## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 11	<b>TYPE OF FIRE:</b> Vegetation
<b>FIRE NAME:</b> Lick Creek-Green Ridge Fires	<b>OPERATIONAL PERIOD:</b> Aug 6 <sup>th</sup> , 2021 24 HOUR
<b>DATE ISSUED:</b> August 5 <sup>th</sup> , 2021	<b>TIME ISSUED:</b> 1930
<b>UNIT:</b> WA-Umatilla National Forest	<b>SIGNED:</b> Dan O'Connor Fire Behavior Analyst (FBAN)

**WEATHER SUMMARY:** See detailed Fire Weather Forecast in IAP

### FUELS:

Fire areas include a range of conifer systems, from higher elevation Sub Alpine Fir and Engelmann Spruce, to Doug-Fir, Grand Fir and Lodgepole Pine under 5000', and Ponderosa Pine in the lower elevations of the Forest. Outside of the 2006 Columbia Complex and the 2015 Grizzly Complex, all forested areas have extensive dead and down and ladder fuels that will work together to elevate fire into the crowns and generate short range spotting.

The area is currently classified as 'Exceptional' drought by the US Drought Monitor, with Energy Release Components currently setting daily record highs, and approaching all time high levels. You may see some resistance to spread in brush and re-prod areas, but these veg structures are losing moisture daily. Heavy dead and down fuels will likely burn completely, holding heat and actively consuming through all hours of the day.

### EXPECTED FIRE BEHAVIOR: *Based on the Warmest, Driest, Windiest Conditions Forecasted*

<u>Maximum Spotting Distance</u> ¾ mile <u>Probability of Ignition</u> 77%	Fuel Type/Model	Maximum Rate of Spread (chains/hour)	Maximum Flame Length (feet)
	Timber litter and understory TU5/TL4	Head 12-15 ch/hr Flank 4-6 ch/hr	Head 8-10 ft Flank 3-5 ft
	Grass/Shrub GS1	Head 17-22 ch/hr Flank 10-14 ch/hr	Head 4-6 ft Flank 2-4 ft

### GENERAL/Potential:

**DAY: Dry Cold Front passage today.** Gusty SW winds may be influenced, enhanced, and/or redirected through the terrain across all areas of the fire today. Expect long range spotting downwind of any active fire areas, especially single or group tree torching or slope aligned runs. Areas of the fire that have been cold for some time may come back to life, so keep lookouts posted when working in the green.

### SPECIFIC

**Green Ridge:** The Tucannon River drainage will likely see an uptick in fire activity today, with upper slopes seeing the strongest winds. There is still considerable intense heat all along the south side of the river, so anticipate torching that could launch spot fires across the river and possibly the 12 road. Winds will likely be influenced by terrain in the drainage bottoms, turns and all. Winds should be favorable for Gulf, but Alpha and the eastern divisions P/S could see increased activity with torching and spotting yet again.

**Lick Creek:** SW winds associated with the dry cold front passage should be favorable for the Lick Ck fire, as most holding concerns with long duration intense heat have been along the SW flanks.

**Night Division:** Due to the late burn periods, anticipate daytime burning conditions to continue well into the night, seeing relief with a decrease in winds and/or relative humidity recovery.

### AIR OPERATIONS:

Sunrise: 0538, Civil Twilight ends: 2049

### SAFETY:

Dry Cold Front passage are associated with rapid fire growth, long range spotting, and extreme fire behavior in the Pacific Northwest. Establish and maintain LCES and know what your fire is doing at all times.

# SAFETY MESSAGE

*Fire fighter safety comes first on every fire, every time*

We are **ALL** accountable for **SAFE** behaviors  
For Day & Night Operations: **8/6/21 0600 – 8/7/21 0600**

INCIDENT: **Lick Creek, Green Ridge**

Date Prepared: August 5, 2021 TIME: 1900

### Risk Management

**Identify Hazards (Situational Awareness):** Gather information; Objectives, communications, who's in charge, previous fire behavior, weather forecast, and local factors.

**Assess Hazards:** Look up, look down, look around. As conditions change, what other safety hazards are likely to exist?

**Develop Controls and Make Decisions:** Develop control measures that reduce risk. Consider risk versus gain.

**Implement Controls:** Ensure controls are in place and being implemented by personnel. Ensure controls are integrated in the operational plan and understood at all levels.

**Supervise and Evaluate:** Are controls adequately mitigating the hazards. If not, reassess and consider additional or different controls to safely accomplish the mission.

IRPR green pages-Pg. 1

**Major Hazards and Risks:** *Mop up, stump holes, hazard trees, steep rugged terrain, driving, potential of new lightning fire starts from thunderstorms.*

## A message from the Chief of the Forest Service in 2015 Thomas Tidwell

- Everyone, every day, returns home safely.
- Safety is not just a consideration in how we do our work; it is the essence of how we make decisions.
- We assess, analyze, communicate, and share risk before, during, and after incidents.
- We do not accept unnecessary risk or transfer it to our partners or future generations.
- Before, during, and after every fire, we enhance relationships.
- We create a respectful work environment for everyone involved in the fire.
- We learn from every experience and use that knowledge to improve.

Start thinking about transition as new team members will be starting to enter the incident and becoming familiar with the fire line. Information sharing will be key to the new teams Success.

8/6/2021 In Brief incoming team

8/7/2021 Shadow day

8/8/2021 0600 Transfer of Command

## COMMUNICATION RESPONSIBILITIES

All firefighters have five communication responsibilities:

- Brief others as needed.
- Debrief your actions.
- Communicate hazards to others.
- Acknowledge messages.
- Ask if you don't know or are unclear.

In addition, all leaders of firefighters have the responsibility to provide complete briefings that include a clearly stated "Leader's Intent."

- Task = What is to be done
- Purpose = Why it is to be done
- End State = How it should look when done

**To:** Incident Commanders on Pacific Northwest (PNW) IMTs, IMTs Working in the Geographic Area, and all PNW Agency Administrators

**From:** Chuck Turley, PNW MAC Acting-Chair on Behalf of All PNW MAC Agency Executives

**Subject:** COVID Mitigation Expectations/Requirements

The frequency of COVID exposure and cases is increasing on our PNW wildfire incidents and within support functions. PNW MAC has reviewed the multiple guidance documents provided by CDC, Wildland Fire Medical and Public Health Advisory Team (MPHAT), and federal, state, and local entities. Beginning immediately our expectation and direction is that all PNW incidents and their support functions will implement and enforce the following.

- For resources assigned to an incident within the PNW and for our NW IMTs assigned outside the northwest, wear a mask at all times whether inside or outside, vaccinated or unvaccinated, unless you are working alone or are on the fire line. Having a medical exemption is the only exception.

This direction applies to all levels of incident operations and all aspects of an incident including but not limited to transportation to/from incident, ICPs, spike camps, helibases, tanker bases, ground support units, etc.

Thank you for your vigilance of COVID protections.

Respectfully,

---
