INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY	
CEDAR CREEK		Date/Time From: 10/23/2022 0700 SUN	Date/Time To: 10/23/2022 2000 SUN
3. Objective(s):			
<p>Provide for firefighter and public safety; specifically manage risk to firefighters by ensuring hazards are identified, assessed and where possible mitigated. Be prepared to accept residual risk when exposure is commensurate with values threatened and the probability of achieving objectives is high.</p> <p>Implement operational plans to keep fire within established primary control lines to protect identified values at risk including:</p> <ul style="list-style-type: none"> • Oakridge, Westfir, and High Prairie • Highway 58 and Forest Road 19 • Union Pacific railroad corridor • Waldo Lake and associated recreational investments • Private infrastructure and recreational investments within surrounding Cascade Lakes Highway • Willamette Pass Ski-Area; Private infrastructure, and Forest Recreational Investments <p>Promote coordination and partnership by developing clear dialogue and providing timely information between the IMT, affected agencies, and the public. Engage in effective communication with Agency Administrators and cooperators.</p> <p>Coordinate with Resource Advisors to complete fire suppression and approved repair work to protect natural and cultural values.</p>			
4. Operational Period Command Emphasis:			
Complete operational assignments and tasks as directed in the IAP and by your Division Supervisor to avoid mission creep.			
General Situational Awareness:			
Monitor the weather, especially wind and rain. Take appropriate measures for working in wet environments. Road conditions and visibility could be compromised with the forecasted weather. Stay on hard surfaced roads and be prepared to return to ICP early if needed.			
5. Site Safety Plan Required? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>			
Approved Site Safety Plan(s) Located ICP			
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):			
<input checked="" type="checkbox"/> ICS 202	<input checked="" type="checkbox"/> ICS 207	Other Attachments:	
<input checked="" type="checkbox"/> ICS 203	<input type="checkbox"/> ICS 208	<input checked="" type="checkbox"/> FIRE BEHAVIOR, SAFETY MESSAGE	
<input checked="" type="checkbox"/> ICS 204	<input checked="" type="checkbox"/> ICS 220	<input checked="" type="checkbox"/> HR MESSAGE, FINANCE

FIRE WEATHER FORECAST

FORECAST NO:	79	NAME OF FIRE:	Cedar Creek
PREDICTION FOR:	Sunday, Oct 23, 2022	UNIT:	OR-WIF-220180
ISSUED:	1900 PDT, Oct 22 2022	Incident Meteorologist:	Bob Tobin

*** MORE WET WEATHER AT TIMES THROUGH THE WEEK***

DISCUSSION: A winter storm system will move out of the area today. Rain and snow showers will give way to clearing skies. This will allow the surface inversion to form again with fog and smoke below in the valleys. Several additional storm systems will move into the region beginning Monday and lasting the rest of next week

<u>SUNDAY:</u>	SHOWERS THROUGH THE MORNING		
WEATHER:	Rain and snow showers early...then clearing...patchy fog.	MAX TEMPS:	West: 40-50 East: 35-45
WIND (EYE LEVEL, MPH):	Sheltered areas: Southwest-west 3-8 mph. Ridges, unsheltered areas, wind-aligned drainages: West-Northwest 10-12 mph with gusts around 20 mph. East of the Crest: West-northwest 10-12 mph with gusts 20-25 mph.	MIN RH:	West: 65-80% East: 65-75%
HAINES (HIGH LEVEL):	2 (Stability 1, moisture 1)	CWR:	10%
PEAK MIXING HEIGHT/WIND:	3,000 ft AGL/NW 10-12 mph	Rain Amount:	0.10
INVERSION:	Moderate, mid-slope, good mixing after 1100.	LAL:	1

<u>SUNDAY NIGHT:</u>	CLEAR AND CHILLY		
WEATHER:	Clear and cool. Valley fog and smoke.	CWR:	0%
WIND (EYE LEVEL, MPH):	Sheltered areas, mid-slopes, and valley bottoms: Drainage 2-4 mph. Ridges: Southwest 4-8 mph. East Side: 5-8 mph.	Rain Amount:	0.0
MIN TEMPS:	Ridges: 25-30, Mid-slope and below: 30-35, East: 25-35.		
MAX RH:	Ridges to mid-slope: 80-90%, Mid-slope and below: 90-100%, East of the crest: 90-100%		
INVERSION:	Moderate to strong developing after 1800..		

