INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY	
ARCHIE CREEK		Date/Time From: 09/28/2020 0630 MON	Date/Time To: 09/28/2020 2000 MON
3. Objective(s):			
<p>1. Strategic suppression objectives are to minimize acres burned on private lands and O&C lands managed by BLM. On Umpqua National Forest ownership, suppress the fire in the most efficient manner while maintaining a high probability of success protecting identified values.</p> <p>2. Tactical objectives will fit with strategic objectives for land ownership and will be based on effective and timely risk management and probability of success. Base all tactics on acceptable risk commensurate with values at risk.</p> <p>3. Values are first and foremost life, including responders and the public. Value priorities in order are:</p> <ul style="list-style-type: none"> • responder and public safety, • private land values and community infrastructure, • improvements, • cultural and natural resources. <p>4. Follow guidelines to minimize exposure of yourself and those you interact with from the Covid-19 virus. This generally includes daily monitoring, social distancing, hand washing, and wear masks when necessary.</p> <p>5. Provide timely information to the public, cooperators, local community, and host agency. Maintain or improve community and visitor relations through positive communications.</p> <p>6. Provide initial attack within the TFR.</p>			
4. Operational Period Command Emphasis:			
COVID mitigations. Take advantage of higher fuel moistures and rainfall affects.			
General Situational Awareness:			
<ul style="list-style-type: none"> • Refer to the attached weather forecast provided by the FBAN. • Good personal hygiene, maintaining social distancing and the use of PPE are some of the most effective ways to protect ourselves and others from many illnesses

To: All Incident Personnel, Archie Creek 2020

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 19	TYPE OF FIRE: Wildland
FIRE NAME: Archie Creek	OPERATIONAL PERIOD: Day Shift
DATE ISSUED: 9/27/2020 TIME ISSUED: 1300	SHIFT DATE: Monday, September 28, 2020
UNIT: Umpqua NF	SIGNED: Greg Titus, FBAN

WEATHER SUMMARY:

See weather forecast in IAP for detailed forecast.

Local Thresholds for Elevated Fire Behavior– Watch Outs

20-foot winds > 13 mph, RH under 25%, Temperature over 85°, 1,000-hour fuel moisture less than 12%.

FIRE BEHAVIOR:

GENERAL:

One- and ten-hour fuels will become receptive to ignition. One-hour fuels will range from 3% in exposed locations to 6% in sheltered locations. Ten-hour fuels will be < 10%.

Fire behavior will be **moderate** today, but more active than previous days as fuels dry from the last rain event. No active fire spread is expected. **Smoldering** in stumps, snags, and downed heavy fuels will continue. **Creeping** fire may be found in needle/leaf drop that are adjacent to the smoldering heat sources. **Running** fire may occur if fire finds its way into previously unburned pockets. Single and group tree torching is possible. No fire perimeter growth is expected. If fire starts outside containment lines expect running fire with torching and spotting.

ERC's are below average for this time of year. ERC values will rise over the next four to five days to above average levels but are not expected to reach critical levels.

Rate of spread and flame lengths are model outputs based on **maximum values** for the fuel models shown, with current fuel moistures in exposed locations on steep slope.

Fuel Model	Rate of Spread	Flame Length
Grass/Shrub (GS2)	30 chains/hour 33 feet/min	6-7 feet
Mature Timber (TU2 & TL5)	20 chains/hour 22 feet/min	4-6 feet

In **one hour** a spot fire would be approximately **10 acres** in timber and **30 acres** in grass/shrub.
Probability of Ignition = **81%**

Specific Areas of Concern:

All Divisions:

Unburned pockets of fuel near the line.

Areas where roll out is possible, steep slope with unburned fuels below.

Areas of heavy needle and leaf drop that could reburn.

Jackpots of heavy fuels that have retained heat.

AIR OPERATIONS: Gusty winds may be a concern for Air Operations.

SAFETY:

The fire has not done much the last few days. Today could be a very different day.

Maintain your situational awareness. Do not let your guard down.

Play the what if game.

Have a plan. Be prepared to implement your plan.

<ul style="list-style-type: none"> • Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – (Ex. Division A medical, Fish Meadows medical, Highway 21 accident.) • Assign or begin patient assessment Medical Incident Report (MIR) and first aid. Request additional medical resources on division/branch or across incident. Transmit MIR patient information to Communications. • Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible. • Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio. • Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required. <ul style="list-style-type: none"> • As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.

HEALTH AND SAFETY MESSAGE

*“We don’t plan on luck to be safe, we plan on sound risk management and good decisions.”
~ The Red Team*

INCIDENT: Archie Creek & Thielsen Fire | **DATE:** Monday September 28, 2020

Major Hazards & Risks: Easterly Winds, Heavy Equipment, Chippers & Covid - 19

Heads up for potentially strong Easterly winds this week: More so for the Archie Creek Fire than the Thielsen Fire. It was exceptionally strong easterly winds that drove the Archie Creek and other large fires in the State of Oregon in early September.

Heavy Equipment and Falling Snags:

There is a lot of heavy equipment on both of fires and likely more to come for suppression rehabilitation, road maintenance, and fuels reduction. With that brings large transports needed to move the equipment into and around the fire. This movement causes congestion and driving delays in these areas. You can help reduce the possibility of having an accident by driving slowly, alert and defensively. When you park in these areas make sure your vehicle does not block the travel way on these roads. If you are a passenger while the driver is backing **offer to get out and be a spotter**. These are certainly accidents that can be prevented. In addition to the heavy equipment, there will be fallers along interior roads to fell hazard trees. Fallers make sure you have road guards before felling trees along roadways.

