AM BRIEFING

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY	
JACK FIRE-ROUGH COMPLEX		Date/Time From: 08/16/2021 0700 MON	Date/Time To: 08/16/2021 2100 MON
3. Objective(s):			
<u>General Objectives</u>			
Provide for the safety and wellbeing of incident responders by implementing strategies and tactics that mitigate hazards while providing for the highest probability of success.			
Minimize fire spread to prevent loss of highly valued resources and assets including communities adjacent to the fire, high value commercial timber lands, infrastructure, and natural resources.			
Protect Salmon and Steelhead habitat in the Frank and Jeanne Moore Wild Steelhead Management Act Area by limiting fire spread and intensity that will negatively impact the watershed.			
Follow Northwest MAC Group COVID Mitigation Expectations and Requirements as well as CDC guidelines and COVID BMPs. If you or your resources have any symptoms, contact COVID Coordinator.			
<u>Management Objectives</u>			
Utilize the Risk Management Process and take actions that have a high probability of success and mitigate risk to incident responders and the public.			
Implement suppression actions in consideration of values at risk to minimize adverse impacts while managing fire suppression costs.			
Build and strengthen relationships with the community and partners by ensuring they have timely and accurate information.			
Take initial attack action on fires within the delegated IA response area (TFR). Support request for assistance to initial attack on North Umpqua Zone as requested.			
4. Operational Period Command Emphasis:			
General Situational Awareness:			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			
Approved Site Safety Plan(s) Located			
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

Jack Fire/Rough Patch Incident Weather Forecast

FORECAST NO: 38D
 PREDICTION FOR: Monday Day Shift
 SHIFT DATE: August 16, 2021
 FORECAST ISSUED: 1700 August 15, 2021

NAME OF FIRE: Jack Fire / Rough Patch Complex
 UNIT: N. Umpqua RD / GB Team 2
 INCIDENT METEOR. Jeff Tonkin
 Text Observations: 707-672-3386

WEATHER DISCUSSION:

An upper trough off the Pacific and associated dry front will move east across the perimeters today. This will spell an abrupt cooling trend as well as increasing west and northwest winds over the next few days. Much improved sky conditions are also expected in terms of smoke coverage...thus increased sunshine will help mixing and may promote stronger upslope and upcanyon winds each afternoon through Wednesday.

WEATHER FORECAST TODAY (MONDAY DAY SHIFT):

WEATHER: Sunny...light smoke.

MAX TEMPERATURES: Drainages (<3500 ft): 82 – 87 F Upper Slopes/Ridges (>3500 ft): 74 – 79 F

MIN HUMIDITY: Drainages: 16 to 21% Upper Slopes/Ridges: 38 to 43%

WINDS (EYE LEVEL):

Lower Slopes/Drainages WNW 4 to 6 mph...gusts 10 mph in afternoon. Upper Slope/Ridges: NW or upslope 4 – 7 mph...locally gusty from 10 to 14 mph after 1400 PDT.

LAL: 1 **CWR:** 0% **Mixing Height:** 6k ft AGL **Haines:** 4 **Inversion Elevation** 4k ft breaking late afternoon.

AFTERNOON / EVENING SMOKE TRNSPT WIND:

Lower slopes/Drainages...NW 4-6 mph. 5-8k ft elevation...W 8 - 12 mph. High Altitude...W 20 mph

WEATHER FORECAST FOR MONDAY NIGHT:

WEATHER: Marine Push...low clouds possible overnight. Breezy around sunrise.

MIN TEMPERATURES: Drainages (< 3500 ft): 53 – 57. Upper Slopes/Ridges (> 3,500 ft): 63 – 68 F

MAX HUMIDITY: Drainages: 80%. Upper Slopes/Ridges: 75 – 85%

WINDS (EYE LEVEL): Drainages/Valleys – Down slope or NW 2 – 4 mph..gusts to 8 mph.

Upper Slopes/Ridges – West and NW 4 to 6 mph...gusts 10-15 mph.

LAL: 1 **CWR:** 0% **Mixing Height:** 400 ft AGL

OUTLOOK FOR TUESDAY:

WEATHER: Morning low clouds with possible marine push. Higher RH's.

