On Umpqua National Forest ownership, suppress the fire in the most efficient manner while maintaining a high probability of success protecting identified values.</p> <p>2. Tactical objectives will fit with strategic objectives for land ownership and will be based on effective and timely risk management and probability of success. Base all tactics on acceptable risk commensurate with values at risk.</p> <p>3. Values are first and foremost life, including responders and the public. Value priorities in order are:</p> <ul style="list-style-type: none"> • responder and public safety, • private land values and community infrastructure, • improvements, • cultural and natural resources. <p>4. Follow guidelines to minimize exposure of yourself and those you interact with from the Covid-19 virus. This generally includes daily monitoring, social distancing, hand washing, and wear masks when necessary.</p> <p>5. To: All Incident Personnel, Archie Creek 2020

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 26	TYPE OF FIRE: Wildland
FIRE NAME: Archie Creek	OPERATIONAL PERIOD: Day Shift
DATE ISSUED: 10/04/2020 TIME ISSUED: 1600	SHIFT DATE: Monday October 5, 2020
UNIT: Umpqua NF	SIGNED: Greg Titus, FBAN

WEATHER SUMMARY:

See weather forecast in IAP for detailed forecast.

Local Thresholds for Elevated Fire Behavior– Watch Outs

20-foot winds > 13 mph, RH under 25%, Temperature over 85°, 1,000-hour fuel moisture less than 12%.

FIRE BEHAVIOR:

GENERAL:

One- and ten-hour fuels will remain receptive to ignition. One-hour fuels in 6% in exposed locations to 9% in sheltered locations. Ten-hour fuels, 7%. 1000-hour fuels remain above critical levels at around 14%.

Fire behavior will be **minimal** today. No active fire spread is expected. **Smoldering** in stumps, snags, and downed heavy fuels will continue. **Creeping** fire may occur in areas with **needle/leaf drop**. No fire perimeter growth is expected.

If fire starts outside containment lines expect moderate running fire with occasional torching.

ERC values are slightly above average. ERC-G is **51** at Grandad RAWs. Critical ERC level 54-58.

Rate of spread and flame lengths are model outputs based on **maximum values** for the fuel models shown, with current fuel moistures in exposed locations on steep slope.

Fuel Model	Rate of Spread	Flame Length
Grass/Shrub (GS2)	9 chains/hour 10 feet/min	3 feet
Mature Timber (TU2 & TL5)	5 chains/hour 6 feet/min	2 feet

In **one hour** a spot fire would be approximately **1.6 acres** in timber and **5 acres** in grass/shrub.
Probability of Ignition = **56%**

Specific Areas of Concern:

All Divisions:

Any remaining heat source, stumps, logs, and snags.

Areas with heavy needle/leaf cast.

AIR OPERATIONS: No concerns for Air Operations. Slight hazy conditions.

SAFETY:

Transition!

Transition is a critical time in an incident.

Transfer your knowledge of any fire behavior concerns in your area.

Are there unburned pockets that need attention?

Any areas of remaining heat there could flare up?

What about areas of heavy needle/leaf drop?

Areas of steep terrain that could support active fire.

IWI IC Responsibilities:					
<ul style="list-style-type: none"> • Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – (Ex. Division A medical, Fish Meadows medical, Highway 21 accident.) • Assign or begin patient assessment Medical Incident Report (MIR) and first aid. Request additional medical resources on division/branch or across incident. Transmit MIR patient information to Communications. • Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible. • Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio. • Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required. • As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.

HEALTH AND SAFETY MESSAGE

“We don’t plan on luck to be safe, we plan on sound risk management and good decisions”....the Red Team

