ARCHIE CREEK	Date/Time From: 09/24/2020 0630 THU	Date/Time To: 09/24/2020 2000 THU
<b>3. Objective(s):</b>		
<p>1. Strategic suppression objectives are to minimize acres burned on private lands and O&amp;C lands managed by BLM. On Umpqua National Forest ownership, suppress the fire in the most efficient manner while maintaining a high probability of success protecting identified values.</p> <p>2. Tactical objectives will fit with strategic objectives for land ownership and will be based on effective and timely risk management and probability of success. Base all tactics on acceptable risk commensurate with values at risk.</p> <p>3. Values are first and foremost life, including responders and the public. Value priorities in order are:</p> <ul style="list-style-type: none"> <li>• responder and public safety,</li> <li>• private land values and community infrastructure,</li> <li>• improvements,</li> <li>• cultural and natural resources.</li> </ul> <p>4. Follow guidelines to minimize exposure of yourself and those you interact with from the Covid-19 virus. This generally includes daily monitoring, social distancing, hand washing, and wear masks when necessary.</p> <p>5. Provide timely information to the public, cooperators, local community, and host agency. Maintain or improve community and visitor relations through positive communications.</p> <p>6. Provide initial attack within the TFR.</p>		
<b>4. Operational Period Command Emphasis:</b>		
COVID mitigations. Take advantage of higher fuel moistures and rainfall affects.		
<b>General Situational Awareness:</b>		
<ul style="list-style-type: none"> <li>• Refer to the attached weather forecast provided by the FBAN.</li> <li>• Good personal hygiene, maintaining social distancing and the use of PPE are some of the most effective ways to protect ourselves and others from many illnesses</li> </ul>

To: All Incident Personnel, Archie Creek 2020

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 15	<b>TYPE OF FIRE:</b> Wildland
<b>FIRE NAME:</b> Archie Creek	<b>OPERATIONAL PERIOD:</b> Day Shift
<b>DATE ISSUED:</b> 9/23/2020 <b>TIME ISSUED:</b> 1300	<b>SHIFT DATE:</b> Thursday, September 24, 2020
<b>UNIT:</b> Umpqua NF	<b>SIGNED:</b> Greg Titus, FBAN & Mike Ward, FBAN (t)

### WEATHER SUMMARY:

See weather forecast in IAP for detailed forecast.

### Local Thresholds for Elevated Fire Behavior– Watch Out

20-foot winds > 13 mph, RH under 25%, Temperature over 85°, 1,000-hour fuel moisture less than 12%.

### FIRE BEHAVIOR:

#### GENERAL:

Fire behavior will be very subdued today due to the overnight rainfall. No active fire spread is expected. Smoldering in stumps and duff in very sheltered areas will continue. No expected fire perimeter growth.

ERC's will be below average for this time of year. ERC values will have dropped considerably due to the rain event.

Rate of spread and flame lengths are based on **maximum values** for the fuel models shown, exposed fuels on steep slope.

Fuel Model	Rate of Spread	Flame Length
Grass/Shrub (GS2)	< 8 chains/hour < 10 feet/min	2 feet
Mature Timber (TU2 & TL5)	< 7 chains/hour < 8 feet/min	3 feet

In **one hour** a spot fire would be less than 3 acres.

**Probability of Ignition = 21%**

#### Specific Areas of Concern:

No areas of special concern today. All areas of the fire will be very subdued due to the overnight rainfall.

**AIR OPERATIONS:** Cloud cover could affect Air Operations.

#### SAFETY:

### Smoldering Fire – The Concealed Danger.

**Smoldering** is one stage of combustion of wildland fuels. It occurs after the flaming front has passed and is most commonly encountered during mop-up. Think of glowing embers.

The fundamental difference between **smoldering** and flaming combustion is that smoldering occurs on the surface of the solid rather than in the gas phase.

**Smoldering** occurs at a lower temperature than flaming combustion, thus it can be harder to detect. Feeling for heat with an ungloved hand may be needed to detect smoldering combustion.

**Smoldering** propagates in a creeping fashion, moving many times slower than flames.

**Smoldering** presents a significant hazard in wildland fire in that it can easily transition to a flaming fire. Think of that little ember hidden in a slash pile. With a decrease in fuel or oxygen, the fire reduces to embers and ash. This is a dangerous phase because any introduction of new fuel loads or increase in oxygen could reinvigorate the fire. This is the longest stage of a fire; in fact, it often takes weeks to fully extinguish all embers and firebrands from a large fire.

Mop-up of **smoldering** fire near containment lines is essential for complete containment and control of wildland fire.

**Smoldering** fire also emits toxic gases (e.g., carbon monoxide, cyanide, ammonia, etc.) and particulates at a higher yield than flaming fires. Rotate crews during heavy mop-up.

