## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>	<b>2. Operational Period: DAY</b>	
THIELSEN	Date/Time From: 09/18/2020 0700 FRI	Date/Time To: 09/18/2020 1900 FRI
<b>3. Objective(s):</b>		
<p>1) Protection of human life and safety is the first priority for all actions taken on a wildfire and can overrule all other strategic and incident objectives and management and incident requirements.</p> <p>2) Base management decisions on meeting objectives while also minimizing the risk of COVID-19 exposure to responders and the public. COVID-19 considerations may alter how you meet goals but should not lead to higher-risk tactics.</p> <p>3) Focus on strategies and tactics that reduce exposure to COVID19 and smoke impacts to local communities.</p> <p>4) Protect the WUI infrastructure at Diamond Lake (109 recreation residences, Diamond Lake Resort, FS campgrounds, ODFW facility) and Lemolo Lake (Lemolo Lake Resort/KOA, Pacificorps facilities, FS campgrounds) to prevent loss of highly valued assets.</p> <p>5) Ensure safe egress for public on Hwy 138 as it is a major east-west transportation route which would impact both the public and fire personnel access.</p> <p>6) Protect Sandshed/ODOT site near Hwy 138/FS Road 2610 to prevent loss of partner buildings and heavy equipment, staging area.</p> <p>7) Protect isolated Forest assets in the area (FS campgrounds at both Diamond Lake and Lemolo and Hwy 138, Powder magazine at Mt. Bailey, Hemlock Butte Ski Cabin) to prevent loss of valued Forest infrastructure.</p> <p>8) Protect partner infrastructure (ODFW, Diamond Lake Resort, Lemolo Lake KOA) to prevent loss.</p>		
<b>4. Operational Period Command Emphasis:</b>		
<p>1) Monitor cumulative fatigue and ensure all incident resources receive adequate rest.</p> <p>2) Follow established incident-within-an-incident protocols listed in the Medical Plan.</p> <p>3) Protection of human life and safety is the first priority for all actions taken and shall override all other incident strategic objectives. Evaluate risk vs. benefit in strategic and tactical planning and only commit operational resources to actions that have the highest probability of success of protecting values.</p>		
<b>General Situational Awareness:</b>

## FIRE BEHAVIOR FORECAST

<b>Incident Name</b>	Thielson	<b>Forecast Number</b>	4
<b>Operational Period</b>	9/18/2018	<b>Date/Time Issued</b>	9/17/2018 1700
<b>Unit</b>	OR-UPF	<b>Forecast by (Name &amp; Position)</b>	Allan Hepworth FBAN (T)

### FIRE BEHAVIOR DISCUSSION

**GENERAL:**

**Fire behavior today is expected to stall with rain likely throughout the burn period, reduced temperatures, and higher relative humidity**

- Extremely dry vegetation will support fire spread in areas that do not receive substantial rainfall
- Each time smoke lifts out of the fire area, even for short periods, expect an increase in spread.
- As the weather pattern shifts to a moister pattern over next couple days, the larger diameter fuels will maintain lower fuel moisture levels.

<u>Ridge Top Spotting:</u>	Fuel Types	Rates of Spread	Flame Lengths
Up to 1/4 of a mile	Pine/Fir with slash	Up to 5 ch/hr, ¼ mile	Less than 3 feet
	Shrubs with slash	Up to 10 ch/hr, ¼ mile	Less than 8 feet
<b>Probability of Ignition 28%</b>			

**SPECIFIC:**

**Today:** Moderated and even stalled fire behavior is expected. Dead fuels remain at historically dry condition and those areas receiving negligible rainfall would observe increased fire behavior with any outflow winds or terrain influence.

**Tonight:** Humidity recovery will slow fire spread through the evening hours. Rain potential decreases after midnight and drying returns into the next burning period.

**AIR OPERATIONS:**

Potential for thunderstorms may restrict air operations in the afternoon.

