## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 2	<b>TYPE OF FIRE:</b> Wildland
<b>FIRE NAME:</b> Whitmore & Hamilton Ridge Fires	<b>OPERATIONAL PERIOD:</b> Aug 6-7 2021, 0600-0600
<b>DATE ISSUED:</b> Aug 5, 2021	<b>TIME ISSUED:</b> 1600
<b>UNIT:</b> WA-COA	<b>Don Strand FBAN</b>

### INPUTS

**WEATHER SUMMARY:** Cooler: Max temp 81, Min RH 30%. Winds- west 10-15 with gusts to 25 mph.

### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL:** Fuels consist of grass and sage brush on the lower slopes with scattered to heavy of timber overstory over a mix of grass, regeneration and timber litter. Timber present on the upper slopes with areas about 10-year-old regeneration in areas of 2008 fire scar.

Live and dead fuel moistures very low and available to readily burn which contributes to a high resistance to control.

Expect continued fire spread in unlined area on both fires. Overall tendency is for easterly fire spread. Fire behavior should moderate to high but in areas exposed to afternoon wind gusts, expect more active fire behavior with torching and spotting in spite of cooler weather. Potential exists for torching runs where there's alignment of wind and slope

Head fire rates of spread in the grass and brush fuels will approach 50 chains/hour (about 50 feet/minute) with about 7-8 feet flame lengths. With the wind gusts, expect greater rates of spread and flame lengths.

Spotting distance will approach about 1000 ft although with periodic wind gusts to 25 mph, watch for spots up to 0.4 miles.

Probability of Ignition will approach 60% unshaded in the afternoon and decreasing as temps decrease and humidity increases.

**AIR OPERATIONS:** Watch for turbulence in the complex terrain. Smoke haze may impact visibility.

### SAFETY

**Pay attention to the very dry light and flashy fuels, Fire intensity can exponentially increase and quickly change directions with increases of wind and or slope.**

**Burnout – watch for wind directions and speed. Pay attention to smoke drift... spotting. Smoke haze may impact your ability to timely see new spot fires.**

**Smoke haze over the fire may modify how active fire behavior may become. In the event there is a thicker layer of smoke, and it clears, watch for significant increase in fire activity.**

# Safety Message

6-7 August 2021

**INCIDENT: Whitmore**

**OPERATIONAL PERIOD: 0600-0600**

## **TOPICS:**

### **TRANSITION**

NW Team 12 has assumed command of the fire as of 0600. Transition of Overhead and personnel will continue through the duration of the incident. Transition is a time that can be marred by extreme success or failure. Ensure positive relationship building and open lines of communications. Take a few extra minutes to get to know new personnel and provide a good briefing of actions taken up to the transition. Make sure you know who is working in your area and maintain accountability of your people.

### **HYDRATION/NUTRITION**

- \* Drink fluids throughout operational period (water and Gatorade) not energy drinks. Begin hydration well before your shift and continue after.
- \* Follow work / rest guidelines
- \* Set a reasonable work pace and allow adequate rest breaks
- \* Use buddy system to monitor personnel of heat related and fatigue issues
- \* For Heat Related Injuries refer to IRPG.
- \* Ensure adequate caloric intake.

### **INCIDENT COMMUNICATIONS**

Incident communications will be developing throughout the day. Avoid engagement if positive communications are not in place with Overhead or ICP. Check throughout the day for communication coverage as you change locations. Take a tactical pause if needed to fully allow incident transition to occur. Letting the transition develop allows for a solid and safe foundation to move forward in a lower risk environment.

