

INCIDENT OBJECTIVES	1. Incident Name Summit Trail / Chuweah Creek / Upper Lime Creek		2. Date Prepared 08/10/21	3. Time 1900
	4. Operational Period Day Operations: 0600 – 2000 August 11, 2021 Night Operations: 1800-0600			
Strategic Framework: Implement a full suppression strategy on the Chuweah Creek, Summit Trail and Upper Lime Creek fires that protects identified values at risk. Values identified include human life and safety, cultural and historic values, primary and recreational residences, wilderness values on Summit Trail, hunting and gathering land and commercial timber.				
Management Objectives:				
<ul style="list-style-type: none"> - Provide for firefighter and public safety by utilizing the risk management process to maintain safe and effective operational decisions, this includes full suppression strategies utilizing the full complement of tactics to achieve the control objectives. - To the best extent possible minimize size and duration to limit negative impacts to identified values that provides for highest probability of success and in close coordination with agency resource advisors and tribal leadership. - Maintain the existing positive relationships between NW Team 7, the Colville Agency, Washington Department of Natural Resources, cooperators and public by fostering trust and ensuring information is provided in timely manner. - Provide for infectious disease control through thoughtful mitigations when appropriate for the safety of the firefighters and the public we serve. - Provide Initial Attack response and assist as requested by the Colville Agency, Mt. Tolman Fire Center and Washington DNR Northeast Region. 				
Operational Period Command Emphasis:				
Control Objectives:				
<ol style="list-style-type: none"> 1) LIFE is the most important value to be protected. Place the highest emphasis on protecting our responders/firefighters and our public by using sound risk mitigation and management. 2) Keep fire north of Bridge Creek Road to minimize impacts to structures and recreational facilities at Twin Lakes 3) Keep fire east of BIA Road 73 to reduce loss of commercial timber and cultural values. 4) Keep fire south of Grizzly Mountain to protect Wilderness Characteristics and reduce fire footprint and duration. 5) Keep fire west of Carson and Bitterroot Mountains to lessen impact on commercial timber, private property and primary residences in Seyler Valley. 6) Keep Chuweah Creek fire in current footprint, minimize additional impacts to expressed values of concern by continuing with mop up and patrol. 7) Keep Upper Lime Creek fire south of Cache Creek Road, west of Hwy 21, north of Lime Creek Road and east of BIA Road 93 to reduce duration and size of fire footprint and from becoming a resource draw.

Fire Weather Forecast

FORECAST NO: 26
PREDICTION FOR: Operational Period
SHIFT DATE: 0600 8/11/2021 – 0600 8/12/2021
FORECAST ISSUED: 1830 8/10/2021

NAMES OF FIRES: Summit Trail/Chuweah/Upper Lime Cr
UNIT: Colville Agency
SIGNED:
Jonathan Pelton, Incident Meteorologist

...Excessive Heat Warning from 1200 Today to 2000 on Saturday...

WEATHER DISCUSSION: An upper ridge building across the western U.S. will lead to continued warming and drying throughout the week. Well above normal temperatures and low minimum relative humidity are anticipated. In addition, fair to poor humidity recoveries and warm overnight lows are forecast. Northwest to north northeast winds should prevail through tonight with winds remaining gusty overnight into early on Thursday. Terrain driven winds should prevail for most mid and lower slopes and valley locations. The heat should peak on Friday and Saturday.

WEATHER FORECAST for Today:

Forecast Element	Summit Trail Fire	Chuweah Creek Fire/Upper Lime Creek Fire
Weather/Sky	Patchy smoke early, otherwise mostly sunny.	Patchy smoke early, otherwise mostly sunny.
High Temperature (°F)	84-94	87-97
Minimum Humidity (%)	19-28	17-26
20 ft winds ridgetop/upper slopes (mph)	NW 5-10, becoming NNW 9-14 G 23 after 1100	NW 6-11, becoming NNW 9-14 G 24 after 1300.
20 ft winds Mid and lower Slopes/Valleys (mph)	Downslope/downvalley 2 to 5 mph becoming Upslope/upvalley 5-9 mph around 0900	Downslope/downvalley 2 to 5 mph becoming Upslope/upvalley 6-11 mph around 0900
Mixing Height (ft AGL)	8,500	8,700
Transport Winds (mph)	NNW 11-16	NNW 11-16
CWR (≥ 0.10")	0	0
LAL	1	1
Haines Index	3 (Very Low)	3 (Very Low)

WEATHER FORECAST for Tonight:

