Incident Action Plan **CEDAR CREEK** **POTTER & BIG SWAMP**

October 14, 2022
Operational Period
Dayshift - 0700-2000

Cedar Creek - OR-WIF-220180 – P6PYP6 (0618)

Cedar Creek – WA DNR – 221-IWA

Potter – OR-WIF-220170 – P6PX6A (0618)

Big Swamp – OR-WIF-220189 – P6PY6M (0618)

This page intentionally left blank.

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY	
CEDAR CREEK	Date/Time From: 10/14/2022 0700 FRI	Date/Time To: 10/14/2022 2000 FRI
3. Objective(s):		
<p>Provide for firefighter and public safety; specifically manage risk to firefighters by ensuring hazards are identified, assessed and where possible mitigated. Be prepared to accept residual risk when exposure is commensurate with values threatened and the probability of achieving objectives is high.</p> <p>Implement operational plans to keep fire within established primary control lines to protect identified values at risk including:</p> <ul style="list-style-type: none"> • Oakridge, Westfir, and High Prairie • Highway 58 and Forest Road 19 • Union Pacific railroad corridor • Waldo Lake and associated recreational investments • Private infrastructure and recreational investments within surrounding Cascade Lakes Highway • Willamette Pass Ski-Area; Private infrastructure, and Forest Recreational Investments <p>Promote coordination and partnership by developing clear dialogue and providing timely information between the IMT, affected agencies, and the public. Engage in effective communication with Agency Administrators and cooperators.</p> <p>Coordinate with Resource Advisors to complete fire suppression and approved repair work to protect natural and cultural values.</p>		
4. Operational Period Command Emphasis:		
Complete operational assignments and tasks as directed in the IAP and by your Division Supervisor to avoid mission creep.		
General Situational Awareness:		
Monitor the weather, especially wind. Ensure overhead hazards are mitigated and L.C.E.S. is in place.		
5. Site Safety Plan Required? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>		
Approved Site Safety Plan(s) Located ICP		
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):		
<input checked="" type="checkbox"/> ICS 202 <input checked="" type="checkbox"/> ICS 203 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> ICS 205A <input checked="" type="checkbox"/> ICS 206	<input checked="" type="checkbox"/> ICS 207 <input type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> ICS 220 <input checked="" type="checkbox"/> Map/Chart <input checked="" type="checkbox"/> Weather Forecast/Tides/Currents	Other Attachments: <input checked="" type="checkbox"/> FIRE BEHAVIOR, SAFETY MESSAGE <input checked="" type="checkbox"/> HR MESSAGE, FINANCE <input checked="" type="checkbox"/> LOGISTICS INFO, PHONE LISTS <input checked="" type="checkbox"/> UNIT LOG, CHECK-IN / DEMOB

FIRE WEATHER FORECAST

FORECAST NO:	69	NAME OF FIRE:	Cedar Creek
PREDICTION FOR:	Friday, Oct 14, 2022	UNIT:	OR-WIF-220180
ISSUED:	1900 PDT, Oct 13, 2022	Incident Meteorologist:	Bob Tobin

*** VERY WARM AND VERY DRY WELL INTO NEXT WEEK ***

DISCUSSION: High pressure will be over the fire area the remainder of the week. This will result in a warming and drying trend. Temperatures will be 5-10 degrees above average if not more. Offshore flow will result in poor overnight relative humidity recoveries on mid-slopes and ridges each night. There is the possibility of some gusty ridgetop winds each night.

FRIDAY: ABOVE AVERAGE TEMPERATURES AND DRY CONDITIONS

WEATHER:	Smoke and haze at the lower elevation. Some afternoon clearing. Sunny on mid-slopes and ridges.	MAX TEMPS:	West: 75-85 East: 75-85
WIND (EYE LEVEL, MPH):	Sheltered areas: VRB 2-5 mph through 1200, then upslope 4-7 mph. Ridges, unsheltered areas, wind-aligned drainages: E-SE 7-12 gusts to 20 mph...then NW 5-10 with gusts to 12 mph after 1100-1200. East of the Crest: E-SE 7-12 gusts to 20 mph...then NW 5-10 with gusts to 12 mph after 1100-1200.	MIN RH:	West: 15-25% East: 15-25%
HAINES (HIGH LEVEL):	4 (Stability 2, moisture 2)	CWR:	0%
PEAK MIXING HEIGHT/WIND:	4500 ft AGL/NW 5-10 mph	Rain Amount:	0.00
INVERSION:	Strong, mixing out after 1100-1400.	LAL:	1