Drainages (<3500 ft): Max Temps: 75 – 79 F **Min RH:** 23 - 28%.

Upper Slopes/Ridges (>3500 ft): Max Temps: 68 – 73 F. **Min RH:** 43-49%.

Wind Lower Slopes / Drainages: NW 6 – 8 mph...Gusts 10-15 mph. **Upper Slopes/Ridges:** NNW 8 to 12 mph...Gusts 18 to 23 mph.

LAL: 1. **CWR:** 0%. **Mixing Height:** 5k ft AGL. **Haines:** 4 High

AFTERNOON / EVENING SMOKE TRNSPT WIND:

5 to 10k ft...W 25 mph. High Altitude...NW 35 mph

THREE DAY EXTENDED (WEDNESDAY – FRIDAY)

	<u>Max T</u>	<u>Min RH</u>	<u>Max RH</u>	<u>Midslope Afternoon Winds</u>	<u>LAL</u>	<u>WX</u>	<u>POP</u>
WED	82 – 86	38%	65%	NW 6-8 Gust 15 mph	1	AM Low clouds	0%
THU	86 – 91	34%	70%	NW 4-6 Gust 12 mph	1	Aft Cumulus	0%
FRI	84 – 89	40%	60%	NW 4-6 Gust 12 mph	1	Sunny	0%

Extended Fire Behavior Forecast # 39

Name of Incident: ROUGH PATCH COMPLEX (OR-UPF-000373)	Administrative Unit: Umpqua National Forest
Date & Time Issued: 1900– 08/14/2021	Operational Period: 8/15 to 8/18
FBAN: Dean Warner	Signed: 

Weather Summary

See attached Incident Weather Forecast. Hot and dry trending to more seasonal average by mid-week

Fire Behavior Summary

General – Max. spot distance: ¼ mile Prob. of Ignition: 70% Haines Index: 4 LAL: 1 ERC: <90% Sun-Wed	FUEL MODEL	Uphill Rate of Spread (ch/hr)	Backing Rate of Spread (ch/hr)	Uphill Flame Length (ft.)	Downhill Flame Length (ft.)
	Grass	30 ch/hr	2 ch/hr	5-6 feet	1-2 feet
	Timber Litter	3-4ch/hr	½ ch/hr	1-2 feet	½ foot
	Timber Understory	8-9 ch/hr	½-2 ch/hr	4-6 feet	1-2 feet

General: Forecasted weather will slowly trend from hot, dry, and smoky to seasonal averages with possible clearing, resulting less aggressive fire behavior by Wednesday. The outright lack of wind and blanket of smoke limits both the amount of solar radiation and vertical air movement. Dry fuels and steep topography will remain the primary drivers to fire movement. Consider live fuels very close to dormancy stage and available contribute to fire spread. The upper third of hillslope on south and west aspects will clear first and be especially active in the afternoon, while the mid-slopes typically form a thermal belt overnight, providing conditions throughout the night for active fire behavior.

Jack Fire: Unburned islands are comprised of sparse fuels that do not readily support fire spread. Watch for flare-ups near the control line. Snowbird/Buckhead will likely merge near Cow Prairie.

Chaos: If smoke clears expect uphill runs where dry fuels and topography align. Older stands of timber have abundant lichen, accentuating fire intensity and quantity of torching trees. Fire will move towards Canton point the north, Little Rock Creek and McKinley Rock to the east, and No Man Creek to the south. Watch for any fire to establish across Canton Creek as this could compromise the 2358 road.

Little Bend/Homestead: Due to the lower elevation and smoke impact, Little Bend has been less active. Watch for clearing skies or any wind to allow for vertical air movement, as this will allow for growth in practically all directions. Fire will continue to test the 38 corridor and Steamboat drainage.

Snowbird/Buckhead/Near Mink: Lack of smoke will create a longer burn window, earlier in morning and late into evening. Position on slope and fuel continuity will dictate fire intensity and rate of spread. A merge with Jack is likely near Cow Prairie, then later Snowbird/Buckhead and Near Minky are to merge within forecast period.

