, with current fuel moistures in exposed locations on steep slope.

Fuel Model	Rate of Spread	Flame Length
Grass/Shrub (GS2)	15 chains/hour 17 feet/min	6 feet
Mature Timber (TU2 & TL5)	7 chains/hour 8 feet/min	4 feet

In **one hour** a spot fire would be approximately **2 acres** in timber and **6 acres** in grass/shrub.  
Probability of Ignition = **71%**

### Specific Areas of Concern:

#### All Divisions:

Any remaining heat source near the fire line.

**AIR OPERATIONS:** No concerns for Air Operations.

### SAFETY:

As things continue to smolder and the black looks more and more the same, remain **vigilant**.  
There is still **heat** in the fire area.

Remember these **Watch Out Situations!**

- # 11 - Unburned fuel between you and the fire.
- # 13 - On a hillside where rolling material can ignite material below.
- #18 - Taking a nap near the fireline.

IWI IC Responsibilities:					
<ul style="list-style-type: none"> <li>• Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – (Ex. Division A medical, Fish Meadows medical, Highway 21 accident.)</li> <li>• Assign or begin patient assessment Medical Incident Report (MIR) and first aid. Request additional medical resources on division/branch or across incident. Transmit MIR patient information to Communications.</li> <li>• Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible.</li> <li>• Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio.</li> <li>• Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required. <ul style="list-style-type: none"> <li>• As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.</li> </ul> </li> </ul>

## HEALTH AND SAFETY MESSAGE

*“Carefulness costs you nothing. Carelessness may cost you your life.”  
The Red Team*

<b>INCIDENT:</b> Archie Creek & Thielsen Fire	<b>DATE:</b> Thursday, October 1, 2020
<b>Major Hazards &amp; Risks:</b> <i>Hydration, Fatigue, Driving/ Heavy Equipment, Public Interface and Covid-19</i>	
<p><b>Hydration:</b> Personnel will need to monitor and increase their hydration intake throughout the day. Remember the recommended 3/1 water-to-sports drink ratios to maintain a healthy balance.</p> <p><b>Fatigue:</b> It has been a long season for most all of us. Long periods of multiple days spent working fires can take its toll on the best of us. Please take the time to take care of yourself. Frequent breaks, adequate rest, hydration, good eating habits and good personal hygiene practices will help mitigate the acclimated fatigue we all are facing.</p> <p><b>Driving/Heavy Equipment:</b> The Southern Area Red Team wants to thank everyone on the Incident for doing their part in safe operations. As we continue throughout the season, use deliberate actions when driving to and from the line such as avoiding distractions while driving, using spotters when parking and backing and driving defensively. Heavy equipment operations will continue to have specific hazards that continuously need mitigation. Needs for spotters and road guards around high traffic areas are paramount to safe operations.</p> <p><b>Increasing Public Interface:</b> Firearms hunting season will open in Western Oregon this Saturday October 3<sup>rd</sup>. With many deer hunters coming close to our Fire impacted areas for recreation. Expect to see an increase in traffic, people looking for camping sites within the forest, and the need to be very aware of public safety in fire impacted areas.</p> <p><b>Covid-19:</b> Continue to provide awareness and mitigations for Covid-19 prevention in all our daily operations. Do not let complacency put you, your co-workers, or families at risk. The wearing of masks within 6 feet of others, frequent hand washing, disinfecting workspaces, vehicles and monitoring your co-worker’s health are all proven ways to mitigate the spread.</p>	

*Thank you for your time and consideration*

*Archie Creek and Thielsen Fire Safety Officers: Larry Connell, Tommy Hawkins, Troy Floyd,  
Steve Gray, Gary Kemp, Chad Hyatt, and Brad Lidell*

## Daily COVID-19 Reminder

- **“MODULE OF ONE” Concept:** Resources assigned to the Archie Fire need to focus on reducing the amount of time they spend around other resources they do not need to directly work with. Please limit your exposure to other resources.
- **Cloth face coverings (MASKS):** All individuals must wear a mask when they are working in close quarters outside their “Module of One.”
  - Masks must cover your mouth and nose.
  - Lightly used medical masks are okay.
  - Supply has medical masks for distribution.
  - Masks need to be worn inside ICP buildings, and when social distancing is not practical (supply, ground support, briefing areas).
- **Hygiene:** All resources need to wash their hands before and after touching common items around camp.
- **Douglas County Community:** Please ensure that resources are following the above when they are visiting local area business.
- **Wildland Fire COVID-19 Screening Tool:** Apply the screening tool to yourself and any crew members you are responsible for.

If you have questions or concerns, please contact the Red Team COVID Coordinator  
Birk Roseman 850-363-7214 / [birk.roseman@usda.gov](mailto:birk.roseman@usda.gov)

# Noxious Weeds - Economic Impacts

Noxious weeds have a huge economic impact on Oregon communities. **Oregonians lose an estimated \$125 million a year to just 21 of Oregon's 137 state-listed noxious weeds.** Economic impacts include lost agricultural production, fire damage, control expenses, decreased property values, and increased food and consumer product costs.

As an example, Scotch broom has infested 1.5 million acres in Oregon and has an estimated economic impact of \$40-50 million per year. The largest costs attributed to Scotch broom are the increased inputs needed to establish trees on commercial and public timberlands.

Once Scotch broom is established, it is hard to eradicate. One healthy plant can produce over 10,000 seeds a year, and seeds can remain viable in the seed bank for 50-80 years. The pea-like pods burst in the summer, ejecting seeds up to 10 feet. Spot treatment with herbicides costs \$165/acre; mechanical treatments (pulling, cutting) can cost \$1000/acre, and, because of that long-lived seed bank, treatments might go on for the next 50 years.

Although 1.5 million infested acres and \$40-50 million a year sounds like a lot, there is a total of **7 million acres** of susceptible habitat in western and eastern Oregon. If all of this land were to become infested, the economic impact to Oregonians would be an estimated **\$180 million** a year.

**Prevention is our best tool.**

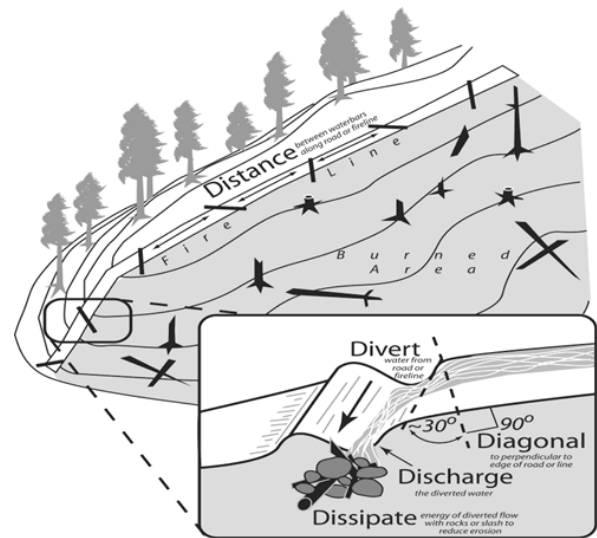

Use the weed wash.

Check clothing for seeds.

**Don't carry hitchhiker seeds home with you.**
