Flight Date: 07/16/2021	Interpreter(s) Phone: 503-801-9614	GACC IR Liaison Phone: 541-771-4521	National Coord. Phone: 505-842-3845
Ordered By: Chris Buhrig 541-848-7927	A Number: 44	Aircraft/Scanner System: N350SM / Tk9	Pilots/Techs: Pilot: Husman Pilot: Buss Tech: Gugler
IRIN Comments on imagery: Scan missed far north of perimeter. Registration issues.		Weather at time of flight: Clear	Flight Objective: Perimeter identification and hotspot locations outside perimeter
Date and Time Imagery Received by Interpreter: 07/16/2021 @ 2035 PDT		Type of media for final product: PDF map, zipped shapefiles, log and KMZ files to FTP site and update NIFS feature IR feature classes	
Date and Time Products Delivered to Incident: 07/16/2021 @ 2340 PDT		Digital files sent to: https://ftp.wildfire.gov/public/incident_specific_data/pacific_nw/2021_Incidents_Washington/2021_Dry_Gulch_WASES020655/IR/	
Comments / notes on tonight's mission and this interpretation: Interpretation started with the current IR heat perimeter in NIFS. Perimeter has grown to the south and west, approaching Patcha Creek and Buckley Ridge. Intense heat in these areas with isolated heat sources detected outside of the perimeter. Scan did not cover the far north of the perimeter, Rubenser Ridge. This is identified on the maps. Scan box may need to be adjusted. All products have been posted to the FTP and uploaded into NIFS.