<u>MONDAY:</u>			
WEATHER:	Rain in the morning...becoming showers in the afternoon.	MAX TEMPS:	West: 40-50 East: 35-45
WIND (EYE LEVEL, MPH):	Sheltered areas: Southwest 8-10 mph. Ridges, unsheltered areas, wind-aligned drainages: Southwest 10-15 mph with gusts to 25 mph. East of the Crest: Southwest-west 10-15 mph with gusts to 25 mph.	MIN RH:	West: 75-85% East: 70-80%
HAINES (HIGH LEVEL):	2 (Stability 1, moisture 1)	CWR:	15%
PEAK MIXING HEIGHT/WIND:	1,500 ft AGL/SW 10-20 mph.	Rain Amount:	0.10
INVERSION:	Moderate mixing after 1000	LAL:	1

<u>EXTENDED OUTLOOK:</u>			
TUESDAY:	Rain and mountain snow likely. Highs 40 to 50.... Min RH 85-100%...SW 8-12 mph.		
WEDNESDAY:	Rain and mountain snow likely. Highs 35 to 45... Min RH 90-100%...SW 10-15 with gusts 20-30 mph.		
THURSDAY:	A slight chance of rain and mountain snow. Highs 35 to 50.... Min RH 75-85%...S-SW 10-15 mph.		

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 77	TYPE OF FIRE: Wildland Fire
FIRE NAME: Cedar Creek	OPERATIONAL PERIOD: 10/23-26/2022
DATE ISSUED: 10/22/2022	TIME ISSUED: 1900
UNIT: USFS-OR-WIF	SIGNED: Don Strand, FBAN

INPUTS

Weather Summary: ***See Attached Fire Weather Forecast***

Fire Behavior Summary

GENERAL: Primary fuel types are TL5 and TU5. **TL5** is compact short needle conifer litter, found primarily in 2nd growth Douglas fir plantations. **TU5** is timber overstory with very high surface fuel load- short needle conifer with heavy brush and down log fuel loading in mature or old growth stands. Lichen is present across the landscape and spots readily. Timber stands with needle litter (**TL3**), dominated by Fir, Hemlock, or Lodgepole Pine. **TL8** is timber stands with needle litter dominated by Ponderosa Pine.

Fire behavior potential in minimal. Isolated areas of smoldering duff, logs and large surface fuels under closed canopies. ERC is forecasted to be 21 (68th percentile). Note – ERCs for the next 3 days were forecasted on 10/21/22 so they are likely to change daily.

Sunday: Forecasted ERC is 21 (68th percentile). Slight improvement in today's weather but fire behavior will continue to be smoldering in protected area in duff and large chunks in the timber litter. Spotting probability nonexistent.

Monday: Forecasted ERC is 19 (63rd percentile). Continued smoldering.

Tuesday: Forecasted ERC is 19 (63rd percentile) Continued smoldering.

AIR OPERATIONS: Expect poor visibility due to clouds.

SAFETY

In areas near fire edges, fire weakened trees and snags are potential overhead hazards.

HEALTH & SAFETY MESSAGE

INCIDENT:

Cedar Creek Fire

DATE & SHIFT:

10/23/2022 Day Shift

-TRANSITION-

- Communicate with new leadership – Know who you are working for
- Adequate Briefing – know what the plan is
- Communications & Medical Plans – Any Changes?
- Logistical Concerns
- Do you have all the information you need?
- If you have questions ... Ask

-HAZARDS-

- Driving and Roads – drive defensively, be ready for the unexpected
- Hazards Trees – heads up for Green and Dead trees
- Working Around Heavy Equipment – give them the space they deserve
- Wet Conditions – be mindful of the changing conditions and adjust accordingly

Reassess your missions, hazards, and priorities with a change in conditions.

