INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY		
THIELSEN	Date/Time From: 09/24/2020 0700	THU	Date/Time To: 09/24/2020 1900
3. Objective(s):			
<p>1) Protection of human life and safety is the first priority for all actions taken on a wildfire and can overrule all other strategic and incident objectives and management and incident requirements.</p> <p>2) Base management decisions on meeting objectives while also minimizing the risk of COVID-19 exposure to responders and the public. COVID-19 considerations may alter how you meet goals but should not lead to higher-risk tactics.</p> <p>3) Focus on strategies and tactics that reduce exposure to COVID19 and smoke impacts to local communities.</p> <p>4) Protect the WUI infrastructure at Diamond Lake (109 recreation residences, Diamond Lake Resort, FS campgrounds, ODFW facility) and Lemolo Lake (Lemolo Lake Resort/KOA, Pacificorps facilities, FS campgrounds) from the threat of wildfire to prevent loss of highly valued assets.</p> <p>5) Ensure safe passage for public on Hwy 138 as it is a major east-west transportation route which would impact both the public and fire personnel access.</p> <p>6) Protect Sandshed/ODOT site near Hwy 138/FS Road 2610 from the threat of wildfire to prevent loss of partner buildings and heavy equipment, staging area.</p> <p>7) Protect isolated Forest assets in the area (FS campgrounds at both Diamond Lake and Lemolo Lake, Hwy 138, Cinnamon Butte, Powder magazine at Mt. Bailey, and Hemlock Butte Ski Cabin) from the threat of wildfire to prevent loss of valued Forest infrastructure.</p> <p>8) Coordinate suppression and suppression repair actions with the lead READ to ensure that impacts to the Oregon Cascades Resource Area are mitigated.</p>			
4. Operational Period Command Emphasis:			
<p>1) Monitor cumulative fatigue and ensure all incident resources receive adequate rest.</p> <p>2) Follow established incident-within-an-incident protocols listed in the Medical Plan.</p> <p>3) Protection of human life and safety is the first priority for all actions taken and shall override all other incident strategic objectives. Evaluate risk vs. benefit in strategic and tactical planning and only commit operational resources to actions that have the highest probability of success of protecting values.</p>			
General Situational Awareness:			
Look up, look down, look all around for hazards, recognize them and mitigate them.			
5. Site Safety Plan Required? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>

Fire Weather Forecast

FORECAST NO: 7
PREDICTION FOR: Thursday
Shift Date: September 24, 2020
TIME AND DATE
FORECAST ISSUED: 9/23/2020 at 1800

INCIDENT: Thielsen Fire
UNIT: Umpqua National Forest
SIGNED: Ryan Fliehman
Incident Meteorologist (IMET)

Weather Discussion: Light rain showers remain present this morning before tapering off by midday. A slight chance of shower redevelopment will be possible in the afternoon and evening. Winds will once again become breezy, but not as strong as yesterday. The big change will be the significant drop in temperatures and increase in humidity as we sit on the back side of the cold front. The chance for rain returns on Friday afternoon/evening as a secondary front passes. Saturday onward brings a warming and drying trend.

WEATHER FORECAST:

Today:
SKY/WEATHER: Breezy winds throughout the day. Rain early in the morning then a chance of showers in the afternoon/evening.
High Temperature...55-60F
Min RH.....52-57%
20-FOOT WINDS:
Ridges: West-southwest winds 10-15 gust 20 mph.
Lake Level and Valleys: South or up the lake (south to north) 6-11 gust 15 mph after 1000.
CWR (>=0.10")....30% AM LAL....1 Haines Index...3 (Very Low) Mixing Height...4000 ft AGL

Tonight:
Weather: Light winds on ridges. Cold overnight temperatures with low clouds and fog possible.
Low Temperature on Fire...33-38F
Low Temperature in Chemult...27-32F
Max RH.....80+% (Good Humidity Recoveries)
20-FOOT WINDS: Southwest 4-8 gust 11 mph on the fire. Light winds in the valleys.
CWR (>=0.10")....Near 0% LAL....1

