INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAYS	
S-503 FIRE		Date/Time From: 06/27/2021 0600 SUN	Date/Time To: 06/27/2021 2200 SUN
3. Objective(s):			
Operational Objectives <ul style="list-style-type: none"> · Provide for firefighter and public safety using ongoing risk analysis and reasonable mitigation of identified hazards. · Protect community of Pine Grove. · Assist Warm Springs Agency with Initial Attack as requested. 			
Management Objectives <ul style="list-style-type: none"> · Maintain and enhance relationships with cooperators, stakeholders, landowners, and communities. · Provide accurate and timely information to the public. · Manage cost commensurate with values at risk and update Agency Administrators daily. · Protect Tribal, cultural, archeological, and sensitive plant sites by coordinating with Resource Advisors. · Treat each other with dignity and respect and act in a professional manner on the fire and in the community. 			
4. Operational Period Command Emphasis:			
Be deliberate. Do the job focused on quality.			
General Situational Awareness:			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			
Approved Site Safety Plan(s) Located

Fire Weather Forecast

FORECAST NO: 5
 PREDICTION FOR: Sunday – Day Shift
 SHIFT DATE: June 27th, 2020
 ISSUED: 2000, June 26th, 2021

NAME OF FIRE:
 UNIT:
 Incident Meteorologist:
 Signed: *Todd Carter*

S-503 Fire
 Warm Springs Agency
 Todd Carter

DISCUSSION:

*** Increased Northeast Wind Sunday Afternoon ***

*** Excessive Heat Warning in Effect – Issued by NWS Pendleton, OR ***

Temperatures will climb between 98 and 103 on the fire continuing a heat wave that will last into next week. Sunday will have afternoon to early evening breezy northeast winds with gusts to 25 mph especially on the ridges. There is no red flag warning in effect. It will also be drier with relative humidity nearing 15 percent. Expect poor humidity recovery at night through into next week. Monday will be extremely hot for this area at 105 degrees on the fire and 113 around base camp. A break in the heat is anticipated Tuesday night into Wednesday but that will be accompanied with an increase in westerly wind. There is no precipitation in the forecast for at least the next 7 days.

SUNDAY: *** Extremely Hot, Dry and afternoon Breeze ***

WEATHER: Sunny Hot with afternoon breezes.

20-FOOT WIND

- Valleys: Down slope/valley 3 mph. Trending northeast 7 mph after 1000. Then 9-12 mph after 1400. Gusts to 20 mph in the afternoon.
- Ridges: Northeast 9 mph increasing to 12-16 mph with gusts to 25 mph in the afternoon.

MAX TEMPERATURES: Around 102 lower elevations and around 97 ridges around 3200 feet.

MIN RH: Drier. 13 to 19 percent valleys and ridges.

HIGH HAINES: 3 (Very Low).

CHANCE RAIN/T-STORMS: 0%.

LAL: 1

CWR (>= 0.10"): 0%

0%

Mixing Height: 6000 Feet AGL.

SUNDAY NIGHT

WEATHER: Clear.

20-FOOT WIND

- Valleys: Northeast 9 mph becoming down slope/valley 2-4 mph after 2100.
- Ridges: Northeast 10 mph. Gusts to 20 mph in the evening.

MIN TEMPERATURES: Around 70 valleys and ridges.

MAX RH: Poor Humidity Recovery. 50 percent valleys and 35 percent ridges.

HIGH HAINES: 3 (Very Low).

CHANCE RAIN/T-STORMS: 0%.

LAL: 1

CWR (>= 0.10"): 0%.

0%.

Mixing Height: 5000 Feet AGL until 2200 then falling to near surface in the valley.

MONDAY: *** Continued Extreme Heat ***

WEATHER: Sunny.

20-FOOT WIND

- Valleys: Down slope/valley 3 mph. Then northeast 5-9 mph after 1200. Gusts to 17 mph in the afternoon.
- Ridges: Northeast 9-13 mph. Gusts to 22 mph in the afternoon.

MAX TEMPERATURES: Around 106 lower elevations and near 100 on the ridges around 3200 feet.

MIN RH: Drier. 12 to 18 percent valleys and ridges.

HIGH HAINES: 4 (Low).

CHANCE RAIN/T-STORMS: 0%.

LAL: 1

CWR (>= 0.10"): 0%

0%

Mixing Height: 7000 Feet AGL.

