INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY & NIGH	T SHIFT
DOUBLE CREEK	Date/Time From:	Date/Time To:
DOODLE ONLER	09/10/2022 0600 SAT	09/11/2022 0800 SUN

3. Objective(s):

Leader's Intent:

- Professional responders are expected to conduct themselves in a professional manner at all times. We shall foster an environment that promotes teamwork, respect and is free from discrimination and harassment. A "zero tolerance" policy will apply to behavior determined to be inappropriate.
- Ensure the Medical Plan, 8-line and short haul operations are well understood and all assigned resources are confident in the application.

Management Objectives:

- Human life is the most valuable resource to be protected, consequently accept no unnecessary risk. The only acceptable risk in 1) tactics that have a high probability of success, 2) on actions that meaningfully contribute to your objectives or protection of high value resources (responders, public, communities, etc.), and 3) minimize exposure to incident responders.
- Ensure proactive communication and coordination occurs regarding the incident's status and strategy with agency administrators, cooperators, communities and the public through timely press releases, informational updates, social media, meetings and other informational sharing platforms.
- Protect private lands in the community of Imnaha, the Imnaha River corridor, Freezeout Creek drainage, Imnaha River Woods and Pallette Ranch to prevent loss of highly valuable resources such as residences and infrastructure.
- Work with the Resource Advisors and minimize suppression impacts in the Imnaha River and tributaries to protect salmon, steelhead and Bull Trout habitat.
- Protect known historic and pre-contact cultural sites by minimizing fire spread to the sites where possible, minimize suppression impacts and work with the resource advisors.
- Keep fire from impacting Forest Service infrastructure and values at risk, including on Double Creek Fire: Memaloose Campground and Guard Station; Hat Point Lookout, picnic area and trailhead; Five Mile and Granny View Viewpoints; and Sacajawea and Saddle Creek Campgrounds, On Sturgill Fire: Minam River Lodge; Reds Horse Ranch; and Standley and Bear Creek Guard Stations. On Nebo Fire: Lick Creek Guard Station and campground; Salt Creek Summit warming hut and groomer shed; and Wing Ridge and Redmont Shelter ski huts.
- Provide initial attack to new unplanned ignitions within the designated geographic area and requests for assistance from the local agencies with jurisdiction. Prioritize response to ignitions that threaten infrastructure, recreational sites and private lands.
- Implement and maintain effective COVID-19 prevention and mitigation measures that follow CDC guidelines and interagency protocols.
- Maintain fiscal accountability and cost effectiveness as an important component of the decision-making process for the incident.
- Triage and assess structural protection needs. Provide structure preparation equivalent to risk.
- Support suppression operations as requested within delegation.

4. Operational Period Command Emphasis:

Control Objectives

General Situational Awareness:

ICS 202

- Double Creek: Hold and secure east containment lines along the Imnaha River, west of the Hells Canyon NRA, and south of the Snake River and Imnaha River confluences. Protect values along the Imnaha corridor.
- Nebo: Keep fire west of 39 Cloverdale Road. Limit spread north toward values outside of the wilderness.
- Sturgill: Protect values in Minam Lodge and Reds Horse Ranch by monitoring fire growth and using firing and suppression actions on Big Sheep Ridge to minimize growth to the northwest. Monitor spot fires in Goat Creek and Goat 1 & 2.

FORECAST NO:

INCIDENT Weather Forecast

NAME OF FIRE: Double Creek & Wilderness Fires

UNIT: OR-WWF

SIGNED: Michael Brown

Incident Meteorologist Trainee

PREDICTION FOR: Day & Night Shift SHIFT DATE: September 10th, 2022

07

FORECAST ISSUED: 1900, Sept 9th, 2022

<u>WEATHER DISCUSSION:</u> Wind will shift to southerly by daybreak Saturday and continue through the day with consistently low humidity. Upslope/upvalley winds and/or drainage alignment will yield the highest wind speeds. Sunny and warmer weather will occur through the weekend.

WEATHER FORECAST:

WEATHER: Sunny. Warmer and drier. Areas of smoke.

TEMPERATURES: 65 to 78 around 6000-ft and higher, 80 to 92 valley bottoms.

HUMIDITY: 10 to 20 percent.