Friday:
SKY/WEATHER: Increasing clouds throughout the day with breezy winds. Chance of showers after 1200.
High Temperature...55-60F
Min RH.....57-63%
20-FOOT WINDS:
Ridges: West-southwest winds 5-10 gust 15 mph before 1100, increasing to 10-15 gust 20 mph after 1100.
Lake Level and Valleys: South or up the lake (south to north) 6-11 gust 15 mph after 1100.
CWR (>=0.10")....10% LAL....1 Haines Index...2 (Very Low) Mixing Height...2000 ft AGL

Extended Outlook:
Saturday and Sunday...A chance for showers continues into Saturday before tapering off in the afternoon. Saturday will mark the start of a warming trend that runs into the middle of next week. Drier conditions are also expected during this period. Saturday brings more breezy conditions before finally decreasing Sunday.

Cinnamon RAWS Obs (as of 1800)	Temp (F) Hi/Low	RH (%) Max/Min	Peak Wind (mph)	Rainfall (past 24 hours)
Tuesday 9/22	67/40	91/42	WSW 7 Gust 25 mph	0.00"

Please send weather observations taken in the field to IMET Ryan Fliehman at ryan.fliehman@noaa.gov

FIRE BEHAVIOR FORECAST

Incident Name	Thielsen	Forecast Number	9
Operational Period	9/24/2018	Date/Time Issued	9/23/2018 1700
Unit	OR-UPF	Forecast by (Name & Position)	Alison Coons FBAN 

FIRE BEHAVIOR DISCUSSION

GENERAL: Cooler temperatures combined with predicated rain and or much higher relative humidity will aid in suppression of remaining heat in jackpots of heavy fuels and in sheltered areas.

Spotting: Due to high winds an ember COULD travel up to 0.1 miles **HOWEVER- Probability of Ignition** after rain is 1% If no rain is received – POI increases to just 22%

Predicted Fire Spread:

If predicted rains fall over the fire area, fire spread will be reduced to pockets of sheltered fuels and 1000 hour fuels remaining to smolder and creep. It is likely these areas of heat will only show themselves (smoke) if exposed to winds. Areas sheltered from winds by vegetation and or on the lee side of ridges are not likely to show themselves during the burning period.

If rain does not reach the fire area, there is still very little spread expected. Some limited spread later in the burning period, less than 50 feet and hour with flame lengths less than 1 foot are most likely. Jackpots of heavy fuels are most likely to show themselves early with an increase of smoke popping up as the day progresses.

SPECIFIC:

Today: Although all divisions have some remaining interior heat, Division W is most likely to continue seeing activity.

Tonight: Humidity recovery will continue to stall fire movement and extinguish many exposed areas of heat.

AIR OPERATIONS:

Low clouds in the morning, clearing in the afternoon.

SAFETY:

While moving in and around wet logs and debris, careful foot placement will reduce potential for sprains, strains, and falls.

Energy Release Component

The Energy Release Component (ERC) is a calculated output of the National Fire Danger Rating System (NFDRS). The ERC is a number related to the available energy (BTU) per unit area (square foot) within the flaming front at the head of a fire. The ERC is considered a composite fuel moisture index as it reflects the contribution of all live and dead fuels to potential fire intensity. As live fuels cure and dead fuels dry, the ERC will increase and can be described as a build-up index. The ERC has memory. Each daily calculation considers the past 7 days in calculating the new number. Daily variations of the ERC are relatively small as wind is not part of the calculation.

