CORONAVIRUS SAFETY

LIMIT THE SPREAD OF GERMS AND PREVENT INFECTION

Recommends the following steps to help prevent the spread of germs during this situation:

- Practice social distancing by keeping about six feet from others if you must go out in public.
- Wash your hands often with soap and water for at least 20 seconds, especially after being in a public place, or after blowing your nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer with at least 60% alcohol.
- Avoid touching your eyes, nose or mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Cover your nose and mouth with a tissue when coughing or sneezing; throw used tissues in the trash. If a tissue isn't available, cough or sneeze into your elbow or sleeve, not your hands.
- Clean and disinfect frequently touched surfaces daily.
- If surfaces are dirty, clean them - use detergent or soap and water prior to disinfection. Full information on how to disinfect found [here](#).
- You should wear a facemask when you are around other people (e.g., sharing a room or vehicle).
