Comments / notes on tonight's mission and this interpretation: Interpretation started with the current Wildfire Daily Fire Perimeter in NIFS. Growth in perimeter is north along the ridge between Turkey and Meadow Creeks and east across Turkey Creek to Butte Ridge. Intense heat to the north and east. Heat sources detected outside the perimeter to the north and east. No heat detected in the smaller spot fire in the headwaters of Turkey Creek. All products have been posted to the FTP and uploaded into NIFS.
