Lick Creek / Green Ridge Weather Forecast

FORECAST NO: 53

FORECAST FOR: Thursday Operational Period

SHIFT DATE: 9/2/2021

NAME OF FIRE: Lick Creek/Green Ridge

UNIT: OR-UMF

SIGNED: David Shallenberger - Incident

Meteorologist

DATE AND TIME ISSUED: 9/1/2021 at 1900 PDT

240-778-5019

... High Pressure Builds in with Warming and Drying...

WEATHER DISCUSSION: High pressure will continue to build into the area today with no change to the dry pattern expected. Afternoon min relative humidity will decrease and begin to dry out as temperatures increase each day heading into the weekend. Winds will switch to a north-northwest predominant direction as the high nudges into northwestern WA. Winds will then begin to decrease each afternoon through Thursday and Friday. Temperatures will then return to above normal temperatures heading into the weekend. Increased warming and winds returning on Saturday as the high shifts east will result in elevated fire weather conditions for afternoon min RH on Friday and into Saturday. By the beginning of next week, the pattern points to the high becoming a more blocking feature over SE Washington keeping temperatures up and min RH in the afternoon just above elevated fire weather conditions. This will slow an approaching cold front on Monday and Tuesday causing it to stall over central WA, keeping cooler air at bay and a reprieve to afternoon relative humidity.

TODAY:

WEATHER: Mostly sunny with smoke and haze.

MAXIMUM TEMPERATURE: 59-64° above 5000 feet. 71-76° valley bottoms.

MINIMUM RELATIVE HUMIDITY: 28-33% above 5000 feet. 23-28% valley bottoms.

20-FOOT RIDGETOP WINDS: Becoming north-northwest to 6-8 mph with gusts up to 16 mph in the afternoon.

GREEN RIDGE CREEKS: Light and variable becoming strong upslope/upcanyon.

INVERSION/STABILITY: Low level inversion will lift around 1000.

CHANCE OF WETTING RAIN (≥ 0.10 "): 0%. **HAINES INDEX:** 3 (Very Low) LAL: 1

TONIGHT:

WEATHER: Mostly clear. Smoke and haze in the morning.

MINIMUM TEMPERATURE: 45-50° above 5000 feet. 39-44° valley bottoms.

MAXIMUM RELATIVE HUMIDITY: 50-56% above 5000 feet. 60-65% valley bottoms.

20-FOOT RIDGETOP WINDS: North to north-northwest winds at 4-6 mph gusting 10 mph at times.

GREEN RIDGE CREEKS: Downslope/downcanyon winds 5-8 mph.

INVERSION/STABILITY: moderate surface inversion.

CHANCE OF WETTING RAIN (≥ 0.10"): 0%

FRIDAY:

WEATHER: Mostly sunny with smoke and haze.

MAXIMUM TEMPERATURE: 64-70° above 5000 feet. 76-81° valley bottoms.

MINIMUM RELATIVE HUMIDITY: 20-25% above 5000 feet. 15-20% valley bottoms.

20-FOOT RIDGETOP WINDS: Winds shifting to north-northwest at 4 to 6 mph with gusts to 14 mph in the afternoon.

GREEN RIDGE CREEKS: Light and variable becoming strong upslope/upcanyon.

INVERSION/STABILITY: Low level inversion will lift around 1000.

CHANCE OF WETTING RAIN (≥ 0.10"): 0%. **HAINES INDEX:** 3 (Very Low) LAL: 1

Observations from the field are valuable!

Email any obs to david.shallenberger@noaa.gov or text them to 240-778-5019.

FIRE BEHAVIOR FORECAST FORECAST NUMBER: 38 TYPE OF FIRE: Wildland Fire FIRE NAME: Lick Creek & Green Ridge OPERATIONAL PERIOD: 0630-2100 09/02/21 TIME ISSUED: 1900 UNIT: Umatilla NF OR-UMF-000658 & 000659 SIGNED: Wm. Scott MacDonald, FBAN william.macdonald@usda.gov 541-806-2483

INPUTS

WEATHER SUMMARY – See attached Fire Weather Forecast; Temps rising, RH dropping, still breezy.