Below is the 10 Day Predicted ERC and F100 table for the area surrounding the Thielsen fire which is located in the east side of NW04

Pacific Northwest Coordination Center - PSA NW04 - 10 Day ERC and FM100 Forecast

SAFETY MESSAGE

Thielsen Fire

September, 24, 2020

Please take time to review the following safety topic with your crew prior to starting your shift:

PUBLIC HIGHWAY OPENING: Use signage, spotters, or flaggers when needed. If possible, park vehicles to provide some element of protection for personnel. Engage strobes, flashers, or bar lights when conducting roadside operations. Assume the public is not paying attention

SNAGS/FIRE WEAKENED TREES: There are numerous snags, fire weakened trees throughout the entire incident area; Maintain a strong situational awareness at all times. Look up, look down, and look around and be **especially alert when the wind picks up**. When falling operations are in progress, keep nonessential personnel at least 2 ½ tree lengths away from the activity. Be sure to check the green for overhead and snag hazards. This snag hazard still there in Divisions that are in patrol status.

COVID 19: The Southern Area Gold Team takes the Covid 19 threat very serious. Please wear your mask when in close proximity of others. Maintain at least 6 feet of separation at all times. Wash your hands with soap and water and use hand sanitizer.

Wet Surfaces: After a rain surfaces become slippery, this includes roadways, parking lots, sidewalks, open woods, exposed soils, and woody materials. Watch your step, look where you are going. Drive slower, stopping distance is increased on wet roads along with possibility of sliding onto the shoulder or ditch.

FATIGUE/COMPLACENCY: Be alert for signs of fatigue in your crew and have them take breaks as often as necessary. Make sure they are maintaining a 2:1 work/rest ratio. Focus on the task at hand.

DRIVING: Driving is the one of the biggest hazards on this incident. Defensive driving is essential. Keep windows clean, use headlights, seat belts, and chock blocks. Driving back in at the end of shift in the dark will require 100% focus. **MAINTAIN SITUATIONAL AWARENESS!**

Incident Safety Officers: Shawn Duggar, Larry Holsomback

INCIDENT SAFETY ANALYSIS 215a

Thielsen Fire OR-UPF-00041 - Thursday, September 24, 2020

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
Staffing Initial Attack Suppression Mop up	Chain Saw Operations	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG Pg 22 ~ Follow "Procedural Felling Operations" IRPG Pg 85. ~ Look up, Look down, Look around for hazard tree indicators. ~ Only fell and buck trees within your expertise, and training. ~ Do not fall trees during high wind events. ~ Ensure proper use of all required PPE.
Staffing Initial Attack Suppression Mop up	Air Operations	<ul style="list-style-type: none"> ~ Ensure positive communication with all air resources. ~ Don't plan on air resources for medical transport or resupply. ~ Follow "Aviation Watch-Out Situations" IRPG Pg 46. ~ Refer to "Directing Bucket or Retardant Drops" IRPG Pg 58 . ~ Refer to "Aerial Retardant Safety" IRPG Pg57. ~ Refer to "Aircraft Mishap Response Procedure" IRPG Pg 62.
Fire Ops.	Chipper	<ul style="list-style-type: none"> ~Wear Proper PPE. ~At least 2 operator with machine. ~Have Fire extinguisher on hand. ~Block chipper tires when unhooked. ~Do not use rakes or shovel to push material into feeder ~Never operate chipper alone. ~Do not wear loose clothing. ~Do not reach into the infeed shroud ~Do not use your hands to push material into feeder
ICP, Staging, Fire Operations, Motel	Injury & Medical Emergency	<ul style="list-style-type: none"> ~Supervisor and employee plan for medical emergencies daily. ~Practice COVID-19 procedures outlined by CDC. ~Consult IRPG "Planning for Medical Care" page 2. ~Ensure radio communications are acceptable before leaving home or base each day. ~Follow "Emergency Medical Care" IRPG pages 105-119. ~Verify first aid kit to meet project hazards is present.
ICP, Fire Operations	Communications	<ul style="list-style-type: none"> ~Before leaving home or base, employee and supervisor establish checkin/out plan and check radio communication with dispatch. ~Use cell phone for backup plan. ~Update situational awareness of potential hazards and long responses since few employees are in the field. ~Utilize human repeaters when working in dead spots.
Fire Operations, ICP, Staging	Driving & Traffic	<ul style="list-style-type: none"> ~ Practice "Defensive Driving" techniques traveling on all roads and city streets. ~ Use spotters & Honk horn to alert personnel when backing. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts). ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. ~ Use the 3 second rule for following distance when driving. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs. ~ Refer to "Smoke and Transportation Safety" IRPG Pg 31 ~ Refer to "Roadside Response Safety" IRPG Pg 26
Staffing Initial Attack Suppression Mop up	Firefighter & Public Smoke Exposure	<ul style="list-style-type: none"> ~ Refer to "Smoke Hazards and Mitigation" IRPG Pg 30 ~ Use warning lights and provide traffic control on roadways during smoky and night operations. ~ Rotate crews out of smoky areas during firing and mop-up operations. ~ Contact Communications when firing operations are initiated.