20 FT WINDS:

RIDGETOP (6,000-ft and higher) - South 8 to 16 mph with afternoon gusts to 25 mph.

SLOPE/VALLEY - South 6 to 12 mph. Local gusts to 20 mph.

HAINES INDEX: 5 (Moderate)

STABILITY/INVERSION: Inversions lifting between 1000 and 1400 hrs depending on aspect & sheltering.

MIXING HEIGHT: Around 5,000-ft agl.

<u>OUTLOOK FOR TONIGHT:</u> RH will remain low overnight with minimal recovery in addition to no decrease in wind speed. Wind gusts may pick up after midnight to between 15 and 25 mph on ridge tops and favorable North-South oriented valleys. Warmer. Lows in the 50s and low 60s.

OUTLOOK FOR SATURDAY:

WEATHER: Sunny. Warm and dry again. Areas of smoke.

TEMPERATURES: 70 to 85 around 6000-ft and higher, 85 to 95 valley bottoms.

HUMIDITY: 10 to 20 percent.

20 FT WINDS:

RIDGETOP (6,000-ft and higher) - In the morning, southwest wind 10 to 15 mph with gusts to 25

mph. By afternoon, southwest wind of 5 to 10 mph with gusts to 20 mph.

SLOPE/VALLEY - South 5 to 15 mph. Local gusts to 25 mph.

HAINES INDEX: 5 (Moderate)

MIXING HEIGHT: Around 8,000-ft agl.

EXTRA INFORMATION:

Sunrise: 0622 Sunset: 1909

Fire Behavior Forecast # 08									
Name of Incident:	Administrative Unit:								
Double Creek, Nebo, Sturgill & Goat2	OR-WWF								
Date & Time Issued: September 9, 2022 @ 2000	Operational Period: DAY 09/10/2022 (24 hr.)								
FBAN: Steve Ziel	Signed: /z/								

Assumptions: A return to southerly wind flow today — head's up on new fire spread direction/alignments. We still have all the ingredients to produce very active fire behavior today/tonight — steep slopes, dry fuels, and peak of season conditions. Aligned ridges, and south facing aspects will be exposed to winds - lower slopes/river areas may have localized channeling effects with a southerly flow; expect downslope winds in the late evening. Favorable burning conditions between 1000-2200. Rapid spread in grass fuels may be expected in until humidity reaches 50% during late night/early morning (hint: it won't). Live fuels and cured grasses are contributing to fire behavior. Our fires cover a very large geographic area — watch for localized influences.

Weather Summary

*See attached Fire Weather Forecast

Fire Behavior Summary

<u>Fuels in the fire area</u> are primarily composed of **Grass/Shrub**, **Grass**, **Timber Litter**, and **Timber with Understory**. Primary tree species include mixed sizes of Douglas Fir, Ponderosa Pine, sub-alpine fir, with scattered True Fir. Local timber litter is compact to fluffy. Brush and understory species are variety of shrub types, and dog-hair conifer thickets. Snags and heavy fuel concentrations are common throughout all forested areas. Most harsh/dry site grasses are fully cured. Fuel conditions change by elevation, and aspect. Low crown base height (ladder fuels) and lichen/moss are present in high elevation timbered areas.

<u>Today's potential fire activity</u> may include active fire behavior including wind/slope aligned fire spread on slopes and ridges. Group torching with short-range spotting may accelerate rate of spread. Primary spread mechanism includes backing/flanking, and upslope runs. Fire activity may continue into the evening as upslope/down slope wind transition to diurnal down valley sundowner winds. Dangerous rates of spread in grass and grass/shrub fuels may develop with wind/slope alignment. Timber fuels will produce high intensity fire behavior. Expect localized (squirrely) wind effects to influence fire behavior in drainages, and on lee-side of ridges.