Fuel: Fuels in the fire area are primarily composed of Timber w/Understory (Mixed Conifers with litter and shrubs), Timber with Litter (Conifers with dead/down/litter), and Grass with Shrubs (perennial grasses w/brush). Fuels are generally discontinuous - broken up by rock outcrops, areas of grass and changes in aspect. ERC values are starting to rise (slowly) as fuels dry out, moving towards **90**th **percentile weather**.

1000 hr. fuels = 7%-8%, Eastern Washington & the Idaho panhandle are in Extreme to Exceptional Drought. The drying trend will continue to reduce the effects of recent precipitation, along with lower RH recovery.

Topography: Area topography for both fires includes steep slopes with multiple deep drainages. Elevations range from 3,300 to over 6,200 feet. Be aware of situations where topography, wind, and fuels align.

OUTPUTS

FIRE BEHAVIOR

General: Burn period not as long as we move into September, with days becoming shorter. **Not much change from 9/1 fire behavior.** The fire environment will stay moderated – the higher elevations with open fire perimeter are still relatively cool w/higher humidity than the valleys. Sheltered fuels can still be dry enough to burn with limited torching. **Spotting distances can be up to 1000 feet, but generally less than 500 feet,** unless spotting occurs from ridgelines. Fine dead fuel moistures continue to be low, even with temps lowering and RH up slightly, dropping POI; light winds will keep ROS/FL similar to yesterday.

Green Ridge Fire - All Divisions: The southern flank has large areas of open line that have been mostly checked up on Misery Ridge, roads, riparian areas, discontinuous fuels, and the burn scars from 2015. Monitor for changes in observed fire behavior and smoke production; likely to see increase smoke production and areas of moderate fire activity to the south, where fuels are available, and wind/slope align. Interior smokes will continue to consume fuel and involve islands or pockets of available fuel.

Fuel Type	H	ead Fire	Crown Fire		
Grass-Shrub (GS2)	FL: 1 - 4 feet	ROS: 2 - 14 Ch./hr.	FI . 20 50 f	ROS:14 - 35 Ch/Hr.	
Timber (TL8)	FL: 2 - 8 feet	ROS: 3 - 18 Ch./hr.	FL: 20 - 50 feet		
Timber (TU5)	FL: 4 - 16 feet	ROS: 4 - 24 Ch./hr.	Crown fire estimated across both timber fuels		

Probability of Ignition for most areas is **45%-55%** (higher temps/lower FDFM); ROS / FL table is **worse case**; lower slope percent, less wind, discontinuous fuels, will reduce these values significantly.

Lick Creek Fire - All Divisions: No change. Be alert for threats to the control line; spots from interior islands or areas of heat along control lines, with wind/slope alignment. Most smoke is interior of control lines.

IA within the TFR: Live and 1000 hour fuels will still support combustion. Fine fuels will dry when exposed to sunny & breezy conditions, becoming available to burn; rapid ROS when wind/slope/fuels are aligned.

AIR OPERATIONS

Limited to no impacts on aviation operations with good ventilation over the fire at this time; slight inversion until about 1000.

SAFETY – Frequent spot fires across your line... higher elevation fires tend to move by torching and spotting into receptive fuels. Check your SA when trees torch and ensure escape routes are still viable.

Green Ridge Safety Message 9/2/2021

There's been a lot of talk lately about "Unnecessary Risk." One of the latest pushes on this term has come out of one agency's journey through the dark woods of "Safety" toward the awkward proclamation that breathing matters most. So here we are being advised to take no unnecessary risk...

buried in layers of tradition, self...... "And how exactly will the powers-that-be decide if a risk was unnecessary?"

In this perfectly played out yet unrehearsed barroom theater, a comrade takes
the cue and exclaims: "That's simple. If something bad happens then you
shouldn't have been doing it. Didn't we tell you that no tree is worth dying for!" The cynic is sure that a bad
outcome will be the only time necessity is actually measured, and the conclusion is forgone.

Think about "Necessary." How much of your exertion is necessary? The answer is clearly every last bit of it. What I'd like you to think about is: What is it necessary for? Necessary for image? For belonging? For hours? Trust me, I get it. As the kids say: "You Do You." Just be honest with yourself about what the risks you take are for.