Air Ops/Smoke Dispersion

Smoke and morning inversion will impact visibility in afternoon hours.

Safety

Watch Out Situation 11 is emphasized today: **Unburned fuel between you and the fire.** We have a great deal of this situation, especially in Branch I. Remain alert for unanticipated runs through these fuels toward your location.

CHECK-IN & DEMOB INSTRUCTIONS
JACK Fire (OR-UPF-000625)
& Rough Patch Complex (OR-UPF-000373)

CHECK-IN: Check-in is an on-line only process.

STEP 1. Fill out and submit the online check-in form available at <https://bit.ly/2Rr545v> or scan the Jack Fire QR code.

STEP 2. Next email the following Documents to: 2021.roughpatch.finance@firenet.gov. Include your **Resource Order Number** in the email subject line:

<u>Documents</u>	<u>Fed/State Agency</u>	<u>Contractors</u>	<u>Crews</u>	<u>Equipment</u>	<u>AD/Casual Hires</u>
Resource Order	X	X	X	X	X
Red Card	X	X	X	X	X
Safety or RT-130 card for each person with quals & training date		X	X		
Contract Agreement (pages 1- 3)		X	X		
Pre-use equipment inspection				X	
Manifest (names & quals)			X	X	
Casual Hire Form with ECI#					X

Once completed you should get an automated response in your email that your Check-In was received.

STEP 3. All contracted Equipment resources, NERV rentals, and Contract Crews need an inspection from Ground Support and/or the Incident Contract Project Inspector.

Contact Michelle @ Check-In for questions at 253-339-0761 (from 0700-2000).

DEMOB:

STEP 1. Your incident Supervisor needs to submit a General Message to Demob 48 hours prior (72 if flying) to your departure. Ensure your last workday is correct in the IAP.

STEP 2. Return all items to Communications and Supply, Get inspection and weed wash.

STEP 3. Fill out and submit the online demob form available through the QR code below. Take hard

STEP 4. copies of your CTRs, Shift Tickets, Contracts and Resource Order to Finance. After getting your time posted you will finalize with finance by receiving your O-288.

STEP 5. Call Lorie in Demob @ 253-339-0751 to finalize your travel ETA/ETD information.

Thanks for your work and have a safe trip home.

ROUGH PATCH COMPLEX & JACK FIRE PHONE #'s

Overhead & Agency Crews (971)432-6135

Equipment & Claims (971)432-6018

Scan apps are free and work just like the camera on your phone. Photos are .jpg docs whereas scans are .pdf and take up far less data and band-width (not to mention they are easier to read). **Scanner Suggestions** –For iPhones only, there is a scan feature in the “Notes” app. Otherwise, we recommend (for both iPhones and Android) the “Adobe Scan” but make sure you send a copy of the scan, not a link. This is a free app and can be found and downloaded in your “App Store”.

Human Resource Message

As Human Resource Specialists assigned to this incident, our role is to facilitate a positive work environment and to help informally resolve issues and concerns.

Please feel free to come to either of us with any question or concern about any aspect of your work environment on this incident. We are committed to help resolve even the smallest problems²¹ so that everyone may have a positive experience. So, please reach out early rather than waiting until you demobilize.

If you are aware of inappropriate conduct, you have the *right and obligation* to do something about it. Come see either of us any time you have questions, concerns, or just want to chat.

“A sense of humor is part of the art of leadership, of getting along with people, of getting things done.”

—Dwight Eisenhower

Karen Mora, Human Resource Specialist, 970-420-5108

Larry Sandoval, Human Resource Specialist, 505-994-6489

TRAINING MESSAGE - Trainees - please SIGN IN with the Training Specialist, by accessing the fillable Trainee Sign-In Form here:

<https://forms.office.com/g/L5c3rbydZf>

ONCE YOU HAVE SIGNED IN.....at any time during the during the incident:

If Trainee or Trainer is demobing: Trainers – Trainer needs to **fill out the relevant parts of the Task Book** and do an **Incident Personnel Performance Rating** and discuss the assignment with the trainee.

If Trainee is staying: Trainee should contact the Training Specialist to discuss plans for remainder of the assignment.

