FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	TYPE OF FIRE: WILDFIRE
FIRE NAME: Crockets Knob	OPERATIONAL PERIOD: Day Shift Sept 1, 2022
DATE ISSUED: Aug. 31, 2022	TIME ISSUED: 2000 HOURS
UNIT: OR-MAF	SIGNED: DON STRAND, FBAN

INPUTS

WEATHER SUMMARY: See attached spot weather forecast. Max temps – near 90 min RH near 10%. Winds – upslope 4-6 MPH with ridge winds West-southwest 9-14 MPH With gusts near 25 MPH. Haines Index 5 (moderate).

FUELS: Consists of dense Ceanothus brush, dense lodgepole pine regeneration with a surface litter of large down wood. The fire area also contains snags and areas with remnant live trees which survived the 1996 fire.

Live fuel moistures in the Ceanothus are estimated to be near 100%. 1000-hour dead fuel moistures are in the 10% range. 10-hr and 100-hr fuel moistures are in the critically dry range.

Energy Release Component is above the 90th percentile and trending higher through the week.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fire behavior potential will continue to be elevated. Expect fire spread to continue in available surface fuel, with backing, flanking with single and group torching. Sub alpine trees are present in the upper elevations and are prone to torching producing numerous fire brands. Fire spread in these fuels typically is scorch, torch and spot.

Where fire gets in alignment with winds and or slope, short upslope runs in the brush, reproduction and timber stringers are possible. Potential for flare ups exists in areas of dirty burns.

Probability of Ignition will be near 90%. Maximum spotting distance near 0.3 miles.

Head fire rates of spread in the surface fuels will be 5 to 14 feet/minute. On steeper slopes, 20 to 30 feet/minute likely.

SPECIFIC:

DIV A: Expect backing, flanking with occasional single and group torching. In areas of dirty burn, flare ups likely. Pay attention for squirrely winds in the drainages.

DIV E: Expect occasional torching and spotting. Fire will continue spread in the surface fuels to flank with potential for torching and spotting. In the sparse grass openings, scattered pockets of brush, trees and woody debris are receptive to fire brands

DIV M: Potential for fire spread in the brush and timber stringers by spotting across sparse grass areas in the Boulder Creek basin.

DIV Z: In the unburned islands and fingers, expect fire to slowly back and flank with isolated torching in the pockets of regeneration. Continue to keep an eye out for spotting.

INITIAL ATTACK: In the event resources respond to a new start, update your Situational Awareness by observing the fuels, weather, and topography where the new fire is located. Potential for rapid rates of spread in light flashy fuels exist.

AIR OPERATIONS: Expect areas of smoke haze in the morning

SAFETY

Continue to monitor for spot fires. Remember Watchout #16 – “getting frequent spot fires across line”.

Although cooler today, humidity will still be very low so fuels will continue to be available for fire spread. Spot fires can develop quickly and be difficult to suppress.

Safety Message

1 September 2022

INCIDENT: CROCKETS KNOB

OPERATIONAL PERIOD: 0600-1800

TOPICS: MANAGING FATIGUE

All Firefighters can manage fatigue. Supervisors must set the expectation that all personnel need to stay fit for duty.

Its September and we are seeing small incidents, minor accidents, and unsafe behaviors.

The behaviors that cause accidents, illnesses, and injuries is directly related to fatigue and complacency.

- Encourage appropriate Work: Rest ratios
- Be aware of the Heat Index
- Encourage active cooling measures and hydration
- Encourage good, uninterrupted sleep if possible.
- Demand Safe work practices.

WARMER WEATHER/INCREASED FIRE BEHAVIOR

Temps have been warm and will still stay above normal while RH's will stay low. ERCs are approaching the 97th percentile. Pay close attention to unburned pockets of fuel for high rates of spread and spotting potential. Expect spots to behave aggressively in dead and down fuels and produce torching in reprod and brush making control difficult.

Know where Safety Zones and Escape Routes are as conditions Change.

It's better to leave 5 minutes early than 5 minutes to late.

