INCIDENT ACTION PLAN SUMMIT TRAIL

WA-COA-200087 PA N5TC (1522)

DAY SHIFT

7/19/2021 0600

to

7/20/2021 0600

INFORMATION 38

385-999-1380

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Data F	m: 7/10/2021	Date Ter	7/20/2021							
Control of the Contro	2. Operational Period:	Date Fro	• • • • • • • • • • • • • • • • • • • •	Date To:	7/20/2021							
Summit Trail		Time Fro	om: 0600	Time To:	0600							
3. Objective(s):												
Management Objectives												
 Provide for the safety of incident responders and implementation of tactics that have a high proba 				ent and the								
 Identify and provide appropriate protection to the infrastructure. 	reatened improvemen	ts including dw	ellings, businesses, ut	ility and rec	reation							
- Implement strategies and tactics that minimize b	urned area to limit neg	gative impacts t	o commercial timber l	ands.								
- Provide prompt communication of incident information to tribal leadership, communities and stakeholders.												
- Utilize assigned resource advisors to aid in development of the courses	opment of incident act	ivities to minim	ize adverse effects to o	cultural and	natural							
Control Objectives												
- Keep the fire:												
- North of Bridge Creek Highway												
- East of BIA Road 73												
- South of Sitdown Creek												
- West of Twin Lakes												
General Situational Awareness:												
Steep and rugged terrain, critically dry and recep	tive fuel beds, active a	rea for fire histo	ory and drought stress	ed trees.								
- Enhanced hygiene (especially handwashing), PPE

Fire Weather Forecast

FORECAST NO: 3 INCIDENT: Summit Trail Fire PREDICTION FOR: Monday UNIT: Colville Reservation

Shift Date: July 19, 2021 0600-1800 **SIGNED:** Bob Tobin

TIME AND DATE Incident Meteorologist (IMET)

FORECAST ISSUED: 7/18/2021 at 2000

<u>Weather Discussion:</u> The pattern for the coming week will be the struggle between a deep low pressure system in the eastern Pacific and a strong high pressure system moving up from the 4 corners area. This will bring a warming and drying trend to the region through the week. There will also be chances for thunderstorms mainly southeast of the burn area both Monday night and Tuesday night. This convection will remain east and south of the Summit Trail fire area. Temperatures will cool off later in the week, but high will remain above normal.

WEATHER FORECAST:

Today:

SKY/WEATHER: Partly cloudy and warmer.

High Temperature...85-90. **Min RH.....**15-20%

20-FOOT WINDS: Southwest 10 to 12 mph with gusts around 20 mph.

CWR (>=0.10").... 0% LAL....1 Haines Index...4 (Low) Mixing Height...8900 ft AGL

Tonight:

Weather: Partly cloudy and warmer.

Low Temperature...65-70. Max RH......35-40%

20-FOOT WINDS: : Southwest 5-9 mph...becoming drainage 5-7 mph after 2300

CWR (>=0.10")....0% LAL...1.

Tuesday:

SKY/WEATHER: Partly cloudy.

High Temperature...84-89. **Min RH.....**14-18%

20-FOOT WINDS: South-southwest winds 10-15 mph with gusts to 20 mph.

CWR (>=0.10")....0% LAL....1 Haines Index...4 (Low) Mixing Height...9200 ft AGL

Extended Outlook

Wednesday...Sunny. Low: 60-65...High: 78-82. Min RH: 13-18% Winds: Southwest 10-15 mph with gusts 20-25 mph.

Thursday...Sunny. Low: 55-60...High: 75-80. Min RH: 12-17% Winds: southwest 10-12 mph with gusts to 20 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2	TYPE OF FIRE: Wildland
FIRE NAME: Summit Trail	OPERATIONAL PERIOD: July 19, 2021 Day Shift
DATE ISSUED: July 18, 2021	TIME ISSUED: 2100 Hours
UNIT: WA-COA	Don Stand, NW IMT 12 Fire Behavior Analyst

INPUTS

WEATHER SUMMARY: See attached Fire Weather Forecast.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuel moistures will be trending lower over the next week as temps increase and humidity decreases. Nighttime humidity recovery will be poor. This will affect live and dead fuel availability to burn. Fuels are mixed conifer with grass and brush understory, timber litter, regeneration stands with shrub layer, logging slash, blow down.

Expect very active fire with periods of extreme fire behavior today. Potential for a repeat of yesterday's fire behavior is very likely with the changing fuel conditions. Expect head fire spread with single and group torching and transitioning to crowning runs with the afternoon winds.