INCIDENT SAFETY ANALYSIS 215a

Staging, Fire Operations,	Heavy Equipment Operations	<ul style="list-style-type: none"> ~ Refer to "Working with Heavy Equipment" IRPG Pg 86 ~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Use a spotter when backing. ~ Avoid working below heavy equipment.
Fire Ops.	Structure Protection & HAZMAT	<ul style="list-style-type: none"> ~ Review "Wildland Urban Interface Firefighting" considerations, IRPG Pg 12-16 ~ Use "Structure Assessment" checklist, IRPG Pg 13 ~ Refer to "Structure Hazard Marking System" IRPG Pg 41 ~ Follow "HAZMAT Incident Operations" IRPG Pg 36
IWI	Responder exposure to COVID-19	<ul style="list-style-type: none"> ~ Responders wear COVID-19 protective PPE and sanitize all surfaces. ~ Place soiled clothing in plastic bags for cleaning or decontamination. ~ Limit exposure to essential personnel only. ~ Follow all current CDC mitigations.
Gatherings spaces	Human to human contact and exposure to COVID-19	<ul style="list-style-type: none"> ~ Practice social distancing and group gatherings to meet current CDC guidelines. ~ Avoid working in groups when possible. ~ Stage for IA at designated areas that minimize grouping: ie home or motel. ~ Wear CDC recommended PPE.
Fire operations	Hazard Trees	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22. ~ Post lookouts, or use a spotter in mop-up areas with personnel. ~ Don't park vehicles or take breaks in high concentrations of hazard trees. ~ Establish trigger points for disengagement during high wind events. ~ Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
ICP, Staging, Fireline Operations Motel	Transmission of COVID-19 between employees	<ul style="list-style-type: none"> ~ Closed camps/ICP. ~ Limit access to essential personnel. ~ No sharing of hotel rooms. ~ Clean and sanitize all shared work areas daily. ~ Provide sanitation supplies to all personnel. ~ Consider virtual or remote work. ~ "Am I fit" checklist before every shift, Southern Area WFRP
ICP, Staging, Fire Ops, Motel	Surface exposure from equipment and offices	<ul style="list-style-type: none"> ~ Do not share tools, disinfect tool handles before use. ~ Deep clean and disinfect office if exposure to COVID19 has occurred or is suspected; use CDC approved disinfectants. ~ Establish a facility log for all administrative facilities to identify personnel entering, leaving, dates and times. ~ Daily disinfect equipment subject to common use - dozers, mowers, tractors, etc and attach use log to identify persons, date, time and cleanings. ~ If cleaning date/status of furniture, tools, etc. is unknown, treat it as contaminated and disinfect before use.
Briefings, Incident Operations, Travel	Person to person contact with visitors, contractors, partners & others	<ul style="list-style-type: none"> ~ Be prepared with COVID PPE - gloves, mask, glasses, disinfectant - put them on before approaching or talking to anyone. ~ Maintain social distance of 6 feet or more. ~ No handshake or hug - wave. ~ Keep a daily log of who you encountered, where and when. ~ Wash your hands with soap & water or germicide, especially after touching handles, tools, pumps & knobs.
ICP, Staging, Fire Ops,	Lack of or Incorrect Use of PPE	<ul style="list-style-type: none"> ~ Always wear appropriate project PPE for operation. ~ COVID PPE - nitrile or latex gloves, masks, glasses, disinfectant.. ~ If COVID or project PPE is not present, avoid hazards or stop work.
ICP, Staging, Fire operations, Motel	Employee showing symptoms of illness	<ul style="list-style-type: none"> ~ Immediately isolate employee. ~ Check temperature. ~ Use "Am I Fit" checklist in Southern Area WFRP. ~ Document all personnel that had come into contact with employee. ~ Evaluate with medical unit for further action. ~ Protect responders from possible COVID-19

