OUTPUTS FIRE BEHAVIOR

GENERAL: Fire behavior should be moderate again today with the lower wind speeds. Seasonal humidity combined with the lower wind speeds will result in slower rates of spread, reduced torching, and a lower chance of crown fire. However, the humidity will start a steady downward trend this week and we can expect an increase in fire activity later in the week.

Probability of ignition is 65% with spotting distances of 1000 feet possible. Haines Index 3

1-hour fuel moistures: 5%, 10 hours at 5%, 100 hours at 7%, 1000-hour fuels are ~8 % and live fuel moistures are at around 75-95%. ERCs are above the 97th percentile.

Fuel model	Max. Flame Length	Day Shift ROS	Night Shift ROS	Spotting
Timber little and understory TUS/TL4	6-7 ft.	8-12 ch/hr	6-9 ch/hr	.2 miles
Short Grass/Shrub – GR4	3-4 ft.	11-19 ch/hr	4-7 ch/hr	.2 miles

SPECIFIC:

Green Ridge: The fire will continue to progress up and out of the drainages, but should lessen when the winds switch to a WNW direction. Rates of spread will be slow and flame lengths reduced. The fire will be active in the heavier concentrations of fuels as the winds surface. Conditions should be favorable for burnout operations in Division M. The active fire in division P adjacent to the Lick Creek fire will continue to move to the southeast along the Tucannon drainage.

Lick Creek: The WNW winds today should again be favorable by pushing the heat and smoke into the interior. Expect interior fuels to continue to consume and put off smoke.

Night Division: Due to the late burning periods, anticipate daytime burning conditions to continue well into the late evening and continuing until the downslope winds set up and/or the humidity recovers.

AIR OPERATIONS:

Heavy smoke may hamper air operations.

SAFETY

Local Thresholds – **WATCHOUT:** Combinations of any of these factors can greatly increase fire behavior:

Elevations	20' Winds +15 mph	RH <20%	Temp +80°	1000hr Fuel <7%
3000 –5500'	SW/WNW 5-10 mph	18-23%	80-85°	~8%

Human Resource Message

LICK CREEK / GREEN RIDGE FIRE

August 10-11, 2021

Mutual Respect: Everyone has the right to work in a harassment-free environment where people treat one another with dignity, equity, courtesy, and respect. You have the right to say “no” to unwelcome advances or requests for favors. You have the right to file a complaint or a grievance through appropriate avenues, if necessary.

With those rights, you also have responsibilities to behave in a manner that treats people with dignity, equity, courtesy, and respect. To abide by agency and incident ethics and conduct regulations, and to report any harassment or other inappropriate behavior you observe or experience.

It is very important we all encourage mutual respect to reduce workplace stress, conflict, and problems, and increase and improve communication between colleagues.

Be patient with each other. This is going to be a long fire season. Give yourself and your coworkers a break. Many of us will be together on multiple fire assignments or have already been on multiple fire assignments and folks may be a bit “snappy” in their responses. This is to be expected however, be in control of your emotions and help each other out. Patience, Patience, and more Patience...it does a person good!

MUTUAL RESPECT, YOU MAKE THE DIFFERENCE!

Be safe, stay cool, and have a good day!

After being notified by your supervisor of your tentative release date:

1. Return all supplies, radios, etc. that were checked out. If you have no items to return, you can complete Finance and Demob virtually. All line vehicles must complete a WEED WASH and have a post-inspection of their vehicles.
2. Submit time for all personnel and equipment to Finance per directions in IAP.
3. Once you receive confirmation from FINANCE with a copy of your OF-288 and other financial documentation, you are free to complete Step 4 and travel home.

Training Specialist Message/Training Process

You do not have to wait until the last work day to complete a position task book (PTB) evaluation. You can complete the evaluation process at any time on the incident. Trainees are not required to check in with the Incident Training Specialist (TNSP). However, Geographic Area Priority Trainee Program participants are strongly encouraged to check in with the TNSP. The TNSP is available to answer questions and/or help guide both the Trainee and Evaluator through the process.

1. Incident trainees should check in early with the TNSP either in person or remotely using the QR code on the IAP cover. Within that QR code exists a training portal.
2. The trainee needs to take ownership of their training assignment. Working closely with their evaluator, identify tasks and learning opportunities that can be documented in their PTB.
3. Ensure all the information is complete and correct on the Evaluation Record and, if being recommended for certification, the PTB Verification/Certification form. Incorrect or incomplete information is a very common issue in PTBs and, all too often, delays certification of a trainee as fully qualified. Please review all information to make sure it is complete, accurate, and legible.
4. The evaluator should complete an Incident Personnel Performance Rating (ICS 225 WF) for the trainee, and submit a copy to the TNSP either in person or a picture copy.
5. Once all the documentation is completed, the trainee will need to close out with the TNSP. The trainee can: 1) stop by and close out in person with TNSP; 2) call the TNSP to go through the Exit Interview Form and discuss how the assignment went; or 3) complete the Exit Interview Form through the QR code link.

FIRING OPERATIONS SAFETY

- Conduct thorough briefing for all personnel involved (inside rear cover IRPG).
- All personnel to be fully qualified for their assignments. Trainees must have qualified trainers.
- Utilize Risk Mgmt. Process (IRPG p. 1) for implementing the plan.
- Required PPE to be worn by all personnel involved.
- LCES must be established prior to implementing burning operations (IRPG p. 6).

BEFORE YOU BEGIN ENSURE THAT:

- Lookouts are posted
- Communications have been established and verified between aviation, firing, and holding resources
- Escape routes are established and will not be compromised by firing operations
- Pace of firing does not exceed capabilities of holding resources
- Critical holding points such as bends in roads, saddles, etc. have been identified and holding resources have been made aware of them

Maintain situational awareness throughout the operation. Do not allow mission focus to adversely affect your overall view of the situation (e.g. while suppressing a spot fire you become unaware that there are numerous other spots and your escape route has become compromised). Communicate, communicate, communicate!

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
