To: All Incident Personnel, Archie Creek 2020

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 18	TYPE OF FIRE: Wildland
FIRE NAME: Archie Creek	OPERATIONAL PERIOD: Day Shift
DATE ISSUED: 9/26/2020 TIME ISSUED: 1300	SHIFT DATE: Sunday, September 27, 2020
UNIT: Umpqua NF	SIGNED: Greg Titus, FBAN & Mike Ward, FBAN (t)

WEATHER SUMMARY:

See weather forecast in IAP for detailed forecast.

Local Thresholds for Elevated Fire Behavior– Watch Out

20-foot winds > 13 mph, RH under 25%, Temperature over 85°, 1,000-hour fuel moisture less than 12%.

FIRE BEHAVIOR:

GENERAL:

Fire behavior will be **minimal** today due to the increased fuel moistures. No active fire spread is expected. Some **creeping** fire may be found in previously unburned fuels and needle/leaf drop. **Smoldering** in stumps, snags, and downed heavy fuels may continue. No expected fire perimeter growth.

ERC's are well below average for this time of year. ERC values have drop considerably due to the recent rain events. ERC values will rise over the next four to five days to above average levels but are not expected to reach critical levels.

Rate of spread and flame lengths are model outputs based on **maximum values** for the fuel models shown, with current fuel moistures in exposed locations on steep slope.

Fuel Model	Rate of Spread	Flame Length
Grass/Shrub (GS2)	< 19 chains/hour < 21 feet/min	5 feet
Mature Timber (TU2 & TL5)	< 10 chains/hour < 11 feet/min	3 feet

In **one hour** a spot fire would be less than **5 acres** in timber and **17 acres** in grass/shrub.

Probability of Ignition = **53%**

Specific Areas of Concern:

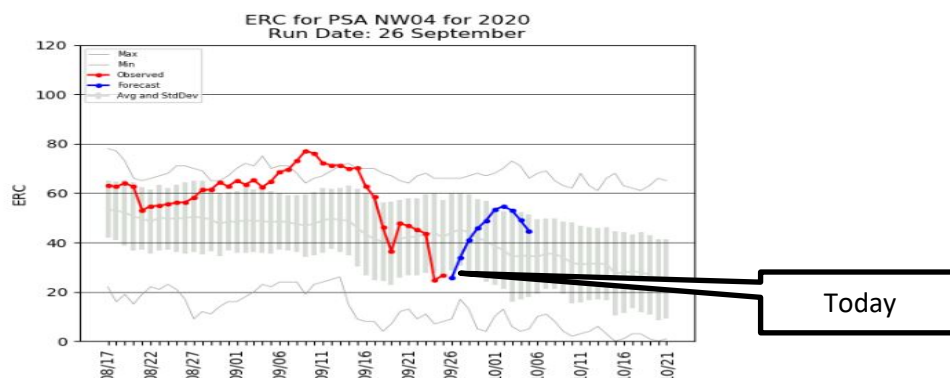

No areas of special concern today for fire behavior.

AIR OPERATIONS: No concerns for Air Operations.

SAFETY:

Watch Out Situation 14 is emphasized today: **Weather becoming hotter and drier.**

While the fire has not shown much activity over the last few days, heat is still available to rekindle unburned fuels. The next few days are forecast to be hotter and drier with easterly winds. We will see more smokes pop up and even some creeping surface fire. ERC values are forecast to rise over the next five days.

<p>IWI IC Responsibilities:</p> <ul style="list-style-type: none"> • Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – (Ex. Division A medical, Fish Meadows medical, Highway 21 accident.) • Assign or begin patient assessment Medical Incident Report (MIR) and first aid. Request additional medical resources on division/branch or across incident. Transmit MIR patient information to Communications. • Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible. • Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio. • Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required. • As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.

Daily COVID-19 Reminder

- **“MODULE OF ONE” Concept:** Resources assigned to the Archie Fire need to focus on reducing the amount of time they spend around other resources they do not need to directly work with. Please limit your exposure to other resources.
- **Cloth face coverings (MASKS):** All individuals must wear a mask when they are working in close quarters outside their “Module of One.”
 - Masks must cover your mouth and nose.
 - Lightly used medical masks are okay.
 - Supply has medical masks for distribution.
 - Masks need to be worn inside ICP buildings, and when social distancing is not practical (supply, ground support, briefing areas).
- **Hygiene:** All resources need to wash their hands before and after touching common items around camp.
- **Douglas County Community:** Please ensure that resources are following the above when they are visiting local area business.
- **Wildland Fire COVID-19 Screening Tool:** Apply the screening tool to yourself and any crew members you are responsible for.

If you have questions or concerns, please contact the Red Team COVID Coordinator
Birk Roseman 850-363-7214 / birk.roseman@usda.gov

Catch of the Day

This photo is believed to be from the lower North Umpqua, circa 1930-1940s.

‘A bad day fishing beats a good day at work,’ as the old saying goes.... but not to worry, there aren’t very many bad fishing days on the North Umpqua river...

The North Umpqua river bisects the Archie Creek fire area, and is considered a world-class fishery, known for its Steelhead runs. In addition to summer and winter steelhead, the North Umpqua is home to several species, including Oregon Coast coho salmon, spring Chinook salmon, cutthroat trout, and Pacific lamprey.

The impact of a fire of this magnitude will likely affect the North Umpqua and its tributaries for years to come, but we can help minimize additional resource damage by implementing the following;

- As pumps get turned back in after mop-up, please continue to keep fuel as far from the streams as possible and ensure spill pads are disposed of properly.
- Install effective water bars – there are several streams that are within areas that experienced high-severity burns, so we need to do the most we can to prevent during suppression repair on dozer and handlines to reduce sediment runoff into the creeks.
- If working on hazard tree removal adjacent to larger streams such as Canton Creek and Rock Creek, please contact READ Jeff McEnroe at 541-537-0501.