"Unnecessary" is nearly impossible to define pre-action, and overly easy to declare in hindsight.

Nobody on the line is accepting risk

for no reason. There is always a

reason. It's just that the reasons are

Heat, noise and smoke exposures are compounded when combined with fatigue. The weary are not wary. There is a marked increase in accidents and injuries as fatigue sets in⁵. When we're tired, we have difficulty processing information and adapting to changing circumstances—fairly important abilities in our world.

What do you think of when you hear 2:1? Hot drip mix? Beer to water? If you're like me you think of CTRs.

The basic theme is this: brute strength is handy, but intelligence matters more.

I'm just suggesting that you put some thought into the actual rest you and those you oversee are getting—or not getting. Not the mythical rest on your CTR—the actual down time. Be intentional. Get radical. Support sleep.

Triangle: Put a Pinch of Practical in Your Tactical Pause

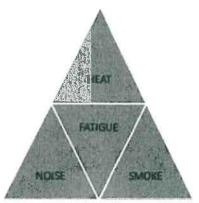

We all know it's impossible to learn anything if it doesn't somehow take the form of a triangle, so here you go. This triangle (courtesy of George Broyles) is heavy and it will smash you. It's also pretty much invisible because we are so accustomed to its elements. Some of the points are sharp and will cut you down where you stand, others are rather dull, but insidiously incessant. You want to do some good for yourself and those around you? Put a pinch of practical in your tactical pause. Stop what you're doing to intentionally:

- Lower core body temperature.
- Lower heart rate.
- Relieve fatigue.
- Get out of the noise.
- Get out of the smoke.

The Triangle, Courtesy of U.S. Forest Service Fire and Fuels Project Leader George Broyles.

Team Ordering/Timeline Process:

1100 - Last call to change spike camp resource hot food location.

1600 - DIVS to have next day's resource order ready for Planning OPS.

- All crew level orders will be placed through DIVS or Branch.
- DIVS or Branch will place all orders through Supply -
- All orders will be tracked using the process found on the front of this form.

GPS Datum: NAD 83- Degrees, Decimal, Minutes (DDMM.MM)

Definitions

FOB-Forward Operating Base is a secure forward position established to strategize, design and discuss tactics, and for personnel to transfer information and meet.

Line Spike Camp-Managed by Operations at the DIVS level; mobile, short duration and self- sufficient.

Spike Camp-Supported by Logistics, listed in the IAP, numbers in camp are set by 1100, named by Plans.

Emergency Medevac- Life threatening situation requiring immediate medical attention. Handled as per IAP med plan and team SOP's. Communications to clear command channel radio traffic.

Medical Transport-Transport of less serious injury/illness managed by Operations or line Medics back to camp for evaluation and/or treatment.

GREEN RIDGE FIRE Finance Process OR-UMF-000659

All finance functions are being performed virtually

Please send all of your documents to 2021.greenridge.finance@firenet.gov

Email Subject Line: (Example) Overhead/Resource Order Number Resource Name

Use Overhead, Equip or Crew in the subject line with your information (as you were ordered-look on RO if needed)

(Example: TIME_O-200_SBear)

Email all documents that pertain to your assignment:

Agency	Agency ADs /	VIPR Resources	Contract / Agency Crews	
Overhead	EFFs			Cooperators
Resource Order	Resource Order	Resource Order	Resource Order	Resource Order
Crew Time	Casual Hire Form	VIPR Agreement	Manifest	Agreement
Reports (CTRs)	CTRs	Schedule of Items	Agreement / Contract	Shift Tickets / CTRs
	1	Inspections	Schedule of Items	
		Shift Tickets	Inspections	
			CTRs	

Submit Equipment Shift Tickets or Crew Time Reports (CTRs) daily to

2021.greenridge.finance@firenet.gov

Please include your email address and phone number in the body of the email when sending your documents.

