Date and Time Products Delivered to Incident: 9/2/2022 0030 PDT			
Comments /notes on tonight's mission and this interpretation: I started interpretation with yesterday's IR perimeter. I checked the image for misalignment with imagery and didn't find any issues. I did not identify and sources of heat at a significant distance away from the heat perimeter. Most of the acres that were added today were a result of the backburn on the NW side of the fire.
