Debut: North American 1983 NAD83
Evacuation Area Working
09/17/2020
Perimeter as of: 09/16/2020 @ 1735
Approx: 24,309 ac

Team 12 Operations Big Hollow incident evacuation recommendations:

1. Reduce current Big Hollow incident evacuation levels to Level 1.
2. Consider using geographic management action lines for re-evaluation of future evacuation levels.
3. If the fire is a threat to, or extends beyond, the provided Management Action Lines, consider changing the evacuation level.
