
INCIDENT ACTION PLAN

WALKER CREEK FIRE

Wednesday, September 8, 2021
0600-1800 Operational Period

WA-NES-002245

221-KPI

PNN7RL (1522)

Incident Objectives	1. Incident Name Walker Creek	2. Date Prepared 9/7/2021	3. Time Prepared 2200
4. Operational Period (Date and Time) 9/8/2021 0600-1800			
5. General Control Objectives for the Incident (include Alternatives)			
<ul style="list-style-type: none"> • Provide for firefighter and public safety at all times. This includes the application of the "10 and 18", LCES, and the Risk Management Process. • Fight fire aggressively to limit acreage burned. Keep the fire east of Redman Creek, west of Mineral Creek, south of Stimson Private Ground, and north of FS 1936. • Maximize opportunity for cost saving without jeopardizing public or firefighter safety. • Maintain awareness of avoidance areas and implement tactics accordingly. • Act professionally and in a manner that fosters good relationships with the public, private landowners, timber industry representatives, elected officials and other stakeholders. • Follow agency policies at all times and respect the policies of the host agency. 			
6. Weather Forecast for Operational Period			
See attached weather forecast.			
7. General Safety Message			
<ul style="list-style-type: none"> • Provide for firefighter and public safety at all times. • Monitor compliance of 10 and 18 by all incident personnel. • Adhere to 2:1 work/rest ratio for all fire line personnel. • Aviation safety is high priority. Assess the risk against the benefit of the mission. • Ensure all assigned personnel understand emergency medical reporting & transport procedures including locations of nearest emergency responders & facilities.

Walker Creek Fire Weather - 3 DAY OUTLOOK

FORECAST NO: 32
PREDICTION FOR: Wednesday-Friday
SHIFT DATE: Sept 08 – Sept 10, 2021
FORCAST ISSUED: 1200 MDT - 09/07/2021

NAME OF FIRE: Walker Creek
UNIT: WA-DNR NE Region
SIGNED: *Thomas A. Bird*
Incident Meteorologist

WEATHER DISCUSSION: ***forecast numbers below are for elevation of 4500 ft msl***

Elevated fire weather conditions are expected today and again on Thursday. Two low pressure systems will pass across the fire to keep winds breezy, and possibly somewhat windy at times over the exposed terrain. It is possible that some light rain moved over the fires overnight and early this morning, but any amounts would be insignificant. Today will be slightly cooler and not quite as dry. However temperatures will still be slightly above normal, and minimum relative humidity will likely drop into the 20% range. Winds will be breezy from the southwest today, and more westerly on Thursday, in the 15 to 25 mph range. Through the rest of the week, temperatures are expected to trend downward, with moderate gains in relative humidity. Winds will generally be lighter with only occasion moderately breezy conditions.

NOTE: This outlook is not to be used for tactical decisions. It is for planning purposes only. Please request SPOT weather forecasts from the Spokane National Weather Service office.
 Direct line to fire weather desk (509) 244-5031

WEDNESDAY: ***ELEVATED FIRE WEATHER CONDITIONS - Breezy***

SKYWEATHER: Early clouds/exiting rain showers. Becoming mostly sunny. Warm & Dry. Breezy SW winds.

AM - Min Temps: 50-60°	Max RH: 40-50%	Winds: Variable, favoring southwest 5 to 10 mph.
PM - Max Temps: 73-78°	Min RH: 27-32%	Winds: Breezy. SW 10-15 mph w/ gusts 18-22 mph.
Haines Index: 4 (Low).	LAL: 1	PCPN/STORM CHC: 0% CWR: 0%

THURSDAY: ***ELEVATED FIRE WEATHER CONDITIONS - Breezy***

SKYWEATHER: Partly cloudy. Slightly cooler and continued dry. Breezy southwest to west winds.