# Deliberate Risk Assessment-Hazard Summary

6 August 2021

Hazard	Mitigation	Post Risk
Viral Transmission Mitigations, Communicable Disease	Maintain awareness of health, perform self-checks, maintain social distancing, and wear face coverings in accordance with CDC recommendations. Report and isolate if not feeling well.	Low
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site. Identify EMT/EMTP from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize civilian medivac as treatment/timing dictates. Evaluate on-going need for repositioning medical personnel.	High
Steep Terrain/Gravity	Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes. Establish LCES.	Moderate
Snags	Use avoidance to limit exposure time. Snag ahead to avoid exposure. Use qualified fallers, blasting, or alternate methods if needed. Conduct on-going risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 22).	High
Communication	Evaluate for dead zones prior to engagement. Utilize human repeaters as needed. Ensure accountability of resources in problem areas.	Moderate
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	Moderate
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Maintain an awareness of livestock and rattlesnakes.	Moderate
Fire Behavior	Be aware of burn windows and weather impacts and min/max RH for flashy fuels/local conditions. Report changes to FBAN and IMET.	Moderate
Unburned Fuels/Firing Ops	Establish LCES. Ensure management action points are implemented and followed. Weather updates as needed during burning operations. Locate indirect firelines to minimize the amount of unburned fuels. Follow Interagency Ignition Guide. Ensure communications between all firing operations. Establish road security at all firing sites. Follow approved firing plan for unburned fuels.	Moderate
Transportation	Signing of all incident roads that provide access to divisions. Daily updated travel plan maps. Practice defensive driving. In local communities obey the posted speed limits. Use reader boards to control entry as needed. Identify and evaluate contingency and alternate escape and travel routes.	High
Aircraft	Utilize Air Attack. Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary radio channel. Reference IRPG (Safe aircraft operations pg. 56-58). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	High
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment.	High
Transmission Lines	Maintain one span radius from any downed line or compromised pole, be aware of smoke conductivity, report any downed lines or burning poles.	High
Public Interaction	Place new road closures as necessary and maintain current closures. Maintain awareness of evacuation areas and provide accurate information dissemination.	Low
Initial Attack	Ensure identified IA resources are briefed of expectations and ensure communication plan is provided. Ensure resources are briefed on IA command structure. Provide identified crews with area maps.	Moderate

# Human Resource Message

## Whitmore & Hamilton Ridge Fire

August 6-7, 2021 0600 to 0600

Hello, my name is Susie Manezes, and I am the Human Resource Specialist (HRSP) assigned to this incident, my role is to facilitate a positive work environment and to be a focal point for informal resolution of issues and concerns.

My office is located here at the Community Center however, given COVID mitigations, I can be reached by cell phone at 602-571-9327. Please call or text me if you have any questions or concerns.

Throughout this assignment, please treat everyone with dignity and respect.

### Thought for the Day:

A simple greeting even if it is “Hello” goes a long way toward establishing our human connection and how we relate to others. When we remain silent among strangers, we unwittingly reinforce the feeling of differences, which in turn builds walls that make it harder to recognize our similarities.

Sometimes, a simple “Hello” opens lines of communication and makes it easier for people to talk and share information. Also, smiling and saying hello is a good way to start the day. It is a good thing!

“A sense of humor is part of the art of leadership, of getting along with people, of getting things done.”  
- Dwight Eisenhower

# Pro Tip: Map Download

How to resolve troubles with downloading maps into Avenza.

**Note:** These directions were written for Apple, but the steps are roughly the same for Android.

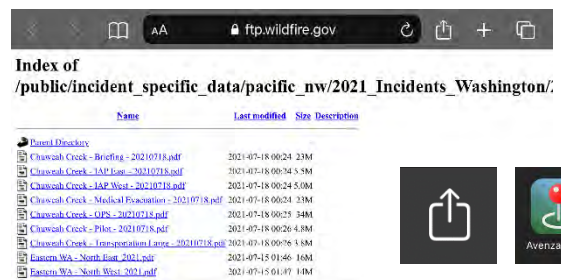

## Start Here:

1. Connect to Wi-Fi as the local area's cellular network is not fast enough for large file downloads. This may result in a browser timeout and error message about the map not being able to download to be displayed. The Community Center has a guest Wi-Fi that can be utilized.
2. For either method below, **START BY SCANNING THE QR CODE** on the front of the IAP to get to the FTP site and 'Current\_Maps' folder.

## Method 1: From a browser

1. Tap on the desired map link and wait for the preview.  
*\* If it fails to load, use method 2 instead*
2. Tap the 'send to' icon (square with up arrow)
3. Choose the Avenza app

