FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 11	TYPE OF FIRE: Wildland
FIRE NAME: Summit Trail	OPERATIONAL PERIOD: July 28-29, 2021 0600-0600
DATE ISSUED: July 27, 2021	TIME ISSUED: 2100 Hours
UNIT: WA-COA	Lauren Blake/ FBAN(t)

INPUTS

WEATHER SUMMARY: Temperatures will remain above normal, relative humidity's will be dry and humidity recoveries will remain fair to poor.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Warm temperatures and low humidity's continue to support moderate to high fire activity especially where exposed to gusty winds. Increase in cloud cover forecasted in the afternoon is not expected to moderate fire behavior significantly.
- Expect single and group torching with upslope runs and spotting in the afternoon. Backing and flanking with roll outs will continue on steeper slopes. Probability of ignition will be up to 88%. Spotting up to .3 mile.
- Fuel moistures continue to be low. Nighttime humidity recovery will be moderate to poor. This will affect live and dead fuel availability to burn. ERC's remain near the 97th percentile at Gold Mountain RAWS. Fuels are mixed conifer with grass and brush understory, timber litter, regeneration stands with shrub layer, logging slash, blow down and older pre-commercial thinning slash.

SPECIFIC:

DIV B/X: Good progress mopping up heat near the fireline and no perimeter growth expected. Interior pockets of fuels that burn out will have spotting potential and could threaten line depending on wind speed and direction.

DIV F: Fire will continue to be active in the Sitdown Creek drainage today progressing north/northeast toward South Thirteenmile Mtn and Grizzly Mountain. Lower elevation diurnal winds may follow terrain and flow in multiple directions in Sitdown and Lynx Creek drainages which will influence the direction of fire spread.

DIV J: Fire in the bottom of Lynx drainage will continue to roll out and spot as it works its way to the bottom of the drainage. Where the fire crosses the drainage bottom, expect slope/wind aligned runs.

Div M: While this division is working a good distance from the current fire's edge, monitor fire activity and smoke columns. Spotting distance could be up to .3 miles.

DIV S: On steeper slopes, watch for roll outs carrying the burning material down slope below your location. Higher, more exposed portion of the Oregon City Ridge will continue flanking to the east where lower deep drainages that retain moisture longer will spread a bit slower.

DIV V: On steeper slopes, watch for roll outs carrying the burning material down slope below your location. Fire will slowly progress down into Beaver Dam Creek by means of roll out and small group torching where winds and terrain align.

Nightshift: Poor humidity recovery will keep fire active until around midnight.

AIR OPERATIONS: Smoke will impact visibility until approx. 1400.

SAFETY MESSAGE

Planning for Medical Emergencies

- Prior to each operational period be able to answer these 3 questions;
 1. **What are you going to do if someone gets hurt?**
 - Where is your closest medical personnel and ambulance?

 - Can you get the injured to a road or helispot, what will it take to do that?
 3. **How long will it take to get them to a hospital?**
 - Where is the closest hospital, air or ground transport, what conditions can change or affect the transportation timeline?

Incident Training Program

It's time to plan for transition. Trainees "timing out" on or around 7-30 will need to close out their training documentation with the TNSP prior to DEMOB.

Below are instructions for, *virtually*, completing your Training Documentation

1. The Trainer completes an electronic **Individual Performance Evaluation (ICS 225)**. An electronic Performance Evaluation will be emailed to the Trainer. Once signed, it will automatically Forward to the trainee's email for review and signature.
2. The Trainee will complete a **Final Interview Form**. A link to an electronic form will be provided by text or email msg.
3. The evaluator should have all work completed in the position task book at the time of the training assignment close-out including a recommendation in the **Evaluation Record** as to the outcome of the assignment, i.e., recommend certification, needs more assignments. An electronic **Evaluation Record** will be included with the **Performance Evaluation** emailed to the trainer.
4. That completes the process.

For training related questions, call: Brad Smith (TNSP) at 209-770-4809 or email bradley_smith@firenet.gov