AM - Min Temps: 45-55°	Max RH: 55-65%	Winds: Variable 3-5 mph; ridges W-NW 5-10 mph.
PM - Max Temps: 68-73°	Min RH: 30-35%	Winds: Breezy. SW-W 10-15 mph w/gusts 20-25 mph.
Haines Index: 3 (Very Low).	LAL: 1	PCPN/STORM CHC: 0% CWR: 0%

FRIDAY: ***MODERATED FIRE WEATHER CONDITIONS***

SKYWEATHER: Mostly sunny. Slightly cooler. Fair, and dry. Lighter winds

AM - Min Temps: 40-45°	Max RH: 60-70%	Winds: Variable 3-5 mph; ridges NW 5-10 mph.
PM - Max Temps: 64-69°	Min RH: 30-35%	Winds: Light upslope. Upper slopes SW 5-10 mph.
Haines Index: 4 (Low).	LAL: 1	PCPN/STORM CHC: 0% CWR: 0%

EXTENDED FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 32	TYPE OF FIRE: Wildland
FIRE NAME: Walker Creek	OPERATIONAL PERIOD: Sept 8-10, 2021 0600-0600
DATE ISSUED: September 7, 2021	TIME ISSUED: 2000
UNIT: WA DNR, BLM, USFS	Don Strand FBAN

INPUTS

WEATHER SUMMARY: See attached fire weather forecast

OUTPUTS

FIRE BEHAVIOR

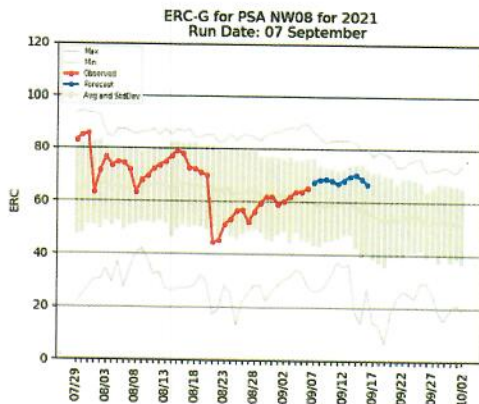

FUELS: The fire area fuels consist of mixed conifer timber litter consisting of Douglas-fir (many with dwarf mistletoe clumps), western larch, lodge pole pine, Engelmann spruce reproduction and overstory with scattered sub-alpine fir. All timber types have ladder fuels with black moss/lichens that make for an easy transition to crown fire. Dead fine fuels, grass (where not heavily grazed), and slash/blowdown can increase surface fire spread. Most live fuels, are available to carry fire and fuel moistures will continue to drop with seasonal drying. Live fuels are still drought stressed.

GENERAL: Fire behavior potential the next few days will be high due to warm temps, moderate humidity and breezy conditions. Fuel moistures over the last few days have been decreasing in the 10-hr and larger dead fuels. These fuels will continue to remain available to carry fire and contribute to higher intensities leading to torching and spotting. Generally, expect scattered smoldering and creeping fire behavior in areas of dirty burns and unburned islands interior to fire edges. Areas of heavy needle cast will also see smoldering and creeping fire behavior. Potential for interior isolated torching remains due to abundant ladder fuels. Some limited areas will have backing and flanking fire behavior with torching. Expect a notable increase in fire behavior potential as the humidity drops to 30% or lower in the afternoon. Unshaded surface fuels will be more available to carry fire.

SPECIFIC: DIV Q:

- Much of the fire edge is interior to control lines, In limited areas, backing, flanking and head fire spread in very heavy surface fuels will continue along with periodic torching and spotting. Over the next couple of days with wind gusts 25 to 30 mph, potential for upslope runs exists, especially where there is wind/slope alignment. Isolated smokes along the fire edge will also heat up.
- Where the fire is backing and flanking in the dense regeneration stands from past timber harvest, spread rates will be slow in the needle litter but where jackpots or isolated heavy fuels exist, fire intensities will increase with periodic single and group torching with short range spotting. This spread will be sporadic.
- Overnight humidity recovery is expected to be in the lower range of moderate so the fire will remain active above the thermal belt, meaning the burning period will be longer. Potential exists for fire edges to reposition in some locations overnight below available fuels, leading to short upslope runs in the afternoon.

DIV A, F, T and H: Interior areas of dirty burns where heat is still present, fire will smolder and creep in duff and needle litter. In the event heatspreads to heavier fuels, flare ups with isolated torching are possible.