BASE CAMP(a) High Temperatures: Sun (109), Mon (113), Tue (110)

LONGER TERM TREND:

Tuesday through Wednesday: Extreme heat continues through Tuesday. Highs will be 100-105 and minimum relative humidity 15-20 percent. Northeast winds will turn around from the West 10 mph in the afternoon. Poor relative humidity recovery overnight less than 60 percent on average. Some cooling by Wednesday and Thursday into the middle 90s with some westerly breezes and a little higher humidity.

You can report to the IMET 509-319-0474 (text) / todd.carter@noaa.gov (email). Or give observation sheets to the FBAN or IMET.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 7	TYPE OF FIRE: Wildfire
FIRE NAME: S-503	OPERATIONAL PERIOD: 6/27/2021 0600-2200
DATE ISSUED: 6/26/2021	TIME ISSUED: 2000
UNIT: Warm Springs Agency	SIGNED:  Jim Hampton FBAN

INPUTS

WEATHER SUMMARY

Maximum temp: 102 valleys, 97 near 3200 feet
Relative humidity (min): 13-19%
20' Winds: See weather forecast for specific wind information

OUTPUTS

FIRE BEHAVIOR

GENERAL: The primary geological feature within the fire area is a lightly dissected east-west ridge (Laughlin Hills) on the north flank of the fire. Timber fuels consist of mixed conifer and lodgepole pine both with grass/brush understory. Past fire activity is evident within and adjacent to the perimeter. Heavy fuel loadings are present in older growth timber models. Oak savannah fuels are present within the fire perimeter as well.

FIRE BEHAVIOR BY FUEL MODEL

Fuel Type	Head Spread Rate	Flame Length	Spotting Distance
Low Load Grass (GR2)	60 ch/hr.	4 feet	.1 mile
Grass-Shrub (GS2)	30 ch/hr.	6 feet	.1 mile
Timber litter (TU1)	7 ch/hr.	2 feet	.1 mile
Timber with Understory (TU5)	13 ch/hr.	6 feet	.1 mile

Calculations based on 25% slope

Haines: 3 (Very Low)
PIG: 90%
Expected Fine Dead Fuel Moisture: 3%
LAL: 1

SPECIFIC:

All Divisions:

Unburned pockets of fuel within the perimeter will continue to consolidate through the burn period. Expect smoldering fire to transition to creeping surface fire and occasional isolated and multiple tree torching. **Deteriorating overnight humidity recovery means an extended burn period. Fire will become active earlier, burn with more intensity through the burn period and burn longer into the evening.** Areas containing larger diameter down fuels will be very resistant to mopup.

*** Potential for moderate to high rates of spread and moderate spotting distance in light fuels on new starts or spot fires***

AIR OPERATIONS: Heat will have an impact on aviation efficiency throughout the afternoon.

SAFETY

Watchout Situation #14: Weather getting hotter and drier.

S-503 Rehabilitation Standards

Mop Up Standards General

1. All fires will be completely lined.
2. Generally, in timber fires we have required mop up within 300 feet of the main perimeter of the fire. Discretion to go less than 300 feet is provided by Operations in specific cases to provide for firefighter safety. Examples include snag patches and steep slopes.
3. In grass and woodland areas generally mop up within 100 feet of the main perimeter of the fire.
4. Remove any snags with risk within 2 tree lengths of fire perimeter. If a snag is sound, it must be left standing due to the high value of Tribal timber and responsive salvage operations.
5. Go direct line whenever possible. Cold trailing is possible in certain situations.
6. 100% mop up on all spot fires.

Dozer Line: (Dozer line rehab will be implemented during the type III/IV organization)

1. All dozer lines will need accurate GPS and put on a map.

Hand Line

1. Use hand tools only for repair of hand lines.
2. Pull back hand lines and obliterate any berms. The berm material should be spread back into the hand line or recontoured to the hand line.
3. Construct water rills (breaks) only on slopes greater than 30 percent. Also use woody debris to act as natural sediment dams. The construction of water rills is significantly different from building water bars or cross drains on established trails. On handlines, water rills are only intended to break the momentum of overland flows and should gradually disappear with time. Create water rills by raking loose soil to 4-6 inches and at a 45-degree angle to the hand line. All rills should be constructed to drain outside the burned area. Space rills every 50 feet or in all natural drainage areas.
4. Remove all trash, equipment, flagging on way out, depositing in the appropriate location.