FRIDAY NIGHT: POOR RECOVERIES ON RIDGES...MODERATE RECOVERIES VALLEY BOTTOMS

WEATHER:	Clear, heavy smoke and haze under the inversion.	CWR:	0%
WIND (EYE LEVEL, MPH):	Sheltered areas, mid-slopes, and valley bottoms: Drainage 3-5 mph after 1900. Ridges: SE 4-8 gusts to 10 mph after 2000. East Side: E-SE 5-9 gusts to 12 mph after 2000.	Rain Amount:	0.00
MIN TEMPS:	Ridges: 55-65, Mid-slope and below: 50-55, East: 25-40.		
MAX RH:	Ridges to mid-slope: 15-25%, Mid-slope and below: 40-50%, East of the crest: 50-60%		
INVERSION:	Strong developing mid-slope after 1900.		

SATURDAY:

WEATHER:	Smoke and haze. Afternoon clearing	MAX TEMPS:	West: 75-85 East: 75-85
WIND (EYE LEVEL, MPH):	Sheltered areas: up-slope 3-6 mph through 1200, then NW 5-7 mph. Ridges, unsheltered areas, wind-aligned drainages: E-SE 10-12 mph gusts to 20 mph. East of the Crest: E-SE 10-12 mph gusts to 20 mph...becoming VRB 5-10 mph.	MIN RH:	West: 15-30% East: 15-25%
HAINES (HIGH LEVEL):	5 (Stability 2, moisture 3)	CWR:	0%
PEAK MIXING HEIGHT/WIND:	4,500 ft AGL/SE-E 8-12 mph	Rain Amount:	0.00
INVERSION:	Strong, mid-slope, mixing out after 1400	LAL:	1

EXTENDED OUTLOOK:

SUNDAY:	Sunny and warm. Highs lower 70s to mid-80s...Min RH 15-30%...E-SE winds 8-12 gust 20 mph.
MONDAY:	Sunny and warm. Highs upper 60s to mid-70s...Min RH 30-40%...E-SE winds 8-12 gust 20 mph...Becoming W-NW 5-10 mph after 1400.
TUESDAY:	Sunny and not so warm. Highs mid-60s to mid-70s...Min RH 45-55%...SE-S winds early becoming WNW 5-10 mph after 1400.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 70	TYPE OF FIRE: Wildland Fire
FIRE NAME: Cedar Creek	OPERATIONAL PERIOD: 10/14/2022, 0700-2000
DATE ISSUED: 10/13/2022	TIME ISSUED: 1900
UNIT: USFS-OR-WIF	SIGNED: Don Strand, FBAN

INPUTS

WEATHER SUMMARY: Partly cloudy- Temp 82 °. Relative Humidity minimum 15%. Winds; Ridges, unsheltered areas, wind-aligned areas; E-SE 7-12 gusts to 20 mph, then NW 5-10 with gusts to 12 mph after 1100-1200: Winds: East of the Crest; E-SE 7-12 gusts to 20 mph, then NW 5-10, with gusts to 12 after 1100-1200.

See Weather Forecast for detailed information

Fire Behavior Summary

GENERAL: Primary fuel types are TL5 and TU5. **TL5** is compact short needle conifer litter, found primarily in 2nd growth Douglas fir plantations. **TU5** is timber overstory with very high surface fuel load- short needle conifer with heavy brush and down log fuel loading in mature or old growth stands. Lichen is present across the landscape and spots readily. Timber stands with needle litter (**TL3**), dominated by Fir, Hemlock, or Lodgepole Pine. **TL8** is timber stands with needle litter dominated by Ponderosa Pine.

