Comments / notes on tonight's mission and this interpretation: **Note: at the request of the IMT managing the fire, tonight's acreage includes only the acres associated with the Jack fire. For acres associated with the fires south of Jack including the fires near Mink Creek, Buckhorn Mountain and Snowbird Mountain, see the maps and logs for the Rough Patch Complex (https://ftp.wildfire.gov/public/incident_specific_data/pacific_nw/2021_Incidents_Oregon/2021_RoughPatchCpx_ORUMP000373/IR/) Growth was primarily limited to the fire's southern edge. Some small pockets of intense heat were mapped. Two new heat sources were located west of the Jack fire near Panther Ridge.
