BULLDOG MOUNTAIN & MACK MOUNTAIN

INCIDENT ACTION PLAN

Bulldog Mountain
WA-COF-2348

Mack Mountain
WA-COF-2338

Cody Butte Fire Lookout, Kettle River Range

	Notes
	
,	

INCIDENT OBJECTIVES 1. Incident Name Bulldog Mtn. & Mack Mtn. 2. Date Prepared 09/01/21 1900 4. Operational Period Day Operations: 0700 – 2100 September 2 - 4, 2021 Strategic Framework: Implement a full suppression strategy on the Bulldog Mountain and the Mack Mountain fires that protects identified values at risk. Values identified include human life and safety, primary residences, private property, commercial timber values in unharvested units and the protection of resource values of recreation, water and vegetation. Management Objectives:

- Implement risk management practices that provide for the safety of firefighters, other responders, and the public as the priority.
- Protect investments, minimize impacts to private property and other infrastructure.
- Maintain the existing positive relationships between NW Team 7, the Colville National Forest, Ferry County Emergency Management, affected livestock permittee's, the local Fire District Chief and public by fostering trust and ensuring information is provided in timely manner.
- Provide for infectious disease control through thoughtful mitigations when appropriate for the safety of the firefighters and the public we serve.
- Provide Initial Attack response and assist as requested by the Colville National Forest and Northeast Washington Interagency Center.

Operational Period Command Emphasis:

Control Objectives:

- 1) LIFE is the most important value to be protected. Place the highest emphasis on protecting our responders/firefighters and our public by using sound risk mitigation and management.
- Keep Bulldog fire north of Deadman Creek community and other private & state lands.
- 3) Keep fires west of Hwy 395 from further impacting communities, major transportation corridor and commercial timber sales.
- Keep fires south of identified active timber sales.
- 5) Keep Bulldog fire east of Bulldog Cabin and Stickpin Fire footprint (2015) and the Mack Mountain Fire east of Forest Service Road 2030 to limit fire size and duration and impacts to recreation infrastructure.
- 6. Weather Forecast for Period

Bulldog Mountain and Mack Mountain Fire Weather Forecast

FORECAST NO: 49

PREDICTION FOR: Operational Period

THE DIGITAL OF THE OPERATION OF THE

SHIFT DATE: 9/2/2021 – Day Shift **FORECAST ISSUED**: 2000 9/1/2021

NAME OF FIRE: Bulldog and Mack

UNIT: Colville USFS

SIGNED: Mary P. Wister, Incident Meteorologist

mary.wister@noaa.gov 541-377-9905

... Cumulus clouds will develop during the afternoon hours today and on Friday...

<u>WEATHER DISCUSSION:</u> The atmosphere will become more stable over the next couple of days, but cumulus clouds will fill up the sky during the afternoon hours. The shading from the cloud cover will keep temperatures mild and the humidity relatively high, especially along ridgetops. Winds will be mostly light at all elevations through Friday with a slight increase in winds on Saturday.

TODAY:

WEATHER: Becoming mostly cloudy. Cumulus clouds.

MAXIMUM TEMPERATURE: 60-65° above 4500 feet. 63-68° valley below 4500 feet. MINIMUM RELATIVE HUMIDITY: 38-43% above 4500 feet. 30-35% below 4500 feet.

20-FOOT WINDS: North-Northwest 3-7 mph along ridges. Upslope/Upvalley 3-7 mph lower elevations.

INVERSION/STABILITY: Low level inversion lifts around 1000 PDT. Mid level inversion.

CHANCE OF WETTING RAIN (≥ 0.10 "): 0%.

HAINES INDEX: 3 (Very Low)

LAL: 1.

TONIGHT:

WEATHER: Becoming mostly clear.

MINIMUM TEMPERATURE: 45-50° above 4500 feet. 35-40° below 4500 feet.

MAXIMUM RELATIVE HUMIDITY: 53-58% above 4500 feet. 80-90% below 4500 feet.

20-FOOT WINDS: North-Northeast 2-5 mph in the evening becoming light overnight. Downslope/downvalley

2-5 mph lower elevations.

INVERSION/STABILITY: Stable with a low and mid level inversion.

CHANCE OF WETTING RAIN (≥ 0.10"): 0%

HAINES INDEX: 3 (Very Low) LAL...1

FRIDAY:

WEATHER: Becoming mostly cloudy. Cumulus clouds and high clouds.

MAXIMUM TEMPERATURE: 63-68° above 4500 feet. 67-71° valley below 4500 feet. MINIMUM RELATIVE HUMIDITY: 35-40% above 4500 feet. 30-35% below 4500 feet.

20-FOOT WINDS: Light winds becoming South-Southeast 3-5 mph along the ridges. Upslope/upvalley 3-8 mph

elsewhere.

