

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Rough Patch Complex & Jack Fire	2. Operational Period: Date From: 9/23/21 Time From: 0600	Date To: 9/23/21 Time To: 2100
---	---	-----------------------------------

3. Objective(s):

1. Address the safety of incident responders, aviation and public through clear communication. Ensure an understanding of strategies and tactics, including a clearly defined and obtainable end state, to facilitate sound risk mitigation decision making.
2. Using a full suppression strategy, develop a long-term plan for the Rough Patch Complex and Jack Fire that incorporates primary, alternate, contingency, and emergency plans that identify opportunities for both direct and indirect suppression actions in alignment with the following prioritized highly valued resources and assets:
 - Community Infrastructure and Defensible Homes and Structures: Minimize fire threat and impacts to the Bohemia Mining District, Star Mine, Doehead Repeater and other communication sites, ODOT facilities and Highway 138, Pacific Power facilities, private property, and any other private structures. Coordinate suppression actions with cooperators responsible for structure and private land protection.
 - Economic Value of Natural Resources: Exclude fire where feasible to prevent fire effects to industrial, O&C, and converted/matrix timberlands, timber sale areas, and Cow Creek tribal cultural and natural resource values.
 - Natural and Cultural Resource Values: Weigh potential suppression actions in consideration of the natural values in the Steamboat drainage, in particular the Frank and Jeanne Moore Wild Steelhead Management Area, eligible historic properties, cultural resources, seed orchards, south Umpqua Experimental Forest, Boulder Creek Wilderness, Late Successional Reserves, IRAs, coho salmon, and northern spotted owl critical habitat to minimize high intensity fire effects and undesirable suppression related effects to these values.
 - Agency Owned Recreation Sites and Facilities: Provide point protection where applicable to minimize fire threat and impacts to FS and BLM recreation sites, structures and associated facilities including Musick Guard Station and Fairview Lookout, based on fire behavior and movement.
3. Monitor air quality, identify sensitive areas and communities at risk from smoke impacts. Identify appropriate ways to minimize impacts and methods to reduce smoke exposure by coordinating with Oregon DEQ, Oregon Health Authority and providing clear messaging to the public.
4. Provide timely and accurate incident information through the press, community meetings, trap lines, briefings, and social media. Incident information shall be coordinated between the team and the Umpqua NF and BLM Swiftwater Field Office.
5. Provide for initial attack on any new fires within the delegated response area of the TFR. Support requests for initial attack outside of the TFR as requested by the Agency Administrators.

4. Leaders Intent:

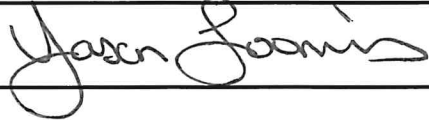

- The highest priority on this incident is to protect the safety of fire personnel and to protect human life. Ensure that communication channels are in place and effective at all levels of management on the Rough Patch Complex and Jack Fire.
- Manage exposure and spread of COVID-19 by implementing all recommended and required Northwest MAC Group and CDC mitigations at ICP, spike camps, and on the line when feasible by socially distancing, masking up both inside and outside and minimizing in-person interactions where appropriate.
- Maintain and strengthen relationships with the Umpqua NF, Willamette NF, BLM Swiftwater Field Office, Cow Creek Band of the Umpqua Tribe, ODF, Douglas and Lane County Emergency Managers and Sheriff's Departments, Douglas County Fire Protection Association, Pacific Power, community leaders, other cooperators, local agencies, and private landowners utilizing the most effective platforms available.
- Maintain a positive and inclusive workplace where all personnel are treated with respect and courtesy.
- Ensure good financial management of the Rough Patch Complex and Jack Fire by establishing and monitoring cost effective methods for accomplishing operational objectives.

Fire Weather Forecast

THURSDAY, SEP 23, 2021

FORECAST NO: 76
PREDICTION FOR: Thursday, Sep 23, 2021
ISSUED: 2000, Sep 22, 2021

NAME OF FIRE: ROUGH PATCH COMPLEX/JACK FIRE
UNIT: N. Umpqua RD
SIGNED: *Shane Eagan* Shane Eagan, IMET

DISCUSSION: Expect a warming and dry trend through the weekend across the Rough Patch Complex. Thursday will be drier than Wednesday, as RH bottoms out around 20 percent at ridgetops. Poor humidity recovery and breezy easterly winds are expected overnight Thursday into Friday morning. Friday will be the warmest day of the week, with lower elevation areas pushing 90 degrees. The heat coupled with a very dry air mass and breezy winds will result in elevated fire weather conditions early Friday morning through the afternoon. Cool and potentially wetter weather arrives next week, although the exact details on precipitation amounts are still murky. As it stands today, there is a good chance (~40-50%) of periodic wetting rains (>.25") after Monday.

