National **PURPLE HEART DAY**

A Salute To Our Nation's Combat Wounded Servicemembers

Purple Heart Day, observed on August 7th, is a time for all Americans to remember and honor the brave men and women who were either wounded or paid the ultimate sacrifice as a result of enemy action. As we transition command on this fire, both California Team 12 and Northern Rockies Black Team wish to extend our deepest gratitude to those who have sacrificed so much for our nation. We want all Purple Heart Recipients to know they will never be forgotten by the American People. For you Purple Heart Recipients amongst us on the Lick Creek/Green Ridge Fire, we are humbled and honored by your selflessness and Duty to Country—and no word in the English language bears enough meaning to describe our gratitude for what you and your fellow soldiers have done for us and our families.

We will never forget.

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">LICK CREEK/GREEN RIDGE</p>	2. Operational Period:	Date From: 8/7/2021 Time From: 0600	Date To: 8/8/2021 Time To: 0600
----------------------------------------------------------------------------------------------	-------------------------------	----------------------------------------	------------------------------------

3. Objective(s):

- Strategic Objectives:**
- Provide for the safety of firefighters and the public through utilization of strategic and deliberate risk assessment processes. Ensure incident within an incident protocols are established.
 - Develop and implement operational objectives based on identified values at risk and highest probability of success limiting fire spread.
 - Follow established guidelines and mitigations regarding COVID and other infectious diseases.
 - Enhance relationships through timely communication and active involvement with the public, stakeholders, and cooperators.
 - Coordinate with the READ's to ensure natural and historical values are protected to the degree necessary.
 - Maintain fiscal responsibility keeping cost commensurate with the values at risk.
 - Provide initial attack response to new fire starts within the TFR boundary. Assist with initial attack efforts outside the boundary as requested.
 - Provide for an effective and efficient transition of incident management between IMT's.

- Lick Creek Operational Objective:**
- Keep fire within its currently identified perimeter.

- Green Ridge Operational Objective:**
- Keep fire north of the 2015 Butte Creek Burn scar along the West Butte Creek Trail to the East Butte Creek Trail to Yearling Ridge Trail to Crooked Creek Trail to Monument Ridge and along the First Creek Trail to NF 40 at Misery. Protect Little Turkey Tail Recreation residences and the Godman Guard Station.
 - Keep fire east of FS road 64 to protect private property, structures, and recreation sites.
 - Keep fire south of the Patrick Grade road at the Tucannon road to the 3111, 3117 and the 4022 roads towards Dodge Springs.
 - Keep fire west of NF 40 Road. Minimize suppression impacts in the Wenaha-Tucannon Wilderness using natural containment features as practical.

- COVID Mitigations:**
- All persons must wear a mask indoors at all times regardless of vaccination status, as well as outdoors when physical distancing cannot be maintained.
 - Maintain a module as one, wash your hands and sanitize surfaces.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 12	TYPE OF FIRE: Vegetation
FIRE NAME: Lick Creek-Green Ridge Fires	OPERATIONAL PERIOD: Aug 7 th , 2021 24 HOUR
DATE ISSUED: August 6 th , 2021	TIME ISSUED: 1930
UNIT: WA-Umatilla National Forest	SIGNED: Dan O'Connor Fire Behavior Analyst (FBAN)

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP

FUELS:

Fire areas include a range of conifer systems, from higher elevation Sub Alpine Fir and Engelmann Spruce, to Doug-Fir, Grand Fir and Lodgepole Pine under 5000', and Ponderosa Pine in the lower elevations of the Forest. Outside of the 2006 Columbia Complex and the 2015 Grizzly Complex, all forested areas have extensive dead and down and ladder fuels that will work together to elevate fire into the crowns and generate short range spotting.

The area is currently classified as 'Exceptional' drought by the US Drought Monitor, with Energy Release Components currently setting daily record highs, and approaching all time high levels. You may see some resistance to spread in brush and re-prod areas, but these veg structures are losing moisture daily. Heavy dead and down fuels will likely burn completely, holding heat and actively consuming through all hours of the day.

EXPECTED FIRE BEHAVIOR: *Based on the Warmest, Driest, Windiest Conditions Forecasted*

<u>Maximum Spotting Distance</u>	Fuel Type/Model	Maximum Rate of Spread (chains/hour)	Maximum Flame Length (feet)
<u>Probability of Ignition</u> 84%	Timber litter and understory TU5/TL4	Head 20-25 ch/hr Flank 10-15 ch/hr	Head 12-15 ft Flank 6-8 ft
	Grass/Shrub GS1	Head 38-42 ch/hr Flank 25-28 ch/hr	Head 5-8 ft Flank 3-5 ft

GENERAL/Potential:

DAY: Continued gusty SW winds will again be influenced, enhanced, and/or redirected through the terrain across all areas of the fire today. Expect long range spotting downwind of any active fire areas, especially single or group tree torching or slope aligned runs. Areas of the fire that have been cold for some time may come back to life, so keep lookouts posted when working in the green.

SPECIFIC

Green Ridge: Yesterday the fire made substantial runs up and out of the Tucannon River drainage- it's now in a different weather environment with more exposure to ridgetop winds. Anticipate greater rates of spread with increased wind support, fuels are also a drier forest type than down in the river drainages. Take time to understand where the fire has spread to and what slope, fuels, and weather influences will drive growth today.