# HEALTH AND SAFETY MESSAGE

*“We don’t plan on luck to be safe, we plan on sound risk management and good decisions.”  
~ The Red Team*

**INCIDENT:** Archie Creek Wildfire      **DATE:** Thursday September 24, 2020

**Major Hazards & Risks:**      *Driving, Footing, Trees*

DRIVING TODAY... Rain has affected most roads. Soft shoulders, slick surfaces and debris could be awaiting you. Slow down and expect others to be driving toward you or working along roads.

FOOTING TODAY... Watch out for slick rocks, limbs and metal surfaces (engines, equipment, port-a-pots). A fall can put you out of work quickly.

HAZARD TREES Today... Some areas have been several days since the fire burned them. Rain, wind and time have a deadly effect on trees. Look up and identify danger.

### Short-Haul Helicopter

- Capable of inserting EMPF & gear into tight canopy or steep terrain up to 350 feet
- EMT or Medical Incident IC requests medical extraction using Medical Incident Report
- Confirm aircraft type, call sign, estimated time of arrival and frequency
- Give information when ordering: hazards (i.e. ash, smoke, snags, aerial), tree height, terrain; patient transport configuration (supine or seated position).
- When helicopter contacts IWI IC, repeat hazards, weather conditions and patient status.

The helicopter will fly to the coordinates provided. They will make contact with ground personnel on scene with the patient using an identified air-to-ground frequency. The helicopter will complete a short-haul recon and size up, gather patient update information and then fly to a landing zone (LZ) to configure for short-haul operations. The helicopter will be monitoring the appropriate air-to-ground, air guard and victor frequencies. From this point, ground resources should only contact the helicopter in case of an emergency. During the insertion and extraction process ground personnel must be clear of the area.

## Daily COVID-19 Reminder

- **“MODULE OF ONE” Concept:** Resources assigned to the Archie Fire need to focus on reducing the amount of time they spend around other resources they do not need to directly work with. Please limit your exposure to other resources.
- **Cloth face coverings (MASKS):** All individuals must wear a mask when they are working in close quarters outside their “Module of One.”
  - Masks must cover your mouth and nose.
  - Lightly used medical masks are okay.
  - Supply has medical masks for distribution.
  - Masks need to be worn inside ICP buildings, and when social distancing is not practical (supply, ground support, briefing areas).
- **Hygiene:** All resources need to wash their hands before and after touching common items around camp.
- **Douglas County Community:** Please ensure that resources are following the above when they are visiting local area business.
- **Wildland Fire COVID-19 Screening Tool:** Apply the screening tool to yourself and any crew members you are responsible for.

If you have questions or concerns, please contact the Red Team COVID Coordinator  
Birk Roseman 850-363-7214 / [birk.roseman@usda.gov](mailto:birk.roseman@usda.gov)

## Wildland Fire COVID-19 Screening Tool

### **DO YOU HAVE ANY OF THESE SYMPTOMS?**

Today or in the past 24 hours, have you had a fever or a combination of more than one of the other any symptoms listed below **in addition to your normal work-related issues?**

- Fever, felt feverish, or had chills? Repeated shaking with chills?
- Cough? Shortness of breath or difficulty breathing?
- Muscle pain? Headache? Sore throat?
- New loss of taste and/or smell?

In the past 14 days, have you had contact with a person known to be infected with the coronavirus (COVID-19)?

**DOCUMENT IN YOUR 214 THAT YOUR CREW AND YOU HAVE CONDUCTED SELF SCREENING EVERY DAY.**

*\*Take temperature with touchless thermometer if available\**

### Wildland Fire COVID-19 Symptom Protocols

**If you or a member of your crew have symptoms related to COVID-19:**

- **Remove the individual from work duties.**
- **Do not announce that someone has symptoms, step aside, and report to Medical.**
- **Wait for clearance to return to duty.**

**To best protect all Archie Fire resources, please log the “CONTACT” you and your crew may have had each day in your 214.**

- **Contact: exposure to individuals outside of your “Module of One” that is within 6 feet and lasts longer than 15 minutes.**

If you have questions or concerns, please contact the Red Team COVID Coordinator

# Weed Wash

Weed washes is up and running! The purpose of weed wash is to prevent the spread of invasive plants throughout the incident by removing their seeds.

## Please visit the weed wash at ICP

Several of you have already been working on the line, and in that case, we ask that you wash your vehicles in the following situations:

1. Initial mobilization into camp
2. Final demobilization
3. Moving from Branch I to Branch II and III, or from BLM to FS
4. As often as possible

\*Federal agencies and industry spend thousands of dollars a year in the fight against noxious weeds as they spread from the valleys (or other infested areas) into uninfested Public Lands and plantations. Prevention is by far the most effective and proactive weapon we have as it saves taxpayer dollars and takes little extra time to accomplish.

# Thank You

On behalf of Roseburg District Bureau of Land Management, Umpqua National Forest, and all cooperators on this incident, we'd just like to thank you for your efforts to clean up trash and other debris around and within the fire area. Several of us who have worked on incidents around the West and the nation have noticed how 'clean' our work areas / Divisions have been. Thanks again for your diligence and keep up the great work!

**Cheers!**