Please call (541)233-6352 if you have personnel time questions

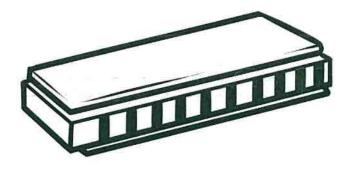

Please call (971) 245-0248 if you have other questions for finance

COMP / CLAIMS or COST you can also send your paperwork for COMP or COST to the email address

LICK CREEK - GREEN RIDGE FIRE HUMAN RESOURCE MESSAGE

How you talk to others is like music coming from you. Make your talk a happy talk that people will want to hear again.

If I can assist you in any way, please do not hesitate to contact us.

Your Human Resource Specialists, Stew Souders, 360-259-3288 Mike Baines, 724-678-6147

Send us your best shots!

The public information shop needs help sharing the Lick Creek and Green Ridge story with an engaged, supportive public! Most people don't know what it

really takes to contain a wildfire - your photos can help them understand the incredible work you do!

Examples:

Line construction

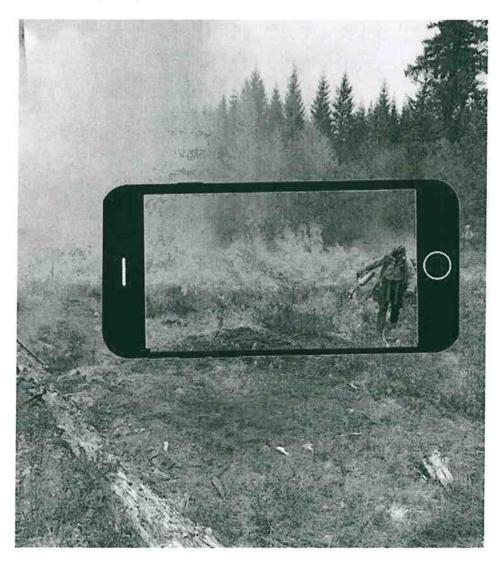

Mop up

Hose lays

Crews

Griding

Air ops

We can only use photos that show everyone in complete PPE-hardhat, gloves, shelter, etc.

SEND Text 541-670-0812

TRAINING MESSAGE

Educating trainees on their responsibilities.

Training Unit is Closing

Thursday Sept 2nd, at 1800 will be the deadline for Closing-Out with the training specialist on the incident.

There are still 10 trainees who need to close-out with the training specialist.

How to Close-Out **

When you close-out, bring your <u>performance evaluation and</u>
<u>taskbook</u>. I will review your taskbook for completeness,
record your accomplishments, and then forward
your information to your home unit.

** If you cannot close-out in person, please call and speak with the training Specialist to Close-Out.

"I am always doing that which I cannot do, in order that I may learn how to do it"

— Pablo Picasso

Hank Falcon / Training Specialist / NW Team 8 541-727-1022 / henry_falcon@firenet.gov

Green Ridge Fire Demob Instructions

Follow these steps in the <u>order below</u>:

1. Ground Support - Inspections are only required for contractors that have damage and want to make a claim. The inspection is optional for agency resources.
2. Supply - Return any items you checked out.
3. Communications - Return any items you checked out.
4. Trainees – See the Training Specialist to close out.
5. Documentation - Drop any evaluations or training documentation in the box at Finance.
6. Finance – Please see instructions for the Finance process in this IAP.
7. DMOB Unit – <u>FINAL STEP: Stop by DMOB.</u> Provide DMOB with your estimated time of departure and arrival home. You are not completely demobed until you inform DMOB.

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom	
Cough more than expected?	
Shortness of breath or difficulty breathing?	
Fever? Chills?	
Muscle pain, outside your normal for firefighting?	
Sore throat?	
New loss of taste or smell?	
Fatigue, outside your normal for firefighting?	
Headache, outside your normal for firefighting?	-=
Congestion or runny nose, outside your normal for firefighting?	
Nausea or vomiting	
Diarrhea	
* Take temperature with no-touch thermometer, if available *	

Instructions for Screening

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	DO NOT MOBILIZE
At Entries:	DO NOT ANNOUNCE
Consider adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained.	Ask individual to step aside and follow the steps below.
If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	

Escort symptomatic individual to isolation area. Isolation support personnel should begin documentation. Have symptomatic individual contact Supervisor for further direction. Notify public health officials. Have individual transported as appropriate. Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).