THURSDAY:

SKY/WEATHER: Partly cloudy and warmer.

WIND (20 FT):

Sheltered areas: Downslope/down valley through 1000 then upslope/up valley 4-8 mph, gusts to 10 mph.

Ridges, unsheltered areas, wind-aligned drainages: NNE 5-10 mph with gusts 10-15 mph, becoming NW after 1400, especially on western areas of the complex and around ICP.

MAX TEMPERATURE: Lower slopes (< 3500 ft): 77-84F; Upper slopes/ridges (> 3500 ft): 70-76F.

MIN RH: Lower slopes: 25-35%; Upper slopes/ridges: 20-30%.

HAINES: 4 **INVERSION:** Low-level inversion mixes out by late morning. Mixing height: 5,000 ft.

THURSDAY NIGHT:

SKY/WEATHER: Mostly clear, breezy, and dry.

WIND (20 FT):

Sheltered areas: Downslope/down valley 2-5 mph.

Ridges, unsheltered areas, wind-aligned drainages: E 5-10 mph, gusts 10-20 mph.

MIN TEMPERATURE: Lower slopes: 48-55F; Upper slopes/ridges: 45-55F.

MAX RH: Lower slopes: 55-70%; Upper slopes/ridges: 40-55%

INVERSION: Strong inversion near mid-slope.

FRIDAY: ELEVATED FIRE WEATHER CONDITIONS POSSIBLE

SKY/WEATHER: Mostly sunny, warmer, dry, and breezy.

WIND (20 FT):

Sheltered areas: Downslope/down valley through 1000 then upslope/up valley 4-9 mph, gusts to 12 mph.

Ridges, unsheltered areas, wind-aligned drainages: SE 6-11 mph with gusts 12-20 mph, becoming WNW after 1300.

MAX TEMPERATURE: Lower slopes: 84-93F; Upper slopes/ridges: 77-85F.

MIN RH: Lower slopes: 20-30%; Upper slopes/ridges: 12-25%.

HAINES: 4 **INVERSION:** Low-level inversion mixes out by late morning. Mixing height: 6,500 ft.

Extended outlook: Saturday: Mostly sunny. Highs in the low 70s to low 80s. Min RH: 30-45%. SE winds becoming WNW winds 5-12 mph. **Sunday:** Partly cloudy. Highs in upper 60s to upper 70s. Min RH: 30-45%. NW winds 5-15 mph. **Monday:** Increasing clouds, chance of rain. Highs in the upper 50s and 60s. Min RH: 55-75%. NW winds 8-25 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 74	TYPE OF FIRE: Wildfire
FIRE NAME: Rough Patch Complex & Jack Fire	OPERATIONAL PERIOD: 09/23/2021 (0600-2000)
DATE ISSUED: 09/22/2021	TIME ISSUED: 2000 Hours
UNIT: OR-UPF, Umpqua National Forest	SIGNED: Barry Kleckler /s/ Barry Kleckler – FBAN

INPUTS

WEATHER SUMMARY: ****Warming and Drying Trend Continues****
See fire weather forecast for details

FUELS:
 Two primary timber stands in the fire area are Douglas-fir with cedar, madrone, white fir and big leaf maple that are open with low brush mixed throughout the understory (TU5). The second is Douglas-fir with moderate to heavy brush in the understory (TL5). Both timber stands have light to moderate dead and downed material. Litter and duff are damp, fine fuels may slowly become available by the end of the week to sustain surface fire spread.

Forecast ERC to increase each day this week

OUTPUTS

FIRE BEHAVIOR GENERAL:
 Fire behavior will be limited to smoldering and stationary consumption of logs and stumps as fuels slowly dry out after weekend precipitation. Each day of drying may lead to slightly increased areas of visible smokes, but good overnight humidity recovery limits "peak" burning to a few hours each afternoon.

- Timber Litter – TL5 (High Load Conifer Litter)
 - Rate of Spread – smoldering creep with flame lengths less than 1 foot.
- Timber Understory – TU5 (Very High Load, Dry Climate Timber-Shrub)
 - Rate of Spread – smoldering creep with flame lengths less than 1 foot.

FDFM 4-6% PIG 50-70% Torching Unlikely Crown Runs Unlikely

***Fine Dead Fuel Moistures and Probability of Ignition are based on peak forecast fire weather conditions and do not take into account recent precipitation. Fire behavior forecast is based on observed fuel conditions.**

FIRE BEHAVIOR SPECIFIC:
 Unlined Divs: Smoldering and creeping edge. Watch for increased amounts of smoke as a sign of fuels beginning to dry.
 Lined Divs: Continued consumption of heavies and stumpholes mostly interior. Beware of snags if going deeper.

