Lick Creek / Green Ridge Weather Forecast

FORECAST NO: 49

FORECAST FOR: Sunday Operational Period

SHIFT DATE: 8/29/2021

NAME OF FIRE: Lick Creek/Green Ridge

UNIT: OR-UMF

SIGNED: David Shallenberger - Incident

Meteorologist

DATE AND TIME ISSUED: 8/27/2021 at 1900 PDT

240-778-5019

... Warm and Dry; Dry Cold Front Arrives Monday ...

<u>WEATHER DISCUSSION</u>: The warming and drying conditions will continue as the high to the west continues to build in for Sunday providing drier air filtering in. With increasing gradient due to the high and an approaching cold front, winds will begin to increase tomorrow into the afternoon with westerly to northwesterly winds developing. Near elevated RH and temperature values for Sunday. By Monday, poor RH recoveries will set up as a dry cold front arrives with near critical fire weather values developing. A bit of instability setting up with dry and warming conditions will set the stage for a Haines 5 day. Gusty westerly winds are expected with sustained winds reaching 15 mph in the afternoon. The front will pass through for Tuesday with cooler temps and slightly higher RH values expected. Winds will remain strong from the northwest.

TODAY:

WEATHER: Mostly sunny with smoke and haze.

MAXIMUM TEMPERATURE: 72-77° above 5000 feet. 81-86° valley bottoms.

MINIMUM RELATIVE HUMIDITY: 23-28% above 5000 feet. 17-22% valley bottoms.

20-FOOT RIDGETOP WINDS: Winds west-northwest to 6-10 mph with gusts up to 18 mph in the afternoon.

GREEN RIDGE CREEKS: Light and variable becoming upslope/upcanyon.

INVERSION/STABILITY: Low level inversion will lift around 1100.

CHANCE OF WETTING RAIN (≥ 0.10"): 0%.

HAINES INDEX: 4 (Low)

LAL: 1

TONIGHT:

WEATHER: Mostly clear. Smoke and haze in the morning.

MINIMUM TEMPERATURE: 55-60° above 5000 feet. 50-55° valley bottoms.

MAXIMUM RELATIVE HUMIDITY: 35-40% above 5000 feet. 45-50% valley bottoms.

20-FOOT RIDGETOP WINDS: Northwest winds at 6-8 mph.

GREEN RIDGE CREEKS: Downslope/downcanyon 3-6 mph after 2000.

INVERSION/STABILITY: Moderate inversion. CHANCE OF WETTING RAIN (≥ 0.10"): 0%

MONDAY:

WEATHER: Mostly sunny with smoke and haze.

MAXIMUM TEMPERATURE: 70-75° above 5000 feet. 75-80° valley bottoms.

MINIMUM RELATIVE HUMIDITY: 20-25% above 5000 feet. 15-20% valley bottoms.

20-FOOT RIDGETOP WINDS: West-northwest 10 - 15 mph with gusts up to 25 mph in the afternoon.

GREEN RIDGE CREEKS: Light and variable becoming strong upslope/upcanyon, especially in aligned valleys.

INVERSION/STABILITY: Low level inversion will lift around 1100.

CHANCE OF WETTING RAIN (≥ 0.10"): 0%. HAINES INDEX: 5 (Moderate) LAL: 1

Observations from the field are valuable!

Email any obs to david.shallenberger@noaa.gov or text them to 240-778-5019.

	INDUTE

INPUTS

WEATHER SUMMARY - See attached Fire Weather Forecast

Fuel: Fuels in the fire area are primarily composed of Timber w/Understory (Mixed Conifers with litter and shrubs), Timber with Litter (Conifers with dead/down/litter), and Grass with Shrubs (perennial grasses w/brush). Fuels are generally discontinuous - broken up by rock outcrops, areas of grass and changes in aspect. ERC values are starting to rise (slowly) as fuels dry out, moving back towards 90th percentile weather.

1000 hr. fuels = 7%-8%, Eastern Washington & the Idaho panhandle are in Extreme to Exceptional Drought. The drying trend will continue to reduce the effects of recent precipitation, along with lower RH recovery.

Topography: Area topography for both fires includes steep slopes with multiple deep drainages. Elevations range from 3,300 to over 6,200 feet. Be aware of situations where topography, wind, and fuels align.