Forecast Element	Summit Trail Fire	Chuweah Creek Fire/Upper Lime Creek Fire
Weather/Sky	Mostly Clear with patchy smoke.	Mostly Clear with patchy smoke.
Low Temperature (°F)	63-69	61-71
Maximum Humidity (%)	30-40	33-48
20 ft winds ridgetop (mph)	NW 8-13, then NNE 10-15 G 24 after 2000.	NW 9-14, then NNE 11-16 G 25 after 2000.
20 ft winds Slopes/Valleys (mph)	Upslope/upvalley 3-7 mph, then Downslope/downvalley 2-5 mph by 2200.	Upslope/upvalley 3-7 mph, then Downslope/downvalley 2-5 mph by 2200.
CWR (≥ 0.10")	0	0
LAL	1	1

OUTLOOK FOR Thursday:

Forecast Element	Summit Trail Fire	Chuweah Creek Fire/Upper Lime Creek Fire
Weather/Sky	Patchy smoke early, otherwise mostly sunny.	Patchy smoke early, otherwise mostly sunny.
High Temperature (°F)	84-94	87-97
Minimum Humidity (%)	16-24	13-23
20 ft winds ridgetop/upper slope (mph)	N 10-15 G 23, becoming N 5-10 after 1200.	NW 11-16 G 24, becoming N 6-11 after 1200.
20 ft winds Mid and lower Slopes/Valleys (mph)	Downslope/downvalley 2 to 5 mph becoming Upslope/upvalley 5-9 mph around 0900.	Downslope/downvalley 2 to 5 mph becoming Upslope/upvalley 6-11 mph around 0900.
Mixing Height (ft AGL)	9,200	9,500
Transport Winds (mph)	N 10-15, then N 8-13 after 1200.	N 11-16, then N 9-14 after 1200.
CWR (≥ 0.10")	0	0
LAL	1	1
Haines Index	4 (Low)	4 (Low)

Please text weather observations to the Incident Meteorologist at 208-577-1621 with location, elevation, time and weather information.

Fire Behavior Forecast # 24

Name of Incident: Summit Trail, Chuweah Creek, and Upper Lime Creek	Administrative Unit: WA-COA Colville Agency
Date & Time Issued: August 10, 2021 @ 2000	Operational Period: DAY/NIGHT 08/11-12/2021
FBAN: Steve Ziel	Signed: /z/

Assumptions: Accelerated and progressive drying of fuels today (and the next few days). All fuels will support areas of fire spread during the peak burning period between 1400-1800. Fire behavior conditions will be moderate-to-active today as continued drying occurs. Persistent burning conditions may be expected due to drought conditions and dry(ing) fuels – heavy fuels will retain heat for longer periods providing future reburn threat and mop-up difficulty. Assess moisture in your work area – and monitor the rate of drying. Fine fuels respond rapidly to temperature and relative humidity changes. Expect continued progressive drying through the week with poor RH recovery occurring through the night.

Weather Summary

See attached Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area are primarily composed of *Grass and shrubs*, *Timber Litter*, and *Timber with Understory*. Primary tree species include mixed sizes of Ponderosa Pine, Douglas Fir, with scattered Lodgepole Pine, True Fir and cedar. Local timber litter is compact to fluffy. Brush and understory species include Ocean Spray, ceonothus, hardwoods, dog-hair conifer thickets reproduction. Snags and heavy fuel loading are common throughout all areas. *Live fuels are drought stressed and may contribute to high rates of spread; grasses are fully cured. Fuel type changes occur by management activity, elevation, and aspect. Low crown base height (ladder fuels) and black shaggy moss are present in most of the timbered areas. Timber harvest blocks may contain slash piles.*

Today's "peak period" fire behavior Will include areas (pockets) of active surface fire spread including flare ups with isolated torching. Steep slopes may produce active fire with backing, flanking, and fingering head runs. Expect moderate rates of spread in all fuels with wind/slope alignment. Backing fire may provide slope reversals resulting in upslope fire activity with torching and short-range spotting. Sheltered/shaded fuels may provide reduced fire behavior – heavy fuels will continue to consume and hold heat (due to dryness). Monitor fine fuel moisture closely.

* Fine fuel moisture= 6% - 8% %+, 1000hr. moisture=8%, Woody fuels 80%, Probability of Ignition 40% -60%

Fuel Type	Rate of Spread	Flame Length	Spotting Distance	<u>WET SURFACE FUELS</u>
...If your work area includes -	(CH/HR = FPM)		Group Torching	0
Grass with mixed shrub (GS2)	10 - 15 ch/hr.	3 - 5 feet	.1 - .2 mile	0 ch/hr. Monitor drying rate
Timber with Understory (TU5)	5 - 10 ch/hr.	6 - 8 feet	.1 - .2mile	0 ch/hr. Smoldering, creeping
Timber Understory (TU1)	2 - 4 ch/hr.	2 - 3 feet	.1 - .2 mile	0 ch/hr. Smoldering, creeping
Timber Litter (TL8)	4 - 6 ch/hr.	2-3 feet	.1 - .2 mile	0 ch/hr. Smoldering, creeping

Specific Assignments: *Any firing operations need to apply appropriate heat management techniques.