Deliberate Risk Assessment-Hazard Summary

23 OCT 2022

Hazard	Mitigation	Post Risk
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site for transport capability. Identify EMT/EMTP from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize agency and civilian medivac as treatment/timing dictates. Evaluate on-going need for repositioning medical personnel. Provide Dust abatement on Helispots as needed.	HIGH
Aircraft	Utilize Air Attack. Ensure all resources are a safe distance from all bucket work, long line work and retardant drops. Establish LCES. Utilize air to ground primary for fixed wing, air to ground 2 for helicopter work as needed. Reference IRPG (Safe aircraft operations pg. 61-62). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	HIGH
Railroad Right-of-Way	Implement work windows/slow orders through your division for Union Pacific when personnel are working near the right-or-way. Post lookouts at each end of work zones. Coordinate with division and operations before engaging in the assignment.	HIGH
Hazard Trees	Use avoidance to limit exposure time. Fall ahead to avoid exposure. Use qualified fallers or alternate methods if needed. Conduct on- going risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 20-21).	HIGH
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment. Follow agency guidelines for chipping operations.	HIGH
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	MODERATE
Fire Behavior	Be aware of burn windows and weather impacts and min/max RH for flashy fuels/local conditions. Report changes to FBAN and IMET. Establish MAP for disengagement to provide for an orderly retreat given lack of safety zones. Have a plan for disengagement that establishes a designated meeting point and maintains personnel accountability.	MODERATE
Steep Terrain/Gravity	Establish LCES. Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes.	MODERATE
Transportation	Coordinate with ODOT for construction windows and areas of one lane traffic along HWY58. Provide daily updates of construction progress. Sign all incident roads that provide access to divisions. Provide daily updated travel plan maps. Practice defensive driving. In local communities obey the posted speed limits. Use reader boards to provide advanced warning and control entry to base camp as needed. Identify and evaluate contingency and alternate escape and travel routes. Provide road surface abatement and grading as needed. Provide advanced scouting for transport access and bridge weight restrictions.	MODERATE
Environmental Factors	Establish MAP for disengaging crews from work assignments during periods of inclement weather. Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Maintain an awareness wildlife and poison oak. Identify and report allergies to your chain of command.	MODERATE
Communication	Evaluate for dead zones prior to engagement. Utilize human repeaters as needed. Ensure accountability of resources in problem areas. Spiking resources must have communication coverage.	LOW
Viral Transmission Mitigations, Communicable Disease	Maintain awareness of health, perform self checks, maintain social distancing, wear face coverings in accordance with CDC recommendations. Report and isolate if not feeling well. Use remote briefings, spike camps and logistical layouts that provide for social distancing as necessary.	LOW
Public Interaction	Implement area and road closures as necessary. Maintain a lookout for hunters in and out of closure areas. Maintain awareness of evacuation areas and provide accurate information dissemination.	LOW
Initial Attack	Ensure identified IA resources are briefed of expectations and ensure communication plan is provided. Ensure resources are briefed on IA command structure. Provide identified crews with area maps.	LOW

ORGANIZATION ASSIGNMENT LIST (ICS 203)

1. Incident Name:		2. Operational Period: DAY	
CEDAR CREEK		Date/Time From: 10/23/2022 0700	Date/Time To: 10/23/2022 2000

6. Control Operations/Work Assignments:						
<p>Task: Assess changing weather conditions to determine whether work on the division can be safely accomplished. Continue repair as needed along 19 road. Secure fire edge on the 19 and 1938 roads. Monitor, patrol, and mop up both direct and indirect primary lines. Monitor fire backing into Fisher Creek.</p> <p>Purpose: Protect infrastructure and values at risk in the community of Oakridge and High Prairie and to protect natural resources by accomplishing priority repair.</p> <p>End State: Fire remains inside current containment lines south of 19 Road and east of 2409 Rd. Roads are returned to pre-fire conditions. Other priority repair needs are assessed and accomplished as possible given environmental conditions.</p>						
7. Special Instructions:						
<ul style="list-style-type: none"> • Be IA ready. • Areas to be avoided are marked with either black/yellow or red dot on white flagging. • Consult Resource Advisors if you have any questions. • Backhaul all excess equipment. • Roadway storm patrol.

Cedar Creek Fire

Mark Richardson, Lead READ, 412-618-7632, mark.richardson@usda.gov

Suppression Repair Standards

Waterbars

Height of water bar for handlines should average 6-12 inches. Height of machine-constructed water bars not to exceed 18 inches on slopes less than 40%. Height of machine-constructed water bars not to exceed 30 inches on slopes greater than 40%.

- Cut in the water bar – do not simply push up loose soil.
- Water bars should direct runoff away from the burned area where possible.
- Assure that the down slope end of the water bar is open and has adequate length to allow free flow of water off the fire line.
- Logs can be incorporated into water bars as long as they are embedded or anchored in a trench. Ensure fire end of log does not contact any organic material.
- Place slash below outlets of water bars to help slow runoff and collect sediment.

