4. Operational Period

Day Operations: 0600 – 2000 July 12, 2021

Strategic Framework: Implement a full suppression strategy on the Green Ridge fire that protects identified values at risk. Values identified include human life and safety, private recreational residences, forest infrastructure, natural wilderness and watershed values.

Management Objectives:

- Provide for firefighter and public safety by utilizing the risk management process to maintain safe and effective operational decisions, this includes full suppression strategies utilizing the full complement of tactics to achieve the control objectives.
- To the best extent possible minimize size and duration of the Green Ridge fire using natural and as opportunities allow manmade barriers that provide highest probability of success and in close coordination with agency Resource Advisors and local fire management staff.
- Maintain the existing positive relationships between NW Team 7, the Umatilla National Forest, cooperators and public by fostering trust and ensuring information is provided in timely manner.
- Ensure COVID 19 per Centers for Disease Control CDC and the state of Washington is adhered to and take necessary measures to minimize the threat and spread of COVID 19 and other infectious viruses.
- Provide Initial Attack response and assist as requested by cooperating agencies.

Operational Period Command Emphasis:

Control Objectives:

- 1) LIFE is the most important value to be protected. There is no higher value than that of the responder/firefighter and our public.
- 2) Keep fire north of Little Turkey Tail Recreation residences that are located approximately 1 mile south
- 3) Keep fire east of Godman Guard Station and other identified Forest Service infrastructure.
- 4) Keep fire from impacting Mill Creek Watershed that serves as primary watershed for the city of Walla Walla.
- 5) Keep fire west of Tucannon River further impacting recreational values and the operations on the Lick Creek fire.

Fire Behavior Forecast # 01

Name of Incident: Green Ridge & Turkey Tail

Fire Number: OR-UMF-659 & OR-UMF-671

Assumptions: Hot and very dry conditions with northwesterly ridgetop breeze. Sunny sky. ERC exceeding the 97th percentile, approaching all-time record values. Poor humidity recovery during the evening hours. Grasses in forested areas are generally uncured, with cured grasses in exposed areas. Peak burning conditions 14:00-19:00.

Weather Summary

**See attached Fire Weather Forecast **

Fire Behavior Summary

Fuels in the fire area are primarily composed of:

- Timber Litter:** Timber stands with needle litter, dominated by ponderosa pine. This fuel generally underburns with moderate rate of spread even without wind/slope alignment. It will produce occasional to frequent torching under most conditions, transitioning to short crown-runs with wind-slope alignment.
- Timber with Understory:** Conifer with abundant brush, small trees, and heavy dead fuels under them, making it difficult to walk through. Will burn readily with abundant torching and spotting when dry; it doesn't need much wind to spread efficiently. Generally found on north aspects elevation. Heavy fuels contribute to rollout.
- Grass:** Cured grass, may be mixed with widely scattered timber or shrubs. Cured grasses will support rapid fire spread with any wind.

Today's fire behavior: Absent buckets and retardant, expect fire to actively spread in all fuels and at all hours. Rollout producing group-torching, short uphill runs, and short range spotting. Cured grass fuels may produce rapid fire spread. Fire behavior in the timber fuels picking up by 14:00. Expect rapid acceleration of fire behavior with column development if fire crosses Turkey Creek or East Fork Meadow Creek.

Fuel Type	Live herbaceous = 30%		Live woody fuels = 100%		Spotting Distance
	ROS	Head	ROS	Backing	
Timber Litter (TL8)	2 - 6 feet/min	2 - 4 feet	<1 foot/min	1 foot	<0.2 mile
Timber Understory (TU5)	3 - 8 feet/min	4 - 8 feet	<1 foot/min	2 feet	<0.2 mile
Grass (GR2)	20 - 50 feet/min	4 - 7 feet	2 - 4 feet/min	2 feet	<100 feet

Specific Assignments:

- Division A** Expect control lines to hold, with continued creeping and smoldering and occasional interior torching. Remain vigilant for fallout or previously undetected spots.
- Division G** Potential for rapid uphill spread in light fuels to the top of Big Turkey Tail Ridge. Lookouts and escape routes are critical for firefighters working with fire below them. Expect moderated fire behavior in the moist fuels near East Fork Meadow Creek, but expect rapid acceleration if a spot becomes established across the creek.
- Division M** Rollout and flareups will continue to be a challenge. Watch for spotting, both your division and from a potential slope run in Division G. While moderated fire behavior can be expected in the moist fuels along Turkey Creek, any spot that becomes established across the creek can be expected to accelerate rapidly. This is especially true for any spot in the upper slopes that will be exposed to the northwest breeze. Consider where you will go and how long it will take if fire becomes active on both sides of Turkey Creek.
- Air Operations** Smoke limited visibility in the morning, with inversion breaking at 10:00.

Safety

Transition day. Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. There is a high potential for fatalities, serious injuries, or incidents (some have occurred in the past). Be proactive in mitigating the risks by proper implementation of LCES—Lookout, Communications, Escape Routes, and Safety Zones.

Transition Day... Know who you are working for.

INCIDENT: GREEN RIDGE

DATE: 7-13-2021

TIME: Day Shift

Major Hazards and Risks

- TODAY IS TRANSITION DAY - Remember...Risks to firefighters increase significantly during transfer of command periods ... know who your leadership is, know where you are supposed to be, know what you are supposed to be doing today. Interpret and present Leader's Intent to your resources and personnel. TASK, PURPOSE, END STATE
- There will be new faces, new names, and new voices on the radio today. Make your contacts with adjoining resources.

Communicate! Ask Questions even if you think you know the answer, you could be surprised by the answer.

WARNING SIGNS DURING A TRANSITION:

- Are you driven by an overwhelming sense of urgency?
- Leader's intent has been fuzzy.
- Group think has taken over.
- Freelancing is occurring.
- Command and Control is becoming compromised. (getting spread too thin)
- Are you compromising LCES to carry out the assignment?
- Is the mission too dependent on "the stars being aligned"? (Think aircraft being the key component to the mission.)

IF ANY OF THESE WARNING SIGNS ARE PRESENT:

- Take a tactical pause.
- Make positive communication with your crew members, supervisors, and adjoining forces.
- Utilize sound risk management practices before re-engaging.

Are you maintaining good communications links with your crew members and line overhead?
