On Umpqua National Forest ownership, suppress the fire in the most efficient manner while maintaining a high probability of success protecting identified values.</p> <p>2. Tactical objectives will fit with strategic objectives for land ownership and will be based on effective and timely risk management and probability of success. Base all tactics on acceptable risk commensurate with values at risk.</p> <p>3. Values are first and foremost life, including responders and the public. Value priorities in order are:</p> <ul style="list-style-type: none"> • responder and public safety, • private land values and community infrastructure, • improvements, • cultural and natural resources. <p>4. To: All Incident Personnel, Archie Creek 2020

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

High pressure will begin to weaken over the area today, with the very warm and dry conditions continuing. The fire will have more of a coastal influence over the weekend, with good overnight humidity recoveries and cooler temperatures. Under high pressure ridging, the winds will continue to be slope driven as the winds aloft will be light through Saturday. A weak upper level disturbance will move across the fire on Sunday night into Monday and this will mainly be dry with no precipitation expected. The winds on Monday will become easterly, but expect wind speeds to remain relatively light, with the main effect of this being drier air moving into the area.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 23	TYPE OF FIRE: Wildland
FIRE NAME: Archie Creek	OPERATIONAL PERIOD: Day Shift
DATE ISSUED: 10/01/2020 TIME ISSUED: 1600	SHIFT DATE: Friday, October 2, 2020

WEATHER SUMMARY:

See weather forecast in IAP for detailed forecast.

Local Thresholds for Elevated Fire Behavior– Watch Outs

20-foot winds > 13 mph, RH under 25%, Temperature over 85°, 1,000-hour fuel moisture less than 12%.

FIRE BEHAVIOR:

GENERAL:

One- and ten-hour fuels will remain receptive to ignition. One-hour fuels will range from 4% in exposed locations to 8% in sheltered locations. Ten-hour fuels will be < 7%. 1000-hour fuels remain above critical levels at around 16%.

Fire behavior will be **minimal** today. No active fire spread is expected. **Smoldering** in stumps, snags, and downed heavy fuels will continue.

Running fire may occur if fire finds its way into previously unburned pockets. Torching is possible. No fire perimeter growth is expected.

If fire starts outside containment lines expect moderate running fire with occasional torching.

ERC's are slightly above average. ERC-G is 42 at Granddad RAWS. Critical ERC level 54-58.

Rate of spread and flame lengths are model outputs based on **maximum values** for the fuel models shown, with current fuel moistures in exposed locations on steep slope.

Fuel Model	Rate of Spread	Flame Length
Grass/Shrub (GS2)	12 chains/hour 10 feet/min	4 feet
Mature Timber (TU2 & TL5)	7 chains/hour 8 feet/min	3 feet

In **one hour** a spot fire would be approximately **2 acres** in timber and **5 acres** in grass/shrub.
Probability of Ignition = **71%**

Specific Areas of Concern:

All Divisions:

Any remaining heat source near the fire line.

Patches of unburned fuel near the lie.

Areas of open line or indirect line.

AIR OPERATIONS: No concerns for Air Operations.

SAFETY:

We are in the home stretch, not let your guard down now!

Putting out any remaining burning material today
reduces exposure to more burning material tomorrow.

Logs, Stumps, and snags are still smoldering and burning.

Be proactive, be alert, keep moving, and looking for the last of the remaining heat.

IWI IC Responsibilities:								
<ul style="list-style-type: none"> • Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – (Ex. Division A medical, Fish Meadows medical, Highway 21 accident.) • Assign or begin patient assessment Medical Incident Report (MIR) and first aid. Request additional medical resources on division/branch or across incident. Transmit MIR patient information to Communications. • Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible. • Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio. • Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required. <ul style="list-style-type: none"> • As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.

HEALTH AND SAFETY MESSAGE

*“We don’t plan on luck to be safe, we plan on sound risk management and good decisions.”
~ The Red Team*

INCIDENT: Archie Creek & Thielsen Fires | **DATE:** Friday October 02, 2020

Major Hazards & Risks: *Driving, Hazard Trees, Deer Gun Season*

Driving: More people and more trucks mean more potential for collisions. Gravel roads are not the only places that are narrow and winding. Watch out on those paved roads, too. **Log trucks** will be using the Canton Road to 138 and down into Roseburg. Be **extra cautious** near Base Camp in Glide. There is also **extremely heavy traffic** on 97 especially in **Chemult, at the Ranger Station** where turning traffic and pedestrians are present.

Hazard Trees: There is a high concentration of hazard trees over in Branch III especially in the Wright Creek area. If you are working in this area or passing through, be heads up and let the Division Supervisor (known as the Wright Creek Group) know you are entering the area. **Identify hazard trees, avoid them or remove them safely.**

Hunters and recreation riders are using off road vehicles on many of the same roads as fire personnel. **Heads up** on blind corners and drive defensively. Deer gun season starts tomorrow so beware.

Everett

- **“Situational Awareness” means seeing what occurs around you with your eyes and your mind. That is seeing what happened, what is happening and what might happen. It is critical thinking for today’s mission.**
- **To reach our goal of no serious injury, we need everyone to do their job and to help their neighbor.**

Archie Creek and Thielsen Fire Safety Officers: Larry Connell, Tommy Hawkins, Troy Floyd, Steve Gray, Gary Kemp, Chad Hyatt, Ivan Cupp, John Fugitt, Dick Gallaspy and Brad Lidell

Daily COVID-19 Reminder

- **“MODULE OF ONE” Concept:** Resources assigned to the Archie Fire need to focus on reducing the amount of time they spend around other resources they do not need to directly work with. Please limit your exposure to other resources.
- **Cloth face coverings (MASKS):** All individuals must wear a mask when they are working in close quarters outside their “Module of One.”
 - Masks must cover your mouth and nose.
 - Lightly used medical masks are okay.
 - Supply has medical masks for distribution.
 - Masks need to be worn inside ICP buildings, and when social distancing is not practical (supply, ground support, briefing areas).
- **Hygiene:** All resources need to wash their hands before and after touching common items around camp.
- **Douglas County Community:** Please ensure that resources are following the above when they are visiting local area business.
- **Wildland Fire COVID-19 Screening Tool:** Apply the screening tool to yourself and any crew members you are responsible for.

If you have questions or concerns, please contact the Red Team COVID Coordinator
Birk Roseman 850-363-7214 / birk.roseman@usda.gov