If Trainee is demobing: Trainee should access the **Trainee SIGN OUT** form here:

<https://forms.office.com/g/AzqjvjDpZa>

If you have any questions or need to discuss your assignment, please contact the Training Specialist

Don Washco, 623-695-6487 Don_Washco@firenet.gov

MINIMUM IMPACT SUPPRESSION TACTICS (MIST)

Use of MIST **will not** compromise firefighter safety or the effectiveness of suppression efforts. Safety zones and escape routes will be a factor in determining fireline location

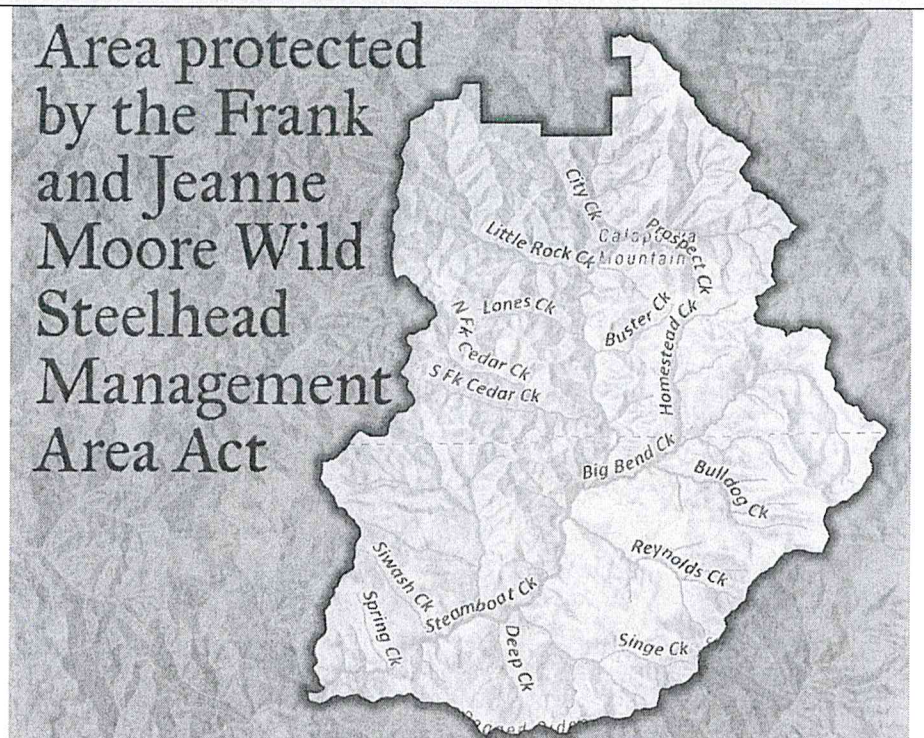

- a. Minimum Impact Suppression Techniques (MIST), as described by the Forest Service Northern Region in 1993, are recommended in Late-Successional Reserve, Managed Late-Successional Area land allocations, Riparian Reserves, Research Natural Areas, etc.

Talk to your READ to learn More!!

Parts of the Chaos and Little Bend Creek fires are burning within the Frank and Jeanne Moore Wild Steelhead Sanctuary which was established in 2019. Frank Moore is an international renowned conservationist and business owner who ran the Steamboat Inn. Jeanne Moore is an incredible naturalist who helped found the Glide Wildflower Show. The Steelhead Sanctuary is ~100,000 acres of prime wild steelhead habitat and spectacular late successional Forest.

The North Umpqua, Steamboat and Canton Creeks are home to winter and summer steelhead runs, Oregon Coho, Spring chinook and rainbow trout.

Please use caution when working around streams and rivers within all fires on the Umpqua National Forest, and if you have any questions about potential stream impacts, reach out to the READ/REAF on your Division.

Great Basin Team 2 Expectations 2021
Safety is the Team's Number One Priority
Everyone is a safety officer—See It, Say It, and Fix It!

The Team is committed to identifying clear Task, Purpose, and End State that achieves the Agency Administrator's direction and objectives in a timely and cost effective manner.

The Team provides every person associated with the incident a safe, productive, and supportive work environment.

