INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY	
THIELSEN	Date/Time From: 09/29/2020 0700 TUE	Date/Time To: 09/29/2020 1900 TUE
3. Objective(s):		
<p>1) Protection of human life and safety is the first priority for all actions taken on a wildfire and can overrule all other strategic and incident objectives and management and incident requirements.</p> <p>2) Base management decisions on meeting objectives while also minimizing the risk of COVID-19 exposure to responders and the public. COVID-19 considerations may alter how you meet goals but should not lead to higher-risk tactics.</p> <p>3) Focus on strategies and tactics that reduce exposure to COVID19 and smoke impacts to local communities.</p> <p>4) Protect the WUI infrastructure at Diamond Lake (109 recreation residences, Diamond Lake Resort, FS campgrounds, ODFW facility) and Lemolo Lake (Lemolo Lake Resort/KOA, Pacificorps facilities, FS campgrounds) from the threat of wildfire to prevent loss of highly valued assets.</p> <p>5) Ensure safe passage for public on Hwy 138 as it is a major east-west transportation route which would impact both the public and fire personnel access.</p> <p>6) Protect Sandshed/ODOT site near Hwy 138/FS Road 2610 from the threat of wildfire to prevent loss of partner buildings and heavy equipment, staging area.</p> <p>7) Protect isolated Forest assets in the area (FS campgrounds at both Diamond Lake and Lemolo Lake, Hwy 138, Cinnamon Butte, Powder magazine at Mt. Bailey, and Hemlock Butte Ski Cabin) from the threat of wildfire to prevent loss of valued Forest infrastructure.</p> <p>8) Coordinate suppression and suppression repair actions with the lead READ to ensure that impacts to the Oregon Cascades Resource Area are mitigated.</p>		
4. Operational Period Command Emphasis:		
<p>1) Monitor cumulative fatigue and ensure all incident resources receive adequate rest.</p> <p>2) Follow established incident-within-an-incident protocols listed in the Medical Plan.</p> <p>3) Protection of human life and safety is the first priority for all actions taken and shall override all other incident strategic objectives. Evaluate risk vs. benefit in strategic and tactical planning and only commit operational resources to actions that have the highest probability of success of protecting values.</p>		
General Situational Awareness:		
Look up, look down, look all around for hazards, recognize them and mitigate them.

To: All Incident Personnel, Archie Creek 2020

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

Weather Discussion: Temperatures once again rise into the 80s with humidity falling into the teens. The east winds tapered off overnight giving way to more of a terrain driven wind pattern moving forward. Overnight humidity recoveries will once again be poor. This pattern looks to persist into the weekend with temperatures remaining well above normal and humidity values in the teens and twenties during the day.

Extended Outlook:

Thursday and Friday...Hot and dry conditions continue for the end of the week as a ridge of high pressure remains in place. Temperatures fall a degree or two from the midweek peak and humidity values increase a couple percent, but the overall message remains the same. Overnight recoveries slowly improve, but remain low in comparison to the beginning of the week.

FIRE BEHAVIOR FORECAST

Incident Name	Thielsen	Forecast Number	15
Operational Period	9/29/2020	Date/Time Issued	9/28/2020 1700
Unit	OR-UPF	Forecast by (Name & Position)	Alison Coons EBAN <i>[Signature]</i>

FIRE BEHAVIOR DISCUSSION

GENERAL: Continued warmer and drier weather. Areas still retaining heat will continue showing themselves.

Predicted Fire Behavior:

Limited relative humidity recovery last night allowed hot areas to continue to smolder and creep where fuels are available.

As relative humidity drops and temperatures rise, fuels will again support minimal spread where small diameter fuels are present. Standing grass and needle cast in open areas (limited canopy) could support spread up to 100 feet per hour. Flame lengths will remain less than 2 feet.

Probability of Ignition:

After yesterday drying and last night's limited relative humidity recovery POI is predicted to be near 65%.

SPECIFIC:

Today: The east and southeastern portions of Division P/W continue to be the most likely area have spread to the east and north from the few remaining hot areas.

Tonight: Slightly better humidity recovery will stall fire movement through the evening hours.

AIR OPERATIONS:

Clear skies with winds will allow for aerial resources to work the fire early.