Under Slung Hand Lines

1. Return soil to trench and tamp to compact.
2. Install cross drains every 50 feet and all natural low spots to prevent water consolidation in the hand line.

Roads Blading will be done during type III/IV organization for safety reasons.

1. Watering of roads necessary.

Other Rehab:

1. Remove and backhaul all trash and non-essential equipment.
2. If pumps are left on fireline then site locations need accurate GPS points.
3. Remove porta-potty's and hand wash stations if not needed.
4. Return fish barrels to Warm Springs Agency if not needed.

Resource Information

1. Provide information to resource advisors about fire damage to fences, gates, troughs, corrals, cattle guards, signs, roads, and any discoveries of archaeological features or artifacts.

Vernon Wolf (Lead READ)

541-460-1336

 **HEALTH AND SAFETY MESSAGE** 

“Safety is a continuing journey, not a final destination”

INCIDENT: S-503	DATE: 6/27/21	TIME: ALL
Major Hazards and Risks: DRIVING, HEAT RELATED INJURY, HAZARD TREES, HEAVY EQUIPMENT OPERATION, SAW OPERATIONS, ATV/UTV USE, AVIATION OPERATIONS, STINGING AND BITING INSECTS		

- Driving continues to be one of the major hazards we face on this fire each day. Continue to use your headlights when traveling, this helps other drivers to see you especially on the dusty roads within the fire area. Please take a look at the distracted driving tips in the box below.
- Over the past several days temperatures have been rising to well above seasonal levels. Follow the Heat Related Injury (HRI) mitigations (IRPG pg 109) and review and follow the Incident Medical Plan (ICS-206). As you change locations during your work assignment be aware of where the line medical staff are located and your proximity to helispots should you need one.
- Hazard Trees – as you continue to push farther in from the line with your mop-up efforts, this will expose you to new areas. Thoroughly scout your work area and mitigate hazards with appropriate felling/bucking resources prior to conducting mop-up operations.
- Personal Hygiene – The COVID-19 protocols put in place last year had the additional benefit of nearly eliminating “Camp Crud”. Some of these protocols we’d like to continue with are just plain good hygiene habits. They are; washing your hands with soap and water before eating and after using the restroom at a minimum, using an alcohol based hand sanitizer when soap and water are not available and not sharing personal items such as water bottles or communication devices.
- Heavy equipment operations will likely continue. When you’re working with heavy equipment like Skidgines and dozers, keep in mind the operator sometimes has limited visibility. Make sure you make contact with the operator before working close to them so they know where you’re going to be.

Watch Out Situation of the Day

6. INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Distracted Driving

There are three main types of distractions:

1. Manual: taking your hands off the wheel
2. Visual: taking your eyes off the road
3. Cognitive: taking your mind off driving

- Driving while using a cell phone reduces brain activity associated with driving (e.g., spatial processing that helps drivers remember and make sense of the objects they observe on the street) by 37 percent.
- Phone conversations of any type increase reaction times and increase variations in speed, lane deviations, and steering wheel control.
- When conversing on mobile devices, either hand-held or hands-free, drivers increase their risk of a crash two to four times.
- Texting takes your eyes off the road for 4.6 seconds. At 55 MPH, that’s like driving an entire football field blindfolded.
- Talking to a passenger while driving is significantly safer than talking on a cell phone, a University of Utah study found. Passengers, unlike cell phone conversations, can make the driver aware of changing road conditions they might not see and can stop the conversation if traffic conditions warrant.

Your IMT 8 Safety Team: Jeff Bishop, Jerry Van Dyne, Paul Brna

AIR OPERATIONS SUMMARY 220		Prepared By: Norm Sealing		Prepared: 06/26/21		Prepared Time: 1600 hrs.

Team Ordering/Timeline Process:

1100 - Last call to change spike camp resource hot food location.
 1600 - DIVS to have next day's resource order ready for Planning OPS.

- All crew level orders will be placed through DIVS or Branch.
- DIVS or Branch will place all orders through Supply - Contact Lanny at (407) 744-7711
- All orders will be tracked using the process found on the front of this form.

GPS Datum: NAD 83- Degrees, Decimal, Minutes (DDMM.MM)

Definitions

FOB-Forward Operating Base is a secure forward position established to strategize, design and discuss tactics, and for personnel to transfer information and meet.

Line Spike Camp-Managed by Operations at the DIVS level; mobile, short duration and self- sufficient.

Spike Camp-Supported by Logistics, listed in the IAP, numbers in camp are set by 1100, named by Plans.

