Incident Meteorologist (IMET)

**...Red Flag Warning in effect from 1300 Sunday afternoon through
2300 Sunday evening for Winds and Low Relative Humidity...**

Weather Discussion: A cold front will move through the region between 1800-2100 Sunday evening. This will result in increasing westerly winds Sunday afternoon. Temperatures will be cooler by 3-4 degrees and relative humidity will be in the 10-20 percent range ahead of the front. The combination of gusty winds and low relative humidity prompts the issuance of a Red Flag Warning. Following the front temperatures will cool around 10 degrees both Monday and Tuesday and will be below seasonal normal for a few days. The front will be dry with no precipitation expected. By Tuesday, however, scattered showers and isolated thunderstorms will be possible in the vicinity of the Whitmore fire, with up to a tenth of an inch of rain possible.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Another day with very dry fuels, very warm temps and breezy conditions. ERCs' for Kramer yesterday are around the 95th percentile. Fire behavior potential today will be very high but potentially moderated due to smoke haze. Continued potential for areas of dirty burns and small islands of unburned fuel to flare up and potentially spot across fire lines with forecasted afternoon and evening winds. Any spot fire that gets established in the timber litter fuels will be difficult to control. If a spot fire gets established in the lighter grass and sage brush fuels, potential for significant spread exists. Expect higher fire intensities where there is wind/slope alignment and available fuels.
- Fuels consist mixed conifer and pine with grass and brush. Logging slash is in scattered locations. There are some areas of regeneration from past timber harvest and 5 to 10-year-old fire scar regen with grass and brush understory. Much of the lower elevations are covered with grass and sagebrush with timbered stringers in the deep draws.
- Most spotting will be short range and also from roll outs on steeper ground. Most spotting will be short range although with wind gusts, spotting near 0.3 mile possible.
- **Probability of Ignition will be near 90% unshaded and 60% shaded during the warmest part of the day.**

SPECIFIC:

DIV A/Z/W/P: This portion of the fire will be the warmest and driest portion of the fire.

DIV C: Continue to watch for heat near the line with forecasted winds, possibility for spotting exist. Dozer berms may still contain heat that can spread to adjacent fuels. Light grass and brush fuels will readily available for fire spread.

DIV F: Areas of dirty burn will continue to clean up with potential to spot. Afternoon winds will be pushing drift smoke across road south of DP 120.

DIV L: Watch for flare ups and spotting in any areas of dirty burns adjacent to fire lines. Winds in the gap south of DP 126 may channel and contribute to flare ups.

DIV M: Continue to monitor for heat near fire lines

Initial Attack: In the event we respond to a new start, any new start in the area will have potential rapid rates of spread. Hot and dry weather with high Probability of Ignition, any start will likely spot. Poor nighttime RH recovery will allow for 24-hour drying of fuels and increase the burning period.

NIGHT: Fire activity remaining from day shift will continue to be active well after dark due to forecasted poor RH recovery. Continue to monitor for spots. Potential for heat in dozer berm and stump holes are burning deep.

AIR OPERATIONS: Watch for turbulence in the complex terrain. Smoke haze may affect visibility.

SAFETY

- **Watch out where you walk. Stump holes burning very deep**
- **Smoke haze may moderate fire activity some, but with any clearing, expect increasing fire activity. Smoke haze will also limit visibility so any spot fire may become larger before noticed.**
- **Red Flag Warning in effect from 1300 Sunday afternoon through 2300 Sunday evening for Winds and Low Relative Humidity**
- **Review the 10 Standard Firefighting Orders and 18 Watchout Situations.**

Safety Message

15 August 2021

INCIDENT: Whitmore

OPERATIONAL PERIOD: 0600-2400

TOPICS:

COMMON BARRIERS TO EFFECTIVE COMMUNICATION INCLUDE:

LOOK! A Distraction!

Lack of focus. You can't communicate effectively when you're multitasking. If you're checking your phone, planning what you're going to say next, or daydreaming you're almost certain to miss nonverbal cues in the conversation. To communicate effectively, you need to avoid distractions and stay focused.

