INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY	
THIELSEN	Date/Time From: 10/02/2020 0700 FRI	Date/Time To: 10/02/2020 1900 FRI
3. Objective(s):		
<p>1) Protection of human life and safety is the first priority for all actions taken on a wildfire and can overrule all other strategic and incident objectives and management and incident requirements.</p> <p>2) Base management decisions on meeting objectives while also minimizing the risk of COVID-19 exposure to responders and the public. COVID-19 considerations may alter how you meet goals but should not lead to higher-risk tactics.</p> <p>3) Patrol and mop up as directed by operations to eliminate the risk of loss of containment when hazards have been mitigated and LCES has been established.</p> <p>4) Monitor fire activity and, protect as needed, the WUI infrastructure at Diamond Lake (109 recreation residences, Diamond Lake Resort, FS campgrounds, ODFW facility), Lemolo Lake (Lemolo Lake Resort/KOA, Pacificorps facilities, Cinnamon Butte, Storage Facilities at Mt. Bailey, and Hemlock Butte Ski Cabin), and Sandshed/ODOT site near Hwy 138/FS Road 2610 from the threat of wildfire to prevent loss of highly valued assets.</p> <p>5) Monitor and ensure safe passage for public on Hwy 138 as it is a major east-west transportation route which would impact both the public and fire personnel access.</p> <p>6) Implement and Coordinate suppression and suppression repair actions with the lead READ to ensure that impacts to the Oregon Cascades Resource Area, Local Roadless Areas, and Mt. Thielsen Wilderness Area to ensure repair standards are followed implemented in accordance to the standards and mitigate damage caused by suppression activities.</p>		
4. Operational Period Command Emphasis:		
<p>1) Monitor cumulative fatigue and ensure all incident resources receive adequate rest.</p> <p>2) Follow established incident-within-an-incident protocols listed in the Medical Plan.</p> <p>3) Protection of human life and safety is the first priority for all actions taken and shall override all other incident strategic objectives. Evaluate risk vs. benefit in strategic and tactical planning and only commit operational resources to actions that have the highest probability of success of protecting values.</p>		
General Situational Awareness:		
Look up, look down, look all around for hazards, recognize them and mitigate them.

To: All Incident Personnel, Archie Creek 2020

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

FORECAST ISSUED: 10/1/2020 at 1800

INCIDENT: Thielsen Fire
UNIT: Umpqua National Forest
SIGNED: Ryan Flieman
Incident Meteorologist (IMET)

Weather Discussion: Conditions as a whole remain similar to previous days with temperatures well above normal and low relative humidity. Only subtle changes are expected with a degree or two cooler daytime highs and a percent or two higher humidity. This slight cooling trend continues into Sunday before we warm up with the ridge rebounding Monday and Tuesday. Terrain driven winds looks to remain the dominant wind pattern for the next several days.

WEATHER FORECAST:

Today:

SKY/WEATHER: Increasing smoke from California fires. A degree or two cooler.

Extended Outlook:

Sunday and Monday...The ridge of high pressure flattens on Sunday leading to cooler temperatures and slightly higher humidity. Moving into Monday will bring a rebound to the ridge allowing for temperatures to rise once again and lower humidity values. Overnight humidity recoveries will continue to be good.

FIRE BEHAVIOR FORECAST

Incident Name	Thielsen	Forecast Number	18
Operational Period	10/2/2020	Date/Time Issued	10/01/2020 1700
Unit	OR-UPF	Forecast by (Name & Position)	Allan Hepworth FBAN (t)

FIRE BEHAVIOR DISCUSSION

GENERAL: 100 and 1000 hour fuels slowly trend drier and could start burning more readily.

Predicted Fire Behavior:

Another day of minimal fire behavior could be observed today. Previous infrared show scattered and isolated heat throughout the fire however, these heat sources are more than likely a combination of stump holes and heavy down/dead fuel. For any new starts in the Thielsen Fire initial attack area, grass fuel could expect to observe spread rates of up to 18 chains an hour with flame lengths of less than 5 feet. In high load timber, spread rates would be less than 3 chains an hour with flame lengths of 2 feet.

Probability of Ignition:

Continued drying with relative humidity values in the low twenties will result in predicted POI near 73%.

SPECIFIC:

Today: Infrared shows isolated heat throughout both divisions. The majority of this isolated heat should be stump holes and possibly 100 and 1000 hour dead and down fuels.

Tonight: Moderate to good humidity recovery and cool nighttime temperatures stall overnight fire spread.

AIR OPERATIONS:

Hazy skies, due to the wildfire situation in Northern California, will begin settling into the fire area today. This haze should have no impact on aerial operations today.

SAFETY:

Warm and dry weather has continued for the past 5 days. Complacency can be a factor as operations have primarily moved to suppression repair. Resources should maintain readiness and awareness in case a new fire is discovered.

LEARN MORE ABOUT FIRE BEHAVIOR---

Haines (1988) developed the Lower Atmosphere Stability Index, or Haines Index, for fire weather use.

