

INCIDENT OBJECTIVES	1. Incident Name Summit Trail /Bulldog Mtn. / Mack Mtn.	2. Date Prepared 08/25/21	3. Time 1900		
4. Operational Period Day Operations: 0700 – 2100 August 26, 2021					
<p>Strategic Framework: Implement a full suppression strategy on all incidents identified on the delegation of authority. This strategy will include utilizing both direct and indirect containment features as topography and access allow. This selected course of action will likely extend fire duration until naturally extinguished or fire activity necessitates subsequent operational engagement to keep fire within identified containment line locations.</p> <p>Management Objectives:</p> <ul style="list-style-type: none"> • Provide for firefighter and public safety by utilizing the risk management process to maintain safe and effective operational decisions, this includes full suppression strategies utilizing the full complement of tactics to achieve the control objectives. • To the best extent possible minimize size and duration to limit negative impacts to identified values that provides for highest probability of success and in close coordination with agency administrators, agency resource advisors and local fire management. • Maintain the existing positive relationships between NW Team 7, the Colville Agency, Colville National Forest, Washington Department of Natural Resources, cooperators and public by fostering trust and ensuring information is provided in timely manner. • Provide for infectious disease control through thoughtful mitigations when appropriate for the safety of the firefighters and the public we serve. • Provide Initial Attack response and assistance as requested by the agencies . <p>Operational Period Command Emphasis: LIFE is the most important value to be protected. Place the highest emphasis on protecting our responders/firefighters and our public by using sound risk mitigation and management.</p> <p>Control Objectives Summit Trail:</p> <ol style="list-style-type: none"> 1) Keep fire north of Bridge Creek Road to minimize impacts to structures and recreational facilities at Twin Lakes 2) Keep fire east of BIA Road 73 to reduce loss of commercial timber and cultural values. 3) Keep fire south of Seventeen Mile Mountain, White Mountain and Barnaby Creek. 4) Keep fire west of Ant Mountain and Rainy Ridge. <p>Control Objectives Bulldog Mountain & Mack Mountain:</p> <ol style="list-style-type: none"> 1) Keep Bulldog fire north of Deadman Creek community and other private and state land 2) Keep fires west of Hwy 395 from further impacting communities, major transportation corridor and commercial timber sales 3) Keep fires south of identified active timber sales 4) Keep Bulldog fire east of Bulldog Cabin and Stickpin fire footprint (2015) and the Mack Mountain fire east of Forest Service Rd 2030 to limit fire size and duration and impacts to recreation infrastructure.

Summit Trail, Bulldog Mountain, and Mack Mountain Fire Weather Forecast

FORECAST NO: 41
PREDICTION FOR: Operational Period
SHIFT DATE: 8/26/2021 – Day Shift
FORECAST ISSUED: 2000 8/25/2021

NAME OF FIRE: Summit Trail, Bulldog (Div B), and Mack (Div M)
UNIT: Colville Agency
SIGNED: *Mary P. Wister*, Incident Meteorologist
 mary.wister@noaa.gov 541-377-9905

WEATHER DISCUSSION: Seasonably warm temperatures and low humidity will continue again today with a light south-southwest wind. A fast moving cold front tonight will bring showers and isolated thunderstorms near the Canadian border, and Bulldog Mountain and Mack Mountain will have the best chance of observing showers. Any storms that develop should be weak but may bring outflow winds around 20 mph. Friday will be cooler with higher humidity, but warm and dry conditions will return this weekend.

WEATHER FORECAST for Today:

Forecast Element	Summit Trail	Div B and Div M
Weather/Sky	Increasing clouds. Smoke and haze aloft.	Increasing clouds. Smoke and haze aloft.
High Temperature (°F)	75-80°	68-73°
Minimum Humidity (%)	20-24%	27-32%
20 ft winds ridgetop (mph)	SW 5-10 mph.	SW 5-10 mph.
20 ft winds Slope/Valley (mph)	South aspect: S-SW 4-8 mph Others: Upslope/upvalley less than 4	South aspect: S-SW 3-7 mph Others: Upslope/upvalley less than 4
Inversion / Stability	Stable with mid-level inversion	Stable with mid-level inversion.
CWR (≥ 0.10")	0	0
LAL	1	1
Haines Index	3 (Very Low)	3 (Very low)