In selecting areas for establishing water bars the following should be considered:

- Locate bars at natural slope breaks. The idea is to move water off the fire line before it can build up enough energy to erode soil.
- When possible, locate bars where the outlet empties onto a resistant surface (i.e. rock or log debris).
- Locate bar outlets to provide maximum buffer distance to stream channel.
- Angle of water bars should be 20-45 degrees to the line.

Fire Line Slope %	Maximum Water Bar Spacing (feet)
2-5	300
6-10	200
11-15	150
16-20	100
21-35	75
36+	50

Dozer Line Repair

- Pull in berms and woody debris developed in construction of fireline. Distribute this material over the surface of the fire line, similar to the density of the surrounding area.
- Blockade lines at intersect with roads by placing logs and slash across the lines for 300 feet or site distance to minimize motorized use. Take extra care to return the entry points to a natural appearance that blends in with the surrounding landscape to the extent possible.
- At some line intersections with roads, it may be necessary to block access by constructing earthen berms and/or place boulders, heavy logs, slash, and other large vegetative material at the beginning of dozer line. These sites will be identified in Field Maps.
- Other blockage may be identified if lines exposed sensitive areas to future human intrusion.
- Lines requiring native seeding or weed-free mulching will be identified in the Field Maps. If there isn't enough debris to achieve 50% ground cover, REAFs may identify areas where weed free straw, or wood mulch is needed. Work with a resource advisor to implement seeding where necessary.

Chipping Standards

- Provide a 30-foot buffer of no chipping at water crossings or culverts.
- Do not place chips into road ditch.
- Do not chip onto a steep slope where chips will slide back into the ditch.
- Broadcast chipped material, ensuring that chips are no more than 4" deep.

DEMOB INSTRUCTIONS

Cedar Creek, Junction Camp, Big Swamp & Potter

AIR TRAVEL – All resources requiring air travel to their home unit must call DEMOB 72 hours in advance of departure date to make travel arrangements.

DEMOB LOCATIONS: All demobs will occur at the resource current locations (Oakridge ICP or Junction Camp). Please follow the steps in this order.

1. **IAP:** Refer to the Tentative Demob list for your assigned Demob date/time.
2. **WEED WASH:** All vehicles that have driven off the pavement need to complete a weed wash before leaving. Weed wash is located at Kokanee Staging near Oakridge ICP and Crescent Staging near Junction Camp.
3. **GROUND SUPPORT:** Equipment contractors need to pick up inspection forms at Ground Support. If damage or claims are reported an inspection may be performed. Ground Support will inform Demob when completed.
4. **COMMUNICATIONS AND SUPPLY:** Turn in all checked out items to the respective units. As items are returned, Demob will be notified.
5. **FINANCE:** Report to Finance and close out all final paperwork.
6. **DEMOB:** Once closed out in Finance, call Demob at 541-482-1331. If no answer, try again in a few minutes. If still no answer, then leave a message with the following information:
 - a. Your Resource Order Number
 - b. Name of Resource/Company
 - c. City/State you are traveling to
 - d. Estimate time of departure and arrival
 - i. Rest overnight (RON) location if applicable.

This is the last step before you start your travel.