Fuel Moistures- Lost Lake RAWS WIMS forecast data for Wed, Thurs, Fri. are:

Day	10-hour	100-hour	1000-hour	ERC
9/8	10%	11%	13%	49
9/9	11%	11%	13%	48
9/10	11%	11%	13%	47

Walker Creek IRAWS near DP 364, yesterday's minimum 10-hr fuel moisture was 6%. Check Wx obs on Spokane NWS website to find RAWs and associated 10-hr moisture.

Probability of Ignition will approach 70 to 80% unshaded and 40 to 50% shaded.

AIR OPERATIONS: Expect some turbulence in areas of complex terrain

SAFETY

Periodically take weather observations and calculate the fine dead fuel moistures and Probability of Ignition to maintain Situational Awareness. Weather observations will also be helpful to submit to NWS for spot weather forecast.

Fire weakened live and dead trees, especially with any wind, are overhead hazards.

Review the 10 Standard Fire Fighting Orders and the 18 Watchout Situations.

Safety Message

Safety Starts with You!

We are ALL accountable for SAFE behaviors and actions

Name: Walker Creek

Date: 9/17/2021

Quote: **Situational Awareness Is Critical During Team Transitions**

There is always a risk – No matter how well you do the job,
But every day is new and different.

Therefore We must always maintain Situational Awareness!

Situational Awareness Check List

- The Mission
- Communications
- Terrain – Alignment of topography
- Weather – Current and expected
- Fire Behavior – Current and expected
- Physical Condition – Yourself and others
- The Public – People, Structures, Traffic and Hazardous material
- Hazards – Snags, Steep Terrain, Rolling Material and Driving
- Availability of Other Resources
- Air Operations

While working on steep slopes watchout for rolling, falling or sliding material that can injure you or start a fire below you.

10 Standard Fire Orders

The Goal:

Fight fire aggressively, having provided for safety first.

We can achieve the by completing the following orders:

Fire Behavior

- Keep informed on fire weather conditions and forecast.
- Know what the fire is doing at all times.
- Base all actions on current and expected behavior of the fire.

Safety

- Identify escape routes and safety zones and make them known.
- Post lookouts when there is possible danger.
- Be alert. Keep calm. Think clearly. Act decisively.

Leadership

- Maintain prompt communications with your forces, your supervisor, and adjoining forces.
- Give clear instruction and be sure they are understood.
- Maintain control of your forces at all times.

Thank you for your hard work and you good safety record.

WALKER CREEK FIRE DEMOB LIST

Wednesday September 8, 2021

DEMOB INSTRUCTIONS

Paperless and electronic demobilization will be used to the extent possible for all resources. **PLEASE LOOK closely at the Fire Name and Resource Number.** All finance documents will be emailed and signed virtually. Ensure all Final CTR's and Shift Tickets **ARE KEPT UP TO DATE** with Finance. Please be **PATIENT** as the phone lines are limited and it takes a little longer for the virtual process. For **FLIGHT** arrangements, call 206-473-1425 at least 48 hours before you demob.

DEMOB STEPS

(Must Be Done In Order)

1. If you have any items checked out by Supply and Communications, proceed to those areas to turn in equipment. If you don't have any items checked out, proceed to NEXT STEP.
2. If you were inspected upon arrival or need a No Claims/No Comp receipt, check out with Ground Support. If this does not apply, proceed to NEXT STEP.
3. Call Finance at 509-423-6011 or 509-433-1115 or 509-531-7418 to finalize paperwork.
4. Call DMOB at 206-473-1425 or 509-432-6143 to complete the process to be released.

EMERGENCY PLAN INCIDENT WITHIN AN INCIDENT

ON SCENE INCIDENT COMMANDER

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment, Extrication and Transport.

- ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED- ***IF DETERMINED TO BE A GREEN, DO NOT DECLARE EMERGENCY TRAFFIC AND ONLY COMPLETE LINE 1-4 ON MIR*.**
- Conduct size-up of the incident nature of accident, number type of resources involved, latitude and longitude location (DD°MMM.MM format): notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency, coordinate with incident communications and air attack for air medical transportation needs.
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