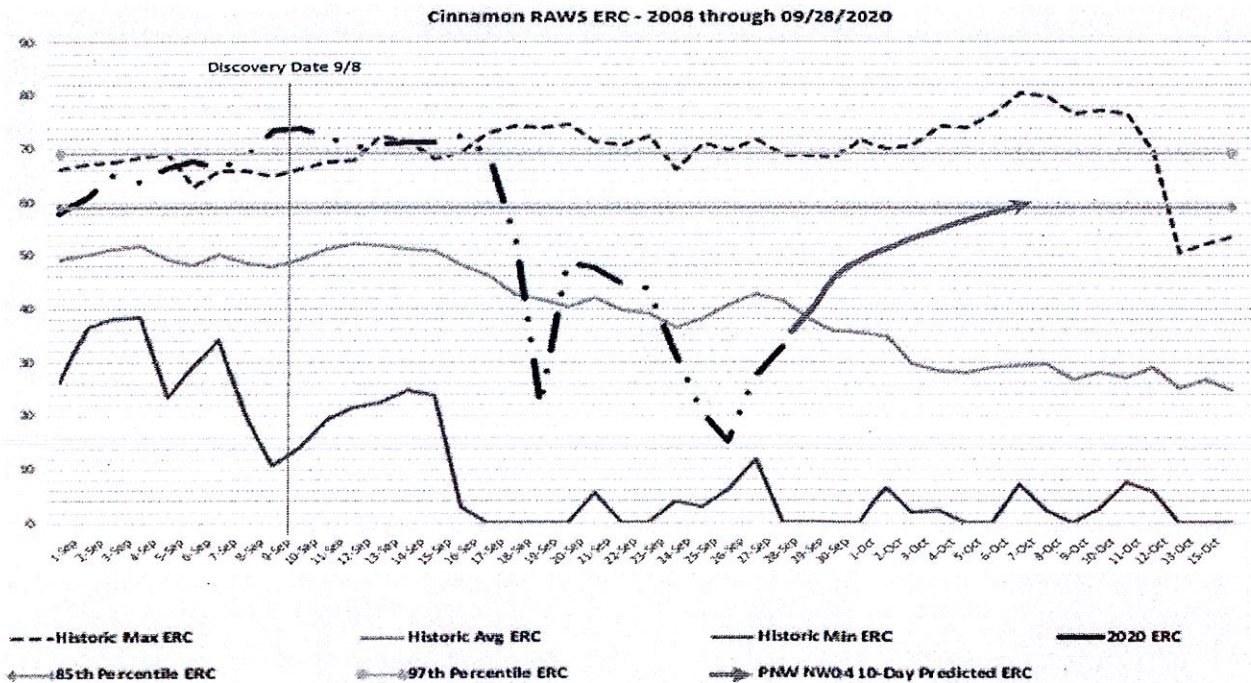

SAFETY:

Conditions are moderating but not dead. Stay alert for fire inside and outside the containment line. Plan before acting. Always have LCES.

LEARN MORE ABOUT FIRE BEHAVIOR---

Watch Out Situation 14: Weather becoming hotter and drier

While the fire has not shown much activity over the last couple days, heat is still available to rekindle unburned fuel. Hotter and drier conditions will continue over the next few days. We will see more visible smoke with even some creeping surface fire possible. Energy Release Component (ERC) values are forecast to continue rising over the next 10 days.

Please send your fire behavior observations to: alison_coons@firenet.gov or allan_hepworth@firenet.gov

HEALTH AND SAFETY MESSAGE

*“We don’t plan on luck to be safe, we plan on sound risk management and good decisions.”
~ The Red Team*

INCIDENT: Archie Creek & Thielsen Fire	DATE: Tuesday September 29, 2020
Major Hazards & Risks: <i>Weather, Heavy Equipment, Falling Snags, Powerlines</i>	
<p>Weather: Be aware of Lower Relative Humidity’s, Higher Temperatures trending this week</p> <p>Heavy Equipment: There is a lot of heavy equipment on both the Archie Creek & Thielsen Fire and likely more to come for suppression repair, and fuels reduction. With that brings large transports needed to move the equipment into and around the fire. You can help reduce the possibility of having an accident by driving slowly, stay alert and drive defensively. When you park in these areas make sure your vehicle does not block the travel way on these roads. If you are a passenger while the driver is backing offer to get out and be a spotter. These are certainly accidents that can be prevented.</p> <p>Falling Snags: In addition to the heavy equipment, there will be fallers along interior roads to fell hazard trees. Fallers make sure you have road guards before felling trees along roadways.</p> <p>Chippers: It is important that all resources working with the chipper be briefed on safe working practices and sign the JHA for chipper operation before using the chipper. The operator of the chipper must be trained and qualified. The operator should be the owner or employee of the chipper contractor.</p> <p>Powerline: Always treat downed powerlines as if they are LIVE wires. Refer to Powerline Safety in the (IRPG) Incident Response Pocket Guide pages 24 & 25.</p>	

Thank you for your time and consideration

*Archie Creek and Thielsen Fire Safety Officers: Larry Connell, Tommy Hawkins, Troy Floyd,
Steve Gray, Gary Kemp, Chad Hyatt, and Brad Lidell*

Notice of Right to Representation

As a bargaining unit employee represented by a labor organization, you have the right to request representation from your certified labor organization at any investigative examination/interview where you reasonably believe the examination might result in disciplinary action being taken against you. You may make this request at any time prior to or during the interview. If you request union representation, your agency may opt to: (1) suspend questioning and grant your request then resume the interview; (2) discontinue the interview; or (3) offer you the choice to proceed with the interview without a Union representative or to forego the interview.

Clarification about the Above Notice

If a management representative wants to question you (a bargaining unit employee) about an allegation that you were involved in some occurrence that could result in a proposal to discipline you, Union believes it is in your interest to have a Union representative present when you are questioned. **You have to invoke that right by asking for representation. Management is not obligated to inform you of this right, and they are not obligated to automatically arrange for a Union representative to be present.** In the event that you request representation and a Union representative has not been dispatched to the incident, contact will be made with the Union representative listed above, and arrangements will be made for that representative or his designee to come out on site, or to meet with you by telephone.

Weed Wash:

The access road to Buck Eye Cinder Pit is on the north side of HWY 138 approximately 1.25 miles west from the Junction with HWY 97. The road is signed in orange as "Staging Area."

To access the weed wash, traffic travelling north will proceed to the Buck Eye cinder pit to turn around. They will then travel south and enter the weed wash on the right side of the road. The exit is the same pit access road back to HWY 138.
