FIRE BEHAVIOR FORECAST											
FORECAST NUMBER: 21	TYPE OF FIRE: Wildland										
FIRE NAME: Walker Creek & Chickadee Creek	OPERATIONAL PERIOD: Aug 28-29 2021 0600-0600										
DATE ISSUED: Aug 27, 2021	TIME ISSUED: 2000										
UNIT: WA DNR, BLM, USFS	Don Strand FBAN										
INDITS											

WEATHER SUMMARY: See attached fire weather forecast

OUTPUTS

FIRE BEHAVIOR

FUELS: The fires are burning mostly in mixed conifer timber consisting of Douglas-fir, western larch, Engelmann spruce, and lodgepole pine below 6,000'. Sub-alpine fir, white bark pine, and lodgepole pine occur above 6,000'. All timber types have ladder fuels with black moss/lichens that make for an easy transition to crown fire. Dead fine fuels, grass, and slash will increase surface fire spread. Most live fuels, except for red alder, are available to carry fire and fuel moistures will continue to drop with seasonal drying.

GENERAL: Expect continued moderated fire behavior. Expect smoldering and creeping early and in the afternoon as humidity decreases a slight increase in backing and flanking. Continue to watch for hold over spots from previous fire activity. Heavy fuels will burn until consumed or extinguished. Single tree torching may occur where pockets of heat remain under ladder fuels and where close to fire edge can cause spotting. Pitchy/punky wood and fine fuels still will be receptive fuel beds. Any spotting will be short range.

SPECIFIC:

Chickadee: Fire spread has been terrain and fuels driven with spotting and roll outs. Today, pay attention for hold over spots for previous fire activity. Burn out operations may be less effective early in the day but should improve in the afternoon. Fire behavior will be low with smoldering and limited backing and flanking with increasing potential in the afternoon. Areas exposed to afternoon wind gusts will experience moderate intensities at times. Potential for isolated torching exists. Winds will likely be southerly in the Sinlahekin Fuel Moistures- Aeneas LO RAWS from yesterday were- 10-hour 16%, 100-hour 14%, 1000-hour 14%. ERC near 54th percentile or below average for this time of year as compared to the last seven fire seasons.

Probability of Ignition will approach 60% unshaded and 40% shaded.

Walker: Expect moderated fire activity with cooler conditions. Fire will be smoldering and creeping early, with humidity decreasing into the mid 30's later in the afternoon a slight increase in fire behavior potential exists. Continue to watch for surface fire near control lines with forecasted afternoon southwest wind. A slight chance for torching exists. Conditions to burnout will likely be varied depending on humidity and fuel loading. Fuel Moistures- Lost Lake RAWS from yesterday were- 10-hour 21%, 100-hour 14%, 1000-hour 16%. ERC near 31st percentile, well below average for this time of year as compared to the last seven fire seasons. Note: Areas that received less precip than the RAWs NW of fire may have slightly lower fuel moistures.

Probability of Ignition will approach 60% unshaded and 40% shaded.

Night: Favorable weather and fuels will reduce fire activity after sundown. Minimal spread potential early in the shift while heavy fuels will hold heat overnight. Stump holes burning deep

AIR OPERATIONS: Expect some turbulence in areas of complex terrain

SAFETY

Continue to monitor conditions by periodically taking weather and calculating the fine dead fuel moisture and Probability of Ignition

Weather becoming slight warmer and drier the next few days. So, remember fuel and fire conditions will vary.

INCIDENT: Walker Creek/Chickadee OPERATIONAL PERIOD: 0600-0600

COVID MITIGATIONS

Please review your COVID/Viral Transmission prevention guidelines. Maintain your distancing to the greatest extent, cough or sneeze away from other people, mask up when indoors and respect the personal space of others. If you begin feeling ill, notify your supervisor and seek medical attention for screening.

HOW TO MAINTAIN FOCUS

Focus is the thinking skill that allows people to begin a task without procrastination and then maintain their attention and effort until the task is complete. Focus helps people pay attention amid distractions and setbacks and to sustain the effort and energy needed to reach a goal. We all know focus can be hard to maintain when the task doesn't meet our motivation threshold. Remember the successful completion of the mission depends on every single person to maintain and perform. Lost focus equals lost productivity and a rise in risk!