Chippers:

There are at least 5 chipper operations on the Archie Fire and 1 on the Thielsen Fire. It is important that all resources working with the chipper be briefed on safe working practices and sign the JHA for chipper operation before using the chipper. The operator of the chipper is to be trained and qualified. That will likely be the owner or employee of the chipper contractor.

COVID-19 Message:

DUTY – It is our duty to do our jobs safely. Safety includes following these CDC guidelines:

- Wearing a Mask (where feasible)
- Washing your Hands (where you can)
- Maintaining Social Distancing (in briefings and around camp)

RESPECT – Have respect for your crew, your family and yourself by following the CDC guidelines above both on and off duty. When in the office or vehicles with your co-workers, wear a mask to respect the “Module as One”. Remember your off-duty behavior will influence the health and wellbeing of your crew and their families too.

INTEGRITY – Do all these things even when no one is watching. This way you show up for everyone in your life in the best way you can.

Thank you for your time and consideration

Archie Creek and Thielsen Fire Safety Officers: Larry Connell, Tommy Hawkins, Troy Floyd, Steve Gray, Gary Kemp, Steve Donnelly, Chad Hyatt, and Brad Lidell

Daily COVID-19 Reminder

- **“MODULE OF ONE” Concept:** Resources assigned to the Archie Fire need to focus on reducing the amount of time they spend around other resources they do not need to directly work with. Please limit your exposure to other resources.
- **Cloth face coverings (MASKS):** All individuals must wear a mask when they are working in close quarters outside their “Module of One.”
 - Masks must cover your mouth and nose.
 - Lightly used medical masks are okay.
 - Supply has medical masks for distribution.
 - Masks need to be worn inside ICP buildings, and when social distancing is not practical (supply, ground support, briefing areas).
- **Hygiene:** All resources need to wash their hands before and after touching common items around camp.
- **Douglas County Community:** Please ensure that resources are following the above when they are visiting local area business.
- **Wildland Fire COVID-19 Screening Tool:** Apply the screening tool to yourself and any crew members you are responsible for.

If you have questions or concerns, please contact the Red Team COVID Coordinator
Birk Roseman 850-363-7214 / birk.roseman@usda.gov

Wildland Fire COVID-19 Screening Tool

DO YOU HAVE ANY OF THESE SYMPTOMS?

Today or in the past 24 hours, have you had a fever or a combination of more than one of the other any symptoms listed below **in addition to your normal work-related issues?**

- Fever, felt feverish, or had chills? Repeated shaking with chills?
- Cough? Shortness of breath or difficulty breathing?
- Muscle pain? Headache? Sore throat?
- New loss of taste and/or smell?

In the past 14 days, have you had contact with a person known to be infected with the coronavirus (COVID-19)?

DOCUMENT IN YOUR 214 THAT YOUR CREW AND YOU HAVE CONDUCTED SELF SCREENING EVERY DAY.

Take temperature with touchless thermometer if available

Wildland Fire COVID-19 Symptom Protocols

- If you or a member of your crew have symptoms related to COVID-19:**
 - **Remove the individual from work duties.**
 - **Do not announce that someone has symptoms, step aside, and report to Medical.**
 - **Wait for clearance to return to duty.**
- To best protect all Archie Fire resources, please log the “CONTACT” you and your crew may have had each day in your 214.**
 - **Contact: exposure to individuals outside of your “Module of One” that is within 6 feet and lasts longer than 15 minutes.**

If you have questions or concerns, please contact the Red Team COVID Coordinator

NOXIOUS WEEDS

Noxious weeds are nonnative, invasive plant species that cause ecological and/or economical harm. Nonnative plant species can change fire regimes, form monocultures, and displace native plant communities and the wildlife that depend on those communities.

Rush skeletonweed was accidentally introduced to the US in contaminated animal fodder in 1914. While not yet common in our area, plants often go unnoticed until infestations are large since the wiry, rush-like stems tend to blend in with grasses until the plants are in flower.

Rush skeletonweed produces dandelion-like seeds which can travel up to 20 miles in wind currents. The plants have taproots that can be up to 6.5 feet deep, and root fragments left in the soil up to four feet deep can regenerate new growth. These characters make rush skeletonweed especially difficult to control – prevention is key!

Medusahead was first introduced to the US in 1887, most likely as a hitchhiker in the fur of livestock. The plant was first recorded in our very own Roseburg, Oregon! From here, the plant spread concentrically, arriving in eastern Washington by 1901, California by 1908, and Idaho and Nevada by the 1960s. In the rangelands of the western US, medusahead is spreading at a rate of ~ 12% a year.

Medusahead is an annual grass species capable of producing dense monocultures. In this part of Oregon, the plant is an invader in our oak and meadow systems, displacing wildlife habitat and native plants important to pollinator species.

Help prevent the spread of noxious weeds and other invaders! Wash your vehicle (especially the undercarriage) as much as possible, but at the least;

- **before bringing equipment into the fire area.**
- **again before you demob.**

Don't take our noxious weed seeds home with you!

-- Weed Wash stations are located at the Fairgrounds ICP and the Glide Mill site --

Demob Tips

Archie Creek Fire OR-UPF-000436

For emergency or urgent demobs contact your supervisor first and then contact the Demob Unit directly at 2020.archiecreek.dmob@firenet.gov (425) 324-1267

After being notified by your supervisor of your tentative release date:

Step 1. Visit Demob for your Demobilization Checkout sheet.

Step 2. Return all supplies, radios, etc. that were checked out.

Step 3. All vehicles that have been on the fireline must go through the weed wash.

Location:

- Douglas County Fairgrounds in Roseburg, OR (regular vehicles/crummies/engines)

Step 4. Visit Finance to receive your OF-288 or OF-286.

AFTER steps 1-4 are completed:

Step 5. Return your Demobilization Checkout Sheet to Demob, you are released from the incident and may begin travel home. **Safe Travels!**