The Team operates in a transparent manner, facilitating open communication and dialogue up, down, and across the chain of command, with active listening and opportunity for discussion and collaboration.

Here are a few ways you can help the Team create an atmosphere of **Duty, Respect, and Integrity** as outlined in the Incident Response Pocket Guide (IRPG):

If you Need to Leave the Incident Environment when Off Duty:

Notify your supervisor of destination and estimated time of return in the event you are needed for duty prior to expected time.

Alcohol /Illegal Drugs / Fitness for Duty

Alcohol and illegal drugs are not permitted within the incident environment. Be ready, willing, and able to perform your duties. If you are unable to perform your duties, you may be released from the incident with the home unit or employer being notified of the circumstances.

Work Environment/Human Relations:

Conduct yourselves as professionals and maintain a positive, non-hostile work environment with mutual respect. Sexual harassment, discrimination, acts of reprisal or any inappropriate behavior that violates human rights, the provisions of equal employment opportunity (EEO), or ethics and conduct standards will not be tolerated. If you need clarification of these expectations, contact the Human Resource Specialist.

Your actions in the community outside of the incident environment must also conform to these standards while assigned to this incident. Your integrity is shown by obeying the law and following local rules and ordinances. Non-compliance with these expectations could result in your being released from the incident with the home unit or employer being notified of the circumstances.

COVID Mitigation Expectations and Requirements:

The frequency of COVID exposures and cases are increasing on PNW wildfire incidents and within support functions. Our expectation and direction is that all PNW incidents and their support functions will implement and enforce the following:

- For ALL resources assigned to an incident within the PNW, wear a mask at all times whether inside or outside. Exceptions include working alone, working on the fire line,

having a medical exemption, and/or pilots and flight crew during all phases of flights for the following missions: airtanker, smokejumper, ATGS, ASM, point-to-point, HELCO, short-haul, rappel, and aerial ignition.

- Highly encourage limiting access to all fire related facilities, and
- Highly encourage maximum use of virtual meetings to the extent possible.

Work / Rest Guidelines:

Any shift times over 16 hours require written justification and approval by the appropriate Section Chief on the Crew Time Report, and will be reviewed by the Incident Commander.

Performance Evaluations:

Performance Evaluations will be completed for all trainees and contractors (including ADs). Any unsatisfactory performance will be documented on an evaluation. It is your responsibility to ensure that your supervisor has completed an evaluation.

Use of Social Media on Wildland Fire Assignments:

Firefighters and Incident Management Team (IMT) members should be aware that existing agency-specific ethics and conduct regulations and restrictions governing the use of social media by federal employees on fire assignments apply.

Only authorized employees designated by the hosting unit may represent the government on public social media websites. If you choose to post to a social media website you should have a disclaimer that clearly states the views or opinions that you express are yours alone and do not represent the views of your agency or the IMT.

However, anything that you do post regarding wildland firefighting and the agency you work for reflects on that agency, the IMT you are assigned to and all wildland firefighters.

Social media sites are regularly monitored by federal agencies and employees may be held accountable for inappropriate conduct or ethics. When in doubt, don't post!

I hope you have a safe, productive and rewarding experience here. If you have any needs or concerns that cannot be addressed by my Command and General Staff, please feel free to visit with me.

Tony DeMasters
Incident Commander

2021 Team Evaluation – Please share your evaluation of the team by scanning the QR code.

Rough Patch Complex and Jack Fire Initial Attack Responsibility and Procedures

The following applies to all IA responses:

- Relay the initial coordinates and size up information (if applicable) to the Rough Complex Communications Unit
- The Communications Unit will take the coordinates to the Situation Unit to plot and determine if the new start is in, or out of the IA responsibility area.
- The Communications Unit will notify Planning Operations of the potential new IA.
- If requested, the Planning Operations Chief will update the jurisdictional Duty Officer.
- The Communications Unit will notify the jurisdictional dispatch office of the new start and provide them an initial size-up and inform them of the resources responding
- In all cases, the IA will be documented using the appropriate Incident Organizer and be given to the local agency representative upon arrival on scene, in camp or sent to the respective dispatch center

Fires within the IA Responsibility Area:

- All communications will be handled through the incident Communications Unit
- The initial size up will be relayed to Line Ops who will send appropriate identified resources
- All requests for additional resources must be approved by Line Ops
- Great Basin Team 2 will manage the fire until it is suppressed completely, turned over to local resources, or the agency administrator makes a different decision regarding its management
- If the Jurisdictional Dispatch Center identifies a potential new start within the delegated incident IA response area, the center will notify Rough Complex Communications Unit and all above procedures will be implemented.