WEATHER FORECAST for Tonight:

Forecast Element	Summit Trail	Div B and Div M
Weather/Sky	Mostly cloudy. Chance of showers and a slight chance of thunderstorms.	Mostly cloudy. Scattered showers and isolated thunderstorms.
Low Temperature (°F)	48-53°	52-57°
Maximum Humidity (%)	65-70%	65-70%
20 ft winds ridgetop (mph)	SW 4-8 mph becoming NW 4-8 mph gusting to 12 mph	SW 4-8 mph becoming NW 4-8 mph gusting to 12 mph
20 ft winds Slope/Valley (mph)	Downslope/downvalley 2-5 mph	Downslope/downvalley 2-5 mph.
Gusty and erratic winds possible with thunderstorms. Outflows around 20 mph possible.		
CWR (≥ 0.10")	10	20
LAL	1..possibly 2	2
Rainfall amounts possible	less than 0.10 inch	0.05 to 0.15 inch

OUTLOOK FOR FRIDAY:

Forecast Element	Summit Trail	Div B and Div M
Weather/Sky	Becoming partly cloudy. A slight chance of showers or thunderstorms in the morning.	Mostly cloudy. A chance of showers or thunderstorms, mainly in the morning.
High Temperature (°F)	69-73°	62-67°
Minimum Humidity (%)	42-47%	47-52%
20 ft winds ridgetop (mph)	WNW 5-10 mph.	WNW 5-10 mph.
20 ft winds Slope/Valley (mph)	W-E drainages: West 4-8 mph. Upslope/upvalley 3-8 mph elsewhere.	West facing slopes: WNW 5-10 mph. Upslope/upvalley 3-8 mph elsewhere.
Inversion / Stability	Marginally unstable	Marginally unstable.
CWR (≥ 0.10")	10	10
LAL	1...possibly 2.	1...possibly 2.
Haines Index	3 (very low)	3 (very low)

Observations are always appreciated! mary.wister@noaa.gov or 541-377-9905

Fire Behavior Forecast # 39

Name of Incident: Summit Trail, Bulldog Mountain and Mack Mountain	Administrative Unit: WA-COA (Summit Tr.) and WA-COF (Div. B, M)
Date & Time Issued: August 25, 2021 @ 2000	Operational Period: DAY August 26, 2021
FBAN: Steve Ziel	Signed: /z/

Assumptions: *Lingering effects of precipitation continue to diminish, and now provide opportunity for fire spread during the operational period. Exposed surface fuels on southerly aspects and steep slopes are dry enough to support limited fire spread where heat and available fuels are present. Sheltered fuels remain damp, but are responding to drying. Any fire spread is likely to be moderate due to fuel moisture and moist soil conditions. Peak burning period conditions between 1400-1800 may provide limited opportunity for surface fire spread on slopes with a breeze. Fire behavior activity will be limited today due to scattered heat sources, and lingering residual moisture that acts as a "heatsink". Fair-to-good night time humidity will re-enforce slow drying.*

Weather Summary

See attached Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area are primarily composed of *Grass and shrubs, Timber Litter, and Timber with Understory*. Primary tree species include mixed sizes of Douglas Fir, Ponderosa Pine, True Fir and cedar. Brush and understory species include Ocean Spray, shrub-form Maple, and dog-hair conifer thickets. Snags and heavy fuel concentrations are common throughout all areas. *Live fuels are drought stressed, most grasses are fully cured. Fuel type changes occur by management activity, elevation, and aspect. Low crown base height (ladder fuels) and black shaggy moss are present in most of the timbered areas. Timber harvest blocks may contain shrub covered slash.* Deep duff is common especially in dense timber stands on lower slopes and riparian areas.

Today's potential fire behavior may include scattered pockets of spreading surface fire. Fire behavior characteristics are likely to include continued "skunking around", "smoldering with creeping", isolated torching, backing and flanking. Rolling material and falling snags in fuel rich areas may produce flare ups. Heavy fuel concentrations, log ends, and stump holes will continue to consume (and produce smoke) due to dryness.