Demob: 541-482-1331

2022.cedarcreek.demob@firenet.gov

CEDAR CREEK FIRE

TO: ALL PERSONNEL

FROM: OREGON DEPARTMENT OF CORRECTIONS

SUBJECT: WORKING AROUND OFFENDERS

- NO PERSON SHALL BE ALLOWED TO CARRY FIREARMS IN THE AREA WHERE OFFENDERS ARE WORKING. (It is acceptable to secure weapons in vehicles while entering the working vicinity of offenders)
- DO NOT GIVE OR TAKE ANYTHING FROM AN OFFENDER. Oregon Department of Correction's Offenders wear jeans with a DOC logo or Nomex pants with an orange stripe.
- DO NOT TAKE PHOTOS OR INTERVIEW OFFENDERS WITHOUT APPROVAL FROM INMATE LIAISON. (Signed consent forms required.)
- DO NOT DO ANY FAVORS FOR OFFENDERS. (Examples passing on a message, giving tobacco, asking for change, mailing a letter, using a phone, etc.)
- PROMPTLY REPORT ANY SUSPICIOUS ACT TO THE SUPERVISOR, DOC STAFF OR INMATE LIAISON. (The most innocent act/favor can have consequences that could negatively affect an offender for years.)
- USE OF TOBACCO PRODUCTS IS NOT ALLOWED. (Offenders are not allowed to use any tobacco products.)
- HARRASSMENT OF ANY KIND WILL NOT BE TOLERATED. (All harassment allegations involving offenders will be reported to Human Resources and the involved agencies representatives.)
- OFFENDERS On Oregon Correction CREWS ARE RATED AS MINIMUM CUSTODY.
- TREAT OFFENDERS WITH RESPECT BUT PRACTICE THE CORRECTIONAL DISTANCE. DON'T GET PERSONAL. (Offenders generally feel good with being part of the fire suppression effort, treat them with the same respect and dignity as other fire fighters but DO NOT GET PERSONAL.
- OFFENDERS ARE TRAINED IN WORK ETHICS AND JOB SKILLS. (Offenders are trained and experienced in their job assignments and work ethic. They are held accountable for job performance and behavior.)

ACKNOWLEDGE CREWS FOR A JOB WELL DONE, OFFENDERS DO GOOD WORK AND APPRECIATE THE RECOGNITION. Offenders need good professional role models as part of their rehabilitation process, consider their presence and set good examples by the context of your conversations and choice of language used.

COVID-19 Mitigations for Cedar Creek Fire

- Masks are not required indoors unless working in a county with a HIGH COVID-19 community level. Currently, Lane County community level is LOW (masking indoors is optional).
- Conduct daily verbal screening checks within crews, report any COVID-like symptoms to your direct supervisor. Supervisors should report any positive symptoms to the Medical Unit for next steps.
- Observe social distancing standards while waiting in line for food and limit contact with others outside of your crew in the food service line. If possible, send crew representatives to pick up meals.
- Practice good personal hygiene, wash hands frequently and disinfect high-traffic areas on a regular basis.
- Limit close contact between firefighters and the public as much as possible to prevent exposure and spread.

Incident Emergency Plan C&G Checklist

Cedar Creek

10/22/2022

EA Silver Team

COMMAND AND GENERAL STAFF INCIDENT EMERGENCY ACTION PLAN AND CHECK LIST

The primary goal of this **Incident Emergency Plan (IEP)** is to provide incident personnel the guidelines necessary to **locate, triage, extricate, treat, and transport** all accident patients in as quick and safe a manner as possible. The closest operationally qualified resource (DIVS, TFLD, ENGB, CRWB, etc.) will initially oversee the emergency and activation of the IEP as the Incident within an Incident (IWI) Incident Commander. Radio communication will be on the Command frequency and will take priority over other radio traffic. **Names and crew designators of injured or deceased individuals will not be given over the radio.** Deceased individuals and their equipment are not to be moved, except to accomplish rescue work or to protect the health and safety of others. Local cooperater resource availability (i.e. county sheriff, etc.) should be established early in the assignment and activated as necessary during an IWI. This person may, under local authority, assume command of the IWI.

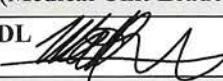

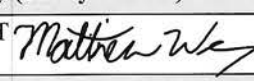

At the time of a reported incident, the Command and General Staff (C&G) will begin implementation of the IEP. Initially the C&G will assemble at a pre-identified meeting location near the Communications Unit to communicate, share information, coordinate and begin developing a common operating picture to support the IWI and to provide for continuity of ongoing operations as required.

If a serious injury or serious medical incident occurs at the Incident Command Post call 911 and contact the Medical Unit for assistance.

All Hazard IWI's will be addressed using this protocol as applicable. Specific information for potential All Hazard Incidents can be found in the attached document, All Hazard Incident Emergency Response Plans.

Standards for Initial Response to IWI on the Fire

- The closest operationally qualified resource will become IC of the IWI.
 - Notify EMT and request medical assistance.
 - Contact Communications:
 - Use ICS-206 WF Medical Plan
 - Name and claim the incident.
 - Use the Medical Incident Report section of the Medical Plan for initial notification.
 - Oversee medical emergency response
 - Use the Medical Incident Report found in the ICS-206 WF and the 2022 IRPG (page 118-119) to provide further information to Communications.
 - Transfer command to higher level qualification as needed.
 - If transfer of command occurs announce clearly to Communications and all resources.

Incident/Project Name		1. Operational Period

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