The Haines Index is used to indicate the potential for wildfire growth by measuring the stability and dryness of the air over a fire. It is calculated by combining the stability and moisture content of the lower atmosphere into a number that correlates well with large fire growth. The stability term is determined by the temperature difference between two atmospheric layers; the moisture term is determined by the temperature and dew point difference. This index has been shown to be correlated with large fire growth on initiating and existing fires where surface winds do not dominate fire behavior.

Haines Index is computed from the morning (12Z) soundings from RAwinsonde Observation (RAOB) stations across North America and is a measure of how readily atmospheric conditions roughly 1 to 3 km (0.5 to 2 miles) above the ground would support the development of a large or erratic plume dominated wildfire.

The Haines Index can range between 2 and 6. The drier and more unstable the lower atmosphere is, the higher the index.

- 2 : Very Low Potential -- (Moist Stable Lower Atmosphere)
- 3 : Very Low Potential
- 4 : Low Potential
- 5 : Moderate Potential
- 6 : High Potential ----- (Dry Unstable Lower Atmosphere)

HEALTH AND SAFETY MESSAGE

*“We don’t plan on luck to be safe, we plan on sound risk management and good decisions.”
~ The Red Team*

INCIDENT: Archie Creek & Thielsen Fires	DATE: Friday October 02, 2020
Major Hazards & Risks: <i>Driving, Hazard Trees, Deer Gun Season</i>	
 <p>Driving: More people and more trucks mean more potential for collisions. Gravel roads are not the only places that are narrow and winding. Watch out on those paved roads, too. <i>Log trucks</i> will be using the Canton Road to 138 and down into Roseburg. Be <i>extra cautious</i> near Base Camp in Glide. There is also <i>extremely heavy traffic</i> on 97 especially in <i>Chemult, at the Ranger Station</i> where turning traffic and pedestrians are present.</p> <p>Hazard Trees: There is a high concentration of hazard trees over in Branch III especially in the Wright Creek area. If you are working in this area or passing through, be heads up and let the Division Supervisor (known as the Wright Creek Group) know you are entering the area. <i>Identify hazard trees, avoid them or remove them safely.</i></p>	<p>Driving: More people and more trucks mean more potential for collisions. <p>Hunters and recreation riders are using off road vehicles on many of the same roads as fire personnel. Heads up on blind corners and drive defensively. Deer gun season starts tomorrow so beware.</p>  <p style="text-align: center;">Everett</p>	<ul style="list-style-type: none"> • “Situational Awareness” means seeing what occurs around you with your eyes and your mind. That is seeing what happened, what is happening and what might happen. Notice of Right to Representation

As a bargaining unit employee represented by a labor organization, you have the right to request representation from your certified labor organization at any investigative examination/interview where you reasonably believe the examination might result in disciplinary action being taken against you. You may make this request at any time prior to or during the interview. If you request union representation, your agency may opt to: (1) suspend questioning and grant your request then resume the interview; (2) discontinue the interview; or (3) offer you the choice to proceed with the interview without a Union representative or to forego the interview.

Clarification about the Above Notice

If a management representative wants to question you (a bargaining unit employee) about an allegation that you were involved in some occurrence that could result in a proposal to discipline you, Union believes it is in your interest to have a Union representative present when you are questioned. **You have to invoke that right by asking for representation. Management is not obligated to inform you of this right, and they are not obligated to automatically arrange for a Union representative to be present.** In the event that you request representation and a Union representative has not been dispatched to the incident, contact will be made with the Union representative listed above, and arrangements will be made for that representative or his designee to come out on site, or to meet with you by telephone.

INCIDENT DOCUMENTATION

The Thielsen Fire IMT is endeavoring to reduce the amount of physical paper documentation to the extent practicable.

Please help your friendly neighborhood DOCL prepare an efficient and organized documentation package by **uploading your documents early and often!**

PREFERRED METHOD:

- Review the list of files required to be retained by the IMT (via QR Code below). Store these files in your MS Team Channel and the DOCL will copy over to official eDOCBOX.

ALTERNATIVE METHOD:

- Email files to 2020.thielsen.plans@firenet.gov with subject heading "Incident Documentation"
- Upload directly to the digital "**Doc Box Inbox**" via the Teams Documentation Channel. Once in the Channel, select the "files" tab at the top to find the inbox.
- If unable to scan, text, or email a picture of the document electronically, there is a physical Doc Box located in the Plans Section for hardcopy files.

Estimated Ground Evac Time Overview: This layer contains the estimated ground transport time in hours from every point within the Continental United States (CONUS) to a definitive care facility (hospital). This data includes both walking speeds when traveling off-road and driving speeds according to the speed limit of the roads traveled. The intent of this layer is to initiate discussions regarding Agency Administrator risk tolerance and mitigation as it pertains to firefighter safety at the earliest possible opportunity in the decision making process. It is not intended to automatically deter resource deployment to any location, but to encourage thoughtful decisions about the risks being transferred to firefighters and how to mitigate those risks.