AIR OPERATIONS:
 Visibility should be good throughout the day. Very little smoke and a few high level clouds.

SAFETY

Transition day. Short period to get up to speed. Ensure communication is complete; what you say may not be what is understood.

Smoldering fire behavior still carries a number of hazards: ash pits, stumpholes, steam burns, and ash in the eyes. Ensure safe practices are followed when providing suppression repair and mopping up. Recent rains may have made snags and trees "top heavy" with moisture, and loosened rocks that may fall and roll.

Take hourly weather observations, including Fine Dead Fuel Moisture and Probability of Ignition calculations, communicate to fire resources.

SAFETY MESSAGE

SAFETY starts with YOU

We are ALL accountable for SAFE behaviors

INCIDENT: Rough Patch Jack Complex	DATE: Wednesday, Sept. 22, 2021 SHIFT: Day
<p>Transition: We're in a state of transition- Incoming team with transfer of command. Operations shifting from extended attack to more mop up. New team members, new leadership. Communications is key to success and safety. If you see something being done or planned that is unsafe say something.</p> <p>Communications: Transition day is the time to make sure you know who are you working directly for, and how to reach them. Know your chain of command. Ask questions. Mitigate the friction and cut through the chaos of Transition Day by Increasing the width of your communications (who you talk to) and depth (how much detail) and clarity (message clear and understood?) of your communications. Go face-to-face if possible to assure complete meeting of the minds.</p> <p>Driving: Watch your speed here in camp and to and from the fire. Be especially careful and attentive to cross traffic making a left turn onto or off of highway 138. If you are behind the wheel, you are being paid to drive safe and slow. Drive Defensively. Use your mirrors. Turn on your headlights (not just daytime driving lights). Seatbelts are not optional!</p> <p>Personal hygiene and Covid / Camp Crud Mitigation: Shower as needed. Wash or sanitize your hands more frequently than you think you need to. Wear your mask properly in situations where it is required- indoors and outdoors where adequate social distance cannot be maintained. This community is having a spike /surge in cases, and you need to wear your mask at local businesses in town too.</p> <p>Covid Symptoms:: If you have a fever, unexplained sweats or headache, or other flu-like symptoms notify your supervisor immediately. Stay away from others. Testing is available. The first step is to notify your supervisor and the established protocol will be activated. Don't delay. Let us help you.</p>	

Risk Management: Have you looked for hazards up, down and around and anticipated them through time going forward? Are strategies and tactics working? Do adjustments for safety need to be made? ; If so, let the Safety Officer or your supervisor know.

On-site ICP Safety Officers: Matt Broyles, Kris Croddy

Human Resource Message

Alcohol and Drug Free Incident

This Incident is Alcohol and Drug FREE

Alcohol, non-prescription drugs, and federally unlawful drugs (**including marijuana**) are not permitted at this incident (ICP, spike camps, and on the fireline). Possession or use of these substances will result in immediate action.

Being under the influence:

- Compromises safety and could cause injury or death of yourself or others
- Interferes with our mission, particularly when resources are stretched and optimal performance is needed from everyone
- You WILL get you sent home, thus damaging your reputation and career

Be a positive role model. If you are aware of inappropriate conduct, you have the *right and obligation* to say something.

Please come see me if you have questions, concerns, or just want to chat.

Karen Mora, Human Resource Specialist, 970-420-5108

HAVEN'T HAD THE TIME TO GET YOUR COVID VACCINATION AND YOU WOULD LIKE TO GET ONE?

Contact the Covid Coordinator at Jack/Rough
Patch ICP at (503) 985-2082

(Call 3 days prior to DEMOB to set up an appt.)

**Douglas County Public Health will be offering the
Johnson & Johnson one dose shot at no cost.

2021 COVID-19 Guidance
Great Basin Incident Management Team 2

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>Take temperature with no-touch thermometer, if available</i>

Instructions for Screening

Item	What to Do
Supervisors should check in with resources multiple times a day (e.g., morning, lunch and after shift) to ensure no symptoms have developed.	Call COVID Coordinator 503-985-2082
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed. Do not announce, escort symptomatic individual to an isolated area and contact Medical and/or the COVID-19 Coordinator.

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o – 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o – 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>		
Patient Location			<i>Descriptive Location & Lat. / Long. (WGS84)</i>		
Incident Name			<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>		
Patient Care			<i>Name of Care Provider (Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG page 106					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