Surface Fuel Type	Head Fire ROS	Head FL	Spot Distance
Understory and litter fuels	1 to 6- ch/hr or feet/min.	Up to 1-6 feet	Up to 0.2 mile

Haines	Probability of Ignition	Fine dead fuel moisture 1-hour	10-hour dead fuel moisture	1000- hour fuel moisture
4 (Low)	60 to 90%.	3-6%	6 to 9%	12 to 15%

Continued hot and dry with poor nighttime humidity recovery. Elevated fire behavior potential. Live and dead fuels are dry and available to carry fire. Will have continued slow fire spread in heavy surface fuels with torching and short-range spotting. The slow to moderate fire spread with smoldering, creeping, backing and flanking fire behavior in areas of available surface fuels. Fire spread is also through short-range spotting. Lichen reacts quickly to changes in humidity and contributes to short-range spotting. Potential still exists for short upslope runs. Areas of thick smoke may affect fire intensity. With the lower nighttime humidity, fire may back or flank into areas with available fuels and be in position to make short upslope runs with torching and spotting overnight.

Today's Fire Behavior

DIV A/Y: Expect mostly smoldering and creeping with isolated torching due to heavy fuels under sheltered canopy. Expect continued backing fire spread down slope in areas of available fuels. Potential for short upslope runs exists.

DIV W. X: Expect smoldering and creeping fire spread in interior unburned islands of fuels. Potential for single tree torching. In areas with steeper slopes with heavy surface loading, potential exists for short uphill runs. Expect smoldering in compact needle litter especially in riparian areas.

DIV T. S: Surface fire spread in heavy fuels with single and group torching. Potential for short upslope runs exists. Smoldering and creeping in needle litter under regeneration stands with very limited torching. Potential for spotting from rolling material in areas with steeper slopes. Potential for easterly winds to channel down Eagle Creek drainage.

DIV P/R: Smoldering, creeping, backing and flanking fire spread in the heavy surface fuels. Expect occasional torching with primarily short-range spotting.

AIR OPERATIONS: Expect limited visibility due to smoke. Strong inversion, mixing out after 1400.

SAFETY

- Today some locations of the fire area will be near the local thresholds for increased fire behavior.
- Areas with unsecured fire edges, continued potential for fire to back into available fuels potentially adding more hazard trees.
- Inversion and smoke haze may moderate fire behavior but in many areas the ability to see fire edge and other hazards are also impacted.

SAFETY MESSAGE

14 October 2022

INCIDENT: CEDAR CREEK

OPERATIONAL PERIOD: 0700-2000

TOPICS:

HIGHWAY 58 CONSTRUCTION

THERE IS NO CONSTRUCTION SCHEDULED FOR TODAY. NO PILOT CAR OPERATIONS.

MANAGING THE MAYDAY

The four (4) W's of size up: While we fight fires of varying complexities throughout the year, we rarely (and thankfully) deal with managing the EMS incident from beginning to end. This can be a stressful task for personnel. While the Emergency Plan is a useful tool, the four (4) W's is a simple, easy and provides you with a guide to establish most of the pertinent information needed to successfully manage the IWI.

“W”hat do I have?

“W”hat am I doing?

“W”hat do I need?

“W”ho is in command?

We call this the 30 second blueprint for success. While it may not answer all the questions needed, it certainly gets you off on the right foot.

Success can lead to complacency, and complacency is the greatest enemy of success.