Div. L – Fine fuel moisture will support surface fire spread, monitor San Poil River and Dry Cr. winds. Manage ignitions carefully.

Div. F – Expect smoldering fuels under timber canopy to creep with sunshine and wind. Surface spread likely with wind/slope..

Div. J – Expect active creeping with some surface spread by lunch. Heavy fuels will continue to consume in-place. NW winds

Div. U – Complex terrain/irregular edge may produce active spread areas. Heavy fuels will consume in-place, flare-ups possible.

Div.X/V/B – Monitor smoldering/creeping, needle cast from earlier fire activity is accumulating over hot ash beds.

Structure Group(s) –Monitor fire activity and NW wind influene. Know what your fire is doing at all times.

Contingency- Monitor fire activity and NW-W wind influence. Know what your fire is doing at all times.

Nightshift- Fair-to-poor overnight humidity recovery will keep fire creeping, and smoldering after dark.

Air Operations: Mostly sunny sky with NW winds over ridges – no issues identified. .

Safety

Warmer and dryer weather results in decreased fine fuel moisture. Ignition of fine fuels causes fire spread. Spreading fire requires decisions and actions that require clear thinking, good judgement and assurance that LCES is in place. Good firefighters make good decisions – work smarter not harder.

Base all actions on current and expected fire behavior (evaluate your situation and the fire activity – anticipate rate of change, consider “what-if’s”, establish trigger points).

*Today's Fire Behavior Forecast contains 727 words written for your situational awareness and discussion with your folks.

DIVISION ASSIGNMENT LIST		1. Branch I	2. Division/Group XV				
3. Incident Name SUMMIT TRAIL		4. Operational Period Date: August 11, 2021 Time: Day 0600 - 2000

DP-145	30 minutes	2 hours	3 hours	6 hours

SAFETY MESSAGE

8/11/21

SUMMIT TRAIL/CHUWEAH/UPPER LIME CREEK FIRES

TOO WET BOOK ENDS TOO HOT AND DRY

There has been a lot invested on fighting these fires, and I am not just talking about the \$\$\$ spent. Our Firefighters have committed blood, sweat and grit to accomplish amazing missions on every division. Every foot of progress getting around this thing is important and truly matters. Whether you are pushing iron, pounding the ground in mop up, or conducting burnout operations to secure a perimeter; your work is necessary and valuable. A few days ago, it was too wet to work and starting tomorrow we go into an EXCESSIVE HEAT WARNING. Regarding fire behavior it feels like we are somewhere in the middle, so be heads up and stay engaged.

Page 5 in your IRPG covers Common Denominators of Fire Behavior on Tragedy Fires.

COMMON DENOMINATORS

TRAGEDY FIRES	SUMMIT/ CHUWEAH/UPPER LIME CREEK
On Relatively small fires or deceptively quiet areas of large fires.	Upper Lime Creek, Division Bravo, Foxtrot, X-ray, Victor
In relatively light fuels, such as grass, herbs, and light brush.	Sections of all 3 fires the fuels are drying. They are becoming ready to burn again.
When there is an unexpected shift in wind direction or in wind speed.	Terrain influenced winds, diurnal winds, on all 3 fires. Big wind shift Friday
When fire responds to topographic conditions and uphill runs	All 3 fires have opportunity for slope reversals and uphill runs as the temps rise, RH lowers, Haines index rises
Critical burn periods between 1400 and 1700.	Take 10 minutes at 2 for a tactical pause. Working at night? There are local influences and thermal belts are common.

CONSIDER IT, BECOME RISK AWARE AND NOT RISK AVERSE!

Argument to the message:

- “What about Contingency, Structure, or Night Shift? I’m nowhere near the fire.”
 - Response: We work in a dynamic environment and your assignment could change very quickly. There are plenty of other things that can hurt you.
- “This is my last shift, I’m demobing tomorrow before it gets hot and dry.”
 - Response: Thank you for your service and get some rest. Remember, Driving is one of the most dangerous things firefighters do. Don’t let your guard down.

Prepared by: NW-7 Safety Officer Eric Brown

TAKE CARE OF EACH OTHER

COMMON QUESTIONS ABOUT INFECTION CONTROL

What happens when a crewmember is showing symptoms, exposed in route? Will they have to quarantine? Is there a difference from vaccinated/non-vaccinated?

