To: All Incident Personnel, Archie Creek 2020

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 14	TYPE OF FIRE: Wildland
FIRE NAME: Archie Creek	OPERATIONAL PERIOD: Day Shift
DATE ISSUED: 9/22/2020 TIME ISSUED: 1300	SHIFT DATE: Wednesday, September 23, 2020
UNIT: Umpqua NF	SIGNED: Greg Titus, FBAN & Mike Ward, FBAN (t)

WEATHER SUMMARY:

See weather forecast in IAP for detailed forecast.

Local Thresholds for Elevated Fire Behavior– Watch Out

20-foot winds > 13 mph, RH under 25%, Temperature over 85°, 1,000-hour fuel moisture less than 12%.

FIRE BEHAVIOR:

GENERAL:

Active fire behavior can be expected as winds increase after inversion lifting mid to late morning. Heavy fuels and duff will continue to smolder and remain available for ignition. Live fuels are nearly cured and are still very volatile. Single tree torching possible, particularly in transitional areas between clear cuts and mature timber stands. Spotting distances up to 0.25 miles from ridge top torching trees. Fire spread will be terrain and wind driven. Potential for strong terrain influenced wind gusts.

ERC's are at average for this time of year. ERC values are expected to remain in this range the next few days and will drop considerably with the next rain event.

Rate of spread and flame lengths are based on maximum values for the fuel models shown, exposed fuels on steep slope.

Fuel Model	Rate of Spread	Flame Length
Grass/Shrub (GS2)	17 - 64 feet/minute	4 - 8 feet
Mature Timber (TU2 & TL5)	8-28 feet/minute	3-6 feet

In **one hour** new spot fires can reach **19 acres in timber stands & 66 acres in exposed grass/shrub areas.**

Probability of Ignition = 48%

Specific Areas of Concern:

Branch I

Divisions R&S - The area near Emile creek and the Little River is of most concern, keeping fire from further progressing up the Emile Creek drainage towards Emile and Grotto Falls is critical. Spread potential is moderate. Wind alignment with steep slopes likely.

Branch II

Division E & F – The main heat is centered around the E & F division break. Potential for spotting across containment lines from heat sources near the line or torching ridgetop trees as winds pick up and fuels continue to dry during the day.

Branch III

Division N – The area of concern is along the Panther Creek road where fire has moved across the road in several locations.

AIR OPERATIONS: High gusting winds may effect Air Operations.

SAFETY:

High Winds, Narrow Roads, Snags and Active Fire Potential

Fire behavior expected to increase due to high winds.

This situation shouts **watch out** for many reasons. For this fire, **Escape Routes** could be compromised by falling trees and snags over narrow mountain roads. If your escape route requires driving on secondary and tertiary roads in steep terrain consider your options and actions throughout the day.

<ul style="list-style-type: none"> • Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – (Ex. Division A medical, Fish Meadows medical, Highway 21 accident.) • Assign or begin patient assessment Medical Incident Report (MIR) and first aid. Request additional medical resources on division/branch or across incident. Transmit MIR patient information to Communications. • Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible. • Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio. • Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required. <ul style="list-style-type: none"> • As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.

HEALTH AND SAFETY MESSAGE

“We don’t plan on luck to be safe, we plan on sound risk management and good decisions.” ~ The Red Team