SAFETY OFFICER: Troy Corn, Jack Cates

Deliberate Risk Assessment-Hazard Summary

14 OCT 2022

Hazard	Mitigation	Post Risk
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site for transport capability. Identify EMT/EMTP from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize agency and civilian medivac as treatment/timing dictates. Evaluate on-going need for repositioning medical personnel. Provide Dust abatement on Helispots as needed.	HIGH
Aircraft	Utilize Air Attack. Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary for fixed wing, air to ground 2 for bucket work as needed. Reference IRPG (Safe aircraft operations pg. 61-62). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	HIGH
Railroad Right-of-Way	Implement work windows/slow orders with Union Pacific when personnel are working near the right-of-way. Post lookouts at each end of work zones.	HIGH
Hazard Trees	Use avoidance to limit exposure time. Fall ahead to avoid exposure. Use qualified fallers or alternate methods if needed. Conduct on- going risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 20-21).	HIGH
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment. Follow agency guidelines for chipping operations.	HIGH
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	MODERATE
Fire Behavior	Be aware of burn windows and weather impacts and min/max RH for flashy fuels/local conditions. Report changes to FBAN and IMET. Establish MAP for disengagement to provide for an orderly retreat given lack of safety zones. Have a plan for disengagement that establishes a designated meeting point and maintains personnel accountability.	MODERATE
Steep Terrain/Gravity	Establish LCES. Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes.	MODERATE
Transportation	Coordinate with ODOT for construction windows and areas of one lane traffic along HWY58. Provide daily updates of construction progress. Sign all incident roads that provide access to divisions. Provide daily updated travel plan maps. Practice defensive driving. In local communities obey the posted speed limits. Use reader boards to provide advanced warning and control entry to base camp as needed. Identify and evaluate contingency and alternate escape and travel routes. Provide dust abatement and grading as needed. Provide advanced scouting for transport access and bridge weight restrictions.	MODERATE
Unburned Fuels/Firing Ops	Establish LCES. Ensure management action points are implemented and followed. Weather updates as needed during burning operations. Locate indirect firelines to minimize unburned fuels. Follow Interagency Ignition Guide. Ensure communications between all firing operations. Establish road security at all firing sites. Follow approved firing plan for unburned fuels.	MODERATE
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Maintain an awareness wildlife and poison oak. Identify and report allergies to your chain of command.	MODERATE
Communication	Evaluate for dead zones prior to engagement. Utilize human repeaters as needed. Ensure accountability of resources in problem areas. Spiking resources must have communication coverage.	LOW
Viral Transmission Mitigations, Communicable Disease	Maintain awareness of health, perform self checks, maintain social distancing, wear face coverings in accordance with CDC recommendations. Report and isolate if not feeling well. Use remote briefings, spike camps and logistical layouts that provide for social distancing as necessary. Establish liaison with Lane County Public Health.	LOW
Public Interaction	Implement area and road closures as necessary. Maintain a lookout for hunters in and out of closure areas. Maintain awareness of evacuation areas and provide accurate information dissemination.	LOW
Initial Attack	Ensure identified IA resources are briefed of expectations and ensure communication plan is provided. Ensure resources are briefed on IA command structure. Provide identified crews with area maps.	LOW

6. Control Operations/Work Assignments:							
<p>Task: Patrol the 4290 road. Complete suppression repair on the 640 road, along shaded fuel break on roads 4668, 4660, and Hwy 46 to specifications by the local unit.</p> <p>Purpose: Protect values at risk on the east side of Waldo Lake, Twin Lakes Lodge, Wickiup Reservoir, Davis Lake, and the community of Crescent while minimizing additional resource damage.</p> <p>End State: Keep fire north of the 4290 road and inside the containment lines. Control lines are repaired to suppression repair standards while minimizing the threat of the fire to values at risk.</p>							
7. Special Instructions:							
<ul style="list-style-type: none"> • Waldo Lake should not be used as a water source. • When working on the 640 road review Resource Advisor message - 640 Road Cutting & Piling Specifications • Be IA ready - See IA Communication Plan for Initial Attack. • Areas to be avoided are marked with either black/yellow or red dot on white flagging. • Consult Resource Advisors if you have any questions. • Backhaul all excess equipment.

Resource Advisor Message

Cedar Creek Fire

Kailey Guerrant, Lead READ, 503-580-5387, kailey.guerrant@usda.gov

Suppression Repair Standards

Waterbars

Height of water bar for handlines should average 6-12 inches. Height of machine-constructed water bars not to exceed 18 inches on slopes less than 40%. Height of machine-constructed water bars not to exceed 30 inches on slopes greater than 40%.

- Cut in the water bar – do not simply push up loose soil.
- Water bars should direct runoff away from the burned area where possible.
- Assure that the down slope end of the water bar is open and has adequate length to allow free flow of water off the fire line.
- Logs can be incorporated into water bars as long as they are embedded or anchored in a trench. Ensure fire end of log does not contact any organic material.
- Place slash below outlets of water bars to help slow runoff and collect sediment.