INCIDENT: Archie Creek & Thielsen Fire	DATE: Monday, October 5, 2020
Major Hazards & Risks: Driving/Backing, Heavy Equipment, Fatigue, Hydration, Transition and Covid 19	
Thanks for your attention to safety!	
<p>Driving: <i>Driving will continue to be our biggest hazard. With the new Glide Camp on 138 ½ mile East of the N. Umpqua River you need to be heads up to the traffic. The speed limit is 50 mph there. We have added an electronic sign on each side of the entrance to help, but don’t let your guard down. Here are some things to avoid while driving: distractions like texting, talking on the phone, and eating; driving while drowsy; driving over the posted speed limits.</i></p> <ul style="list-style-type: none"> • There are lots of logging trucks, and other traffic on the main roads throughout the fire. • When driving keep you’re speed at or below the posted speed limit and turn your headlights on. • Drive defensively and anticipate the actions of other drivers. • Watch for and anticipate wildlife crossing roads, especially early mornings and evenings. • Always fasten your seat belts before the vehicle is set into motion. Use backcrackers. 	
<p style="text-align: center;">Fatigue</p> <p>Please take the time to take care of yourself as multiple days working on the line can take its toll.</p> <ul style="list-style-type: none"> • Take frequent breaks • Get adequate rest by maintaining 2:1 work rest ratio • Maintain good eating habits • Practice proper personal hygiene practices 	<p style="text-align: center;">Hydration</p> <ul style="list-style-type: none"> • Maintain Hydration, maintain fluid intake before and after shift • Avoid caffeinated drinks (coffee, tea, cola and many energy drinks) as they hasten fluid loss • Make sure the majority of your fluid intake is water - use sports drinks in moderation.

Safety Officers: Brad Lidell, Larry Connell, Tommy Hawkins, John Fugitt, Ivan Cupp, Troy Floyd, Steve Gray, Gary Kemp, Chad Hyatt, Richard Gillaspay

Daily COVID-19 Reminder

- **“MODULE OF ONE” Concept:** Resources assigned to the Archie Fire need to focus on reducing the amount of time they spend around other resources they do not need to directly work with. Please limit your exposure to other resources.
- **Cloth face coverings (MASKS):** All individuals must wear a mask when they are working in close quarters outside their “Module of One.”
 - Masks must cover your mouth and nose.
 - Lightly used medical masks are okay.
 - Supply has medical masks for distribution.
 - Masks need to be worn inside ICP buildings, and when social distancing is not practical (supply, ground support, briefing areas).
- **Hygiene:** All resources need to wash their hands before and after touching common items around camp.
- **Douglas County Community:** Please ensure that resources are following the above when they are visiting local area business.
- **Wildland Fire COVID-19 Screening Tool:** Apply the screening tool to yourself and any crew members you are responsible for.

If you have questions or concerns, please contact the Red Team COVID Coordinator
Fred Adler 479-238-6064

Top 10 Natural Resources Take-homes from Archie Creek

These are the top 10 messaging points and/ or tidbits of 'gee-whiz' info that we have shared that will prove useful no matter what incident you work on. Thank you for your most excellent work here and safe travels as you time out and return to your home units! Note: these are not listed in order of importance.

- 1) Constructing EFFECTIVE waterbars on firelines includes attention following the 5-D's; Distance, Divert, Diagonal, Discharge, and Dissipate. The purpose of waterbars is to slow water down as it travels downhill. When constructed correctly, waterbars help reduce excessive erosion and mitigate sediment transfer to streams and rivers.

Fireline Slope	Maximum Spacing
1-6%	300 ft.
7-9%	200 ft.
10-14%	150 ft.
15-20%	90 ft.
21-40%	50 ft.
41-60+%	25 ft.

Figure 1. The Five-D System for Effective Fireline Waterbars. Furniss (undated) PNW

- 2) **RAPTORS HAVE 3 EYELIDS.**
- 3) Control efforts and economic losses stemming from noxious weeds are extremely costly – upwards of \$125 million, in Oregon alone. The best thing we can do is to prevent the spread; use the weed wash whenever possible, check your clothing for seeds, and ensure no plant parts/seeds make the journey home with you.
- 4) In areas where there are cultural sites, please do not move the items from where you discovered them. Simply collect point location, and pass the data to a READ/F on your division.
- 5) As pumps are set up for mop-up, please keep fuel as far from the streams as possible, and make sure each pump has a containment kit. Set pumps, fuel, jerry cans, etc. on level ground and ensure absorbent pads are changed when they become 50% saturated.
- 6) Avoid drafting from smaller streams – if you need help finding water sources, please contact a Resource Advisor, as on most incidents, at least a few of them are local, have incredible knowledge of the area, and can assist with minimal response time.
- 7) Splash erosion occurs when raindrops (which can travel at up to 20 mph) strike soil without any plant cover or woody debris to intercept the drop's kinetic energy, soil particles can splash up to five feet horizontally and two feet in the air.
- 8) You'd be surprised how long trash persists; thanks for your efforts on this incident!
- 9) Noxious weed seeds can remain viable for 1 – 80 years, depending on species.

10) The Chinook is the biggest of all of the Pacific salmon, growing as long as 53 inches and weighing as much as 126 pounds. This fish holds a significant stature culturally, economically, and recreationally.
