1. Incident Name:	2. Operational Period: DAY	
COLD CREEK	Date/Time From: 09/21/2020 0630 MON	Date/Time To: 09/21/2020 0630 MON
3. Objective(s):		
<p>Provide for the safety of firefighters and the public while fighting fire aggressively and applying the "10 and 18," LCES and risk management process.</p> <p>Engage and take suppression actions to limit fire acreage growth and protect structures.</p> <ul style="list-style-type: none"> · Establish containment lines south of Highway 12 to contain the fire. · Establish containment lines for fire encroaching on wilderness north of Highway 12, keeping the fire south and west of Indian Creek and east of Spiral Butte. <p>Maintain best management practices to limit the spread and exposure of the COVID-19 virus within the crew, on the line, in camp or to the surrounding community.</p> <p>Act professionally and in a manner to foster good relationships with public, landowners, cooperators, and agencies. Provide timely and accurate information as it becomes available.</p> <p>Maximize opportunities for cost savings without jeopardizing public or firefighter safety.</p> <p>Maintain awareness of firefighting impact on the landscape, including areas of eco-systems or habitat, minimize and report damage in areas that may be affected and implement tactics accordingly.</p>		
4. Operational Period Command Emphasis:		
<p>Engaging fire must be done with safety being the highest priority, basing it on the terrain, topography and the fire behavior encountered. Portions of the incident are starting to stabilize; resource movements that support other priorities require good briefings to maintain situational awareness. Avoid becoming complacent with your surroundings and do not make assumptions that the recent precipitation has made fuels less receptive to fire.</p> <p>Plan accordingly using risk mitigation. Monitor the weather forecasts for upcoming changes and how that will impact your assignment. Remain diligent about fatigue, and maintain your awareness of personal and crew health.</p>

DATE: 9/21/2020 TIME: Day/Night

Major Hazards & Risks: Driving, Working along Roadways, Hazard Trees, Saw Operations, Steep Terrain, Rolling Material, Aviation Operations, Rugged Access, Cumulative Fatigue, Weather

Working on Roadways

- Conduct all operations as far from traffic lanes as possible to provide for crew and public safety.
- Park units on the same side of the roadway whenever possible to avoid traffic congestion.
- Exit the fire apparatus away from the roadway or where hazard exposure is minimized.
- Exit the fire apparatus with full personal protective equipment.
- Post a lookout to watch for and control oncoming traffic.
- Utilize forward and rear spotters when visibility is impaired or road conditions warrant.
- If equipment needs to be removed from the traffic side of the apparatus, one person will retrieve the equipment and a lookout will watch for oncoming traffic.
- Engine operators will operate pumps from the non-traffic side or from the cab of the apparatus when possible. Keep all hose, fire tools, and equipment out of traffic lanes when possible.
- During night operations utilize reflective clothing, vests, and other safety equipment as necessary.

6. INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Water helps maintain blood volume and allows proper circulation, helps regulate our body temperature, and acts as a shock absorber for our joints and our brain. There are still more health benefits of water: It helps lubricate the linings of our inner organs and maintains healthy kidney function.

Hazard Tree Safety

Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazard trees.