Probability of Ignition will approach 90% unshaded. Maximum spotting distance near 0.4 miles with most spotting being short range. Additionally, expect the fire to continue to back and flank down slope on the west and east flanks. On steeper slopes some fire spread will be from roll outs.

SPECIFIC:

North and East Flanks: Expect very active fire with periodic crown fire with spotting. Continued fire spread north to and over Oregon City Ridge and also spread easterly along the top of the ridge. Expect fire to continue to back down slope to the north. Roll outs on the steeper slopes will continue. Keep an eye out for any hold over spots from previous fire activity.

East Flank: Fire spread will continue easterly down slope in the Beaver Dam Creek drainage. Potential exists for upslope runs towards Oregon City Ridge. Heavy surface fuels are in this drainage.

Heel, far west fire edge: Fire will spread westerly/down slope toward Bridge Creek. Areas of heavy mistletoe brooming in Douglas fir will contribute to torching and spotting across bottom of drainage. Slope reversal likely followed by upslope run to the top of the ridge westerly of Bridge Creek. Pay attention to roll outs establishing fire lower in the drainage that may lead to single and group torching. Continue to watch for spots down wind.

Northwest flank: fire will continue back and flank to the west with potential for short upslope torching and crowning runs. Again, spotting will be problematic.

AIR OPERATIONS: Watch for turbulence in the complex terrain. Smoke may impact visibility.

SAFETY

Weather trend is warmer and dryer with poor nighttime humidity recovery. Live and dead fuel moistures will continue to drop contributing to more aggressive fire behavior.

Watch for increased fire activity with wind slope alignment.

Expect snags and damaged trees to burn through and be falling hazards.

14.WEATHER IS GETTING HOTTER AND

SAFETY MESSAGE

Ask yourself "What Can Go Wrong"

- Identify the critical elements of your plan, and ask "what if" a loss of one of these elements occurs
- Develop a plan to deal with the problem before it occurs
- Communicate the plan to all of your personnel
- Validate the new plan to ensure it matches the current situation

MAJOR HAZARDS AND RISKS

STEEP TERRAIN	HAZARD TREES	HEAVY EQUIPMENT
FATIGUE	DEHYDRATION	DRY FUELS
SPOT FIRES	BUCKET DROPS	COMMUNICATIONS

Be sure all elements of your safety plan are in place prior to engagement

Planning for Safety

Have multiple plans and make them know

P – Primary Plan (Offense)

Focused on firefighter safety and mission objectives

A – Alternate Plan (Offense)

A fall back plan that closely supports the primary

C- Contingency Plan (Defense)

Entirely focused on firefighter safety

E – Emergency Plan (Defense)

Entirely focused on individual firefighter survival

Hazard Tree Safety

Inspect area for hazard trees before starting work. Are there trees that have been falling, leaning, hung up, or have broken tops? Are there high risk species? How long has the fire been burning in the area?

Identify hazards and fell or avoid the hazard and flag.

Take down hazard trees only with qualified sawyers and then only if necessary.

Team 10 Safety Officers Frank Pingiczer, Jason Danen SOF2(T)

Fire and COVID-19 Briefing Checklist

Fully vaccinated people:

Do not need to wear a mask or physically distance in federal buildings or on Federal lands, except where called for by Federal, State, local, tribal, or territorial laws, rules, and regulations

Masks are required on all federally managed incidents for individuals that are not fully vaccinated. Mask wearing requirements on incidents or in federal facilities should be consistent with CDC guidance.

Self-Awareness / Screening

- □ Immediately separate yourself from others.
- □ Notify supervisor if you or others experience:
 - o Cough, more than expected
 - o Shortness of breath or difficulty breathing
 - o New loss of taste or smell
 - o Fever o Chills
 - o Sore throat o Muscle pain
- □ Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

SUPERVISOR CALL MEDL @ 530-400-0880 IF IN CAMP, OTHERWISE CALL VIA RADIO FOR FUTHER INSTRUCTIONS

Summit Trail Fire-Incident Training Program

A TNSP is available on this incident to assist with your training assignment needs and documentation.

To receive documented incident credit for your assignment, scan the QR Code or click on the link below to access and complete the Trainee Registration Form. Once registered you will receive additional instructions via text.

Registering your training assignment as early as possible on the incident is to your benefit!

For training related questions, call: Brad Smith (TNSP) at 209-770-4809 or email bradley_smith@firenet.gov