* Fine fuel moisture= 3-5%, 1000hr. moisture=10%, Woody fuels 120%, Probability of Ignition-70-90%

Fuel Type	Rate of Spread	Flame Length	Spotting Distance	e *50 MPH "Outflow" GUS	
If your work area includes -	(CH/HR = FPM)	Feet	Miles	ROS	FL
Grass-Shrub (GS2)	30	6			
Timber w/ Understory (TU5) Heavy	12	8	.4		
Grass (GR2) Harsh site cured	80	7			
Timber Litter (TL3) Heavy load litter	3	2			

Specific Assignments:

Br. I (Div. A/Z, Q, R) — Wide range of backing gulches/draws along Imnaha River N&S that may become active. Expect robust spread in grass. Expect squirrely winds in Freezeout Creek and south. Div. R — expect progressive spread to the south on ridge to Neil Cyn. BR. II (Div. S, E) — Lots of wind aligned broken terrain and ridges. Northerly wind provides new alignments for rapid spread in grass. Br. III — Nebo fire -N. Fk. Sheep Cr. active flanking fire in Wing Ridge area. Lick Cr. likely to have active flare-ups. Sturgill fire — Active backing toward Minam River Chaparral Cr. Fire slopped over the lip ridge of Lostine drainage. Continued backing/flanking in N. Fk Minam River on the south end of the fire. Monitor south wind effect for increased activity on Huckleberry Ridge and Goat2.

Air Operations: Good day to fly, southerly air flow will provide view into areas previously obscured by smoke.

Safety

<u>Watch Out when...</u>Weather is becoming hotter and drier...when wind increases and/or changes direction...when you are getting frequent spot fires across line.....when terrain and fuels make escape to safety zones difficult.

Expect warming and drying to occur over the next several days. Potential fire behavior needs to be anticipated <u>throughout</u> the day. Base all actions on current and expected behavior of the fire. We are at the peak of fire seasonwe have the rest of summer to observe fuel, weather, and topography interactions.

*Todays Fire Behavior Forecast contains 737 (-69 from previous) words written for your situational awareness.

Short-Haul Operations

CAPABILITIES

- During an operational Short-Haul the helicopter is capable of inserting Short-Haulers into an area with tight canopy cover and/or technical terrain.
- Haul line lengths range from 100 feet to 350 feet.
- Short hauler and/or medical gear can be delivered to the medical scene even if extraction by short-haul is not necessary.

ORDERING

- EMT or Medical Incident IC determines medical extraction is required.
- Follow local established procedures and/or Medical Incident Report (MIR) in the IRPG.
- Confirm aircraft type, call sign, estimated time of arrival and frequency.
- Give site selection information when ordering: hazards (i.e. ash, smoke, snags, aerial), tree height, terrain, and patient transport configuration (supine or seated position). Repeat hazards and give updated weather conditions as well as brief patient update to responding helicopter.

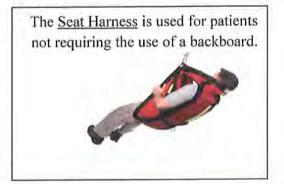

PROCESS: The helicopter will fly to the coordinates provided. They will make contact with ground personnel on scene with the patient using an identified air-to-ground frequency. The helicopter will complete a short-haul recon and size up, gather patient update information and then fly to a landing zone (LZ) to configure for short-haul operations. The helicopter will be monitoring the appropriate air-to-ground, air guard and victor frequencies. From this point, ground resources should only contact the helicopter in case of an emergency. During the insertion and extraction process ground personnel must be clear of the area.

ON SCENE: EXPECT THE FOLLOWING

- 1 or 2 rescuers (at least one qualified as an EMT or higher)
- Backboard (if needed and not already on scene)
- All equipment necessary for patient extraction

The Patient Extraction Bag accommodates most backboards.

-A patient on a backboard, TRS, SKED or litter will be inserted into the bag.

6 Control Operations/Work Assignments				-				

Task: Structure protection, mop up, patrol, and secure from DP 240 to DIV R break.

Purpose: To create reasonable space around structures; to use control lines to fire

End State: High value assets and private inholdings are protected by: established fire breaks; completed control lines that are cold black from firing operations; or direct line.

6. Control Operations/Work Assignments:				-				

Task: Assure LCES at all times. Identify and mark safety zones. Triage and assess structure protection needs and provide structure prep equivalent with the risk. Support suppression operations as requested, within delegation of authority. Identify water sources and input using survey-123 - ensure data syncs.

Purpose: Reduce the potential for structure loss within assigned area.

End State: There are minimal fire impacts to the area with no loss of structures.