Fires outside the IA Responsibility Area:

- The respective dispatch center will dispatch resources to the fire per dispatch procedures unless otherwise requested by the Duty Officer for the jurisdictional Agency
- The jurisdictional duty officer may request team resources (aviation or ground) through the Rough Complex Communications Unit as approved by Line Operations.
- If Rough Complex/Jack Fire resources are utilized, and arrive on-scene first, they will provide a size up to the incident communications unit. Communications unit will provide intel/information to the jurisdictional dispatch center.
- The dispatch center will provide the air-to-air frequency to all dispatched aviation resources to communicate with air attack.
- Jurisdictional responding ground resources will be given the frequencies to the Rough Complex/ Jack Fire incident in the event there are resources responding from the Rough Complex/Jack Fire, to provide positive communications with all respondents.
- Aviation resources may go direct to the dispatch center for their notification and size up but must also notify the incident communications unit in coordination with the incident air attack.

HEALTH AND SAFETY MESSAGE

SAFETY** starts with **YOU

We are **ALL** accountable for **SAFE** behaviors
For Day/Night Operations: August 16, 2021

INCIDENT: **Rough Patch Complex/ Jack Fire**

DATE: 8-16-21

Major Hazards and Risks:

- **DRIVING:** Drive defensively, stay aware of changing road conditions, know where you are going. Expect the unexpected. **SLOW DOWN!!!**
- **TRANSITION:** Take the time to get clear leaders' intent. Ask questions and maintain a clear chain of communications throughout the operational period.
- **HEAT RELATED ILLNESS (HRI):** Take care to monitor the health and welfare of yourself and crew, drink plenty of water/fluids, take frequent breaks, get 8 hours of sleep, and get enough food.

Fire Order of the Day:

Keep informed on fire weather conditions and forecasts (#1)

- Evaluate the forecasts provided in the IAP.
- Listen to IMET or FBAN on the radio for updates
- What are your spot weather forecasts telling you?

LCES

- Have you placed the right lookout in the right spot?
- When did you check your radio for the right channels?
- What is the last time you looked behind you to assure you know what your escape route looks like if you need it?
- Do you know the difference between a deployment site and a Safety Zone?

LOOK UP LOOK DOWN LOOK AROUND

PREPARE RIGHT FOR A SUCCESSFUL OUTCOME.....

- **Keep it at or below the Speed Limit.**
- **Closed roads still have speed limits.**
- **Share the roads.**
- **It is our job to Expect the Unexpected!!!!**

Always think LCES.....

**Your Safety Team:
Laney Cutshaw
Brandon Hoffman**

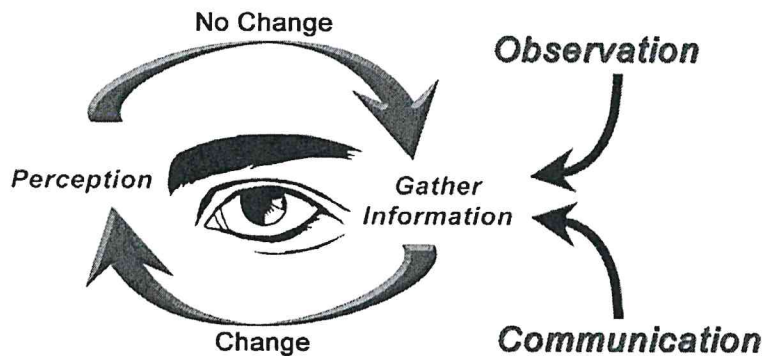

Discuss possible risks prior to engaging in work tasks.