Ensure LCES in in place before engaging and continue to evaluate during the entire shift.

SAFETY OFFICER: Troy Corn, Jack Cates

Deliberate Risk Assessment-Hazard Summary 28-29 August 2021

Hazard	Mitigation	Post Risk
Viral Transmission Mitigations, Communicable Disease	Maintain awareness of health, perform self checks, maintain social distancing, wear face coverings when indoors or when social distancing cannot be maintained. Report and isolate if feeling symptomatic. Coordinate with Okanogan County Public Health for testing, reporting and	Low
	isolation as needed.	
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site. Identify EMT/EMTP from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize civilian medivac as treatment/timing dictates. Evaluate on-going need for repositioning medical personnel.	High
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment. Familiarize crews with specialty equipment and processes.	High
Hazard Trees	Use avoidance to limit exposure time. Snag ahead to avoid exposure. Use qualified fallers, blasting, or alternate methods if needed. Conduct ongoing risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 22).	High
Aircraft	Utilize Air Attack. Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary radio channel. Reference IRPG (Safe aircraft operations pg. 56-58). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	High
Steep Terrain/Gravity	Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes. Establish LCES.	Moderate
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	Moderate
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Maintain an awareness of livestock. Keep an eye out for wildlife including bears, cougars, and rattlesnakes.	Moderate
Fire Behavior	Be aware of burn windows and weather impacts and min/max RH for flashy fuels/local conditions. Be aware of increased fire behavior and concerns specific to thunderstorm safety (IRPG p. 21). Report changes to FBAN and IMET. Include thunderstorm safety message in IAP.	Moderate
Unburned Fuels/Firing Ops	Establish LCES. Ensure management action points are implemented and followed. Weather updates as needed during burning operations. Locate indirect firelines to minimize the amount of unburned fuels. Follow Interagency Ignition Guide. Ensure communications between all firing operations. Establish road security at all firing sites. Follow approved firing plan for unburned fuels.	Moderate
Transportation	Signing of all incident roads that provide access to divisions. Daily updated travel plan maps. Practice defensive driving. In local communities obey the posted speed limits. Use reader boards to control entry as needed. Identify and evaluate contingency and alternate escape and travel routes.	Moderate
Communication	Evaluate for dead zones prior to engagement. Utilize human repeaters as needed. Ensure accountability of resources in problem areas.	Low
Public Interaction	Place new road closures as necessary and maintain current closures. Maintain awareness of evacuation areas and provide accurate information dissemination.	Low

WALKER CREEK/CHICKADEE CREEK/SPUR FIRE DEMOB LIST Saturday August 28, 2021

DEMOB INSTRUCTIONS

Paperless and electronic demobilization will be used to the extent possible for all resources. **PLEASE LOOK closely at the Fire Name and Resource Number**. All finance documents will be emailed and signed virtually. Ensure all Final CTR's and Shift Tickets have been submitted to Finance the night before your demob day.

<u>DEMOB STEPS</u> (Must Be Done In Order)

- 1. If you have any items checked out by Supply and Communications, proceed to those areas to turn in equipment. If you don't have any items checked out, proceed to **NEXT STEP**.
- **2.** If you were inspected upon arrival or need a No Claims/No Comp receipt, check out with Ground Support. If this does not apply, proceed to **NEXT STEP**.
- **3.** Call Finance at 509-423-6011 or 509-433-1115 or 509-531-7418 to finalize paperwork.
- **4.** Call DMOB at 206-473-1425 or 509-432-6143 to complete the process to be released.

Human Resource Message

Walker Creek and Chickadee Creek Fires, August 28, 2021

As a NW Fire Management Team, we overcome challenges because we are strong and because we are a professional team focused on putting out fires. We know we cannot do this alone therefore, we bring in other skilled professionals, you, to aid us in this task.

On this assignment, we are facing another challenge which is COVID-19. We all have the skills to overcome this challenge however, we all must consciously apply those skills to put COVID-19 out. Those skills involve social distancing, washing our hands, and wearing masks. This becomes a "win-win." We put out the fire and we help stop the spread of a communicable disease. With everyone's help, we can achieve this goal.

We are getting reports from the community that fire personnel are not wearing their masks when doing business in the community. We ask you to:

PLEASE...WEAR YOUR MASK.