7. Special Instructions:

Determine need for mop-up on structures. If needed, mop up within 100 feet of structures. Identify water supplies. Placard addresses as time allows. Inventory all pumps and equipment and report to DIVS.

HEALTH AND SAFETY MESSAGE Pacific Northwest Incident Management Team 2

INCIDENT: Double Creek	DATE:	

Devil's Knob Rapid Lesson Sharing

On September 7, 2021, during an attempt to catch a spot fire on the Devil's Knob Complex in very steep and rocky terrain, a hotshot crewmember was struck on the forearm by an extremely hot, bowling ball-sized rock. The firefighter sustained a palm sized 3rd degree burn to the right forearm and minor bruising to the torso. Additional crew members also endured minor injuries during this same operational shift.

The crew that the injured firefighter was a part of was normally an IHC, but the Superintendent had changed the crew's status to Type 2IA because of staffing changes late in the season. The late season fire was burning in steep rugged terrain. Operations in the area were focused on scouting and prepping for a planned burn that shift.

A spot fire near the crew's location required a quick, aggressive response to knock down. As the crew began the dig a bowling ball size rock dislodged from the hot ground above. It struck the firefighter in the arm and chest knocking him off his feet. As care was initiated it was assumed the rock strike injury would be RED. After assessment the more concerning injury was a burn on the forearm from the hot rock. An IWI was initiated but conducted over cell phone to free up operational radio space. The firefighter was transported first to the Med Unit for initial care then on to an urgent care facility. He was treated for a 3rd degree burn to his arm and bruising in his chest from the rock strike. During the remainder of the shift another individual was hit by a rolling log but walked away with minor abrasions. A different crewmember sustained small burns to the back of the neck caused by burning moss.

Lessons Learned:

When working on steep terrain, keep crew members out of the "fall-line" path when engaging the lower portion of a fire. Consider staggering individuals, using large trees for cover from rollers, and/or posting a lookout to watch for falling debris (such as rocks and logs).

Because the season was coming to an end, the crew was short and rostered with five individuals who were fairly new (fill-ins, rookies, and new-to-fire individuals). This transition in experience created a new team environment and posed challenges to leader's intent and inter-crew communication.

This spot fire required a faster suppression operational tempo. It was only the second time for the crew to engage in an "IA" type mode. Before engaging in tactics that fall outside of recent operational routines, take time to acknowledge the human factors (supervision, team fitness, planning) than can contribute to higher risk operations.

On this incident, the Medical Unit Leader was prepared to treat minor burn injuries. The medical tent was stocked with abundant supplies to treat burn injuries and—to ensure continuous care—was even able to provide medical supplies to the crew member when he was demobed home with the rest of the crew

For more information on Devil's Knob RLS and other lessons learned visit the Wildland Fire Lessons Learned Center website at https://www.wildfirelessons.net/home.

Safety Officers: Brown, Bucich, Poyner, Munns, Koons

Phone: 541-216-4579

Email: 2022.doublecreek@firenet.gov

Help us tell the story of the fires...

...Submit your photos and videos to the PIO Team.

2022.DOUBLECREEK@FIRENET.GOV

Social Media - PAUSE Before Posting:

- <u>PERCEPTION</u> You are representing the jurisdictional agency and your home unit.
- **AUTHORITY** Be aware of federal and host agency social media policies.
- <u>UNDERSTANDING</u> Know the incident objectives. Never post negative, controversial, or unsafe messages to personal accounts.

 Ask a PIO/PAO or supervisor for clarification.
- **SAFETY** Do not compromise your safety while taking photos and always wear proper PPE. Never post photos of children, inmates, investigations, or cultural sites; be sensitive to burned structures and private information.
- **EXPECTATION** Share relevant content or photos with PIOs/PAOs to help tell the incident story

Human Resource Message

FIRE

Fatigue...... Be aware that fatigue can have a negative impact on

your conduct and speech.

Integrity...... Integrity and Honesty are vital on a fire. If you

mess up, fess up, whatever you did can most likely be resolved if you confront it as soon as you are aware of

it.

Respect....... Treat others as you would like to be treated.

Example...... Set an example. Realize you influence

others around you, therefore, always conduct yourself in a professional, competent and

approachable manner.