Lick Creek: SW winds associated with the dry cold front passage should be favorable for the Lick Ck fire, as most holding concerns with long duration intense heat have been along the SW flanks.

Night Division: Due to the late burn periods, anticipate daytime burning conditions to continue well into the night, seeing relief with a decrease in winds and/or relative humidity recovery.

AIR OPERATIONS:

Sunrise: 0539, Civil Twilight ends: 2048

SAFETY:

Transition day with California Team 12 and the incoming Rocky Mountain Black Team. Help the incoming team get to know the fuels, topography, and fire behavior you have learned to speed up their SA.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

We are **ALL** accountable for **SAFE** behaviors
For Day & Night Operations: **8/7/21 0600 – 8/8/21 0600**

INCIDENT: **Lick Creek, Green Ridge** | Date Prepared: August 6, 2021 | TIME: 1900

Make a Plan to Reposition

- Establish a plan to reposition resources in the event of adverse fire behavior.
- Have decision points established.
- Post experienced lookouts who know the decision points, and where all of the resources are working.
- Develop notification protocols to initiate the plan.
- Make sure all resources know where to go and their travel time to that location.
- Have a check in protocol for resources when they arrive at their safe locations.

Major Hazards and Risks: *Mopping up, stump holes, hazard trees, steep rugged terrain, driving, Chain saw operations, unburned fuel between you and the main fire when trying to pick up spot fires.*

Team Transition Period

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. Be proactive in mitigating the risks by proper implementation of LCES—Lookout, Communications, Escape Routes, and Safety Zones.

Factors for increased risks to fireline personnel during transition periods include:

- ✓ No, or poor, briefing of incoming personnel.
- ✓ Lack of fire weather and behavior information, both forecast and observed.
- ✓ Communications; face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
- ✓ Location of safety zones and escape routes may not be known and communicated to all resources.
- ✓ Not all Resources know who is in command.

Mitigation action:

Communications: Maintain existing communications with your own and adjacent resources while you are developing communications with incoming resources and your “new” supervisor.

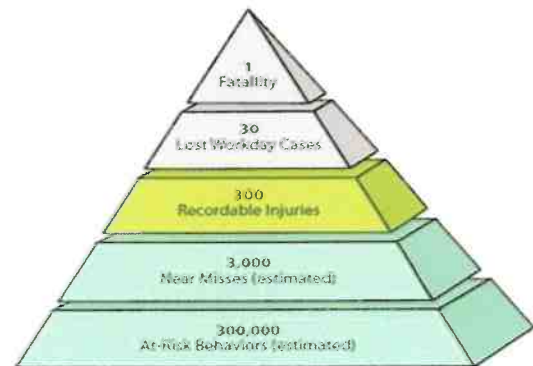

Transition process is in motion, team members are shadowing. Information sharing will be key to the new teams Success.

8/8/2021 0600 Transfer of Command

Safety Triangle

- How many unsafe acts have you seen?
- How many bumps, scrapes, and minor injuries/accidents?
- Take time to recognize those “weak signals” and change a behavior before they become the number at the top of the pyramid!!!!

What Does **Safety Triangle** Mean?

The **Safety Triangle**, also known as the Safety Pyramid, the **Heinrich Triangle**, and the Bird Triangle, is a theoretical model that describes a stable ratio between workplace incidents of varying degrees of severity.

THANK YOU, from So. Cal Team 12 for your dedication to the MISSION. The TASK AT HAND. Helping us make progress on putting this fire out with minimal to no injuries!!

August 3, 2021

To: Incident Commanders on Pacific Northwest (PNW) IMTs, IMTs Working in the Geographic Area, and all PNW Agency Administrators

From: Chuck Turley, PNW MAC Acting-Chair on Behalf of All PNW MAC Agency Executives

Subject: COVID Mitigation Expectations/Requirements

The frequency of COVID exposure and cases is increasing on our PNW wildfire incidents and within support functions. PNW MAC has reviewed the multiple guidance documents provided by CDC, Wildland Fire Medical and Public Health Advisory Team (MPHAT), and federal, state, and local entities. Beginning immediately our expectation and direction is that all PNW incidents and their support functions will implement and enforce the following.

- For resources assigned to an incident within the PNW and for our NW IMTs assigned outside the northwest, wear a mask at all times whether inside or outside, vaccinated or unvaccinated, unless you are working alone or are on the fire line. Having a medical exemption is the only exception.

This direction applies to all levels of incident operations and all aspects of an incident including but not limited to transportation to/from incident, ICPs, spike camps, helibases, tanker bases, ground support units, etc.

Thank you for your vigilance of COVID protections.

Respectfully,

Chuck Turley

Human Resource Message

How are you and your fellow workers doing?

As crew supervisors, you should be looking for and anticipating potential problems and symptoms of stress, low morale, and inappropriate treatment.

INDICATOR EXAMPLES

1. People avoiding people
2. Seclusion/withdrawal/separation from the group
3. Racial or sexual jokes & or remarks
4. Comments that indicate inappropriate treatment like:
 - ** “You can’t take a joke”
 - ** “Just expect that type of treatment on these types of jobs”
 - ** “I was just kidding”
 - ** “I was trying to be nice”
5. Accusations
6. Name Calling
7. Blaming
8. Unequal/unfair treatment

You need to check out these indicators, ask folks to stop the inappropriate behavior and squelch it immediately. You should be setting examples and making sure no one has to deal with ANY INAPPROPRIATE BEHAVIOR.

Your HRSP—Bill