SAFETY OFFICER: Troy Corn, Jack Cates

Deliberate Risk Assessment-Hazard Summary

Utilize agency and civilian medivac as treatment/timing dictates. Evaluate on-going need for repositioning medical personnel.	HIGH
Aircraft	Utilize Air Attack. Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary for fixed wing, air to ground 2 for bucket work as needed. Reference IRPG (Safe aircraft operations pg. 61-62). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	HIGH
Hazard Trees	Use avoidance to limit exposure time. Fall ahead to avoid exposure. Use qualified fallers, blasting, or alternate methods if needed. Conduct on- going risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 20-21).	HIGH
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment. Follow agency guidelines for chipping operations.	HIGH
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	MODERATE
Fire Behavior	Be aware of burn windows and weather impacts and min/max RH for flashy fuels/local conditions. Report changes to FBAN and IMET. Establish MAP for disengagement to provide for an orderly retreat given lack of safety zones. Have a plan for disengagement that establishes a designated meeting point and maintains personnel accountability.	MODERATE
Fuel Conditions	Ensure management action points are implemented and followed. Obtain weather updates as needed during burning operations. Locate indirect firelines to minimize unburned fuels. Follow Interagency Ignition Guide. Ensure communications between all firing operations. Establish road security at all firing sites. Follow approved firing plan for unburned fuels.	MODERATE
Steep Terrain/Gravity	Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes.	MODERATE
Unburned Fuels/Firing Ops	Establish LCES. Ensure management action points are implemented and followed. Weather updates as needed during burning operations. Locate indirect firelines to minimize unburned fuels. Follow Interagency Ignition Guide. Ensure communications between all firing operations. Establish road security at all firing sites. Follow approved firing plan for unburned fuels. If utilizing aerial ignitions, make sure firing plan is in place and communicated to all resources and understood. Utilize separate Air to Ground for operation as appropriate.	MODERATE

Deliberate Risk Assessment-Hazard Summary

1 September 2022

Transportation	Sign all incident roads that provide access to divisions. Provide daily updated travel plan maps. Practice defensive driving. In local communities obey the posted speed limits in town and recognize the school zone around camp and the presence of children along streets and roadways . Use reader boards to provide advanced warning and control entry to base camp as needed. Identify and evaluate contingency and alternate escape and travel routes. Provide dust abatement and grading as needed. Provide advanced scouting for transport access and bridge weight restrictions. Evaluate road conditions for access, egress, and travel routes to the North of the fire for drivability and safety.	MODERATE
Initial Attack	Ensure identified IA resources are briefed of expectations and ensure communication plan is provided. Ensure resources are briefed on IA command structure. Provide identified crews with area maps.	MODERATE
ATV/UTV	Follow agency specific rules and regulations for proper PPE. Make sure operators are properly licensed and trained. Operate machine to the current and expected conditions. Do not overload machine.	MODERATE
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Maintain an awareness of livestock, wildlife and rattlesnakes. Identify and report allergies to your chain of command. Work with READs and GISS to evaluate and identify mineshafts.	MODERATE
Communication	Evaluate for dead zones prior to engagement. Utilize human repeaters as needed. Ensure accountability of resources in problem areas. Spiking resources must be in cell coverage. 24 staffing at JDICC will serve as a backup. Spike locations relayed to Ops daily.	LOW

Crocketts Knob Fire—READ UPDATE

WHAT IS A READ??

A READ is A RESOURCE ADVISOR

THE READ's MISSION:

The Resource Advisor provides professional knowledge and expertise for the protection of natural, cultural, and other resources within an emergency incident environment. The READ supports the IMT by providing information about impacted resources or potential hazards. This can help the IMT to proactively create suppression plans that mitigate damage to resources. Trained Resource Advisors can help IMTs reduce effects on resources and lower overall suppression repair costs.

Fireline qualified READs are called REAFs

(But the term “READ” is commonly used to describe both)

So far, all READs on the Crocketts Knob Fire are REAFs.

We are a resource here to offer help and guidance! Most READ/Fs are passionate about at least one resource and love to share information about that resource. Please reach out to any READ/F assigned to the fire for any resource questions!

Human Resource Message

Crocketts Knob Fire - September 1, 2022

Core Values are Timeless Guiding Principles

Fire's core values reflect more than just firefighting. They are about who you are, how you approach your job, and how you treat people.

- Diversity is an asset as people's differences can bring new perspectives and approaches, so take the time to learn your colleagues' history and personal values to gain ideas and an understanding that you may not have considered.
- In fire, we focus on protecting life, property, and resources, but we need to protect each other. Sometimes the right choice is not the easy choice, but you will never regret doing the right thing by treating someone well.
- Take a moment to think about what Duty, Respect, and Integrity mean to you, and how you can apply them to your job, your team, the fire community, on this fire. It takes Courage to stand apart from the crowd and act upon the other core values.

Thank you for your service.

We appreciate you and so does the community.

Please stay safe and have a good day!