In selecting areas for establishing water bars the following should be considered:

- Locate bars at natural slope breaks. The idea is to move water off the fire line before it can build up enough energy to erode soil.
- When possible, locate bars where the outlet empties onto a resistant surface (i.e. rock or log debris).
- Locate bar outlets to provide maximum buffer distance to stream channel.
- Angle of water bars should be 20-45 degrees to the line.

Fire Line Slope %	Maximum Water Bar Spacing (feet)
2-5	300
6-10	200
11-15	150
16-20	100
21-35	75
36+	50

Dozer Line Repair

- Pull in berms and woody debris developed in construction of fireline. Distribute this material over the surface of the fire line, similar to the density of the surrounding area.
- Blockade lines at intersect with roads by placing logs and slash across the lines for 300 feet or site distance to minimize motorized use. Take extra care to return the entry points to a natural appearance that blends in with the surrounding landscape to the extent possible.
- At some line intersections with roads, it may be necessary to block access by constructing earthen berms and/or place boulders, heavy logs, slash, and other large vegetative material at the beginning of dozer line. These sites will be identified in Field Maps.
- Other blockage may be identified if lines exposed sensitive areas to future human intrusion.
- Lines requiring native seeding or weed-free mulching will **be identified in the Field Maps. If there isn't** enough debris to achieve 50% ground cover, REAFs may identify areas where weed free straw, or wood mulch is needed. Work with a resource advisor to implement seeding where necessary.

Chipping Standards

- Provide a 30- foot buffer of no chipping at water crossings or culverts.
- Do not place chips into road ditch.
- Do not chip onto a steep slope where chips will slide back into the ditch.
- Broadcast chipped material, ensuring that chips are no more than 4" deep.

640 Road: Cutting and Piling Specifications

- Within the wildlife habitat area: Load and transport piled log rounds from both sides of road and remove outside the core. Pile this material OUTSIDE the wildlife area at designated locations to be later burned following the specs below (NO burn piles within the wildlife habitat area).

Pile Specifications:

- Okay to fell a few trees <12" DBH within the current fuel break (West) side of road to accommodate the following burn pile specs, as coordinated with onsite READs.
- Min dimensions: 6 ft. W x 6 ft. H with brush and small debris at base;
- Max dimensions: Can NOT encroach into a 25 ft. buffer around adjacent leave trees;
- Chip and broadcast spray material on either side of the road but keep outside of any stream channels

Figure 2. Typical roadway on moderate slopes with no additional clearing.

Please reach out to the REAF assigned to your division with any questions or concerns.

DEMOB INSTRUCTIONS

Cedar Creek, Junction Camp, Big Swamp & Potter

AIR TRAVEL – All resources requiring air travel to their home unit must call DEMOB 72 hours in advance of departure date to make travel arrangements.

DEMOB LOCATIONS: All demobs will occur at the resource current locations (Oakridge ICP or Junction Camp). Please follow the steps in this order.

1. **IAP:** Refer to the Tentative Demob list for your assigned Demob date/time.
2. **WEED WASH:** All OFF-ROAD resources need to complete a weed wash before leaving. Weed wash is located at Kokanee Staging near Oakridge ICP and Crescent Staging near Junction Camp.
3. **GROUND SUPPORT:** Equipment contractors need to pick up inspection forms at Ground Support. If damage or claims are reported an inspection may be performed. Ground Support will inform Demob when completed.
4. **COMMUNICATIONS AND SUPPLY:** Turn in all checked out items to the respective units. As items are returned, Demob will be notified.
5. **FINANCE:** Report to Finance and close out all final paperwork.
6. **DEMOB:** Once closed out in Finance, call Demob at 541-482-1331. If no answer, try again in a few minutes. If still no answer, then leave a message with the following information:
 - a. Your Resource Order Number
 - b. Name of Resource/Company
 - c. City/State you are traveling to
 - d. Estimate time of departure and arrival
 - i. Rest overnight (RON) location if applicable.

This is the last step before you start your travel.