OUTPUTS

FIRE BEHAVIOR

General: Fuel drying post precipitation event continues, with days becoming shorter. The fire environment will still be moderated – the higher elevations with open fire perimeter are still relatively cool w/higher humidity than the valleys. Sheltered fuels can still be dry enough to burn and with limited torching. **Spotting distances can be up to 1500 feet, but generally less than 500 feet**, unless spotting occurs from ridgelines. Fine dead fuel moistures dropping slightly with lower RH & higher temps, increasing POI; increase in winds will raise ROS and FL somewhat when slope/wind/fuel alignment occur.

Green Ridge Fire - All Divisions: The south flank has areas of open line that have been mostly checked up on Misery Ridge, roads, and the burn scars from 2015. Monitor for changes in observed fire behavior and smoke production; likely to see increase smoke production and areas of moderate fire activity to the south. Interior smokes will continue to consume fuel, and occasionally involve islands of available fuel.

Fuel Type	He	ead Fire	Cro	wn Fire
Grass-Shrub (GS2)	FL: 1-4 feet	ROS: 2 - 16 Ch./hr.	FI . 20 . (0 C)	DOC 15 45 C1 /II
Timber (TL8)	FL: 2 - 10 feet	ROS: 4 - 24 Ch./hr.	FL: 20 - 60 feet	ROS:15 - 45 Ch/Hr.
Timber (TU5)	FL: 4 - 18 feet	ROS: 5 - 28 Ch./hr.	Crown fire estimated a	across both timber fuels

Probability of Ignition for most areas is **65%-75%** (higher temps/lower FDFM); ROS / FL table is worse case; lower slope percent, less wind, discontinuous fuels, will reduce these values.

Lick Creek Fire - All Divisions: Be alert for threats to the control line; spots from interior islands or areas of heat along uncontrolled sections of line, with wind/slope alignment.

IA within the TFR: Live and 1000 hour fuels will still support combustion. Fine fuels will dry when exposed to sunny & breezy conditions, becoming available to burn; rapid ROS when wind/slope/fuels are aligned.

AIR OPERATIONS

Smoke impacts have been limited due to reduced fire behavior; ventilation has kept the air space fairly clear of any aviation concerns due to smoke.

SAFETY – Base all actions on current and expected fire Behavior. Plan for some increased fire behavior for the next 24-48 hours with higher temps, lower RH, and some atmospheric instability.

GREEN RIDGE SAFETY MESSAGE

8/29/21

--HAZARDS IDENTIFIED AND WITNESSED ON THIS INCIDENT—

Driving, Snags, Stump Holes, Mop Up Ops, Snakes, Bees! BEARS! Steep Slopes, Warming and Breezy Weather, Public Entry etc.

By now, everyone should have an awareness of the hazards and issues associated with this incident and knowledge of what to do, or not do, to keep you, yours or your stuff from injury or damage. So on to another safety topic:

SELF SYSTEMS MANAGEMENT

BORTHWEST INCOENT MANAGEMENT

You are the result of several systems working together to make you; well, you. To keep those systems operating properly require a few things to regularly happen:

<u>Hydration</u>- you require at a minimum, about 1 ounce of fluid intake per 2 pounds of body weight during exertion. For example a 200 pound person would require 100 ounces or about 4 quarts to maintain overall health during periods of exertion.

<u>Nutrition</u>- you require about 4600 calories a day when engaged in firefighting. The key is to eat some of everything in the meals provided to keep a healthy balance

<u>Rest-</u> the 2 to 1 work/rest ratio is not an arbitrary number. It is based on human physiology research. Take advantage of your down time to rest and recuperate.

Hazardous Attitudes

From the works on "Human Factor Barriers to Situation Awareness"

- Complacent: Just Another Fire
- Group Think: Afraid To Speak Up
- Invulnerable: "Can't Happen to Us"
- Anti-Authority: Disregard Team Effort
- Impulsive: Do It Even If It's Wrong
 - Macho: Try to Impress Or Prove
- Resigned: We Can't Make A Difference

The Safety Thoughts for Today:

"Safety is something between your ears, it's not something you hold in your hands"

Jeff Cooper, Instructor and founder of the American Pistol Institute, (Later known as the Gunsite Academy)

"It takes leadership to improve safety"

Jackie Stewart, 3 time Formula One auto racing champion and iconic auto racing safety advocate

Your IMT-8 Safety Team: Dan Ridenour, Renee Lamoreaux, and Karrie Stevens

LOGISTICS HOURS

Kitchen @ Wooten Camp 2 miles south on Tucannon Rd:

0500 - 0800

1800-2100

ICP Meals: Meals will no longer be served at ICP

Under the gazebo.