In accordance with current revised CDC guidance, all people over the age of 12 should be fully vaccinated. Individuals who are fully vaccinated need not worry about exposure to COVID-19 unless they become symptomatic (three or more symptoms of COVID-19, which with the Delta Variant typically includes a fever and respiratory symptoms). The vaccines remain highly effective against all variants in spite of recent media reports. Individuals who display symptoms, vaccinated or unvaccinated, should be tested for COVID-19. If individuals show symptoms and are tested and a negative test is returned (rapid or otherwise), they need not quarantine. Individuals who are unvaccinated and show symptoms or who were exposed to a known case of COVID-19 must quarantine until they are released by a healthcare provider (typically involving a negative test) or 14 days. Individuals who are not fully vaccinated must abide by all CDC recommended social distancing guidelines. Masks, while an important tool, cannot be considered sufficient protection alone against any variant of COVID-19, especially the Delta Variant. Vaccination is extremely important and available at several facilities across the reservation and nearly every pharmacy in the U.S.

Dr. Dan Barbara
Director, Health and Human Services
Colville Confederated Tribes

REMEMBERIf you are feeling unwell...

Immediately separate yourself from others! Notify your supervisor or come see us, we are located in the small white tent across the street from Medical.

August 3, 2021

To: Incident Commanders on Pacific Northwest (PNW) IMTs, IMTs working in the Geographic Area, and all PNW Agency Administrators

From: Chuck Turley, PNW MAC Acting Chair on behalf of all PNW MAC Agency Executives

Subject: COVID Mitigation Expectations and Requirements

The frequency of COVID exposure and cases is increasing on our PNW wildfire incidents and within support functions. PNW MAC has reviewed the multiple guidance documents provided by CDC, Wildland Fire Medical and Public Health Advisory Team (MPHAT), and federal, state, and local entities. Beginning immediately our expectation and direction is that all PNW incidents and their support functions will implement and enforce the following:

- for all resources assigned to an incident within the PNW, and for our NW IMTs assigned outside the PNW, wear a mask at all times whether inside or outside. Exceptions include working alone, working on the fire line, having a medical exemption, and/or pilots and flight crew during all phases of flights for the following missions: airtanker, smokejumper, ATGS, ASM, point-to-point, HELCO, short-haul, rappel, and aerial ignition,
- highly encourage limiting access to all fire related facilities, and
- highly encourage maximum use of virtual meetings to the extent possible.

The PNW MAC and partner agencies are not authorizing the “Module as One” concept nor any process that would lessen the expectations and requirements set forth in this letter.

This direction applies to all levels of incident operations and all aspects of an incident including but not limited to transportation to/from incidents, ICPs, spike camps, helibases, tanker bases, ground support units, dispatch centers, smokejumper bases, caches, etc.

Thank you for your vigilance of COVID protections.

Respectfully,

 Chuck Turley

TEAM PERFORMANCE CRITIQUE FORM

TO: CREW BOSSES AND OTHER FIRE OVERHEAD

Our Incident Management Team is interested in doing the best job that we can. This is your opportunity to critique us! Give us your thoughts on how we are doing, or what we can improve on. Please take a few minutes to complete this form and drop it off in de-mob/check-in before you leave. All comments are anonymous unless you let us know who you are. We will use the information to improve our management team in the future. Thanks for your input!

-Incident Commander

INCIDENT NAME: _____ **DATE:** _____

1. How would you rate the treatment you and /or your crew received on this incident?

Excellent Good Fair Poor

Comments?

2. How well did the following items meet your needs?

Breakfast	Excellent	Good	Fair	Poor
Lunch	Excellent	Good	Fair	Poor
Dinner	Excellent	Good	Fair	Poor
Sleeping Area	Excellent	Good	Fair	Poor
Medical	Excellent	Good	Fair	Poor
Showers	Excellent	Good	Fair	Poor
Sanitation	Excellent	Good	Fair	Poor
Supply	Excellent	Good	Fair	Poor
Transportation (Ground Support)	Excellent	Good	Fair	Poor
Finance	Excellent	Good	Fair	Poor
Operational Briefing	Excellent	Good	Fair	Poor
Communications	Excellent	Good	Fair	Poor

Comments?

3. How well were the operational tactics explained to you (Leader's Intent)?

Excellent Good Fair Poor

Comments?

4. How would you rate the knowledge level and performance of your line overhead?

Excellent Good Fair Poor

Comments? (Please give names of exceptional or unsatisfactory people.)

5. How would you rate the team's risk management and attitude toward your safety?

Excellent Good Fair Poor

Comments?

6. Did anything really frustrate you about how this incident was managed? If so, what could this team do to concentrate on improving performance?

No Yes (please give suggestions)

Comments?

7. How clear and accurate were the IAPs and maps?

1 2 3 4 5 6 7 8 9 10

Comments?

8. On a scale of 1 to 10, with 10 being the best, how would you rate the Overall performance this team did on the incident?

1 2 3 4 5 6 7 8 9 10

Comments?

Thank You for Your Time.....

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening Injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