Teresa Smergut HRSP 541-263-2283 Mike Baines HRSP 724-678-6147

Double Creek Fire Virtual Demob Process

If your Demob method of <u>travel is by air</u>, contact DMOB at (206) 718-0358 <u>72 hours in advance</u> of your last work day.

On Your Last Work Day:

Contact FINANCE 24 hours prior to give them a heads-up you are departing:

> Personnel (971) 346-6580

- Equipment: (541) 314-4411
- > Turn in any outstanding or travel CTR/Shift Ticket. Make sure they are SIGNED.
- > Confirm no missing financial documentation

Day of Demob STEP 1:

Contact DMOB at (206) 718-0358 to activate your virtual Check-Out and to determine your specific next steps since we are pre-clearing personnel that do not have any supplies or communications equipment checked out.

STEP 2:

Have your vehicle "weed washed" near Ground Support.

STEP 3 (if directed by DMOB):

SUPPLY - see in person to return issued gear and leftover supplies

COMMUNICATIONS – see in person to return any communications equipment

GROUND SUPPORT – see in person to return incident rental vehicles, get an inspection, etc.

Other Considerations:

- > Turn in any Unit Logs and Evaluations to Plans (Documentation Box)
- > If you have an I-Pad issued on the fire, return it to the Situation Unit

STEP 4:

Contact **FINANCE** to finalize your paperwork:

Personnel (971) 346-6580

- Equipment: (541) 314-4411
- > Complete time closeout process with Finance and receive your signed OF-288 and/or OF-286 <u>BEFORE</u> contacting DMOB for final closeout.

STEP 5:

Contact DMOB at (206) 718-0358 for final closeout

- DMOB will verify check-out completion
- > Be prepared to address your actual departure date/time; your anticipated arrival date/time; and where you will be staying overnight if travel includes overnight stops.

VIRTUAL CREW SWAP/EXTENSION

- > Two options exist for virtual crew swaps: you can call Double Creek Check-in at (206) 795-6379 or DMOB at (206) 718-0358, to provide the crew swap information verbally; or utilize the QR code on the IAP cover to electronically provide the crew swap information.
- > A signed Extension Request Form is required to extended existing resource crew members on the fire and is initiated through your supervisor on the incident
- ➤ Call Double Creek Check-in at (206) 795-6379 or DMOB at (206) 718-0358, for questions/concerns regarding check-in, crew swaps, extensions and DMOB.

INSTRUCTIONS

Place this placard in a conspicuous location at the end of the driveway. Write LARGE enough to see it from your engine seat at the road.

Top Quadrant is for the address number and the defensible risk to assigned resources based on current and expected fire behavior and the structure protection checklist.

L= Low -, Stand alone

M=Moderate-, Prep and Hold

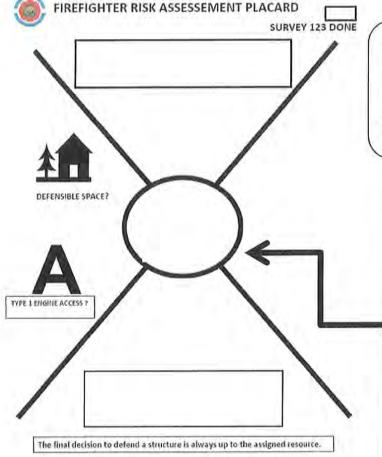

H= High- Prep and Go

E= Extreme - Check and Go

Check if SURVEY 123 has been completed.

This quadrant identifies if there is an adequate defensible space around the structure. If YES- Circle the icon if NO cross the icon out

This is also an area to signify if a TYPE 1
ENGINE can access the structure and has an adequate turn around.

This quadrant is for the <u>Date</u> the assessment is done, and <u>Designator</u> – your TF number and Unit ID number.

The center circle is for indicating structure prep. If no prep is done leave it blank. If SURFACE PREP has been completed Mark a large letter S in the circle. If FULL PREP has been completed completed completely color in the circle.

The bottom quadrant is for identifying the length of the driveway to the structure. This section also is for indicating special circumstances or hazards present <u>examples</u> include:

PTS = There is a Portable Pump, Tank and Sprinkler Kit present.

W = There is a viable water source at this address.

SZ or TRA = There is a SAFETY ZONE OR TEMPORARY REFUGE AREA present.