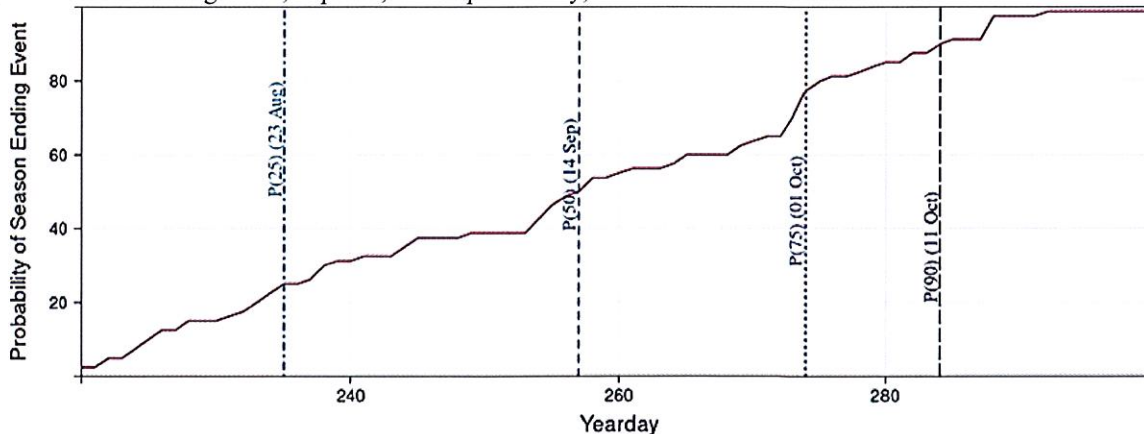

**SAFETY:**

Maintain L.C.E.S. regardless of any measurable precipitation. Thick canopy vegetation can limit the amounts of rainfall received at the forest floor and these historically dry fuels can still support active spread with thunderstorm outflows

**LEARN MORE ABOUT FIRE BEHAVIOR---**

Below is a season-ending graph for the Thielsen Fire. A season-ending event consists of a fire-stopping— sometimes referred to as a fire-slowng event(s)—followed by a persistent combination of environmental factors that mark the end of the fire season. These factors can include subsequent pulses of rain or snow, lower temperatures, higher relative humidity, a lower sun angle, and a shorter photo period.

This is a new product in development by Dr. Matthew Jolly of the Fire Sciences Laboratory, Rocky Mountain Research Station; your feedback is encouraged. It is based on 20 years of gridded weather data (2000-2019) and instead of the nearest Remote Automated Weather Station (RAWS) or a grouping of RAWS (a SIG), it uses the most recent fire perimeter. The criteria for choosing the term threshold is much less subjective than the traditional approach. A time series of ERC is extracted for each pixel within the fire perimeter. If the ERC drops below a relative ERC of 75 (data is scaled 0 to 100)—25% of the historic max—and remains below that threshold, the season-ending criteria is met. The graph is interpreted as follows: Aug. 23, there is a 25% probability for a season-ending event, Sept. 14, a 50% probability, etc.

# HEALTH AND SAFETY MESSAGE

*SAFETY is YOU & ME*

We are ALL accountable for SAFE behaviors

**INCIDENT:** THIELSEN FIRE

**DATE:** September 18th, 2020

**Major Hazards and Risks:** Weather Changes, Medical Emergencies, Driving in Wet Conditions

**Weather-** Over the next couple days we will see major changes in day to day weather. The increased winds from the possible storms shout watch-out. Make sure you have accountability of all resources and have a plan when the weather rolls in. Review lightning safety guidelines.

**Medical Emergencies-**(Refer to IRPG pg.2) Review 8 line!

**Ask yourself these 3 questions:**

1. What are we going to do if someone gets hurt?
2. How will we get them out of here?
3. How long will it take to get them to the hospital?

**Driving** – The roads could be slick and not just on the Fireline. Take your time and drive to the conditions of the road. If you do not need to go down that road don't. Do not assume that the road you traveled yesterday is in the same shape as today.

