*Fire fighter safety comes first on every fire, every time*

### **SAFETY THOUGHT**

**“Listen for the Alarm”.**

**Watch for changing conditions, be aware of “watch out” situations, be alert to indicators of fire behavior.**

### **MAJOR HAZARDS AND RISKS**

## **LOOKOUTS COMMUNICATIONS ESCAPE ROUTES SAFETY ZONES**

In the wildland fire environment, four basic safety hazards confront the firefighter - lightning, fire-weakened timber, rolling rocks, and entrapment by running fires. Each firefighter must know the interconnection of LCES - lookouts, communications, escape routes, and safety zones. LCES should be established before fighting the fire: Select lookouts, set up a communication, choose escape routes, and select safety zones.

### **SNAG HAZARDS**

**Falling trees and snags are one of the leading causes of death and injury for wildland firefighters.**

#### **ENVIRONMENTAL/OPERATIONAL CONDITIONS**

- Strong winds
- Night operations
- Swampy wet areas
- Fire Weakened and Dead Trees
- Helicopter bucket drops and rotor down drafts
- Retardant drops
- Vibrations from heavy equipment and motor vehicles operating nearby
- Sandy loose soil

#### **SNAG/GREEN TREE HAZARD ALERT CHECKLIST**

- Snags/green trees are falling or have fallen in work area.
- Leaning or hung-up trees are present in work area.
- Trees with dead or broken tops and limbs overhead are present in work area.
- High risk tree species (rot and shallow root system, i.e., cypress) are present in work areas.
- Crews are working in a hazard tree area at night.
- Crews are working in a hazard tree area and the wind is blowing.
- Crews are working in an area where trees have been burning for some time.
- Crewmembers are taking a break in a hazard tree area (staging area, drop points, camps, etc.).
- Lookouts have not been posted in a hazard tree area.
- Lookouts are not advising the crew of the presence of hazard trees.
- Winds are increasing or are predicted to increase.
- Tree height within fire perimeter equals or exceeds distance to control line.
- Escape routes pass through hazard tree area.

-------------------	--	--------------------------------------	---------------------------------

You hear everyone talk about **LCES** and it is no different in Human Resources. In human resources we too have LCES.

**L** – Look out - for each other sometimes we get our head down and don't pay attention to what is going on around us.

**C** – Communicate - with each other to assure that little issues are resolved while they are small.

**E** – Evaluate - the situation and react appropriately. Over reaction usually means that there is more to the situation than you know.

**S** – Solutions – be proactive in coming up with solutions to the problems as they arise.