INVERSION/STABILITY: Low level inversion lifting around 1100. Stable with a strong mid-level inversion.

CHANCE OF WETTING RAIN (≥ 0.10 "): 0%.

HAINES INDEX: 3 (Very Low) LAL: 1.

OUTLOOK FOR SATURDAY:

WEATHER: Mostly cloudy. Thick high clouds.

MAXIMUM TEMPERATURE: 58-63° above 4500 feet. 65-70° valley below 4500 feet. MINIMUM RELATIVE HUMIDITY: 35-40% above 4500 feet. 30-35% below 4500 feet.

20-FOOT WINDS: South-southwest 5-10 mph with gusts 12-15 mph...

INVERSION/STABILITY: Low level inversion lifting around 1100. Stable with a mid-level inversion. CHANCE OF WETTING RAIN (≥ 0.10"): 0%. HAINES INDEX: 3 (Very Low) LAL: 1.

FIRE BEHAVIOR FORECAST FORECAST NUMBER: 13 TYPE OF FIRE: Wildfire FIRE NAME: Mack Mtn and Bulldog Mtn fires OPERATIONAL PERIOD: Sept, 2-4, 2021 3-day DATE ISSUED: 9/1/21 UNIT: WA-COF SIGNED:

Typed/printed: /s/ Barry Kleckler

Weather Summary

Temps: Low to mid 60s above 4500', mid 60s to low 70s below 4500'

RH: mid to upper 30s above 4500', low to mid 30s below 4500'

Winds: Generally light, mid-flame windspeeds most likely terrain influenced

FIRE BEHAVIOR

GENERAL:

Fuels have been slowly drying out in the last 10 days since rain. Fire activity has been increasing a bit each day, especially on southern aspects where exposed to sun. Monitor the rate of continued drying. Heavy dead fuels; stumps, logs, and snags continue to consume and smolder. Expect fire to creep into available nearby available fuels, and smoldering fire to kindle to flame on sunny days with a little breeze. Recently burned out areas on the south edge of Bulldog Mtn fire will continue to consume. Flare-ups, single and group tree torching are possible with a combination of sun, slope, wind and ladder fuels.

Fine dead fuel moisture (exposed) 6-7%, Probability of ignition (unshaded) will be 50-60%

SPECIFIC:

Bulldog Mtn: South edge was recently burned out. Hand ignition along the road was successful, aerial ignition was spotty. Expect interior pockets to become active and burn together if given the chance to dry a bit more. Some heat remains to the north backing down the hill.

Mack Mtn: Has not shown much for heat recently and perimeter has not shown growth. Still a few smokes and pockets could come to life with a few more days of seasonally warm temperatures.

SAFETY

There are five major common denominators of fire behavior on fatal and near-fatal fires. Such fires often occur:

- On relatively small fires or deceptively quiet areas of large fires.
- 2. In relatively light fuels, such as grass, herbs, and light brush.
- 3. When there is an unexpected shift in wind direction or in wind speed.
- 4. When fire responds to topographic conditions and runs uphill.
- 5. Critical burn period between 1400 and 1700.

BULLDOG MTN / MACK MTN FIRE SAFETY MESSAGE

LEADER'S INTENT

Leader's intent as defined by the National Wildfire Coordinating Group (NWCG)

Leader's intent is a clear, concise statement about what people must do to succeed in their assignments.

There are 3 components to putting leader's intent into practice.

Task: What is the goal or objective of the assignment?

 This is where the tools hit the dirt, the water hits the ground, and the details come into play.

Purpose: Why the assignment needs to be done.

 Simply stated, it is why you are doing the what! Everyone wants to know the why. This is empowerment at the most basic level.

End State: How the situation should look when the assignment is successfully completed.

 Basically, The finished product. It is what right looks like from the fireline in a specific division, to the control of the fire overall, to the protection of the values at risk and ultimately meeting all the incident objectives set by the agency administrators.

Leader's intent and how it relates to safety

If you have clear leader's intent you should be working within a valid RISK MANAGEMENT DECISION PROCESS that identifies missions with the highest probability for success. No mission is worth the injury of firefighters or the public!

<u>Leader's intent is the responsibility of everyone, from the Agency administrators</u>
<u>to the first year ground pounder!</u> Focus everyday on the WHAT, WHY, and HOW

Please scan the QR. Code to access a 12 minute video explaining leader's intent and the importance for every member.

LEADERS AT ALL LEVELS WORK WITH DUTY, RESPECT, AND INTEGRITY

ANDY PALMER-DUTCH CREEK PROTOCOL UPDATED 8/31/21

LEADER'S INTENT: To establish **approximate** travel times from key areas of the fires toKettle Falls as well as hospitals in Colville, Spokane, and Seattle, Washington via ground transportation. See Medical Plan (ICS-206) for travel times via air. Not every DP is on this chart.

BULLDOG MTN. / MACK MTN.