## **Watchout**

15.WIND INCREASES AND/OR CHANGES DIRECTION

## **COVID**

If you leave home, know your Ws!

**WEAR**

a cloth face covering.

**WAIT**

6 feet apart and avoid close contact.

**WASH**

your hands often or use hand sanitizer

## Thielsen Fire COVID-19 Prevention/Response Plan Southern Area Incident Management Gold Team

The Southern Area Incident Management Gold Team (Gold Team) and the Umpqua National Forest are committed to preventing the spread of COVID-19 among wildland firefighters and support personnel through adherence to standard operating procedures.

Fire management during a worldwide pandemic presents additional challenges to incident management teams. In addition to responsibility for the overall management of the fire incident, the Gold Team must also focus efforts to limit/prevent the spread of COVID-19. Furthermore, in the event incident personnel contract COVID-19, or are exposed, the IMT will likely assist with the initial care of sick personnel, self-isolation of those affected, coordination with local health departments for testing, and follow-up support to personnel testing positive and under quarantine.

This document will serve as a guide for the Gold Team in respect to dealing with COVID-19 during management of the Thielsen Fire currently located in Douglas County, Oregon on the Umpqua National Forest.

### **Limit/Prevent Spread of COVID-19 (Standard Operating Procedures)**

1. All resources assigned to the Thielsen Fire will review the **Wildland Fire COVID-19 Screening Tool** daily. If you answer yes to any of the screening questions, notify your immediate supervisor, self-isolate, and await further direction.

#### **Wildland Fire COVID-19 Screening Tool**

Today or in the past 24 hours, have you had any of the following symptoms\*?

SYMPTOMS	
<ul style="list-style-type: none"> <li>• Cough more than expected?</li> </ul>	<ul style="list-style-type: none"> <li>• Fatigue, outside your normal for firefighting?</li> </ul>

*\*Take temperature with no-touch thermometer, if available*

2. All assigned resources will wear face coverings (e.g., masks) that cover mouth and nose when inside any building utilized for management of the fire, or in a vehicle with more than one person where a “module as one” concept is not utilized.

3. All assigned resources will wear face coverings (e.g., masks) that cover mouth and nose when outside and social distancing of 6 feet or more spacing can't be maintained, ***except when engaged in firefighting activities.***
4. Briefings will be limited to essential personnel, in a location that provides enough space for appropriate social distancing, preferably outdoors. Remote briefing options will be made available.
5. Wash your hands often with soap and water, if available, for at least 20 seconds. Utilize hand sanitizer often.
6. Operate under the "module as one" concept, where possible. Do not closely co-mingle (less than 6 feet) with others outside your group.
7. Sanitize all high-touch surfaces in ICP (e.g., door handles, tables, office equipment, et al) often. Avoid touching common surfaces, when possible, and wash/sanitize hands when not able to avoid touching common surfaces.
8. Consider "after-hours" activities and the risk of exposure.

# Demobilization Message

In order to limit person to person contact the demob process will be conducted virtually for this incident.

Whether you reach the end of your 14 day assignment or you are released earlier the process will be the same. The following are steps you need to be aware of:

- For those of you that require an airline flight to get home, you will need to contact DMOB and provide information to secure a flight. You can use the QR code below to provide that information and Demob will be in contact. Please do so at least 3 days before you need to fly home.
- If you are driving you will need to provide information on your expected drive home. There is a QR code below for that purpose.
- To complete the demob process you will contact demob. Demob will then send you a list with contact information for the units you will need to contact in order to get their authorization to demob. There will not be a paper checkout sheet for you to carry to the units. DMOB: **Jeff DeMatteis, 601-415-9080; 2020.thielsen.demob@firenet.gov**
- Access to a computer will be necessary to close out your time. The Plans Section at the ICP will have a laptop available if necessary. In addition they will have a paper copy of the demob steps you need to follow.
