Fire Behavior Forecast # 13

Name of Incident: Summit Trail/ Chuweah	Fire Number: WA-COA-200087
Date & Time Issued: July 30, 2021 @ 2000	Operational Period: July 31-Aug 1, 2021 0600-0600
FBAN: Steve Ziel / Barry Kleckler (t)/Lauren Blake (t)	Signed: <i>Lauren Blake</i>

Assumptions: *Excessive Heat Warning until 2000 Saturday. Forecasted change to the wind direction and speed will change direction of fire spread and intensity from what we have seen the past 2 weeks. Expect localized gusty winds on ridgetops and exposed slopes. ERCs are well above average, hovering over the 97th percentile for fire season. Excessive Heat Warning until 2000 Saturday.*

Weather Summary

**See attached Incident Weather Forecast **

Fire Behavior Summary

Fuels in the fire area are primarily composed of:

Timber Litter: Regeneration timber stand lacking significant understory, generally underburns with moderate rates of spread without wind/slope alignment with occasional torching. Ponderosa and lodgepole pine and Douglas-fir are common.

Timber with Understory: Timber stand with brush or small trees in the understory will burn readily and aggressively with occasional torching, even with little wind. Heavy down fuels are common, receptive to embers, and consume completely once ignited. True fir with low crown base heights are common.

Grass-Shrubs: Grass or grass/shrub mix. Cured grasses will support rapid fire spread with any wind.

Fire behavior:
Fuel conditions support active fire behavior with potential for high intensity flare-ups, single and group tree torching, and spotting. Forecast winds are light but significant fire behavior could be associated with slope reversal and uphill runs through timber fuel types. Sustained backing and flanking where fuels are continuous. Lower elevation diurnal winds may follow terrain and flow in multiple directions in Sitdown and Lynx Creek drainages which will influence the direction of fire spread. Intensity's will vary as the fires move through timber cut units.

Fuel Type	Live woody fuels = 70-90%		POI = <90%		Fuel Type Flame
	Head Fire		Backing Fire		
	ROS	Flame	ROS	ROS	
Timber litter (TU1)	2-3 feet/min	1-2 feet	Timber litter (TL1)	.2-.5 feet/min	<1 foot
Timber with Understory (TU5)	5-10 feet/min	6-8 feet	Timber with Understory (TU5)	6 - 8 feet/min	2-3 feet
Grass-Shrubs (GS2)	15-20 feet/min	4-6 feet	Grass-Shrubs (GS2)	8-10 feet/min	1-2 feet

Specific Assignments:

DIV B/X No perimeter growth expected. Interior pockets of fuels that burn out will have spotting potential

DIV F Fire will be active in Sitdown Creek and progress north/ northeast toward Grizzly Mtn.

DIV J Fire will continue to make uphill runs with short-moderate crown runs with slope/wind aligned runs.

DIV V Roll out and torching may challenge fire lines

Structure Group Monitor fire activity. Group torching could spot up to .6 miles.

Contingency Monitor fire activity on Oregon City Ridge. Group torching could spot up to .6 miles.

Chuweah Hidden heat could flare up near line could challenge fireline.

Aviation Expect smoky conditions especially in the morning, with light transport winds.

Safety

The possibility of large fire growth is very significant. Keep your fundamentals for safety in place: post lookouts, know the mission & your safety zone

Transition Day... Know who you are working for.

INCIDENT: Summit Trail and Chuweah Creek

DATE: 7-31-2021

TIME: Day/Night Shifts

Major Hazards and Risks

- **TODAY IS TRANSITION DAY - Remember...Risks to firefighters increase significantly during transfer of command periods ... know who your leadership is, know where you are supposed to be, know what you are supposed to be doing today. Interpret and present Leader’s Intent to your resources and personnel. TASK, PURPOSE, END STATE**
- **Review the Incident Within an Incident Plan (IWI), how do you want an injury to be communicated, who will be in charge? Where are your paramedics and EMT’s?**
- **There will be new faces, new names, and new voices on the radio today. Make your contacts with adjoining resources.**
- **Over Communicate! Ask Questions even if you think you know the answer.**

Know & Review your Incident within an Incident protocols:

- **Who are your medical personnel and where are they located? Are they new to this fire?**
- **Where are the closest helispots and potential medevac sites?**
-Is there a need to identify and verify new ones?
- **Do you have communication with your medical personnel?**
- **Do you know what you will do when an injury occurs?**

Thoughts on Driving and Vehicle Operation

- As your time on the fire increases so does your comfortability of driving the roads within the fire area. Please don’t let speeds increase and attention to defensive driving techniques fade to the detriment of what is considered safe and reasonable.
- Knowing that there are new resources arriving to your fire it is necessary to be aware that they may be moving slow and/or making sudden stops in attempt to get familiarized.
- It is important to be a good guest while working in and around this community. Help to keep a good standing by obeying all posted speed limits, warnings, and adding additional due caution.

Are you maintaining good communications links with your crew members and line overhead?

6. INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Immediately separate yourself from others.
- Notify supervisor if you or others experience:
 - o Cough, more than expected
 - o Shortness of breath or difficulty breathing
 - o New loss of taste or smell
 - o Fever o Chills
 - o Sore throat o Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

SUPERVISOR CALL MEDL @ 253-224-5085 IF IN CAMP, OTHERWISE CALL VIA RADIO FOR FUTURE INSTRUCTIONS

Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
- Avoid handshakes and communal use items.
- Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
- Disinfect high touch surfaces often:
 - o Radios, phones, doors, pumps, fuel cans, etc.

Social Distancing and Protective Equipment

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
- Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

Communications

- Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

Protect yourself, your crew, and your camp!

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness.