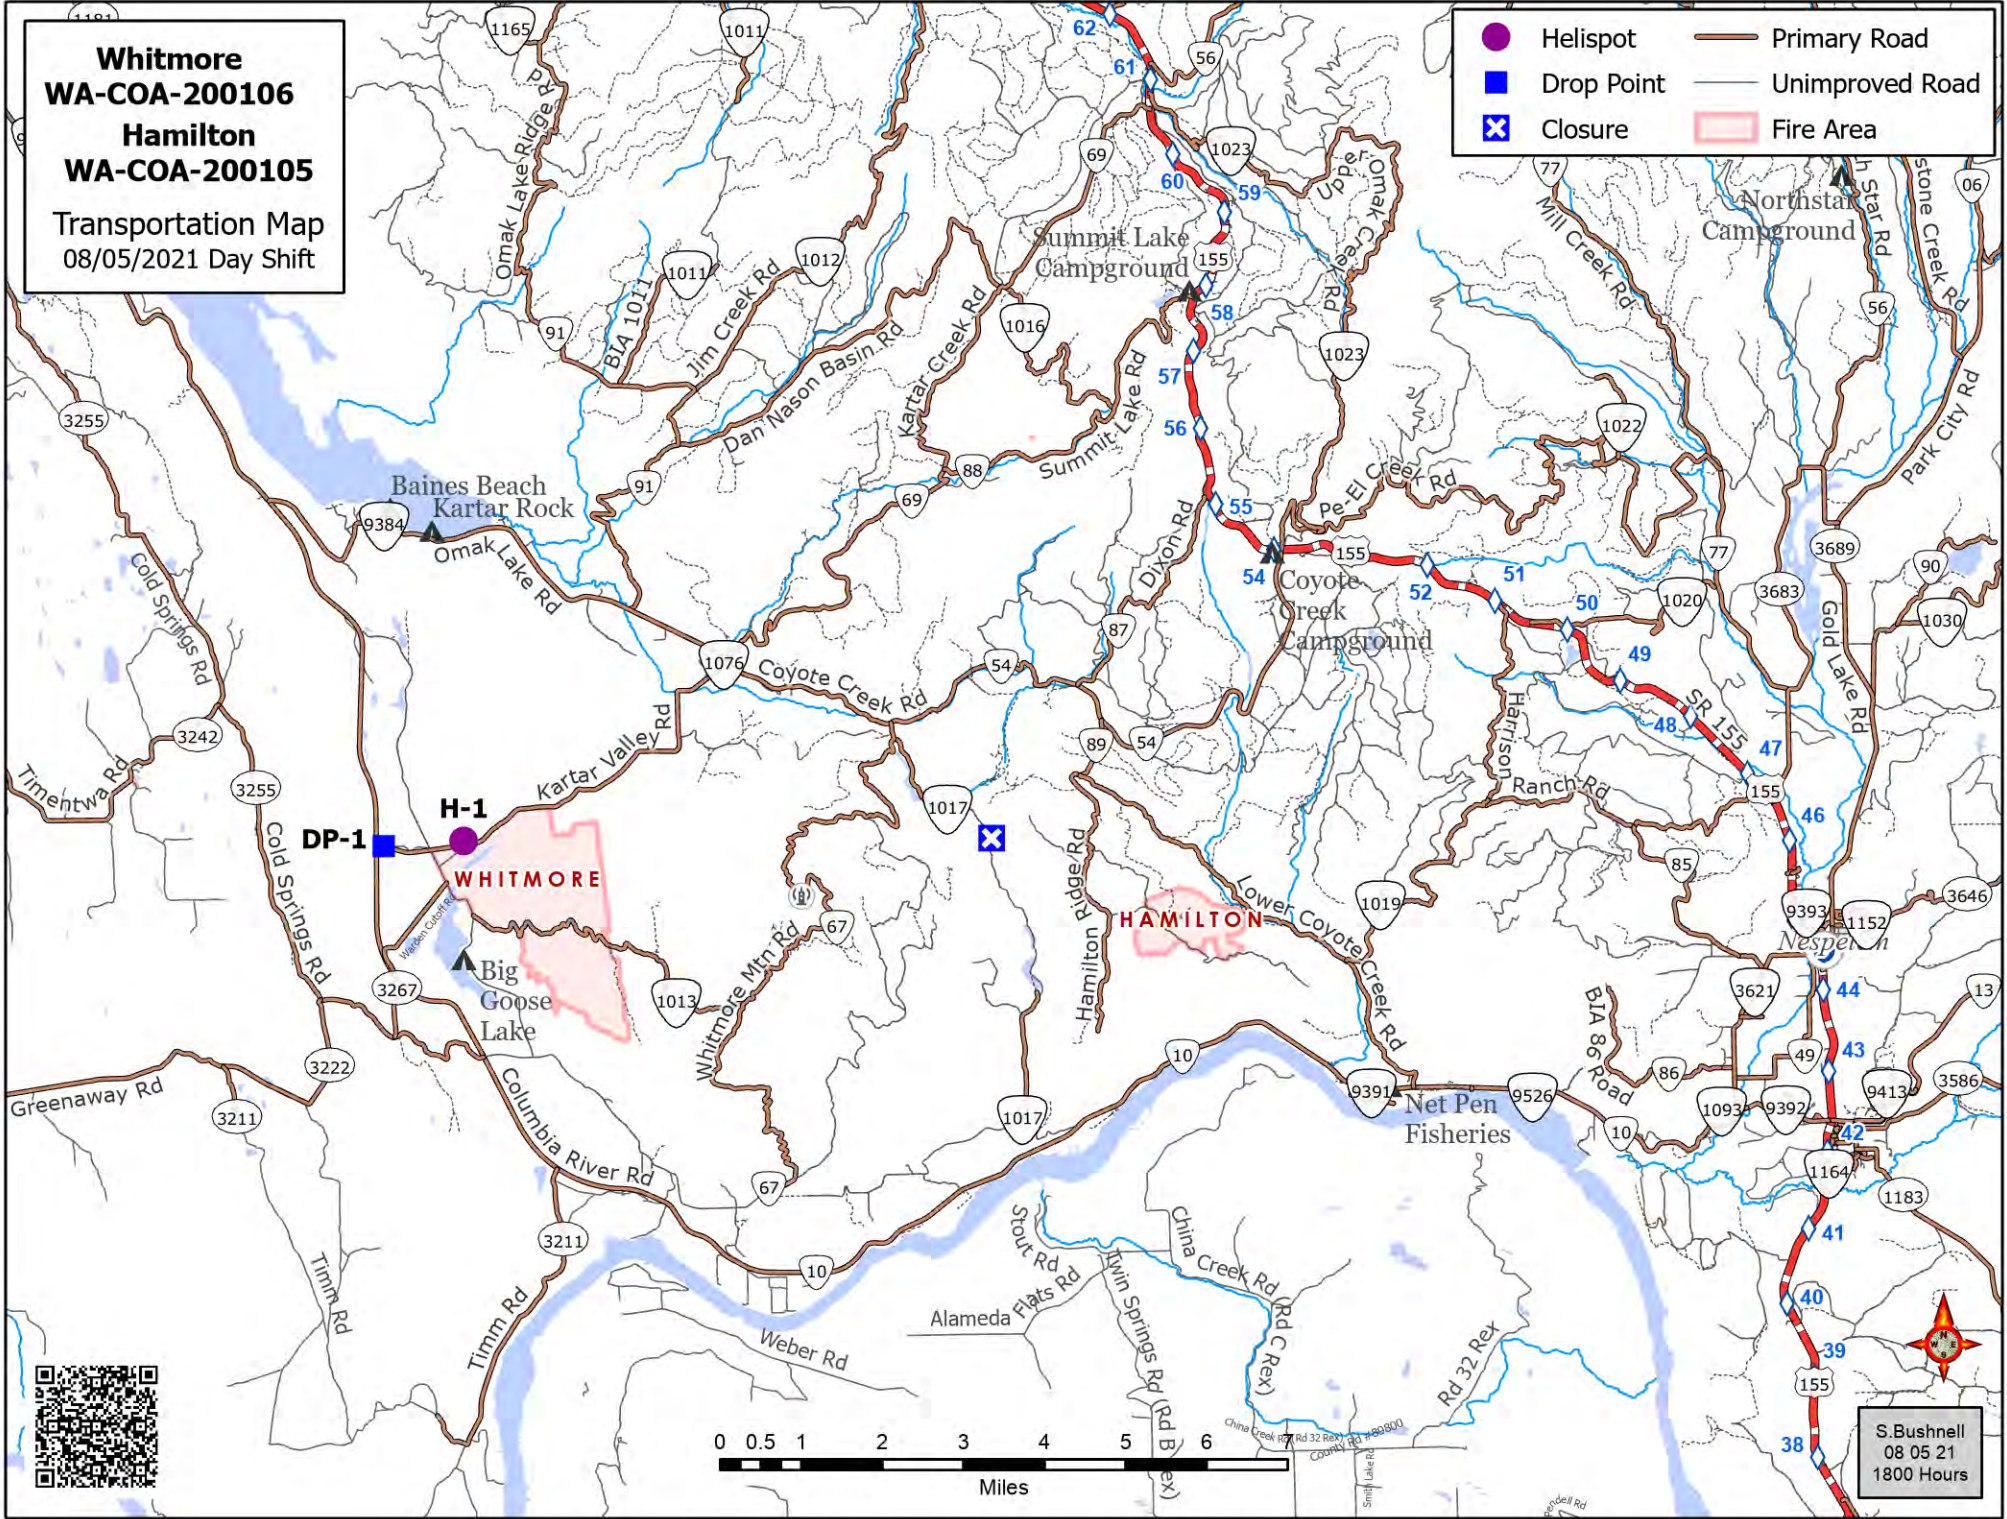

## Method 2: From Avenza direct

1. Tap and hold on the desired map link, then choose 'copy' to copy the direct URL to the map
2. Launch the Avenza app
3. When not in any map... Tap the + (plus) icon at the top of the screen
4. Choose the load from URL option (last choice)
5. Paste the direct URL to the map
6. Tap 'Done' ; the map will begin downloading