* **Fine fuel moisture= 7-9% (exposed), 1000hr. moisture=15%, Woody fuels 135%, Probability of Ignition-30-50%(unshaded)**

Fuel Type	Rate of Spread	Flame Length	Spotting Distance	
...If your work area includes:	(CH/HR = FPM)		Group Torching	
Grass with mixed shrub (GS2)	6 - 8 ch/hr.	2 - 3 feet	.2	
Timber with Understory (TU5)	4 - 6 ch/hr.	5 - 7 feet	.2	
Timber Understory (TU1)	<1 ch/hr.	<1 feet	0	
Timber Litter (TL6)	3 - 5 ch/hr.	1 - 2 feet	0	

Specific Assignments:

- Div. B** – Scattered areas of smoldering surface fuels (duff), and self-isolating ground fire (buried roots, stumps). Monitor heat sources upslope of DP-50, DP-40.
- Div.M** – Monitor scattered pockets of smoldering and creeping. Ground fire (buried roots, stump holes) will linger and produce smoke.
- Div. F** - Monitor backing and flanking along W. Fk. of Hall creek. Isolated torching may be expected with wind.
- Div. H** – Monitor for flare-ups with isolated torching on upper slopes of Stall Cr. Afternoon winds may produce areas of surface spread
- Div. J** – Monitor flare-ups along unburned edges and islands. Expect creeping and backing with isolated torching in the afternoon.
- Div. U** - Expect continued creeping, backing and flare-ups in the afternoon. Monitor variable winds in Lynx and Bitterfoot Mtn. area.

Air Operations: Clear sky, broken high clouds – VFR within the TFR and beyond.

Safety

Isolated flare-up are possible in areas that have not shown activity for a couple days. Snags may fall into fresh fuel. Winds may kindle smoldering fuels to flame.....(review Common Denominators of Fire Behavior on Tragedy Fires (Page 4 – IRPG).

Transition day.....short period to get up to speed. Review the Fire Orders and Watchout situations as they relate to the assignment.....anticipate fire behavior and weather hazards, plan your actions in advance. Share and discuss the Fire Weather Forecast and Fire Behavior Forecast. LCES should be reviewed more frequently.....pull out the belt weather kit, post lookouts.....

*Today's Fire Behavior Forecast contains 675 words written for your situational awareness and discussion with your folks.

SAFETY MESSAGE

**Bulldog Mountain, Mack Mountain
Summit Trail Fires
08/26/2021**

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. There is a high potential for fatalities, serious injuries, or incidents during transfer of command. Be proactive in mitigating the risks.

Factors for increased risks to fireline personnel during transition periods include:

- Resources are unfamiliar with work areas including existing hazards.
 - No or poor briefing of incoming personnel.
 - Unfamiliar with transportation routes.
 - Communications: face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing.
 - Fireline leadership may not be aware of the number, type, and location of all resources.
 - Location of safety zones and escape routes may not be known and communicated to all resources.
 - Not all resources know their chain of command.
-

Mitigation actions to take:

- Take the time to transfer all pertinent information to the resources that need it.
 - Ask questions to ensure assignments are clear.
 - Maintain existing communications with your own and adjacent resources, as well as your original supervisor, while you are developing communications with incoming adjacent resources and your new supervisor.
 - Make gathering of situation awareness a priority.
 - Ensure common terminology is used. (landmarks, roads, etc.)
-

August 3, 2021

To: Incident Commanders on Pacific Northwest (PNW) IMTs, IMTs working in the Geographic Area, and all PNW Agency Administrators
From: Chuck Turley, PNW MAC Acting Chair on behalf of all PNW MAC Agency Executives
Subject: COVID Mitigation Expectations and Requirements

The frequency of COVID exposure and cases is increasing on our PNW wildfire incidents and within support functions. PNW MAC has reviewed the multiple guidance documents provided by CDC, Wildland Fire Medical and Public Health Advisory Team (MPHAT), and federal, state, and local entities. Beginning immediately our expectation and direction is that all PNW incidents and their support functions will implement and enforce the following:

- o for all resources assigned to an incident within the PNW, and for our NW IMTs assigned outside the PNW, wear a mask at all times whether inside or outside. Exceptions include working alone, working on the fire line, having a medical exemption, and/or pilots and flight crew during all phases of flights for the following missions: airtanker, smokejumper, ATGS, ASM, point-to-point, HELCO, short-haul, rappel, and aerial ignition,
- o highly encourage limiting access to all fire related facilities, and
- o highly encourage maximum use of virtual meetings to the extent possible.