The Big C: Complacency

As we progress toward moving on to the next assignment or getting back home; it is easy to have our focus distracted and become complacent to the risks we have faced daily for the last week or so. **THE RISKS ARE STILL THERE!**

****KEEP UP ON PROPER HYDRATION BEFORE, DURING, AND AFTER SHIFT****

SAFETY OFFICER: Jack Cates, Troy Corn, Don Waller (T)

Initial Attack	Ensure identified IA resources are briefed of expectations and ensure communication plan is provided. Ensure resources are briefed on IA command structure. Provide identified crews with area maps.	Moderate
Unburned Fuels/Firing Ops	Ensure management action points are implemented and followed. Weather updates as needed during burning operations. Locate indirect firelines to minimize the amount of unburned fuels. Ensure communications between all firing operations. Establish road security at all firing sites. Follow approved firing plan for unburned fuels.	Moderate
Environmental Factors	Assess for known allergies and report to medical personnel. Obtain Bee/wasp spray and yellow jacket traps. Maintain an awareness of livestock and rattlesnakes.	Moderate
Fire Behavior	Be aware of burn windows and weather impacts and min/max RH for flashy fuels/local conditions. Report changes to FBAN and IMET.	Moderate
Communication	Evaluate for dead zones prior to engagement. Utilize human repeaters as needed. Ensure accountability of resources in problem areas. Be prepared if local traffic maximizes air time.	Moderate
Viral Transmission Mitigations, Communicable Disease	Maintain isolated ICP (remote briefings, etc), maintain social distancing, and wear face coverings in accordance with CDC recommendations. Report and isolate if not feeling well.	Low
Public Interaction	Place new road closures as necessary and maintain current closures. Provide signage on all perimeter roads warning of closures and fire activity. Request tribal police presence on SR155 access roads, Omak Lake and Columbia River Road as needed. Maintain awareness of evacuation areas and provide accurate information dissemination.	Low

Human Resource Message

Whitmore Fire - August 15, 2021 – 0600-2400

Attitude: Having a positive attitude means being optimistic about situations, interactions, and yourself. People with positive attitudes remain hopeful and see the best even in difficult situations. In contrast, those with negative attitudes may be more pessimistic and disagreeable, and typically expect the worst outcome in tough situations.

Take a moment and think about your attitude. How does it affect the things you do and how does it affect the people around you?

With a positive attitude, you learn to see the thoughts behind people’s actions and why they may have acted the way they did. Rather than jumping to a harmful conclusion, you can understand where people may be coming from.

When a conflict arises with a coworker your immediate reaction might be to jump to the defense. You want to protect yourself and garner respect, which is a good thing. However, the more conflicts in which you partake, the more negativity will surround your life.

Instead, take a second to step back and view the situation from a third-party perspective. Will participating in this conflict be beneficial in the long run? Or will it simply cause unnecessary stress and negativity now?

Often, a co-worker is simply having a bad day, or is facing stress. Rather than snapping back, you can practice empathy. This might help you get to the root of the problem and end the conversation on a positive, lighter note.

Don’t let a poor attitude interfere with your day. Take the responsibility to motivate yourself toward a more positive attitude and outlook on life. Remember, we are all in this together. Stay positive and have a good day!

Quote for the Day: "You may not control all the events that happen to you, but you can decide not to be reduced by them." - *Maya Angelou*

A Message from Public Information

PHOTOS: Your fireline photos help us build understanding with the public. Community members want to see what you see because you go where others can't safely go. We are looking for any pictures of the fireline and **fire resources working on the fireline in their PPE.**

You can send photos to:

Email: 2021.whitmore@firenet.gov

Facebook messenger: Central Washington Fire Information Page or
<https://www.facebook.com/cwafireinfo>

As always, make sure you're wearing all your PPE and conveying a professional, caring, and respectful attitude toward the homes and land in this community.

Thanks for helping us out!

Lastly, it's our job to talk to the public, but we want you to know the public is talking to you too. On Facebook yesterday, everyone was excited to hear that mop-up was in progress across the fire:

"Thank you for the updates - but also to those fighting this fire day and night..."

"Wonderful news! How can we thank you enough..."

"That's great news! Thank you!"

Wear a mask in fire camp regardless of vaccination status, unless outdoors and able to maintain at least 6ft of distance at all times, alone in an enclosed space or actively engaged in firefighting on the fireline.

Use the Zoom link provided to join briefings remotely.

Observe 6ft Distancing whenever possible.

Observe “Module as One” practices – only close contact with crew (engine, handcrew, etc.) that you live and work with all summer. Observe distancing and masking around everyone else. Do not co-mingle with other crews or “modules” in camp or on the line.

Send crew representatives to pick up meals - masks must be worn in food lines.

No entry to ICP building except Incident Management Team members

Wash hands frequently and disinfect high-traffic areas on a regular basis.

Limit close contact between firefighters and the public to prevent exposure and spread.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG page 106

4. TRANSPORT PLAN:

Evacuation Location (*if different*): (*Descriptive Location (drop point, intersection, etc.) or Lat. / Long.*) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: **Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