This is just another way of showing mutual respect. Not only will you take care of yourself, but you will also be helping to take care of others in a most respectful way. Let us all do our part in treating each other with dignity and respect throughout this fire assignment.

Quote for the day:

Thank you, be safe and have a good day!

Finance is all virtual. We will be happy to take all your paperwork, CTRs and Shift tickets all by email or text.

Please be patient with us as we process your time for demob. Our finance section is working as quick as we can to process your time. Most of the CTRs and Shift Tickets that the outgoing team was taking never made it to the email, so we might have to ask for your paperwork again. We will do our best to support you anyway we can.

If you have questions, please call one of the above numbers.

Make sure that your CTR and ST have the correct fire that you are working on.

Incident Maps

How to Download Maps in Avenza

If you're cell signal is poor you may need to connect to a wifi to download maps. However sometimes being connected to a wifi can slow map downloads. You'll just have to find out what works best.

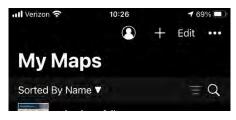

Method 1: From a browser - If you have a good cell or wifi signal

- 1. Tap on the desired map link and wait for the preview. *If it fails to load, use method 2 instead*
- 2. Tap the 'send to' icon (square with up arrow)
- 3. Choose the Avenza app

Method 2: From Avenza direct – if you don't have a good cell or wifi signal

- 1. Tap and hold on the desired map link, then choose 'copy' to copy the direct URL to the map
- 2. Launch the Avenza app
- 3. When not in any map... Tap the + (plus) icon at the top of the screen
- 4. Choose the load from URL option (last choice)
- 5. Paste the direct URL to the map
- 6. Tap 'Done'; the map will begin downloading