INCIDENT: ARCHIE CREEK	DATE: Wednesday September 23, 2020
Major Hazards & Risks: Complacency, fatigue, Driving, High Winds!	
<i>The Pine Gulch has received some good precip and cooler temps ... the roads are busy with logging/fire traffic.</i>	
<p>We have heard it our whole fire career, “Don’t get complacent.” That term gets thrown around so much that it gets dismissed. Is that complacency itself? It reminds me of when the Safety Officer at morning briefings states “Be safe out there.” We have all heard it and rolled our eyes or had other thoughts on our mind rather than really thinking about it. This is not a jab at safety officers, they have a constant struggle to keep people engaged with the common priority of firefighter and public safety. It’s a hard job, and obviously no one wakes up and tries to put themselves in harm’s way. So after some thought we decided to look at how complacency is defined and what it should mean to us in the fire environment.</p> <p>Merriam Webster: self-satisfaction especially when accompanied by unawareness of actual dangers or deficiencies.</p> <p>Dictionary.com: a feeling of quiet pleasure or security, often while unaware of some potential danger, defect, or the like; self-satisfaction or smug satisfaction with an existing situation, condition, etc.</p> <p>Cambridge Dictionary: a feeling of calm satisfaction with your own abilities or situation that prevents you from trying harder.</p> <p>Freedictionary.com: A feeling of contentment or self-satisfaction, especially when coupled with an unawareness of danger, trouble, or controversy.</p> <p>All of these have a common theme. A general feeling that things are ok and you are comfortable. In other words things are routine, ops normal, ops redundant. So let ask ourselves a few questions to gauge where we are at currently.</p> <p>Are we in a routine situation? Are we fatigued to the point where we think everything is routine? Are we dismissive to a hazard, later in the season, that would have drawn more attention to earlier in fire season? What can we control currently?</p> <p>We have no silver bullet to stop complacency. Recognition of our surroundings may be the first step. <i>Currently we have little fire to fight and are in the suppression repair business which is repetitive and tedious.</i> It has been a long fire season already, and maybe we’re short on rest and fatigued. There may be external factors that distract us from the task at hand. This is a classic recipe for complacency and a potential accident, injury, or worse.</p> <p>IDEAS! Communicate with each other to ensure it’s a priority to stay engaged on risk vs. benefit. Being vigilant in your attention to task and your surroundings is one thing we can control and keep in mind nothing is routine, ever. <i>“Look up, look down, and look around. Stop, think, before you act. If you see something, say something.”</i></p> <p>HEADS UP! High winds Expected today from the SSW 15 mph, <u>Gusts to 30 mph</u> in front of a “wetting rain” cold front</p>	

*Thank you for your time and consideration
Your Red Team Safety Officers*

Daily COVID-19 Reminder

- **“MODULE OF ONE” Concept:** Resources assigned to the Archie Fire need to focus on reducing the amount of time they spend around other resources they do not need to directly work with. Please limit your exposure to other resources.
- **Cloth face coverings (MASKS):** All individuals must wear a mask when they are working in close quarters outside their “Module of One.”
 - Masks must cover your mouth and nose.
 - Lightly used medical masks are okay.
 - Supply has medical masks for distribution.
 - Masks need to be worn inside ICP buildings, and when social distancing is not practical (supply, ground support, briefing areas).
- **Hygiene:** All resources need to wash their hands before and after touching common items around camp.
- **Douglas County Community:** Please ensure that resources are following the above when they are visiting local area business.
- **Wildland Fire COVID-19 Screening Tool:** Apply the screening tool to yourself and any crew members you are responsible for.

If you have questions or concerns, please contact the Red Team COVID Coordinator

Weed Wash

Weed washes is up and running! The purpose of weed wash is to prevent the spread of invasive plants throughout the incident by removing their seeds.

Please visit the weed wash at ICP

Several of you have already been working on the line, and in that case, we ask that you wash your vehicles in the following situations:

1. Initial mobilization into camp
2. Final demobilization
3. Moving from Branch I to Branch II and III, or from BLM to FS
4. As often as possible

*Federal agencies and industry spend thousands of dollars a year in the fight against noxious weeds as they spread from the valleys (or other infested areas) into uninfested Public Lands and plantations. Prevention is by far the most effective and proactive weapon we have as it saves taxpayer dollars and takes little extra time to accomplish.

Raptors!

The Archie Creek Fire area is home to several species of raptors that are of resource concern to the BLM and USFS.

What's a raptor? Raptors include birds of prey such as eagles, hawks, falcons, and owls. All raptors have a hooked beak, sharp talons, keen eyesight, and a carnivorous diet.

Fun fact: raptors have three eyelids! They have a top and bottom eyelid plus a third, transparent eyelid which closes laterally across the eye.

Raptors of conservation concern found in the area:

Bald Eagle

Golden Eagle

Northern Spotted Owl

Peregrine Falcon

Raptors of conservation concern not found in the area:

(Velociraptor)
