## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 12	<b>TYPE OF FIRE:</b> Wildland
<b>FIRE NAME:</b> Summit Trail	<b>OPERATIONAL PERIOD:</b> July 29-30, 2021 0600-0600
<b>DATE ISSUED:</b> July 28, 2021	<b>TIME ISSUED:</b> 2100 Hours
<b>UNIT:</b> WA-COA	Lauren Blake/ FBAN(t)

### INPUTS

**WEATHER SUMMARY:** See Fire Weather forecast in IAP.

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

- Warm temperatures and low humidity's continue to support moderate to high fire activity especially where exposed to gusty winds. Increase in cloud cover forecasted in the afternoon is not expected to moderate fire behavior significantly.
- Expect single and group torching with upslope runs and spotting in the afternoon. Backing and flanking with roll outs will continue on steeper slopes. Probability of ignition will be up to 100%. Spotting up to .3 mile.
- Fuel moistures continue to be low. Nighttime humidity recovery will be moderate to poor. This will affect live and dead fuel availability to burn. ERC's remain near the 97<sup>th</sup> percentile at Gold Mountain RAWs. Fuels are mixed conifer with grass and brush understory, timber litter, regeneration stands with shrub layer, logging slash, blow down and older pre-commercial thinning slash.

##### SPECIFIC:

**DIV B/X:** Good progress mopping up heat near the fireline and no perimeter growth expected. Interior pockets of fuels that burn out will have spotting potential and could threaten line depending on wind speed and direction.

**DIV F:** Fire will continue to be active in the Sitdown Creek drainage today progressing north/northeast toward South Thirteenmile Mtn and Grizzly Mountain. Lower elevation diurnal winds may follow terrain and flow in multiple directions in Sitdown and Lynx Creek drainages which will influence the direction of fire spread.

**DIV J:** Increased fire activity in the bottom of Lynx drainage as it works its way to the bottom of the drainage. Where the fire crosses the drainage bottom, expect slope/wind aligned runs. Intensity's will vary as the fires move through timber cut units.

**DIV M:** While this division is working a good distance from the current fire's edge, monitor fire activity and smoke columns. Spotting distance could be up to .3 miles.

**DIV S:** On steeper slopes, watch for roll outs carrying the burning material down slope below your location. Higher, more exposed portion of the Oregon City Ridge will continue flanking to the east where lower deep drainages that retain moisture longer will spread a bit slower.

**DIV V:** On steeper slopes, watch for roll outs carrying the burning material down slope below your location. Fire will slowly progress down into Beaver Dam Creek by means of roll out and small group torching where winds and terrain align.

**Nightshift:** Poor humidity recovery will keep fire active until around midnight.

**AIR OPERATIONS:** Smoke will impact visibility until approx. 1400.

### SAFETY

At all times maintain your situational awareness so you can provide for your safety & safety of your coworkers.

**Summit Trail/Chuweah Creek Fire**  
Operation Period: 07/29-30/2021 Day /Night Shift

**SAFETY MESSAGE**

**Stay focused on the safety aspects of your assignment**

- Ensure LCES is in place prior to engagement.
- Establish decision points when conditions can deteriorate.
- Take weather observations.
- Monitor the fire environment for changes in the fuel, topographic and weather elements. Forecast the fire behavior.
- Evaluate the work area for hazards, communicate hazards, mitigate or avoid the hazards.

**MAJOR HAZARDS AND RISKS**

EXCESSIVE HEAT FATIGUE DRIVING	ROLLING MATERIAL DEHYDRATION BUCKET DROPS	HEAVY EQUIPMENT HAZARD TREES COMMUNICATIONS
--------------------------------------	---	---

***Be sure all elements of your safety plan are in place prior to engagement***

**Driving & Fatigue**

Make sure you are getting your rest when you can !  
Stick to work/rest guidelines.

Fatigue can cause us to mentally stray from the driving task.

It only takes a second of distraction to lose control of our vehicle. The faster you are traveling, the faster you get in trouble.

Make sure you recognize when you are too tired to drive !

Don't tough it out and put yourself and your passengers at risk !

**Risk Management**

- Keep risks commensurate with the benefit.
- Utilize the Risk Management Process found on page 1 of the IRPG.
- Recognize that no injury is worth the ground you are working.
- Everyone is entitled to a round trip ticket. Bring them home healthy.

**Safety Officers Frank Pingczer, Jason Danen SOF2(T)**

## ***Incident Training Program***

**It's time to plan for transition. Trainees "timing out" on or around 7-30 will need to close out their training documentation with the TNSP prior to DEMOB.**

**Below are instructions for, *virtually*, completing your Training Documentation**

1. The Trainer completes an electronic **Individual Performance Evaluation (ICS 225)**. An electronic Performance Evaluation will be emailed to the Trainer. Once signed, it will automatically Forward to the trainee's email for review and signature.
2. The Trainee will complete a **Final Interview Form**. A link to an electronic form will be provided by text or email msg.
3. The evaluator should have all work completed in the position task book at the time of the training assignment close-out including a recommendation in the **Evaluation Record** as to the outcome of the assignment, i.e., recommend certification, needs more assignments. An electronic **Evaluation Record** will be included with the **Performance Evaluation** emailed to the trainer.
4. That completes the process.

**For training related questions, call: Brad Smith (TNSP) at 209-770-4809 or email [bradley\\_smith@firenet.gov](mailto:bradley_smith@firenet.gov)**