Rose Spike Meals:

Breakfast 0545

Dinner 1930

Shower 0530-1200

Team Ordering/Timeline Process:

1100 - Last call to change spike camp resource hot food location.

1600 - DIVS to have next day's resource order ready for Planning OPS.

- All crew level orders will be placed through DIVS or Branch.
- DIVS or Branch will place all orders through Supply -
- All orders will be tracked using the process found on the front of this form.

GPS Datum: NAD 83- Degrees, Decimal, Minutes (DDMM.MM)

Definitions

FOB-Forward Operating Base is a secure forward position established to strategize, design and discuss tactics, and for personnel to transfer information and meet.

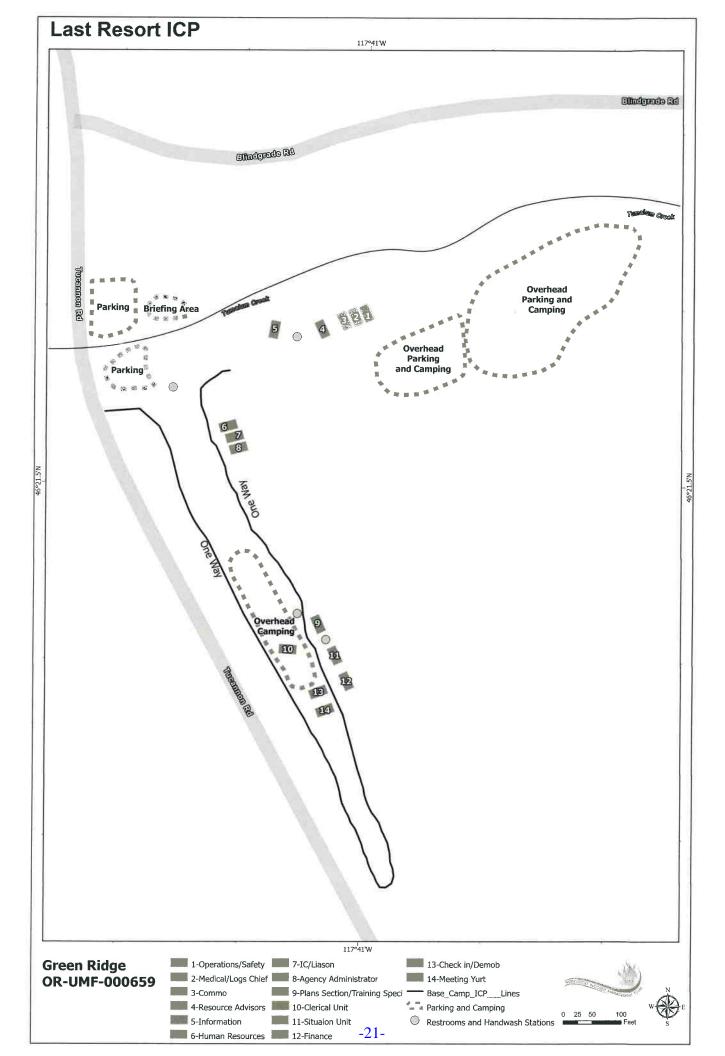

Line Spike Camp-Managed by Operations at the DIVS level; mobile, short duration and self-sufficient.

Spike Camp-Supported by Logistics, listed in the IAP, numbers in camp are set by 1100, named by Plans.

Emergency Medevac- Life threatening situation requiring immediate medical attention. Handled as per IAP med plan and team SOP's. Communications to clear command channel radio traffic.

Medical Transport-Transport of less serious injury/illness managed by Operations or line Medics back to camp for evaluation and/or treatment.

		Shift Tickets	Inspections	
			CTRs	

Submit Equipment Shift Tickets or Crew Time Reports (CTRs) daily to

2021.greenridge.finance@firenet.gov

Please include your email address and phone number in the body of the email when sending your documents.

Any questions, please call: FINANCE – (971) 727-7461

(971) 245-0248

COMP / CLAIMS -you can send your paperwork for COMP or CLAIMS to the finance email address

Lick Creek-Green Ridge Fire Human Resources Message

Please remember to think before you act. What might be fun now, could have bad

consequences later.

If you have a concern – text us, call us, come see us (or just one of us!).

Stew Souders - 360-259-3288 Mike Baines - 724-678-6147

Send us your best shots!

The public information shop needs help sharing the Lick Creek and Green Ridge story with an engaged, supportive public! Most people don't know what it

really takes to contain a wildfire - your photos can help them understand the incredible work you do!