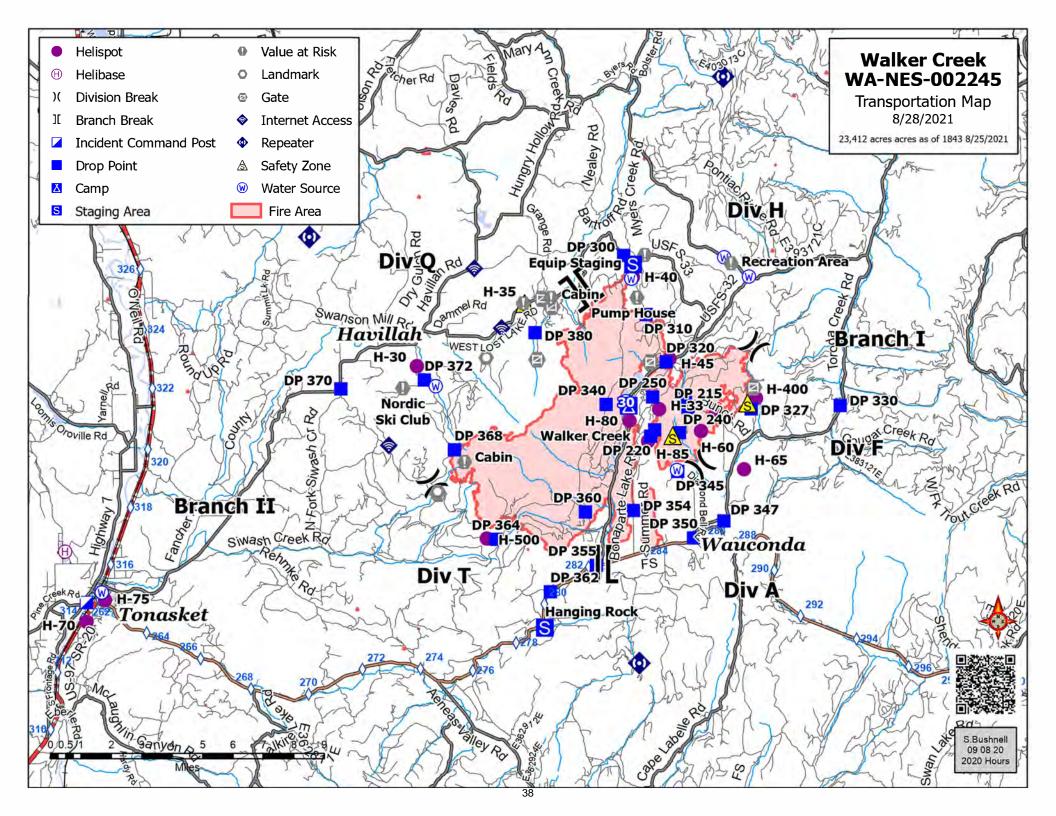

How to Send Map Updates to the Situation Unit

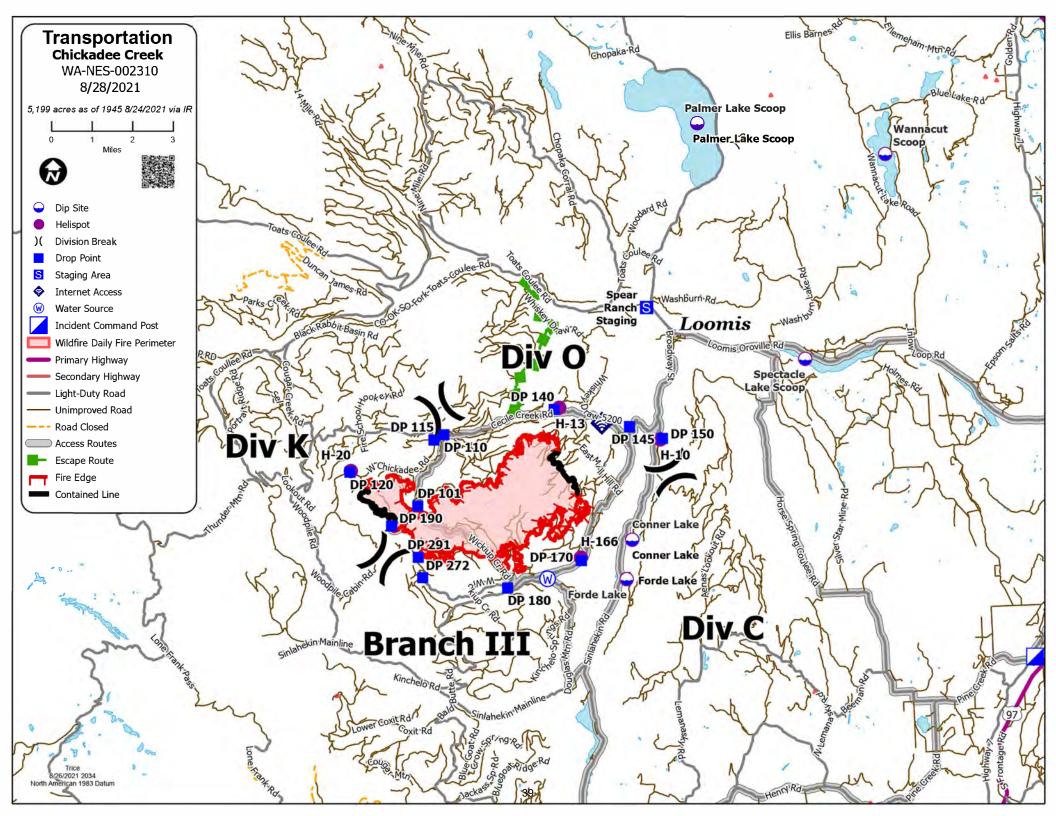

- 1. From within the map in Avenza, click the pin with three lines near the lower-right corner.
- 2. *iPhone:* In the lower right, click the square with up arrow. From the pop-up menu, choose Export to Others.

Android: In the lower right, click the circle with three lines. Click the pop-up circle with up arrow.

- 3. Set these options:
 - a. Filename leave alone
 - b. Export Format choose SHP, GPX or KML
 - c. Data all features
 - d. Image size no image
- 4. Click the Export button in the upper-right corner.
- 5. When the export is ready, choose your Mail application.
- 6. Email the update to 2021.walkercreek.situation@firenet.gov for the Walker Creek Fire map updates or 2021.chickadeecreek.situation@firenet.gov for the Chickadee Fire map updates.
- 7. If you have guestions, call or text the Situation Unit at 360-584-3373.
- 8. Your email needs to include an explanation of the data and a contact phone number.

If all else fails draw your map update on your paper map, take a picture and it attach that to an email to the above addresses.