INCIDENT SAFETY ANALYSIS 215a

Fire Ops.	ATV/UTV use	<ul style="list-style-type: none"> ~ Ensure equipment is inspected and safe to use. ~ Restrict UTV's to max width of 50" on ATV trails due to width and severe out sloped conditions. ~ Ensure operator is trained and certified to operate. ~ Ensure operator has proper PPE according to the Redbook and/or RMA. ~ Question if it is mission critical.
All Incident Operations	Opening Public Highway	<p>Roadside Response Safety IRPG pg. 26.</p> <p>Use flaggers, spotters, and signage when needed.</p> <p>Assume public is not paying attention.</p> <p>Be alert to traffic stopping in the roadway.</p> <p>Conduct all operations well away from lanes of travel.</p> <p>If possible park vehicle to allow for some element of protection for personnel.</p> <p>Engage strobes, flashers, or bar lights.</p>
Fire Ops.	Heavy Dead & Down Fuel Loading	<ul style="list-style-type: none"> ~ Watch footing. ~ Allow for additional time to reach safety zones. ~ Refer to "Safety Zone" information, IRPG Pg 8 ~ Post lookouts, IRPG Pg. 7
Travel in vehicles	Travel precautions from COVID-19	<ul style="list-style-type: none"> ~Maintain personal spacing of 6 feet. ~Wear face mask. ~Daily clean vehicle surfaces at beginning and end of shift with approved sanitizers. ~Assign same personnel to vehicles each shift. ~Follow approved CDC COVID-19 mitigations.

ICS 205

FINANCE

Communication for finance should be sent to
2020.Thielsen.Finance@firenet.gov

Submit all Personnel Time and Equipment Time to the above email.

All CTRs and Shift Tickets must be signed by your incident supervisor.
It is acceptable to put two days on a CTR.

TRAVEL: Breaks

- Meal Periods – Time spent eating during travel interruptions is noncompensable, e.g., eating while waiting in an airport or stopping at a restaurant, and must be shown as a break on the CTR, SF-261. Time spent eating while traveling in a plane, bus, or other vehicle is compensable.
- Travel Interruptions – Employees are in compensable travel status for only actual travel and for “usual waiting time” which interrupts travel. Usual waiting time is defined as time necessary to make connections in ordinary travel situations and travel interruptions such as delays when waiting at the airport terminals due to hazardous weather, heavy holiday traffic, airline mechanical problems, etc. Travel interruptions during a period of continuous travel are compensable up to 3 hours as time/overtime if the travel time occurs outside of the regular tour of duty, except as noted in the Meal Periods section. Travel interruptions exceeding 3 hours (per one-way trip, to or from the destination) where individuals are free to sleep, eat, or, to a limited degree, pursue personal activities including waiting at an airport or other transportation site, are not compensable, and must be shown on the CTR, SF 261, as a travel interruption. In addition, the 3-hour maximum limitation applies even when the one-way trip spans 2 calendar days (50 Comptroller General Decision (CG) 519, 1/26/1971).