Examples:

Line construction

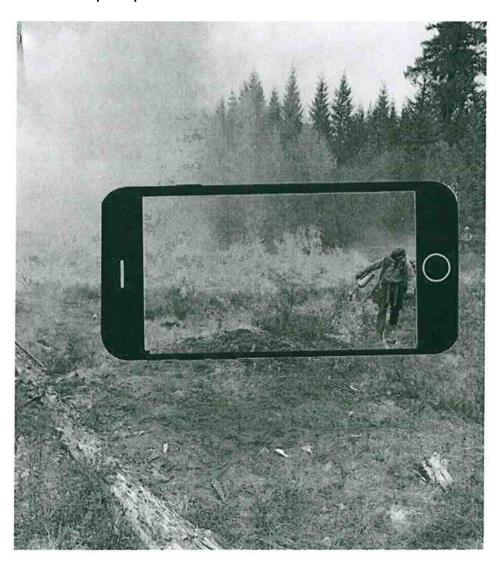

Mop up

Hose lays

Crews

Griding

Air ops

We can only use photos that show everyone in complete PPE-hardhat, gloves, shelter, etc.

Green Ridge Fire Demob Instructions

Follow these steps in the <u>order below</u>:

1. Weed Wash –All line vehicles demobing must proceed to weed wash You will receive a certificate upon completion which you need to show Finance to get your time sheet completed.
2. Ground Support - Inspections are only required for contractors that have damage and want to make a claim. The inspection is optional for agency resources.
3. Supply - Return any items you checked out.
4. Communications - Return any items you checked out.
5. Documentation - Drop any evaluations or training documentation in the box at Finance.
6. Finance - Proceed to the appropriate Finance table (Personnel or Equipment) to receive your final timesheet.
7. DMOB Unit – FINAL STEP: Stop by DMOB . Provide DMOB with your estimated time of departure and arrival home. You are not completely demobed until you inform DMOB

TRAINING MESSAGE

Educating trainees on their responsibilities.

Training Objectives

Training objectives are your goals or desired experience(s) needed to provide you the knowledge, skills and techniques to do the job you are training and working toward.

As a new trainee, your objectives are pretty broad, considering you're just becoming familiar with the duties of a position.

However, as you gain experience, your objectives will become more focused and targeted to assist you in mastering the skills and knowledge needed.

Train with different trainers and build your own style. Remember, ALWAYS get a performance evaluation.

Arriving Trainees.

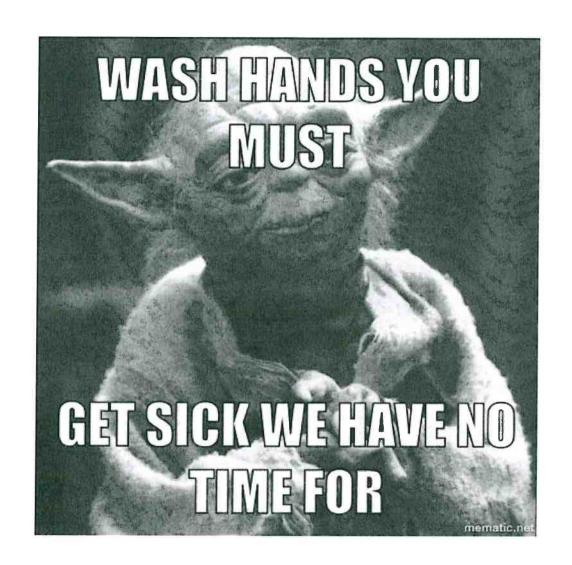

New trainees please register using the QR Code or you may register in person with the training specialist located in the Planning Yurt.

** (If you have already registered, you do NOT have to re-register.) **

https://forms.office.com/g/e86rPLKChR

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom	
Cough more than expected?	
Shortness of breath or difficulty breathing?	
Fever? Chills?	
Muscle pain, outside your normal for firefighting?	
Sore throat?	
New loss of taste or smell?	
Fatigue, outside your normal for firefighting?	
Headache, outside your normal for firefighting?	
Congestion or runny nose, outside your normal for firefighting?	
Nausea or vomiting	
Diarrhea	
* Take temperature with no-touch thermometer, if available *	

Instructions for Screening

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	DO NOT MOBILIZE
At Entries:	DO NOT ANNOUNCE
Consider adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained.	Ask individual to step aside and follow the steps below.
If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	

Escort symptomatic individual to isolation area. Isolation support personnel should begin documentation. Have symptomatic individual contact Supervisor for further direction. Notify public health officials. Have individual transported as appropriate. Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).