Emergency Medevac- Life threatening situation requiring immediate medical attention. Handled as per IAP med plan and team SOP's. Communications to clear command channel radio traffic.

Medical Transport-Transport of less serious injury/illness managed by Operations or line Medics back to camp for evaluation and/or treatment.

S-503 Fire

June 27, 2021

Stress - Fire Season

As the fire season wears on, stress between you and coworkers may accumulate, and at times you may feel like you are losing control of the situation. Frustration, anger, and hurt feelings build-up, which could land you in a compromising position.

Here are a few tips to avoid a "storm":

- Try to deal with problems while they are small.
- Anticipate and calm yourself before interacting with the individual.
- Train yourself not to react with a knee-jerk response.
- Focus on the good qualities of your coworker.
- Process the situation and try to understand their perspective.
- Evaluate if you or others encourage poor behavior and make changes accordingly.
- Avoid specific conversation topics.
- If you must confront the individual, do so politely and professionally and avoid accusatory statements.

Incident information on the web – <https://inciweb.nwccg.gov/incident/7559/>

Send us your best shots!

The public information shop needs help sharing the S-503 Fire story with an engaged, supportive public! Most people don't know what it really means to contain a wildfire — your photos can help them understand the incredible work you do.

Photo examples —

- Line Construction
- Mop-Up
- Hose Lays
- Line rehab
- Night Ops
- Holding
- Gridding

We can only use photos that show everyone wearing proper PPE — hardhat, gloves, glasses, etc.!

How to share photos —

- Text photos to (541) 670-0812
- Email photos to 2021.S-503@firenet.gov
- Catch one of our PIO staff at briefing — we can AirDrop or figure out alternative options for picture sharing

S-503 Fire Demob Instructions

Follow these steps in the order below:

- 1. Turn in crew time and equipment shift tickets.
- 2. Inspections are only required for contractors that have damage and want to make a claim. The inspection is optional for agency resources. Inspections are available at Base Camp on the Fred Ashley Road.
- 3. Return any items you checked out from **Supply** at Base Camp on the Fred Ashley Road.
- 4. Return any items you checked out from **Communications** at ICP at the Wasco County Fairgrounds.
- 5. Drop any evaluations or training documentation in the documentation box at Finance.
- 6. **Finance** : Proceed to the appropriate Finance table (Personnel or Equipment) at ICP at the Wasco County Fairgrounds.
- 7. **DMOB Unit** – **FINAL STEP: Stop by DMOB** at ICP at the Wasco County Fairgrounds. You are not completely demobed until you inform DMOB.

In case of an urgent medical emergency (Yellow or Red), Establish an IC for the IW1 and follow your Medical Incident Report and contact S-503 Communications on Command. Daily- Establish your PACE (Primary, Alternative, Contingency, Emergency) model for medical emergency extraction.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report																													
<p>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</p> <p>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</p>																													
<p>Use the following items to communicate situation to communications/dispatch.</p>																													
<p>1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha, Stand-by for Emergency Traffic."</i></p> <p>2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i></p>																													
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>																												
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>																										
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other																										
Patient Location			Descriptive Location & Lat. / Long. (WGS84)																										
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>																										
On-Scene Incident Commander			Name of on-scene IC of incident within an incident <i>(Ex: TFLD Jones)</i>																										
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>																										
<p>3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)</p> <p>Patient Assessment: See IRPG page 106</p> <p>Treatment:</p>																													
<p>4. TRANSPORT PLAN:</p> <p>Evacuation Location (if different): <i>(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)</i> Patient's ETA to Evacuation Location:</p> <p>Hellspot / Extraction Site Size and Hazards:</p>																													
<p>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:</p> <p><i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i></p>																													
<p>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>Function</th> <th>Channel Name/Number</th> <th>Receive (RX)</th> <th>Tone/NAC *</th> <th>Transmit (TX)</th> <th>Tone/NAC *</th> </tr> </thead> <tbody> <tr> <td>COMMAND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>AIR-TO-GRND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>TACTICAL</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>						Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *	COMMAND						AIR-TO-GRND						TACTICAL					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *																								
COMMAND																													
AIR-TO-GRND																													
TACTICAL																													
<p>7. CONTINGENCY: Considerations: <i>If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.</i></p>																													
<p>8. ADDITIONAL INFORMATION: <i>Updates/Changes, etc.</i></p>																													
<p>REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.</p>