Contact Finance prior to your Demob date to be certain you have all needed documentation.

Please label CTR files: **Last, First O-1 CTR 09.21 – 09.22.20**

Tip: Select download (three small dots at the top if you have an iPhone), you can use the free Adobe Acrobat Reader DC for PDF app; the form will be fillable.

CTR QR Code

Human Resource Message

The mission of the Gold Team is to safely, effectively and efficiently manage the Thielsen Fire by maintaining a team of skilled and productive personnel.

During this incident we will strive to successfully complete our mission and achieve our objectives while creating a positive, drug and alcohol free work environment for all assigned incident personnel.

Consumption of drugs that alter decision making abilities, such as marijuana and alcohol, is prohibited while assigned to the Thielsen Fire incident.

The Gold Team fully supports EEO and will not tolerate sexual harassment or any form of discrimination!

All inappropriate behavior will be dealt with promptly. Disciplinary action and reporting back to an individual's home unit will be initiated as necessary.

Please report any incidents of inappropriate behavior to your supervisor, Marty Bentley, Andy Baker, or myself immediately.

Deborah Beard, Incident Commander

gg64255074 GoGraph.com

ATTENTION!!

FUEL TENDER WILL NOT BE AVAILABLE 1100-1400 DAILY

Steps in the Demob process

- All resources need to turn in supplies, radios, clean up your camp site, and get weed washed if your vehicle and equipment have been on the line.
- Contact Logistics to confirm that you have completed the above steps.
- Next close out with the Time Unit virtually using your smart device or laptop connected to the internet, you can go to the ICP and check in will have a laptop available.
- Trainees need to close out with the Training Specialist before demobing.

Units to Contact	Name	Phone	email
Logistic Section	Leigh Ostin	352-445-1366	leigh_ostin@firenet.gov
Time	Donna Line	706-474-3216	2020.thielsen.finance@firenet.gov

Before you leave contact (txt, call or email) the Demob Unit to confirm all the steps are complete and all travel information, ETD/ETA, is documented.

Demob Contact information:

2020.thielsen.demob@firenet.gov

Cell phone#: 601-415-9080

If you are driving please use the QR code on your smart device, or this link on your laptop, to provide your travel information.

<https://bit.ly/2ZP7ZWq>

QR to provide travel information if driving.

MINIMUM IMPACT SUPPRESSION TACTICS (MIST)

Use of MIST **will not** compromise firefighter safety or the effectiveness of suppression efforts. Safety zones and escape routes will be a factor in determining fireline location. **These are recommendations as possible.**

Fire Lining Phase

- Select tactics, tools, and equipment that least impact the environment.
- Give serious consideration to use of water as a firelining tactic.
- Use alternative mechanized equipment such as excavators and rubber tired skidders rather than bulldozers when constructing mechanical line. If bulldozers are the necessary tool:
 - Try to limit to one blade width, followed up with an excavator to clean line for effective containment
 - If necessary to cross trails and streams (live and intermittent), lift blade 50'-100' from center point of avoidance area. Use handline to improve un-bladed segment.
 - If crossing live and intermittent streams place logs perpendicular in streambed to use as crossing (corduroy)
- Allow fire to burn to natural barriers and existing roads and trails.
- Monitor and patrol firelines to ensure continued effectiveness.