Category: Leadership

The cornerstone of good decision making is good situational awareness. Leaders can increase their decision space by attaining and maintaining good situational awareness. Decision space is simply the amount of time that a decision maker has for considering options before reaching a required decision point.

Situational Awareness Cycle

Situational awareness is depicted as a cycle because the situation and people's perceptions are constantly changing. This internal cycle continues as long as people are awake. Everyone starts with an initial perception of any given situation and then continuously updates it with new information. People gather information through both observation, which includes input from the senses, and communication, which includes face-to-face conversation, written communication, and radio or telephone exchanges.

Simply paying attention is an important part of maintaining good situational awareness, but even more important is determining what to pay attention to. All perceptions are subject to filtering and focusing: people constantly filter information and shift focus. People also produce a lot of internal inputs such as thoughts about what to do next, stress, memories of similar experiences, fear.

Those with more experience in an environment often can more easily filter out distractions and unimportant details and focus on the most salient information.

Discussion Points:

- What does situational awareness mean?
- What are the actions that influence situational awareness?
- Is it possible to lose situational awareness?
- Does your situational awareness match reality consistently?

Have an idea? Have feedback? Share it.

Northwest MAC Group

Northwest Coordination Center
150 SW Harrison St Suite 400
Portland OR 97201
503-808-2720

August 3, 2021

To: Incident Commanders on Pacific Northwest (PNW) IMTs, IMTs working in the Geographic Area, and all PNW Agency Administrators

From: Chuck Turley, PNW MAC Acting Chair on behalf of all PNW MAC Agency Executives

Subject: COVID Mitigation Expectations and Requirements

The frequency of COVID exposure and cases is increasing on our PNW wildfire incidents and within support functions. PNW MAC has reviewed the multiple guidance documents provided by CDC, Wildland Fire Medical and Public Health Advisory Team (MPHAT), and federal, state, and local entities. Beginning immediately our expectation and direction is that all PNW incidents and their support functions will implement and enforce the following:

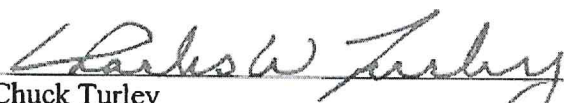

- for all resources assigned to an incident within the PNW, and for our NW IMTs assigned outside the PNW, wear a mask at all times whether inside or outside. Exceptions include working alone, working on the fire line, having a medical exemption, and/or pilots and flight crew during all phases of flights for the following missions: airtanker, smokejumper, ATGS, ASM, point-to-point, HELCO, short-haul, rappel, and aerial ignition,
- highly encourage limiting access to all fire related facilities, and
- highly encourage maximum use of virtual meetings to the extent possible.

The PNW MAC and partner agencies are not authorizing the “Module as One” concept nor any process that would lessen the expectations and requirements set forth in this letter.

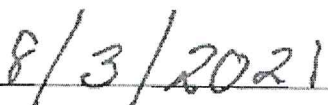

This direction applies to all levels of incident operations and all aspects of an incident including but not limited to transportation to/from incidents, ICPs, spike camps, helibases, tanker bases, ground support units, dispatch centers, smokejumper bases, caches, etc.

Thank you for your vigilance of COVID protections.

Respectfully,

Chuck Turley
PNW MAC Acting-Chair

2021 COVID-19 Guidance
Great Basin Incident Management Team 2

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>Take temperature with no-touch thermometer, if available</i>

Instructions for Screening

Item	What to Do
Supervisors should check in with resources multiple times a day (e.g., morning, lunch and after shift) to ensure no symptoms have developed.	Contact Medical or call the COVID Coordinator 503-985-2082
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed. Do not announce, escort symptomatic individual to an isolated area and contact Medical or the COVID-19 Coordinator.

MEDICAL PLAN (ICS 206 WF)

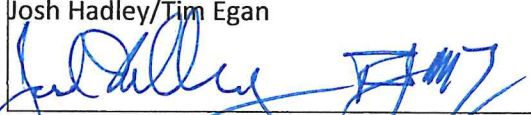

Controlled Unclassified Information//Basic

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following item to communicate situation to communications / dispatch.

1. **CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report) *Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*
2. **INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