Training Message

Sadly, many any of us can relate to this - and have the binders to prove it. Completing Position Task Books expands on what you learn in required instructor-led courses by providing an opportunity to gain experience and skills while doing the work. You get to practice what you learn on a number of assignments until you, your evaluator and your home unit training committee are confident that you can do the job on your own.

Trainees - Please make the effort to learn everything you can from your trainer. Ask questions and be open to instruction.

Trainers – Please share your knowledge and provide opportunities for your trainee to perform the duties on their own. Provide honest feedback in a constructive way.

Feel free to contact me if you have any questions or concerns about the process.

Debra Packard, Training Specialist
559-623-2983 or debra_packard@firenet.gov

Human Resource Message

So you mean to tell
me a stress
ball isn't
for throwing
at people
who stress
you out ?

Stress and fatigue impact your emotional – as well as physical – well-being. This can negatively affect your interactions with others. Take action, don't ignore your stress.

STRESS RELIEVERS

- **Relaxation – break the stress cycle with frequent stress breaks throughout the day – stretch, take a walk, deep breathing**
- **Eat three nutritious meals a day and healthy snacks**
- **Stay in touch with team members and communicate**
- **Replenish, rest, get some down time**

COVID-19 Mitigations for Cedar Creek Fire

- Masks are not required indoors unless working in a county with a HIGH COVID-19 community level. Currently, Lane County community level is LOW (masking indoors is optional).
- Conduct daily verbal screening checks within crews, report any COVID-like symptoms to your direct supervisor. Supervisors should report any positive symptoms to the Medical Unit for next steps.
- Observe social distancing standards while waiting in line for food and limit contact with others outside of your crew in the food service line. If possible, send crew representatives to pick up meals.
- Practice good personal hygiene, wash hands frequently and disinfect high-traffic areas on a regular basis.
- Limit close contact between firefighters and the public as much as possible to prevent exposure and spread.

EMERGENCY PLAN INCIDENT WITHIN AN INCIDENT

ON SCENE INCIDENT COMMANDER

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment, Extrication and Transport.

- **ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED- *IF DETERMINED TO BE A GREEN, DO NOT DECLARE EMERGENCY TRAFFIC AND ONLY COMPLETE LINE 1-4 ON MIR*.**
- Conduct size-up of the incident nature of accident, number type of resources involved, latitude and longitude location (DD°MMM.MM format): notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency, coordinate with incident communications and air attack for air medical transportation needs.
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.

Short-Haul Operations

CAPABILITIES

- During an operational Short-Haul the helicopter is capable of inserting Short-Haulers into an area with tight canopy cover and/or technical terrain.
- Haul line lengths range from 100 feet to 350 feet.
- Short hauler and/or medical gear can be delivered to the medical scene even if extraction by short-haul is not necessary.

ORDERING

- EMT or Medical Incident IC determines medical extraction is required.
- Follow local established procedures and/or Medical Incident Report (MIR) in the IRPG.
- Confirm aircraft type, call sign, estimated time of arrival and frequency.
- Give site selection information when ordering: hazards (i.e. ash, smoke, snags, aerial), tree height, terrain, and patient transport configuration (supine or seated position). Repeat hazards and give updated weather conditions as well as brief patient update to responding helicopter.

PROCESS: The helicopter will fly to the coordinates provided. They will make contact with ground personnel on scene with the patient using an identified air-to-ground frequency. The helicopter will complete a short-haul recon and size up, gather patient update information and then fly to a landing zone (LZ) to configure for short-haul operations. The helicopter will be monitoring the appropriate air-to-ground, air guard and victor frequencies. From this point, ground resources should only contact the helicopter in case of an emergency. During the insertion and extraction process ground personnel must be clear of the area.

ON SCENE: EXPECT THE FOLLOWING

- 1 or 2 rescuers (at least one qualified as an EMT or higher)
- Backboard (if needed and not already on scene)
- All equipment necessary for patient extraction

The Patient Extraction Bag accommodates most backboards.
-A patient on a backboard, TRS, SKED or litter will be inserted into the bag.

The Seat Harness is used for patients not requiring the use of a backboard.

IAP INSERT

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: **Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

Controlled Unclassified Information//Basic