Ground Fuels

- Use cold-trail, wet line or combination when appropriate. If constructed fireline is necessary, use minimum width and depth to stop fire spread.
- Use firing operations if conditions allow.
- Minimize bucking to establish fireline: preferably move or roll downed material out of the intended constructed fireline area. If moving or rolling out is not possible, or the downed log/bole is already on fire, build line around it and let the material be consumed.
- Angle bucking cuts with a downward face when possible, apply dirt on cut faces to reduce visual impacts

Aerial fuels—brush, trees, and snags:

- Fire-tolerant ponderosa pine, Douglas-fir, Sugar Pine and White Bark Pine should be retained to the maximum extent practicable to facilitate forest health and to provide fish and wildlife habitat.
- Adjacent to fireline: limb only enough to prevent additional fire spread.
- Inside fireline: remove or limb only those fuels which would have potential to spread fire outside the fireline.
- Cut brush or small trees necessary for fireline construction flush to the ground.
- Trees, burned trees, and snags:
 - When felling trees for safety and to maintain the fireline, keep wood in large lengths. In riparian zones, consider dropping trees towards the waterbody to assist with bank stabilization as well as fish habitat enhancement.
 - Minimize cutting of trees, burned trees, and snags.
 - Do not cut live trees unless it is determined they will cause fire spread across the fireline or seriously endanger workers. Cut stumps flush with the ground.
 - Scrape around tree bases near fireline if hot and likely to cause fire spread.
 - Identify hazard trees with flagging, glowsticks, or a lookout.
- When using indirect attack:
 - Do not fall snags on the intended unburned side of the constructed fireline unless they are an obvious safety hazard to crews.
 - Fall only those snags on the intended burn-out side of the line that would reach the fireline should they burn and fall over.

TRAINING MESSAGE

If you are a trainee and have not checked in yet, please use the QR code for Trainee Check In Form to complete the on-line check in.

DO NOT WAIT until the last work day to complete a position task book evaluation and check out with TNSP. You can complete this any time on the incident.

Work with your trainer to get tasks signed in your task book. Don't forget to follow all the steps below before you demob. It's essential for documenting your training assignment. Send photos of **2a, b and c** below.

Process for Checking In and Checking Out with Training Specialist

Step 1: Check In. Use the QR code and complete the Check In Form.

Step 2: Check Out. Complete the Trainee Exit Interview Form through the QR code link. Be sure to have your task book with you when completing the Exit Interview Form. Submit copies of the forms listed below. The forms are also available on line at [ICS 225 WF](#) and [NWCG Evaluation Record Form](#). Trainer completes the following:

- a) Performance Evaluation;
- b) Evaluation Record(s) (pages at end of task book); and
- c) Final Evaluator's Verification (page 2 of task book) if you are recommended for certification.

When checking out using the QR code, please take pictures of documentation above and email them to gseamon@talltimbers.org

Step 3: The TNSP will compile documentation for Home Unit Training Officer, and incident documentation.

Call me with any questions or concerns.

Greg Seamon, Training Specialist
850-556-8613
gseamon@talltimbers.org

Trainee Exit Interview Form

INCIDENT DOCUMENTATION

The Southern Area Gold Team is endeavoring to reduce the amount of physical paper documentation to the extent practicable.

Visit the QR code below for a list of files required to be retained by the IMT.

PLEASE SUBMIT ALL DOCUMENTS AS THEY ARE COMPLETED

- Email to 2020.thielsen.plans@firenet.gov with the subject heading "Incident Documentation"

OR

- Upload directly to the digital "DOC BOX INBOX" via the Teams Documentation Channel for this incident. Go to the Files Folder once inside that channel to get to the inbox.

OR

- If not possible to scan or take a picture of the document and submit it electronically, there is a Doc box located in the Plans section for hardcopy files.

Contact Aerin Land with any Documentation questions.

aerin_land@firenet.gov or 305-432-6695 (working virtually so may not answer after 2000 PDT.) You can also contact any onsite Plans person.

Weed Wash:

The access road to Buck Eye Cinder Pit is on the north side of HWY 138 approximately 1.25 miles west from the Junction with HWY 97. The road is signed in orange as "Staging Area."
 To access the weed wash, traffic travelling north will proceed to the Buck Eye cinder pit to turn around. They will then travel south and enter the weed wash on the right side of the road. The exit is the same pit access road back to HWY 138.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
