Comments / notes on tonight's mission and this interpretation: Interpretation started with the current Wildfire Daily Perimeter in NIFS. Reported acres are geodesic. Gales: Cloud cover made interpretation difficult in the central part of the fire, in Fall Creek drainage. Mapped heat and adjusted perimeter where visible. Kwis: No change in perimeter. No heat outside of the perimeter. All products have been posted to the FTP and uploaded into NIFS. https://ftp.wildfire.gov/public/incident_specific_data/pacific_nw/2021_Incidents_Oregon/2021_MiddleForkComplex_ORWI_F210307/IR