The PNW MAC and partner agencies are not authorizing the "Module as One" concept nor any process that would lessen the expectations and requirements set forth in this letter.

This direction applies to all levels of incident operations and all aspects of an incident including but not limited to transportation to/from incidents, ICPs, spike camps, helibases, tanker bases, ground support units, dispatch centers, smokejumper bases, caches, etc.

Thank you for your vigilance of COVID protections.

Respectfully,

 Chuck Turley
 PNW MAC Acting-Chair

LINE ORDER PROCESS

All line orders will go through the Comm. Unit.
Preferred method is over the radio.

The alternate will be to call COML. At (541) 423-2631

**Bulldog Mountain (WA-COF-2348)
 Mack Mountain (WA-COF-2338)
 Demobilization Procedure**

1. Resources identified for demobilization should obtain Checkout Form (ICS-221) from Demobilization Unit Leader (DMOB) at the 0700 operational briefing. The ICS-221 may also be obtained by emailing DMOB at: 2021.bulldogmountain.demob@firenet.gov.
2. Resources will obtain checkout signatures from Supply, Communications, Ground Support and Finance at the Forward Operating Base at Kettle Falls.
3. Completed Demobilization Checkout Forms will be submitted to DMOB at Kettle Falls Forward Operating Base. DMOB will confirm time of departure and estimated time of arrival at home unit.

**Bulldog Mountain and Mack Mountain Fires

TEAM PERFORMANCE CRITIQUE FORM

TO: CREW BOSSES AND OTHER FIRE OVERHEAD

Our Incident Management Team is interested in doing the best job that we can. This is your opportunity to critique us! Give us your thoughts on how we are doing, or what we can improve on. Please take a few minutes to complete this form and drop it off in de-mob/check-in before you leave. All comments are anonymous unless you let us know who you are. We will use the information to improve our management team in the future. Thanks for your input!

-Incident Commander

INCIDENT NAME: _____ **DATE:** _____

1. How would you rate the treatment you and /or your crew received on this incident?

Excellent Good Fair Poor

Comments?

2. How well did the following items meet your needs?

Breakfast	Excellent	Good	Fair	Poor
Lunch	Excellent	Good	Fair	Poor
Dinner	Excellent	Good	Fair	Poor
Sleeping Area	Excellent	Good	Fair	Poor
Medical	Excellent	Good	Fair	Poor
Showers	Excellent	Good	Fair	Poor
Sanitation	Excellent	Good	Fair	Poor
Supply	Excellent	Good	Fair	Poor
Transportation (Ground Support)	Excellent	Good	Fair	Poor
Finance	Excellent	Good	Fair	Poor
Operational Briefing	Excellent	Good	Fair	Poor
Communications	Excellent	Good	Fair	Poor

Comments?

3. How well were the operational tactics explained to you (Leader's Intent)?

Excellent Good Fair Poor

Comments?

4. How would you rate the knowledge level and performance of your line overhead?

Excellent Good Fair Poor

Comments? (Please give names of exceptional or unsatisfactory people.)

5. How would you rate the team's risk management and attitude toward your safety?

Excellent Good Fair Poor

Comments?

6. Did anything really frustrate you about how this incident was managed? If so, what could this team do to concentrate on improving performance?

No Yes (please give suggestions)

Comments?

7. How clear and accurate were the IAPs and maps?

1 2 3 4 5 6 7 8 9 10

Comments?

8. On a scale of 1 to 10, with 10 being the best, how would you rate the Overall performance this team did on the incident?

1 2 3 4 5 6 7 8 9 10

Comments?

Thank You for Your Time.....

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request	<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>				
Patient Location	<i>Descriptive Location & Lat. / Long. (WGS84)</i>				
Incident Name	<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>				
On-Scene Incident Commander	<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>				
Patient Care	<i>Name of Care Provider (Ex: EMT Smith)</i>				
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG page 106					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
